ODFW (P211I) requests modification 1 to scientific research/enhancement permit 973. Permit 973 authorizes ODFW a take of juvenile, threatened, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) associated with a captive broodstock program for three races of threatened chinook salmon in the Grande Ronde River Basin. Permit 973, issued on August 7, 1995 (60 FR 42147, August 15, 1995), authorized the collection, handling, and rearing of juvenile, listed, naturally-produced, chinook salmon for the beginning of the captive broodstock program. For modification 1, ODFW requests a transfer of 1994 brood juveniles of Catherine Creek origin and 1994 brood juveniles of Lostine River origin to the NMFS Manchester Marine Laboratory in Washington. ODFW also requests that the NMFS staff at the laboratory, under the direction of Dr. Conrad Mehnken, be authorized to rear and maintain the listed juvenile fish as an agent of ODFW under permit 973. The objective of the transfer is to dilute the risk of an unanticipated catastrophic event that could cause a decimation of the gene pool at one hatchery location by allocating listed juvenile fish to another hatchery location. The transfer of listed juvenile fish is requested for 1996 only. The authorization for NMFS's responsibility to rear and maintain listed juvenile fish as an agent of ODFW under permit 973 is requested for the duration of the permit. Permit 973 expires on September 30, 1998.

Those individuals requesting a hearing (see **ADDRESSES**) should set out the specific reasons why a hearing on this application would be appropriate. The holding of such hearing is at the discretion of the Assistant Administrator for Fisheries, NOAA. All statements and opinions contained in these application summaries are those of the applicants and do not necessarily reflect the views of NMFS.

Dated: March 18, 1996.

Russell J. Bellmer,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–F

[I.D. 030696B]

Marine Mammals

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Receipt of application for a scientific research permit (P66K) and application to modify permit no. 841 (P129J).

SUMMARY: Notice is hereby given that the Alaska Department of Fish and Game, Division of Wildlife Conservation, P.O. Box 3–2000, Juneau, AK 99802, has applied in due form for a permit to take marine mammals for purposes of scientific research, and Dr. Bruce R. Mate, Professor, Fisheries and Wildlife, Oregon State University, Newport, OR 97365–5296, has requested a modification to permit no. 841.

DATES: Submit comments on or before April 18, 1996.

ADDRESSES: The application and modification requests and related documents are available for review upon written request or by appointment in the following office(s):

Permits Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910 (301/713–2289);

(P66K)—Alaska Region, NMFS, P.O. Box 21668, Juneau, AK 99802–1668 (907/586–7221); and

(P129J)—Southwest Region, NMFS, 501 West Ocean Blvd., Long Beach, CA 90802–4213 (310/570–5301).

Written data or views, or requests for a public hearing on these requests should be submitted to the Director, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13130, Silver Spring, MD 20910. Those individuals requesting a hearing should set forth the specific reasons why a hearing on these particular requests would be appropriate.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of these applications to the Marine Mammal Commission and its Committee of Scientific Advisors.

SUPPLEMENTARY INFORMATION: The subject actions are requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), the Regulations Governing the Taking and Importing of Marine Mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered fish and wildlife (50 CFR part 222).

The Alaska Department of Fish and Game requests authority to take harbor seals (*Phoca vitulina richardsi*) and spotted seals (*Phoca largha*) for scientific research in the following manner:

Harbor seals—Up to 1000 to be captured, restrained, measured (weight, length, girth, blubber thickness by ultrasound, and bioimpedence), sampled (flipper punches, vibrissae, blubber biopsy), flipper tagged, and released. Of these, 225 will be equipped with satellite-linked time-depth recorders (SLTDR) and/or VHF telemetry; 50 muscle biopsied; and 50 injected with deuterium oxide and Evans Blue solution. Additionally up to 1000 may be harassed during collection of scats from haulouts (individual animals may be inadvertently harassed more than once during research activities) and up to 10 may be accidentally killed during capture activities.

Spotted seals—Up to 100 to be captured, restrained, measured (weight, length, girth, blubber thickness by ultrasound, bioimpedence), sampled (flipper punches, vibrissae, blubber biopsy), flipper tagged, and released. Of these, 50 will be equipped with a SLTDR or VHF telemetry. Additionally up to 500 may be inadvertently harassed (individual animals may be harassed more than once) and up to 5 may be accidentally killed during capture activities. Samples collected from seals may be exported on a worldwide basis as the need arises. Activities will occur in southeast Alaska and along the west coast of Alaska.

(P129J)—Permit No. 841 authorizes the permit holder to conduct radio

tagging and biopsy sampling on up to 55 blue whales (*Balaenoptera musculus*), and up to 50 each of fin whales (*B. physalus*), humpback whales (*Megaptera novaeangliae*) and gray whales (*Eschrichtius robustus*) over a 5-year period and to inadvertently harass up to 200 each during tagging and biopsy sampling cruises. The permit holder requests authorization to tag an additional 50 blue whales through the duration of the Permit (i.e., through 1998). The work in 1996 and 1997 will concentrate on animals feeding in southern California prior to their southward migration.

Dated: March 6, 1996.

Ann D. Terbush,

Chief, Permits and Documentation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510–22–F

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Establishment of an Import Limit for Certain Cotton and Man-Made Fiber Textile Products Produced or Manufactured in Costa Rica

March 18, 1996.

AGENCY: Committee for the Implementation of Textile Agreements (CITA).

ACTION: Issuing a directive to the Commissioner of Customs establishing a limit.

EFFECTIVE DATE: March 27, 1996.

FOR FURTHER INFORMATION CONTACT: Jennifer Aldrich, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, (202) 482–4212. For information on the quota status of this limit, refer to the Quota Status Reports posted on the bulletin boards of each Customs port or call (202) 927–5850. For information on embargoes and quota re-openings, call (202) 482–3715. For information on categories on which consultations have been requested, call (202) 482-3740.

SUPPLEMENTARY INFORMATION:

Authority: Executive Order 11651 of March 3, 1972, as amended; section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854).

The United States Government has decided to continue the restraint limit on Categories 352/652 for an additional twelve-month period, beginning on March 27, 1996 and extending through March 26, 1997.

This action is taken in accordance with the Uruguay Round Agreement on Textiles and Clothing and the Uruguay Round Agreements Act.

The United States remains committed to finding a mutual solution concerning Categories 352/652. Should such a solution be reached in consultations with the Government of Costa Rica, further notice will be published in the **Federal Register**.

A description of the textile and apparel categories in terms of HTS numbers is available in the CORRELATION: Textile and Apparel Categories with the Harmonized Tariff Schedule of the United States (see **Federal Register** notice 60 FR 65299, published on December 19, 1995). Also see 61 FR 3002, published on January 30, 1996.

Troy H. Cribb,

Chairman, Committee for the Implementation of Textile Agreements.

Committee for the Implementation of Textile Agreements

March 18, 1996.

Commissioner of Customs,
Department of the Treasury, Washington, DC 20229.

Dear Commissioner: Under the terms of section 204 of the Agricultural Act of 1956, as amended (7 U.S.C. 1854), the Uruguay Round Agreements Act and the Uruguay Round Agreement on Textiles and Clothing; and in accordance with the provisions of Executive Order 11651 of March 30, 1972, as amended, you are directed to prohibit, effective on March 27, 1996, entry into the United States for consumption and withdrawal from warehouse for consumption of cotton and man-made fiber textile products in Categories 352/652, produced or manufactured in Costa Rica and exported during the twelve-month period beginning on March 27, 1996 and extending through March 26, 1997, in excess of 15,288,569 dozen.

Imports charged to this category limit for the period March 27, 1995 through March 26, 1996 shall be charged against that level of restraint to the extent of any unfilled balance. Goods in excess of that limit will be subject to the limit established in this directive.

In carrying out the above directions, the Commissioner of Customs should construe entry into the United States for consumption to include entry for consumption into the Commonwealth of Puerto Rico.

The Committee for the Implementation of Textile Agreements has determined that this action falls within the foreign affairs exception of the rulemaking provisions of 5 U.S.C. 553(a)(1).

Sincerely,

Troy H. Cribb,

Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510–DR–F

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List; Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds to the Procurement List commodities to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities.

EFFECTIVE DATE: April 22, 1996.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: On January 19 and 26, 1996, the Committee for Purchase From People Who Are Blind or Severely Disabled published notices (61 FR 1362 and 2494) of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the commodities and impact of the additions on the current or most recent contractors, the Committee has determined that the commodities listed below are suitable for procurement by the Federal Government under 41 U.S.C. 46–48c and 41 CFR 51–2.4. I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the commodities to the Government.

2. The action will not have a severe economic impact on current contractors for the commodities.

3. The action will result in authorizing small entities to furnish the commodities to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities proposed for addition to the Procurement List.

Accordingly, the following commodities are hereby added to the Procurement List:

Tape, Electronic Data Processing
7045–01–240–4951
Stamp, Custom, Pre-inked
7520–01–381–8027
(Requirements for the GSA Customer Supply Centers)
Sign Kit, Contaminate
9905–01–363–0872
9905–01–363–0873
9905–01–363–0875
9905–01–363–0876
9905–01–363–0877

This action does not affect current contracts awarded prior to the effective date of this addition or options that may be exercised under those contracts.

E. R. Alley, Jr.,

Deputy Executive Director.

[FR Doc. 96–7017 Filed 3–21–96; 8:45 am]

BILLING CODE 6353–01–P

Procurement List; Proposed Additions and Deletions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Proposed Additions to and Deletions from Procurement List.

SUMMARY: The Committee has received proposals to add to the Procurement List services to be furnished by nonprofit agencies employing persons who are blind or have other severe disabilities, and to delete commodities previously furnished by such agencies.

COMMENTS MUST BE RECEIVED ON OR BEFORE: April 22, 1996.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, Crystal Square 3, Suite 403, 1735 Jefferson Davis Highway, Arlington, Virginia 22202–3461.

FOR FURTHER INFORMATION CONTACT: Beverly Milkman (703) 603–7740.

SUPPLEMENTARY INFORMATION: This notice is published pursuant to 41 U.S.C. 47(a) (2) and 41 CFR 51–2.3. Its purpose is to provide interested persons an opportunity to submit comments on the possible impact of the proposed actions.

Additions

If the Committee approves the proposed addition, all entities of the Federal Government (except as otherwise indicated) will be required to procure the services listed below from nonprofit agencies employing persons who are blind or have other severe disabilities.

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will furnish the services to the Government.

2. The action does not appear to have a severe economic impact on current contractors for the services.

3. The action will result in authorizing small entities to furnish the services to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the services proposed for addition to the Procurement List.

Comments on this certification are invited. Commenters should identify the statement(s) underlying the certification on which they are providing additional information.

The following services have been proposed for addition to Procurement List for production by the nonprofit agencies listed:

Food Service

Vandenberg Air Force Base, California
NPA: Life Options, Vocational and Resource Center, Lompoc, California

Medical Transcription

U.S. Naval Hospital, North Charleston, South Carolina
NPA: Association for the Blind, Inc., Charleston, South Carolina

Deletions

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities.

2. The action does not appear to have a severe economic impact on future contractors for the commodities.

3. The action will result in authorizing small entities to furnish the commodities to the Government.

4. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 46–48c) in connection with the commodities proposed for deletion from the Procurement List.

The following commodities have been proposed for deletion from the Procurement List:

Notice of Intent To Grant an Exclusive License of a U.S. Government-Owned Patent

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.7 (a)(I)(i), announcement is made of the intent to grant an exclusive, royalty-bearing, revocable license of U.S. Patent Application Serial Number 08/348,882, filed November 28, 1994 and entitled "Infectious cDNA Clones of Japanese Encephalitis Virus and Attenuated Strains Japanese Encephalitis Virus Made from the Clones", to OraVax, Inc., 230 Albany Street, Cambridge, Massachusetts 02139. Rights to this invention are owned by the United States Government as represented by the Secretary of the Army. Anyone wishing to object to the grant of this license has 60 days from the date of this notice to file written objections along with supporting evidence, if any. Written objections are to be filed with the Command Judge Advocate, U.S. Army Medical Research and Materiel Command, Fort Detrick, Frederick, Maryland 21702–5012.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Command Judge Advocate, Fort Detrick, Frederick, Maryland 21702–5012.

FOR FURTHER INFORMATION CONTACT: Mr. John F. Moran, Patent Attorney, (301) 619–2065 or telefax (301) 619–7714.

Gregory D. Showalter,
Army Federal Register Liaison Officer.

BILLING CODE 3710–01–M

Availability for Non-Exclusive, Exclusive, or Partially Exclusive Licensing of U.S. Patent Application Concerning a Method of Raising Antibodies

AGENCY: U.S. Army Medical Research and Materiel Command, DOD.

ACTION: Notice.

SUMMARY: In accordance with 37 CFR 404.6, announcement is made of the availability of U.S. Patent Application Serial No. 08/460,617 entitled "Method of Raising Antibodies Against *E. coli* of the Family CS4–CFA/I", and filed June 2, 1995, for licensing. This patent has been assigned to the United States Government as represented by the Secretary of the Army.

ADDRESSES: Commander, U.S. Army Medical Research and Materiel Command, ATTN: Staff Judge Advocate, Fort Detrick, Frederick, Maryland 21702–5012.

FOR FURTHER INFORMATION CONTACT: Mr. John F. Moran, Patent Attorney, (301) 619–2065 or telefax (301) 619–7714.

SUPPLEMENTARY INFORMATION: The invention provides a means of immunization of humans with a peptide or denatured protein against enterotoxigenic *E. coli* (ETEC) strains of the CS4–CFA/I family. The antibodies raised by the peptides and proteins may be used as the basis for a cross-reactive ETEC vaccine as well as diagnostic agents to identify antigens of CS4–CFA/I bacteria.

Gregory D. Showalter,
Army Federal Register Liaison Officer.

BILLING CODE 3710–08–M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Storm Damage Reduction and Beach Erosion Control Project on Absecon Island, Atlantic County, New Jersey

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The action being taken is an evaluation of the alternatives for storm damage reduction and the control of further erosion on Absecon Island, New Jersey. The purpose of any consequent work would be to provide shore property protection and to stabilize the shoreline at the predetermined width.

FOR FURTHER INFORMATION CONTACT: Questions regarding the DEIS should be addressed to Ms. Beth Brandreth, (215) 656–6558, U.S. Army Corps of Engineers, CENAP–PL–E, Wanamaker Building, 100 Penn Square East, Philadelphia, Pennsylvania 19107–3390.

SUPPLEMENTARY INFORMATION:

1. *Proposed Action:* a. The draft document evaluates a study area approximately 8 miles in length, extending from Absecon Inlet to Great Egg Harbor Inlet. The study area encompasses Absecon Island, which contains the four communities of Atlantic City, Ventnor, Margate, and Longport. The beaches in these communities have been subject to erosion by storms, tidal inundation, and wave action. Three potential offshore sand borrow sources will be investigated in this study.

b. The authorities for the proposed project are the resolutions adopted by the Committee on Public Works and Transportation of the U.S. House of Representatives and the Committee on Environmental and Public Works of the U.S. Senate in December 1987.

2. *Alternatives:* In addition to the no action alternative, the alternatives considered for storm damage reduction and erosion control will fall into structural and non-structural categories. The structural measures to correct the beach erosion include bulkheads, seawalls, revetments, offshore breakwaters, groins, beach nourishment, perched beach, submerged reef with beachfill, and offshore submerged feeder berms. Non-structural measures include flood insurance, developmental regulations, and evacuation.

3. *Scoping:* a. Numerous studies and reports addressing beach erosion along the New Jersey Coast were conducted by the Corps of Engineers. The most recent study for this area is a Reconnaissance Report: Brigantine Inlet to Great Egg Harbor Inlet Reconnaissance Study (February 1992), which identified a number of problem areas where erosion was negatively impacting the adjacent shorelines. This study identified Absecon Island as one of the primary areas to be recommended for further study in the feasibility phase.

b. The scoping process is on-going and has involved preliminary coordination with Federal, State, and local agencies. Participation of the general public and other interested parties and organizations will be invited by means of a public notice.

c. The significant issues and concerns that have been identified include the impacts of the project on aquatic biota, water quality, intertidal habitat, shallow water habitat, and cultural resources.

4. *Availability:* It is estimated that the DEIS will be made available to the public in April 1996.

Gregory D. Showalter,
Army Federal Register Liaison Officer.
[FR Doc. 96–6925 Filed 3–21–96; 8:45 am]
BILLING CODE 3710–GR–M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for Churchmans Marsh Reservoir/New Castle County Water Supply Project In New Castle County, Delaware

AGENCY: U.S. Army Corps of Engineers-Philadelphia District, DOD; Cooperating Agency: U.S. Environmental Protection Agency-Region III.

ACTION: Notice of intent.

SUMMARY: The proposed action evaluates the need for and the alternative methods of providing additional water supply capacity to meet present and projected water demands in northern New Castle County, Delaware.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed action and DEIS can be answered by Ms. Mary Marshall, U.S. Army Corps of Engineers-Environmental Resources Branch (CENAP–PL–E), Wanamaker Building, 100 Penn Square East, Philadelphia, Pennsylvania 19107–3390; phone: 215–656–6561, fax: 215–656–6543.

SUPPLEMENTARY INFORMATION:

1. Proposed project: The applicant, the Water Resources Agency for New Castle County has applied for a Department of the Army Permit to construct a 2 billion gallon, 250 acre off-stream reservoir in a freshwater tidal wetland, Churchmans Marsh. The proposed project site is located approximately 5 miles southwest of Wilmington and 7 miles east of Newark. It is bounded to the south by I–95, to the north by the White Clay Creek and to the east by the Christina River. Reservoir construction includes diking the perimeter of the site and excavating approximately nine million cubic yards of material to a depth of approximately −20 feet mean sea level. An intake weir will be constructed on the upstream side of the dike to allow flows to enter from the White Clay Creek.

2. Alternatives that will be addressed by the Draft Environmental Impact Statement include:

a. The proposed project—Churchmans Marsh reservoir impoundment;

b. Reservoir impoundment on Artesian Marsh (Churchmans South) site;

c. Reservoir impoundments on tributaries to White Clay Creek and Red Clay Creek;

d. Water transfer via existing and/or proposed pipelines;

e. Aquifer recharge;

f. Desalination of brackish surface water;

g. Indirect waste water reuse; and

h. No action.

3. The following paragraphs detail the scoping actions that have occurred to date:

a. The applicant has taken a number of steps to solicit input from the public including the development of a citizens advisory group. Numerous public information meetings have been held to discuss the status of the project and obtain public comments. In addition, numerous pre-application and pre-scoping meetings have been held with agency participation from the Delaware Department of natural Resources and Environmental Control, the U.S. Fish and Wildlife Service, the National Marine Fisheries Service, the U.S.

Environmental Protection Agency, the National Park Service and the Delaware River Basin Commission.

b. Significant issues to be addressed in the EIS regarding the proposed project include:

1. Loss of 250 acres of tidal freshwater wetlands within impoundment area;
2. Impact of project construction and operation on water quality and flood storage capacity;
3. Fish and wildlife habitat impacts, including endangered species;
4. The effect of nearby hazardous waste sites and Interstate 95 on water quality;
5. Disposal of excavated materials;
6. Mitigation plans; and
7. Water supply alternatives to the proposed action.

c. The U.S. Army Corps of Engineers, Philadelphia District and the U.S. Environmental protection Agency, Region III have executed a Cooperating Agency Agreement for the development of this EIS. The U.S. Environmental Protection Agency, through this agreement, has committed to play an active role in the scoping process, the performance of appropriate field investigations, the development of portions of the Draft and Final EIS's, primarily those related to water quality and hazardous waste issues, and the development of responses to comments received on those sections of the DEIS.

4. A Public Workshop/Scoping Meeting is scheduled for Thursday, April 11, 1996, in the Clayton Hall Conference Center on the University of Delaware's North Campus in Newark, Delaware. The conference center will open at 6 pm for informal viewing of project displays and documents and discussions with appropriate agency representatives. This formal meeting will begin at 7 pm.

5. It is estimated that the Draft Environmental Impact Statement will be made available to the public in the Spring of 1997.

Frank J. Cianfrani,

Chief, Regulatory Branch, Corps of Engineers-Philadelphia District.

[FR Doc. 96–6927 Filed 3–21–96; 8:45 am]

BILLING CODE 3710–GR–M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for a Proposed Flood Control Project on the Bolles Canal in Palm Beach County, Florida

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: The Jacksonville District, U.S. Army Corps of Engineers intends to prepare a General Reevaluation Report (GRR) for the Bolles Canal flood control study (between the Miami and Hillsborough Canals). A Draft Environmental Impact Statement will be prepared for the project.

FOR FURTHER INFORMATION CONTACT: Ms. Therese Fretwell, (904) 232–3271, U.S. Army Corps of Engineers, Jacksonville District, P.O. Box 4970, Jacksonville, Florida 32232–0019.

SUPPLEMENTARY INFORMATION:

a. The study of possible flood control measures for the Bolles Canal is authorized under the Flood Control Act of 1948. Subsequently, the Flood Control Act of 1954 authorized the construction of S–171 and S–172 within the Bolles Canal for the protection of the Everglades Agricultural Area (EAA); however, these structures were not constructed. The process of preparing the General Reevaluation Report will allow the Corps to reformulate and/or modify plans for flood control in this study area. In July 1986, the Jacksonville District requested and received concurrence to reactivate and improve Bolles Canal as an authorized part of the C & SF Project. This decision was based on South Florida Water Management's (SFWMD) conclusion that the total capacity of private pump stations discharging into Bolles Canal was much greater than present Canal capacity. Increasing the capacity of the Bolles Canal may significantly enhance the effectiveness of the Stormwater Treatment Areas (STA's). Thus, in a letter dated 5 October 1994, SFWMD requested that the Jacksonville District pursue a multi-objective study for improvements to the Bolles Canal. The project will involve channel improvements and modifications, and levee and structural improvements and construction. The U.S. Army Corps of Engineers has determined that an Environmental Impact Statement (EIS) should be prepared in order to satisfy requirements under the National Environmental Policy Act (NEPA).

b. Scoping: The scoping process as outlined by the Council on Environmental Quality will be utilized to involve Federal, State, and local agencies; and other interested persons and organizations. A scoping letter will be sent to interested Federal, State, and local agencies requesting their comments and concerns regarding the issues they think should be included in the EIS. Interested persons and organizations wishing to participate in the scoping process should contact the Corps of Engineers at the above mentioned address. Environmental considerations will include potential presence of historical or archaeological resources, aesthetics, wetlands, ecosystems, water quality, water supply, endangered and threatened species and wildlife habitats and values. Public meetings will be held in the future; exact dates, times and locations will be published in local papers.

c. It is estimated that the DEIS will be available to the public by January 1998.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

[FR Doc. 96–6923 Filed 3–21–96; 8:45 am]

BILLING CODE 3710–AJ–M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement/Report (DEIS/R) for the Port of Hueneme Feasibility Study, Port Hueneme, California

AGENCY: Los Angeles District, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent.

SUMMARY: To date, deep draft vessels entering the Port of Hueneme Entrance Channel, have to limit the amount of cargo product that can be brought into the harbor for berthing due to existing shallow bottom depths. In order to increase the cargo efficiency of product delivery, a plan has been developed to deepen the existing channel from the −35 foot contour depth to a depth of −40 to −45 feet mean lower low water. Approximately 1 million cubic yards of material would be dredged for disposal. Disposal options include offshore, near/onshore and upland sites. Potential disposal sites have not been identified at this time. Project figures are available by contacting the below individual and address.

FOR FURTHER INFORMATION CONTACT: Questions concerning the proposed action and DEIS/R can be answered by Mr. Russell L. Kaiser, Environmental Planning Section, at (213) 894–0247, U.S. Army Corps of Engineers, P.O. Box 2711, Los Angeles, California, 90053.

SUPPLEMENTARY INFORMATION:

1. Proposed Action: The proposed action would reduce some of the current limit and cargo product restrictions that can be brought into the harbor for berthing due to existing shallow depths.

2. Alternatives: Although no alternatives have been developed to date, as part of the process, a full array of alternatives would be developed for further analyses. The proposed plan, viable project alternatives, and the "no action" plan will be carried forward for detailed analysis in the National Environmental Policy Act/California Environmental Policy Act document.

3. Scoping Process: Potential impacts associated with the proposed action and alternatives will be fully evaluated. Resource categories that will be analyzed include: geology, oceanography/water quality, air and noise quality, marine resources, cultural resources, socioeconomics, land/water use, recreation, ground and vessel traffic and safety, energy, and aesthetics. The Los Angeles District will be conducting a public scoping meeting with the Port of Hueneme on 28 March 1996, at 7:00 pm, in the Board Room of the Oxnard Harbor District, 105 East Hueneme Road, Port Hueneme, California.

4. Significant Issues: The only possible significant issue at this time may be related to disposal of dredged material if testing shows sediments are contaminated and require special handling.

5. Other Environmental Review and Consultation: Environmental review and consultation as required by Sections 401 and 404 of the Clean Water Act, as amended, (33 U.S.C. 1341 and 1344); the Fish and Wildlife Coordination Act (16 U.S.C. 661 *et seq.*); the National Historic Preservation Act of 1966, as amended (16 U.S.C. 470 *et seq.*); the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*); Executive Order 11990, "Protection of Wetlands," (24 May 1977); and other applicable statutes or regulations will be conducted concurrently with the EIR/EIS review process.

6. Schedule: We estimate the draft EIR/EIS will be made available to the public in Spring of 1997.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

[FR Doc. 96–6930 Filed 3–21–96; 8:45 am]

BILLING CODE 3710–KF–M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed Ocean City, Maryland, and Vicinity Water Resources Feasibility Study at Ocean City, in Worcester County, Maryland; Correction

AGENCY: U.S. Army Corps of Engineers, DOD.

ACTION: Correction to Notice of Intent.

SUMMARY: Reference NOI published in **Federal Register** on Thursday, February 29, 1996, Volume 61, number 41, pages 7778–9. This document contains corrections to the Notice of Intent published for the Ocean City, Maryland, and Vicinity Water Resources Feasibility Study and Draft Environmental Impact Statement (EIS). The corrections relate to the types of documents to be prepared and the dates that the draft documents will be available for public review.

FOR FURTHER INFORMATION CONTACT: Questions about the proposed actions, draft Programmatic EIS, and Supplemental EIS's can be addressed to Ms. Stacey Marek, Study Manager, Baltimore District, U.S. Army Corps of Engineers, ATTN: CENAB–PL–PC, P.O. 1715, Baltimore, Maryland 21203–1715, telephone (410) 962–4977. E-mail address: ocwr@ccmail.nab.usace.army.mil.

SUPPLEMENTARY INFORMATION:

Background: The Ocean City feasibility study will address four different water-related problems in the Maryland coastal bay area as separate report components. The components include (1) the restoration of the northern end of Assateague Island; (2) long-term sand placement opportunities along Ocean City and Assateague Island shorelines; (3) restoration of terrestrial and aquatic habitat; and (4) navigation improvements to the harbor, inlet, and Thorofare channel. The Assateague Island Restoration component will be completed earlier than the other 3 components due to a potentially imminent breach of Assateague Island. The original schedule completion date for the draft Ocean City, Maryland, and Vicinity Water Resources Feasibility Report and DEIS was June 1997.

Need for Correction: As published, the original NOI failed to clarify that a Programmatic EIS, addressing general impacts of the overall project and specific impacts of the Assateague Island restoration, would be available first, followed by a separate supplemental EIS addressing the remaining project components, and to identify the dates the documents would be available for public review.

Correction of Publication: Accordingly, the **Federal Register** published on Thursday, February 29, 1996, Volume 61, number 41, pages 7778–9, is corrected as follows: On page 7778, in the Summary paragraph, substitute the following for the final sentence:

A Programmatic EIS addressing the general actions and impacts of the overall proposed study and the specific actions and impacts of the Assateague Island Restoration component will be prepared and provided for public review in March 1977. Subsequently, separate Supplemental EIS will be prepared for the study components addressing long-term sand placement; restoration of terrestrial and aquatic habitat; and navigation improvements to the harbor, inlet, and Thorofare channel. The Supplemental EIS will be provided for public review in October 1997.

On page 7778, in item number 7, line 2; and on page 7779, in item 7, line 2: substitute "environmental documents" for "DEIS." On page 7779, in item number 10, substitute the following: The draft Programmatic EIS addressing the general actions and impacts of the overall Ocean City, Maryland, Water Resources Feasibility Study and the specific actions and impacts of the Assateague Island Restoration is scheduled to be available for public review in Mar. 1997; a Supplemental EIS addressing the specific actions and impacts of the remaining 3 study components are scheduled to be available for public review in October 1977.

Gregory D. Showalter,

Army Federal Register Liaison Officer.

[FR Doc. 96–6924 Filed 3–21–96; 8:45 am]

BILLING CODE 3710–41–M

DEPARTMENT OF EDUCATION

National Assessment Governing Board; Public Forum

AGENCY: National Assessment Governing Board, Education.

ACTION: Notice of information collection activity.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the National Assessment Governing Board (NAGB) has submitted an Information Collection Request (ICR) to the Office of Management and Budget for approval of the collection abstracted below. The ICR describes the nature of the information collection and its expected cost and burden; it includes the actual data collection instrument and explanatory materials.

DATES: Comments must be submitted on or before April 22, 1996.

FOR FURTHER INFORMATION OR A COPY CONTACT: Susan Cooper Loomis, NAEP ALS Project Director, American College Testing, 2201 N. Dodge Street, Iowa City, Iowa 52243. Copies of the complete ICR and accompanying appendices may be obtained from the NAEP ALS Project Director at the address above.

SUPPLEMENTARY INFORMATION:

Title: NAEP Consumer Survey Research Study of the Achievement Levels for the U.S. History NAEP and the Geography NAEP.

Abstract: The purpose of this information collection activity is to gather information for NAGB regarding the achievement levels set for the 1994 NAEP in U.S. History and in Geography. In particular, Congress has deemed that the achievement levels must be shown to be reasonable, valid, and informative to the public. This survey is designed to collect responses from individuals who are likely to have some interest in the ALS process (having been invited in 1994 to nominate individuals to serve as panelists for the ALS process) and individuals who are likely to have some interest in the subjects for which achievement levels have been developed.

A report has been developed in the form of a newspaper (The NAEP Reporter) to provide respondents information about the NAEP, and about the achievement levels. The "newspaper" report was developed as a means of providing information in a format that would be interesting to the respondent. Unlike actual newspaper articles that have reported on the recently-released results of the NAEP, this account does not judge the outcomes regarding student performances. That is, this report is objective and neither applauds nor decries the performance of students on the NAEP.

A brief questionnaire elicits responses to questions regarding the usefulness and informativeness of the achievement levels for reporting NAEP results. The survey is printed on a postage-paid, self-mailer card.

No third party notification or public disclosure burden is associated with this collection.

An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** notice with a 60-day comment period soliciting comments on this collection of information was published on December 20, 1995.

Burden Statement: The estimated total respondent burden is 924 hours, and the average burden per respondent is .44 hours. This is a one-time survey. Individuals included in the survey will not be contacted for follow-up comments. This burden estimate includes .33 hours to read the stimulus piece (newspaper) and .11 hours to read and respond to the questionnaire.

No small businesses nor other small entities are included in the survey.

Respondents/Affected Entities: Parties affected by this information collection are persons included in a broadly representative sample including persons identified as nominators of achievement levels-setting (ALS) panelists for pilot studies and ALS, as well as samples of subscribers to The Smithsonian magazine (for U.S. History) and The National Geographic for geography.

Estimated Number of Respondents: 2100 in this collection.

Estimated Total Annual Burden of Respondents: 924 hours for this collection.

Frequency of Collection: One time only.

Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to the following address. Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Wendy Taylor, Desk Officer for NAGB, 725 17th Street, NW., Washington, DC 20503.

Dated: March 18, 1996.

Roy Truby,

Executive Director.

[FR Doc. 96–6830 Filed 3–21–96; 8:45 am]

BILLING CODE 4000–01–M

Notice of Waivers Granted by the U.S. Secretary of Education Under the Authority of the Elementary and Secondary Education Act and the Goals 2000: Educate America Act

SUMMARY: States and communities have new opportunities for flexibility in the use of Federal education funds in order to improve school effectiveness and academic achievement. The Improving America's Schools Act (Pub. L. 103–382), (which reauthorized the Elementary and Secondary Education Act (ESEA)), the Goals 2000: Educate America Act (Pub. L. 103–227) (Goals 2000), and the School-to-Work Opportunities Act (Pub. L. 103–239) provide States, school districts, and other eligible waiver applicants with significant new opportunities to seek waivers of certain requirements of Federal education programs in order to improve teaching and learning.

As of December 31, 1995, 85 waiver requests had been approved by the U.S. Department of Education and 11 waiver requests had been denied. This notice identifies the 71 waiver requests approved by the U.S. Department of Education under the above waiver authorities from July 1, 1995 through December 31, 1995. (The other 14 were described in a previous notice.) This notice also identifies the three additional States that have had their Education Flexibility (Ed-Flex) Partnership Demonstration Program applications approved and been delegated the Secretary's waiver authority under the Goals 2000: Educate America Act during this time period.

Notably, in addition to the waivers of targeting and within district allocation provisions described in the earlier notice, this notice includes, among others, waivers that have been approved regarding provisions governing the statutory poverty thresholds for implementing schoolwide programs under Title I, the proportions of funds devoted to professional development in core subject areas under the Eisenhower Professional Developmnent Program, the formation of consortia under the Perkins Vocational and Applied Technology Education Act, and the Public Charter Schools Program. Copies of revised draft Waiver Guidance, which provides examples of waivers and explains the waiver authorities in detail, are available from the U.S. Department of Education at (202) 401–7801.

Application Approvals: From July 1, 1995 through December 31, 1995, the Secretary approved 71 applications for waivers and three applications for Ed-Flex. The successful applications are listed in this notice, which is published as provided for in section 14401(g) of the ESEA and section 311(g) of Goals 2000. Each waiver application is reviewed and evaluated based on its individual merits in accordance with the statutory criteria.

(A) Waivers Approved Under the General Waiver Authority in Section 14401 of the ESEA

(1) Name of Applicant: Monmouth Public Schools, Monmouth, IL.
Requirements Waived: Sections 1113(b)(1)(A) and 1113(c)(2) of the ESEA.
Duration of Waiver: One year.
Date Granted: July 2, 1995.

(2) Name of Applicant: Franklin Area School District, Franklin, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: July 11, 1995.

(3) Name of Applicant: Tri-Valley School District, Valley View, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: July 12, 1995.

(4) Name of Applicant: Blount County Schools, Maryville, TN.
Requirement Waived: Section 1113(c)(1) of the ESEA.

Duration of Waiver: One year.
Date Granted: July 27, 1995.

(5) Name of Applicant: Mifflin County School District, Yeagertown, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three Years.
Date Granted: July 27, 1995.

(6) Name of Applicant: Edgecombe County Schools, Tarboro, NC.
Requirement Waived: Section 1113(c)(1) of the ESEA.
Duration of Waiver: Three years.
Date Granted: July 30, 1995.

(7) Name of Applicant: Montebello Unified School District, Montebello, CA.
Requirement Waived: Section 1113(c)(1) of the ESEA.
Duration of Waiver: One year.
Date Granted: July 30, 1995.

(8) Name of Applicant: Windber Area School District, Windber, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: July 30, 1995.

(9) Name of Applicant: Tamaqua Area School District, Tamaqua, PA.
Requirement Waived: Section 1113(c)(2) of the ESEA.
Duration of Waiver: One year.
Date Granted: August 3, 1995.

(10) Name of Applicant: Puerto Rico Department of Education, San Juan, PR.
Requirement Waived: Section 1113(a)(5) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 4, 1995.

(11) Name of Applicant: DuBois Area School District, DuBois, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 5, 1995.

(12) Name of Applicant: Greene County School District, Greeneville, TN.
Requirement Waived: Section 1113(c)(1) of the ESEA.
Duration of Waiver: Two years.
Date Granted: August 5, 1995.

(13) Name of Applicant: Hempfield School District, Landisville, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 5, 1995.

(14) Name of Applicant: Kentucky Department of Education.
Requirement Waived: Section 14601(b) of the ESEA only with respect to date of enactment of State law.
Duration of Waiver: Until July 1, 1996.
Date Granted: August 5, 1995.

(15) Name of Applicant: Manitowoc Public School District, Manitowoc, WI.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: One year.
Date Granted: August 5, 1995.

(16) Name of Applicant: North Schuylkill School District, Ashland, PA.
Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(1) of the ESEA.
Duration of Waiver: One year.
Date Granted: August 5, 1995.

(17) Name of Applicant: Northwestern Lehigh School District, New Tripoli, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: One year.
Date Granted: August 5, 1995.

(18) Name of Applicant: Belle Vernon Area School District, Belle Vernon, PA.
Requirements Waived: Sections 1113(a)(2)(B), 1113(c)(1), and 1113(c)(2) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 22, 1995.

(19) Name of Applicant: Jefferson County Public Schools, Louisville, KY.
Requirement Waived: Section 1113(c)(1) of the ESEA.
Duration of Waiver: One year.
Date Granted: August 22, 1995.

(20) Name of Applicant: Belleville Township High School District, Belleville, IL.
Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(2) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 23, 1995.

(21) Name of Applicant: Gadsden County School District, Quincy, FL.
Requirement Waived: Section 1113(a)(3) of the ESEA.
Duration of Waiver: One year.
Date Granted: August 23, 1995.

(22) Name of Applicant: Northwest Tri-County Intermediate Unit 5 Title II Consortium, Edinboro, PA.
Requirement Waived: Section 2206(b) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 23, 1995.

(23) Name of Applicant: Riverview Intermediate Unit 6 Title II Consortium, Shippenville, PA.
Requirement Waived: Section 2206(b) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 24, 1995.

(24) Name of Applicant: Trinity Area School District, Washington, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: August 31, 1995.

(25) Name of Applicant: Berwick Area School District, Berwick, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: One year.
Date Granted: September 5, 1995.

(26) Name of Applicant: Campbell County Board of Education, Jacksboro, TN.
Requirement Waived: Section 1113(c)(1) of the ESEA.
Duration of Waiver: Three years.
Date Granted: September 10, 1995.

(27) Name of Applicant: Puerto Rico Department of Education, San Juan, PR.
Requirement Waived: Section 1113(a)(3) of the ESEA.
Duration of Waiver: One year.
Date Granted: September 11, 1995.

(28) Name of Applicant: Warwick School District, Lititz, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: September 11, 1995.

(29) Name of Applicant: Clarkston School District, Clarkston, WA.
Requirement Waived: Section 1114(a)(1)(A) of the ESEA.
Duration of Waiver: One year.
Date Granted: September 15, 1995.

(30) Name of Applicant: Octorara Area School District, Atglen, PA.
Requirement Waived: Section 1113(c)(2) of the ESEA.
Duration of Waiver: Three years.
Date Granted: September 15, 1995.

(31) Name of Applicant: Santa Maria Joint Union High School District, Santa Maria, CA.
Requirements Waived: Section 1113(a)(2)(B) and 1113(c)(2) of the ESEA.
Duration of Waiver: Three years.
Date Granted: September 15, 1995.

(32) Name of Applicant: Chula Vista Elementary School District, Chula Vista, CA.
Requirement Waived: Section 1113(c)(1) of the ESEA.
Duration of Waiver: One year.
Date Granted: September 25, 1995.

Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(2) of the ESEA.
Duration of Waiver: Three years.
Date Granted: December 1, 1995.
(60) Name of Applicant: Highlands School District, Natrona Heights, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: December 1, 1995.
(61) Name of Applicant: Lake-Lehman School District, Lehman, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: December 1, 1995.
(62) Name of Applicant: Maine School Administrative District #57, Waterboro, ME.
Requirements Waived: Sections 1113(a)(2)(B), 1113(c)(1), and 1113(c)(2) of the ESEA.
Duration of Waiver: One year.
Date Granted: December 1, 1995.
(63) Name of Applicant: Nebraska Department of Education on behalf of the Nebraska Coordinating Commission for Postsecondary Education, Lincoln, NE.
Requirement Waived: Section 2206(b) of the ESEA.
Duration of Waiver: Three years.
Date Granted: December 1, 1995.
(64) Name of Applicant: Palmdale School District, Palmdale, CA.
Requirements Waived: Sections 1113(b)(1)(A) and 1113(c)(2) of the ESEA.
Duration of Waiver: Two years.
Date Granted: December 1, 1995.
(65) Name of Applicant: Placerville Union School District, Placerville, CA.
Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(2) of the ESEA.
Duration of Waiver: One year.
Date Granted: December 1, 1995.

(B) Waivers Approved Under the Special Waiver Authority in Section 1113(a)(7) of the ESEA

(1) Name of Applicant: Omaha School District, Omaha, NE.
Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(2) of the ESEA.
Duration of Waiver: ESEA reauthorization period.
Date Granted: September 12, 1995.
(2) Name of Applicant: Woodland Hills School District, Pittsburgh, PA.
Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(1) of the ESEA.
Duration of Waiver: Three years.
Date Granted: September 28, 1995.
(3) Name of Applicant: Lynchburg City Schools, Lynchburg, Va.
Requirements Waived: Sections 1113(a)(2)(B) and 1113(c)(2) of the ESEA.
Duration of Waiver: One year (in part) and three years (in part).
Date Granted: October 2, 1995.
(4) Name of Applicant: New Kensington-Arnold School District, Arnold, PA.
Requirement Waived: Section 1113(a)(2)(B) of the ESEA.
Duration of Waiver: Three years.
Date Granted: October 17, 1995.

(C) Waiver Approved Under the Public Charter Schools Waiver Authority in Section 10304(e) of the ESEA

(1) Name of Applicant: Massachusetts Department of Education.
Requirement Waived: Section 10302(a) of Title X, Part C of the ESEA.
Duration of Waiver: Three years.
Date Granted: July 31, 1995.

(D) Waivers Approved Under the Waiver Authority in Section 311 of the Goals 2000: Educate America Act

(1) Name of Applicant: Oregon Department of Education.
Requirements Waived: Carl D. Perkins Vocational and Applied Technology Education Act at 34 CFR Sections 403.190 and 403.116(c)(1).
Duration of Waiver: Four years.
Date Granted: August 3, 1995.

(E) States Designated Ed-Flex States Under the Education Flexibility Partnership Demonstration Program in section 311(e) of the Goals 2000: Educate America Act

(1) Name of Applicant: Massachusetts.
Duration of Ed-Flex Authority: Five years.
Date Granted: August 19, 1995.
(2) Name of Applicant: Kansas.
Duration of Ed-Flex Authority: Five years.
Date Granted: August 20, 1995.
(3) Name of Applicant: Ohio.
Duration of Ed-Flex Authority: Five years.
Date Granted: September 27, 1995.

(F) Correction to Previous Federal Register Notice

In the description of the Lancaster School District, PA waiver, 60 FR 44391 (August 25, 1995) described two of the district's elementary schools as otherwise ineligible for Title I funds. These two schools have poverty levels below the district average, but are eligible to receive Title I funds irrespective of the waiver.

FOR FURTHER INFORMATION CONTACT: Collette Roney at the Department's Waiver Assistance Line, (202) 401–7801. Copies of Waiver Guidance are also available at this number.

Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Dated: February 16, 1996.

Marshall S. Smith,

Under Secretary.

BILLING CODE 4000–01–P

DEPARTMENT OF ENERGY

[FE Docket No. EA–113]

Application to Export Electricity Destec Power Services, Inc.

AGENCY: Office of Fossil Energy, DOE.

ACTION: Notice of application.

SUMMARY: Destec Power Services, Inc. (Destec) has requested authorization to export electric energy to Mexico. Destec is a marketer of electric energy. It does not own or control any electric generation or transmission facilities.

DATES: Comments, protests, or requests to intervene must be submitted on or before April 22, 1996.

ADDRESSES: Comments, protests, or requests to intervene should be addressed as follows: Office of Coal & Electricity (FE–52), Office of Fuels Programs, Fossil Energy, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585–0350.

FOR FURTHER INFORMATION CONTACT: Ellen Russell (Program Office) 202–586–9624 or Michael T. Skinker (Program Attorney) 202–586–6667.

SUPPLEMENTARY INFORMATION: Exports of electricity from the United States to a foreign country are regulated and require authorization under section 202(e) of the Federal Power Act (FPA) (16 U.S.C. § 824a(e)).

On March 11, 1995, Destec filed an application with the Office of Fossil Energy (FE) of the Department of Energy (DOE) for authorization to export electric energy to Mexico pursuant to section 202(e) of the FPA. Destec neither owns nor controls any facilities for the transmission or distribution of electricity, nor does it have a franchised retail service area. Rather, Destec is a power marketer authorized by the Federal Energy Regulatory Commission (FERC) to engage in the wholesale sale of electricity in interstate commerce at negotiated rates pursuant to its filed rate schedules.

In its application, Destec proposes to sell electric energy to Mexico. The electric energy Destec proposes to transmit to Mexico would be purchased from electric utilities and Federal power marketing agencies in the United States. Destec asserts that such energy would be surplus to the requirements of the entities from which it would be purchased. Destec would arrange for the exported energy to be wheeled from the selling entities, over existing domestic transmission facilities, and delivered to the foreign purchaser over one or more of the following international transmission lines for which Presidential permits (PP) have been previously issued: San Diego Gas and Electric Company's (SDG&E) 230-kilovolt (kV), Miguel-Tijuana transmission line (PP–68); the SDG&E 230-kV line at Imperial Valley (PP–79); El Paso Electric Company's 115-kV lines at Diablo, New Mexico (PP–92) and Ascarate, Texas (PP–48–A); Central Power and Light Company's 138-kV and 69-kV transmission lines at Brownsville, Texas (PP–94); and the 138-kV transmission lines permitted to Mexico's Comision Federal de Electricidad at Eagle Pass (PP–50), Loredo (PP–57), and Falcon Dam (PP–57) in Texas.

Procedural Matters

Any persons desiring to be heard or to protest this application should file a petition to intervene or protest at the address provided above in accordance with §§ 385.211 or 385.214 of the Rules of Practice and Procedure (18 CFR 385.211, 385.214). Fifteen copies of such petitions and protests should be filed with the DOE on or before the date listed above. Additional copies are to be

filed directly with: Mr. John J. Stauffacher, Director, Public Affairs, Destec Energy, Inc. 2500 CityWest Blvd., Suite 150, Houston, Texas 77042 and W. Eric Dennison, Attorney, at the same address.

A final decision will be made on this application after the environmental impacts have been evaluated pursuant to the National Environmental Policy Act of 1969 (NEPA), and a determination is made by the DOE that the proposed action will not adversely impact on the reliability of the U.S. electric power supply system.

Copies of this application will be made available, upon request, for public inspection and copying at the address provided above.

Issued in Washington, DC, on March 18, 1996.

Anthony J. Como,

Director, Office of Coal & Electricity, Office of Fuels Programs, Office of Fossil Energy.

Office of Fossil Energy

[Docket No. FE C&E 96–02—Certification Notice—150]

Clark Public Utilities; Notice of Filing of Coal Capability Powerplant and Industrial Fuel Use Act

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of filing.

SUMMARY: On March 6, 1996, Clark Public Utilities submitted a coal capability self-certification pursuant to section 201 of the Powerplant and Industrial Fuel Use Act of 1978, as amended.

ADDRESSES: Copies of self-certification filings are available for public inspection, upon request, in the Office of Fuels Programs, Fossil Energy, Room 3F–056, FE–52, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C. 20585.

FOR FURTHER INFORMATION CONTACT: Ellen Russell at (202) 586–9624.

SUPPLEMENTARY INFORMATION: Title II of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), as amended (42 U.S.C. 8301 *et seq.*), provides that no new baseload electric powerplant may be constructed or operated without the capability to use coal or another alternate fuel as a primary energy, source. In order to meet the requirement of coal capability, the owner or operator of such facilities proposing to use natural gas or petroleum as its primary energy source shall certify, pursuant to FUA section 201(d), to the Secretary of Energy prior to construction, or prior to operation as a base load powerplant, that such powerplant has the capability to use coal or another alternate fuel. Such certification establishes compliance with section 201(a) as of the date filed with the Department of Energy. The Secretary is required to publish a notice in **Federal Register** that a certification has been filed. The following owner/operator of a proposed new baseload powerplant has filed a self-certification in accordance with section 201(d).

Owner: Clark Public Utilities
Operator: Cogentrix of Vancouver, Inc.
Location: Vancouver, Washington
Plant Configuration: Combined cycle
Capacity: 248 megawatts
Fuel: Natural gas
Purchasing Entities: Clark Public Utilities
In-Service Date: September, 1997

Issued in Washington, D.C., March 15, 1996.

Anthony J. Como,

Director, Office of Coal & Electricity, Office of Fuels Programs, Office of Fossil Energy.

Federal Energy Regulation Commission

[Docket No. ER96–1040–000]

CoEnergy Trading Company; Notice of Issuance of Order

March 18, 1996.

On February 8, 1996, CoEnergy Trading Company (CoEnergy) submitted for filing a rate schedule under which CoEnergy will engage in wholesale electric power and energy transactions as a marketer. CoEnergy also requested waiver of various Commission regulations. In particular, CoEnergy requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liability by CoEnergy.

On March 14, 1996, pursuant to delegated authority, the Director, Division of Applications, Office of Electric Power Regulation, granted requests for blanket approval under Part 34, subject to the following:

Within thirty days of the date of the order, any person desiring to be heard or to protest the blanket approval of issuances of securities or assumptions of liability by CoEnergy should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214).

Absent a request for hearing within this period, CoEnergy is authorized to issue securities and assume obligations or liabilities as a guarantor, indorser, surety, or otherwise in respect of any security of another person; provided that such issuance or assumption is for some lawful object within the corporate purposes of the applicant, and compatible with the public interest, and is reasonably necessary or appropriate for such purposes.

The Commission reserves the right to require a further showing that neither public nor private interests will be adversely affected by continued approval of CoEnergy's issuances of securities or assumptions of liability.

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is April 15, 1996.

Copies of the full text of the order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, D.C. 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP96–176–000]

Columbia Gas Transmission Corporation; Notice of Filing of Calculations of Excess Revenues

March 18, 1996.

Take notice that on March 13, 1996, Columbia Gas Transmission Corporation (Columbia), filed its Calculations of Excess Revenues.

Columbia states that prior to February 1, 1996, in accordance with the former Section 37 (Crediting of Excess Revenues) of the General Terms and Conditions (GTC) of Columbia's FERC Gas Tariff, Second Revised Volume No. 1, Columbia credited Excess Revenues from certain rate schedules to applicable Firm Transportation Customers. Pursuant to GTC Section 37.3, Columbia was required to calculate the Excess Revenues for each Applicable Rate Schedule at the earlier of the end of each 12-month period such rates were in effect, or as of the date such rates were superseded by a subsequent rate proceeding. Moreover, within 60 days after the end of each such period, Columbia was required to return the Excess Revenues through dollar credits to Firm Transportation Customer bills. Finally, GTC Section 37.3 required the concurrent filing of Excess Revenues calculations for each Applicable Rate Schedule with the Commission.

On August 1, 1995, Columbia filed a Section 4(e) general rate proceeding in Docket No. RP95–408, proposing, inter alia, termination of Excess Revenues crediting and deletion of Section 37 of the GTC. By order dated August 31, 1995, the Commission allowed Columbia to terminate GTC Section 37 effective February 1, 1996.

Consistent with the former GTC Section 37, Columbia states that it is returning such Excess Revenues concurrently with the filing of this report through dollar credits to Firm Transportation Customer bills. Columbia also states that it did not meet the revenue threshold for Rate Schedule ITS, nor did it collect any revenues under Rate Schedule ISS during the three-month period of November 1, 1995, through January 31, 1996. Columbia further states that it is crediting $181,186 of Excess Revenues attributable to Rate Schedule SIT. Columbia further reserves its right to make a subsequent filing to reflect adjustments applicable to prior Excess Revenues crediting periods.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's rules and Regulations. All such motions or protests must be filed on or before March 25, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room

Lois D. Cashell,

Secretary.

ConAgra Energy Services, Inc.; Notice of Filing

March 18, 1996.

Take notice that on February 23, 1996, ConAgra Energy Services, Inc. tendered for filing a Notice of Succession notifying FERC that ConAgra Energy Services was incorporated on December 29, 1995.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 28, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. TM96–7–23–000]

Eastern Shore Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

March 18, 1996.

Take Notice that on March 13, 1996 Eastern Shore Natural Gas Company (ESNG) tendered for filing certain revised tariff sheets in the above captioned docket as part of its FERC Gas Tariff, First Revised Volume No. 1, with a proposed effective date of April 1, 1996.

ESNG states that the purpose of this filing is twofold: (1) to "track" Transcontinental Gas Pipe Line Corporation's (Transco) revised fuel retention percentages for injecting gas into storages (see Transco's Fifth Revised Sheet No. 29) effective April 1, 1996; and (2) to "track" changes in ESNG's pipeline suppliers' storage service rates, also effective April 1, 1996.

ESNG states that copies of the filing have been served upon its jurisdictional customers and interested State Commissions.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rule 211 and Rule 214 of the Commission's Rules of Practice and Procedure (18 CFR Section 385.211 and Section 385.214). All such motions or protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

MidAmerican Energy Company; Notice of Filing

March 18, 1996.

Take notice that MidAmerican Energy Company on March 11, 1996 tendered for filing proposed changes in its FERC Electric Tariff, First Revised Volume No. 3 and Original Volume No. 4. The proposed changes consist of the following:

1. First Revised Sheet No. 16 of Network Transmission Tariff, FERC Electric Tariff, First Revised Volume No. 3 superseding Original Sheet No. 16; and
2. First Revised Sheet No. 16 of Point-to-Point Transmission Tariff, FERC Electric Tariff, Original Sheet No. 26.
3. First Revised Sheet No. 33 of Point-to-Point Transmission Tariff, FERC Electric Tariff, Original Volume No. 4, superseding Original Sheet No. 33.
4. First Revised Sheet No. 34 of Point-to-Point Transmission Tariff, FERC Electric Tariff, Original Volume No. 4, superseding Original Sheet No. 34.
5. First Revised Sheet No. 38 of Point-to-Point Transmission Tariff, FERC Electric Tariff, Original Volume No. 4, superseding Original Sheet No. 38.

MidAmerican states that it is submitting these changes in compliance with the Commission's February 27, 1996, order in Docket No. ER96–719–000 and to conform the number of yearly extensions a customer may obtain for commencement of service under Section 7.9 of its Point-to-Point Transmission Tariff to the Commission's Open Access NOPR's pro forma tariffs.

Copies of the filing were served upon MidAmerican's jurisdictional customers under the applicable tariffs and the Iowa Utilities Board, the Illinois Commerce Commission and the South Dakota Public Utilities Commission.

Any person desiring to the heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211

and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 26, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP96–174–000]

Pacific Interstate Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

March 18, 1996.

Take notice that on March 14, 1996, Pacific Interstate Transmission Company (PITCO) tendered for filing and acceptance additional tariff sheets revising its Rate Schedule CQS-1. PITCO requests an effective date of May 1, 1996.

PITCO states that its proposed tariff changes would allow PITCO to credit its cost-of-service billings to its sole current customer, Southern California Gas Company (SoCalGas), (1) amounts it receives for releases of capacity on the Pacific Gas Transmission Company and Northwest Pipeline Corporation systems as a Part 284 shipper on such systems up to the maximum liability SoCalGas may have to PITCO for such released capacity, and (2) amounts attributable to the reservation charge portion of sales by PITCO of any gas deemed excess by SoCalGas and which is above any minimum take-or-pay obligations of SoCalGas to PITCO.

Any person desiring to be heard or protest this filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, DC 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such motions or protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER95–1096–001]

PacifiCorp; Notice of Filing

March 18, 1996.

Take notice that on February 22, 1996, PacifiCorp tendered for filing in compliance with the Commission's Order dated February 16, 1996 in docket No. ER95–1096–000 a proposed revision to PacifiCorp's FERC Electric Tariff, Original Volume No. 9 (Network Tariff).

PacifiCorp proposes to revise the Network Tariff by removing from the definition of "Eligible Customers" the phrase "any retail customer of PacifiCorp or any entity for which the Commission may not order the provision of transmission service under the Federal Power Act." PacifiCorp proposes no other changes to the Network Tariff by this filing. PacifiCorp's Point-to-Point Transmission Service Tariff does not contain the above cited language.

PacifiCorp requests waiver of prior notice and that an effective date of August 7, 1995 be assigned.

Copies of this filing were served on the Wyoming Public Service Commission, the Public Service Commission of Utah, the Public Utility Commission of Oregon, the Idaho Public Utilities Commission, the Montana Public Service Commission, the Public Utilities Commission of California and the Washington Utilities and Transportation Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 28, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. ER96–553–000]

QST Energy Trading, Inc.; Notice of Issuance of Order

March 18, 1996.

On December 8, 1995, as completed on January 25, 1996, QST Energy Trading, Inc. (QST Trading) filed an application for authorization to see energy and capacity at market-based rates, and for certain waivers and authorizations. In particular, QST Trading requested that the Commission grant blanket approval under 18 CFR Part 34 of all future issuances of securities and assumptions of liabilities by QST Trading. On March 14, 1996, the Commission issued an Order Conditionally Accepting For Filing Market-Based Rates And Granting And Denying Requests For Waivers And Authorizations (Order), in the above-docketed proceeding.

The Commission's March 14, 1996 Order granted the request for blanket approval under Part 34, subject to the conditions found in Ordering Paragraphs (F), (G), and (I):

(F) Within 30 days of the date of this order, any person desiring to be heard or to protest the Commission's blanket approval of issuances of the securities or assumptions of liabilities by QST Trading should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure, 18 CFR 385.211 and 385.214.

(G) Absent a request to be heard within the period set forth in Ordering Paragraph (F) above, QST Trading is hereby authorized, pursuant to section 204 of the FPA, to issue securities and to assume obligations or liabilities as guarantor, endorser, surety, or otherwise in respect of any security of another person; provided that such issue or assumption is for some lawful object within the corporate purposes of QST Trading, compatible with the public interest, and reasonably necessary or appropriate for such purposes.

(I) The Commission reserves the right to modify this order to require a further showing that neither public nor private interests will be adversely affected by continued Commission approval of QST Trading's issuances of securities or assumptions of liabilities * * *

Notice is hereby given that the deadline for filing motions to intervene or protests, as set forth above, is April 15, 1996.

Copies of the full test of the Order are available from the Commission's Public Reference Branch, 888 First Street, N.E., Washington, D.C. 20426.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP96–175–000]

Williams Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

March 18, 1996.

Take notice that on March 13, 1996 Williams Natural Gas Company (WNG) tendered for filing to become part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets to be effective April 13, 1996:

First Revised Sheet No. 6B
Second Revised Sheet No. 250A
First Revised Sheet No. 250B

WNG states that it proposes to be permitted to discount its fuel and loss reimbursement percentage applicable to transportation on the Rawlins-Hesston line from the receipt points to the delivery points specified in proposed Article 13.3. WNG will grant fuel and loss reimbursement percentage discounts in competitive situations on a non-discriminatory basis to any party utilizing the designated receipt and delivery points.

WNG states that a copy of its filing was served on all jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest this filing should file a motion to intervene or a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.214 and 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket Nos. RP96–173–000 and RP89–183–050]

Williams Natural Gas Company; Notice of Proposed Changes in FERC Gas Tariff

March 18, 1996.

Take notice that on March 13, 1996, Williams Natural Gas Company (WNG), tendered for filing to become part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets, with the proposed effective date of April 13, 1996:

First Revised Sheet Nos. 8A and 8B

WNG states that this filing is being made pursuant to Article II, Section 10 of the Stipulation and Agreement dated November 24, 1992 (November 24 S & A), approved by Commission Order dated March 12, 1993 (61 FERC ¶ 61,240) and Article 14 of the General Terms and Conditions of its FERC Gas Tariff, Second Revised Volume No. 1. WNG hereby submits a further report of take-or-pay buyout, buydown and contract reformation costs and gas supply related transition costs, and the application or distribution of those costs and refunds.

WNG states that a copy of its filing was served on all participants listed on the service lists maintained by the Commission in the dockets referenced above and on all of WNG's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Sections 385.211 and 385.214 of the Commission's Rules and Regulations. All such motions or protests must be filed as provided in Section 154.210 of the Commission's Rules and Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Project No. 2569–004 Project No. 2538–001 New York]

Niagara Mohawk Power Corporation, Beebee Island Corporation; Notice of Availability of Draft Environmental Assessment

March 18, 1996.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission's) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the applications for a new licenses for the Black River and Beebee Island Projects located in Jefferson County, New York, and has prepared a Draft Environmental Assessment (DEA) for the projects. In the DEA, the Commission's staff has analyzed the potential environmental impacts of the existing projects and has concluded that approval of the projects, with appropriate environmental protection or enhancement measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the DEA are available for review in the Public Reference Branch,

Room 2A of the Commission's offices at 888 First Street, N.E., Washington, D.C. 20426.

Any comments should be filed within 30 days from the date of this notice and should be addressed to Lois D. Cashell, Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. Please affix "Black River Project No. 2569–004" and/or "Beebee Island Project No. 2538–001" to all comments. For further information, please contact Tom Camp at (202) 219–2832.

Lois D. Cashell,

Secretary.

[FR Doc. 96–6907 Filed 3–21–96; 8:45 am]

BILLING CODE 6717–01–M

[Project Nos. P–2660, et al.]

Hydroelectric Applications [Georgia-Pacific Corporation, et al.]; Notice of Applications

Take notice that the following hydroelectric applications have been filed with the Commission and are available for public inspection:

1 a. Type of filing: Notice of Intent to File an Application for a New License.

b. Project No.: 2660.

c. Date filed: August 21, 1995.

d. Submitted By: Georgia-Pacific Corporation, current licensee.

e. Name of Project: Forest City.

f. Location: On Forest City Stream, East Branch of the St. Croix River, in Aroostook and Washington Counties, Maine.

g. Filed Pursuant to: 18 CFR 16.6 of the Commission's regulations.

h. Effective date of original license: April 1, 1962.

i. Expiration date of original license: August 31, 2000.

j. The licensed project consists of: (1) the United States portion of a 500-foot-long dam having a 110-foot-long western embankment section, a 45-foot-long timber-crib spillway section containing two hand-operated wooden 8.3-foot-wide, 10-foot-high gates, and the western half of a 7-foot-wide center pier section; (2) the United States portion of a reservoir having a 17,040 acre surface area at normal pool elevation 434.94 feet m.s.l.; and (3) appurtenant facilities.

The unlicensed project works consist of: (1) the Canadian portion of a 500-foot-long dam having a 324-foot-long eastern embankment section, a pool and weir type fishway section containing six 6.5-foot-wide, 4.0-foot-deep pools, a hand-operated 8.3-foot-wide, 10.0-foot-high wooden gate, and the eastern half of a 7-foot-wide center pier section; and (2) the Canadian portion of a reservoir having a 17,040 acre surface area at normal pool elevation 434.94 feet m.s.l.

The project has no installed generating capacity.

k. Pursuant to 18 CFR 16.7, information on the project is available at: Woodland Mill, Main Street, Woodland, Maine 04694, (207) 427–3311.

l. FERC contact: Charles T. Raabe (202) 219–2811.

m. Pursuant to 18 CFR 16.11 and 16.19 each application for a new or subsequent license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by August 31, 1998.

2 a. Type of Application: Preliminary Permit.

b. Project No.: 11490–000.

c. Date Filed: July 11, 1994.

d. Applicant: Fall Line Hydro Company, Inc.

e. Name of Project: Augusta Canal Water Power Project.

f. Location: On the Savannah River, Richmond County, Georgia.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

h. Applicant Contact: Mr. Robert A. Davis III, Fall Line Hydro Company, Inc., P.O. Box 957265, Duluth, GA 30136, (404) 938–7769.

i. FERC Contact: Michael Dees (202) 219–2807.

j. Comment Date: May 17, 1996.

k. Description of Project: The proposed project would consist of: (1) an existing stone masonry dam approximately 1,600 feet long; (2) an existing 119-acre reservoir with a normal maximum surface elevation of 155 feet msl; (3) an existing section of the Augusta Canal; (4) a proposed intake structure; (5) a proposed powerhouse containing four 3.0 MW hydropower units; (6) a proposed tailrace structure approximately 150 feet long; (7) a proposed transmission line 1,600 feet long; and (8) appurtenant facilities. The applicant estimates that the annual energy generation would be 65,000 Mwh and that the cost of the studies to be performed under the permit would be $25,000. Project energy would be sold to Oglethorpe Power Corporation or another utility. The dam and canal are owned by the City of Augusta, GA.

l. This notice also consists of the following standard paragraphs: A5, A7, A9, A10, B, C, and D2.

3 a. Type of filing: Notice of Intent to File An Application for a New License.

b. Project No.: 3030.

c. Date filed: February 27, 1996.

d. Submitted By: Antrim County, Michigan, current licensee.

e. Name of Project: Elk Rapids.

f. Location: On the Elk River, in the Village of Elk Rapids, Antrim County, MI.

g. Filed Pursuant to: 18 CFR 16.6(b) of the Commission's regulations.

h. Effective date of original license: February 28, 1981.

i. Expiration date of original license: February 27, 2001.

j. The project consists of: (1) a forebay; (2) an 87-foot-long, 23.5-foot-high concrete and brick powerhouse and integral dam structure containing two 350-kW generating units for a total installed capacity of 700-kW; (3) a concrete spillway having stoplog control located on the Elk River about 450 feet southwest of the powerhouse; (4) a reservoir having a 34,000 acre surface area and a 75,000 acre-foot storage capacity at normal summer pool elevation 588.26 feet IGLD; (5) a tailrace to Grand Traverse Bay; (6) a 50-foot-long, 4,160-volt underground transmission line; and (7) appurtenant facilities.

k. Pursuant to 18 CFR 16.7, information on the project is available at: Antrim County Board of Commissioners, P.O. Box 520, Bellaire, MI 49615, (616) 533–6265.

l. FERC contact: Charles T. Raabe (202) 219–2811.

m. Pursuant to 18 CFR 16.19 and 16.20, each application for a new or subsequent license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by February 27, 1999.

4 a. Type of Application: New Major License.

b. Project No.: 2616–004.

c. Date Filed: December 18, 1991.

d. Applicant: Niagara Mohawk Power Corporation.

e. Name of Project: Hoosic River Hydroelectric Project.

f. Location: Hoosic River, Rensselaer and Washington counties, New York.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Jerry Sabattis, Hydro Licensing Coordinator, Niagara Mohawk Power Corporation, 300 Erie Boulevard West, Syracuse, NY 13202, (315) 474–1511.

i. FERC Contact: Edward R. Meyer (202) 208–7998.

j. Deadline Date: The Director, Office of Hydropower Licensing, is waiving that part of section 4.34(b) of the

regulations (see Order No. 533 issued May 8 1991, 56 FR 23108 (May 20, 1991)), that sets the deadlines. Therefore, all comments, recommendations, terms and conditions, and prescriptions concerning this application must be filed with the Commission by May 24, 1996. All reply comments must be filed with the Commission by July 8, 1996.

Also see paragraph D10.

k. Status of Environmental Analysis: The application and the response to the Commission's additional information request have been accepted for filing and the application is ready for environmental analysis. See attached paragraph D10.

l. Description of Project: The Hoosic River Project is located in Rensselaer and Washington counties, New York. The project consists of two developments, Johnsonville and Schaghticoke, which are located on the Hoosic River approximately 13.3 and 7.1 miles, respectively, from its confluence with the Hudson River. The applicant currently operates both developments as storage-and-release peaking facilities. The Johnsonville Dam creates a 450 acre impoundment at a normal maximum water surface elevation of 346 feet above mean sea level, a usable storage capacity of 1,790 acre-feet, and a gross maximum storage capacity of 6,430 acre-feet. The normal maximum vertical fluctuation of the Johnsonville impoundment is 4 feet. The Schaghticoke Dam creates a 198 acre impoundment at a normal maximum water surface elevation of 267 feet above mean sea level, a usable storage capacity of 190 acre-feet, and a gross maximum storage capacity of 1,150 acre-feet. The normal maximum vertical fluctuation of the Schaghticoke impoundment is 1 foot.

Schaghticoke Development

The Schaghticoke development includes: (a) a concrete gravity dam with 2.5-foot-high wooden flashboards; (b) a waste gate structure containing two steel timber gates; (c) a canal that leads to the pipeline intake structure containing an ice sluice; (d) one steel pipeline that leads to a steel surge tank; (e) five steel penstocks that exit the surge tank and lead to the powerhouse; and (f) a powerhouse containing four vertical Francis turbine-generator units and associated controls and equipment.

The total installed capacity of the Schaghticoke development is 15.1 megawatts (MW) with an annual average energy generation of 68,300 megawatt-hours (MWh) and a hydraulic capacity of 240 to 1,640 cubic feet per second (cfs). The facility creates a 1.96 mile bypass reach between the dam and powerhouse tailrace. The bypass reach currently receives no minimum flows. The powerhouse operates under a gross head of 153 feet. There are no transmission lines included in the existing development.

The applicant proposes to change the operation of the Schaghticoke development from storage-and-release peaking to storage-and-release pulsing. The applicant also proposes to repair and upgrade the plant facilities and automate operations via remote controls.

The applicant proposes to release a minimum flow of 10 cfs to the bypass reach and a base flow of 40 cfs downstream of the powerhouse. Impoundment fluctuations would be limited to 1 foot below the top of the flashboards or spillway crest.

The applicant proposes to replace the existing waterwheel exciters with two 150-kilowatt, 15 cfs fixed discharge propeller turbines. The installed capacity of the development would increase to 16.4 MW and, because of generator restrictions, the hydraulic capacity would decrease to 1,470 cfs.

Johnsonville Development

The Johnsonville development includes: (a) a concrete gravity dam with 2.5-foot-high wooden flashboards; (b) a gatehouse containing four iron sluice gates; (c) a concrete intake structure containing two bays; and (d) a powerhouse containing two horizontal double runner Francis turbines, two synchronous plant generators and associated controls and equipment.

The total installed capacity of the Johnsonville development is 4.8 MW with an annual average energy generation of 14,350 MWh and a hydraulic capacity of 380 to 1288 cfs. There is no substantial bypassed reach associated with the facility. The powerhouse operates under a gross head of 38 feet. There are no transmission lines included in the existing development.

The applicant proposes to change the operation of the Johnsonville development from storage-and-release peaking to storage-and-release pulsing. The applicant would also repair and upgrade the plant facilities and automate operations via remote controls. The applicant proposes to reduce the normal fluctuations in the impoundment from 4 feet to 1 foot. The applicant would release a base flow of 40 cfs downstream of the powerhouse.

The applicant proposes to enhance recreational facilities by: providing a recreational/educational trail system along the north shore downstream of the Buskirk Bridge (including an observation deck, interpretive signs, picnic area, fishing access points, and parking area); constructing car-top boat launch sites with picnic facilities on the southeast shore near the dam; constructing a canoe portage around the dam; and constructing a car-top boat launch near the Buskirk Bridge for access to the Johnsonville impoundment.

m. Purpose of Project: Project power would be utilized by the applicant for sale to its customers.

n. This notice also consists of the following standard paragraphs: A4 and D10.

o. Available Location of Application: A copy of this application, as amended and supplemented, is available for inspection and reproduction at the Commission's Public Reference and Files Maintenance Branch, located at 888 First Street, N.E., Room 2A, Washington, D.C., 20426, or by calling (202) 208–1371. A copy is also available for inspection and reproduction at Niagara Mohawk Power Corporation, 300 Erie Boulevard West, Syracuse, NY 13202, or by calling (315) 474–1511.

5 a. Type of filing: Notice of Intent to File An Application for a New (Subsequent) License.

b. Project No.: 2585.

c. Date filed: July 28, 1995.

d. Submitted By: Duke Power Company, current licensee.

e. Name of Project: Idols.

f. Location: On the Yadkin River, in Forsyth County, NC.

g. Filed Pursuant to: 18 CFR 16.6 of the Commission's regulations.

h. Effective date of original license: April 1, 1962.

i. Expiration date of original license: July 31, 2000.

j. The project consists of: (1) a 15-foot-high, 660-foot-long rubble masonry dam having an ungated spillway; (2) a 1-mile-long reservoir having a 35 acre surface area and no appreciable storage at normal pool elevation; (3) an integral stone masonry and wood powerhouse containing six generating units with a total installed capacity of 1,411-kW; and (4) appurtenant facilities.

k. Pursuant to 18 CFR 16.7, information on the project is available at: Duke Power Company, 422 South Church Street, Charlotte, NC 28242, (704) 382–8104.

l. FERC contact: Charles T. Raabe (202) 219–2811.

m. Pursuant to 18 CFR 16.19 and 16.20, each application for a new or subsequent license and any competing license applications must be filed with the Commission at least 24 months prior

to the expiration of the existing license. All applications for license for this project must be filed by July 31, 1998.

6 a. Type of Application: Minor License.

b. Project No.: 11574–000.

c. Date filed: February 23, 1996.

d. Applicant: City of Norwich, Department of Public Utilities.

e. Name of Project: Occum Project.

f. Location: on the Shetucket River, near the City of Norwich, New London County, Connecticut.

g. Filed Pursuant to: Federal Power Act 16 U.S.C. §§ 791 (a)–825(r).

h. Applicant Contact: Mr. Peter Polubiatko, Electric Division Manager, City of Norwich, Department of Utilities, 16 Golden Street, Norwich, CT 06360, (203) 823–4153.

i. FERC Contact: Michael Dees (202) 219–2807.

j. Comment Date: 60 days from the filing date in paragraph c.

k. Description of Project: The project would consist of the following features: (1) An existing dam, (2) a 90 acre reservoir, (3) a forebay, (4) an intake structure, (5) an existing powerhouse housing a hydropower unit with a capacity of 800 Kw; (6) a proposed fish passage facility; (7) an existing 4.8 Kv transmission line; and (8) appurtenant facilities.

l. With this notice, we are initiating consultation with the Connecticut State Historic Preservation Officer (SHPO), as required by section 106, National Historic Preservation Act, and the regulations of the Advisory Council on Historic Preservation, 36 CFR 800.4.

m. Pursuant to Section 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the filing date and serve a copy of the request on the applicant.

In addition to filing under the above paragraph, requests for additional studies may be submited on a 3½-inch diskette formatted for MS–DOS based computers. In light of our ability to translate MS–DOS based materials, the text need only be submitted in the format and version that it was generated (i.e., MS Word, Wordperfect 5.1/5.2, ASCII, etc.). It is not necessary to reformat word processor generated text to ASCII. For Macintosh users, it would be helpful to save the documents in Macintosh word processor format and then write them to files on a diskette formatted for MS–DOS machines.

7 a. Type of Application: Transfer of License.

b. Project No.: 10468–015.

c. Date Filed: February 28, 1996.

d. Applicant: Marsh Valley Hydroelectric Company Marsh Valley Development, Inc.

e. Name of Project: Marsh Valley.

f. Location: On the Portneuf River, in Bannock County, Idaho.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. §§ 791(a)–825(r).

h. Applicant Contact: Ted S. Sorenson, President, Marsh Valley Development, Inc., 5203 South 11th East, Idaho Falls, ID 83404, (208) 522–8069.

i. FERC Contact: Regina Saizan, (202) 219–2673.

j. Comment Date: May 3, 1996.

k. Description of Request: Marsh Valley Hydroelectric Company (MVHC), licensee, and Marsh Valley Development, Inc. (MVDI) request that the license for the Marsh Valley Project be transferred from MVHC to MVDI.

l. This notice also consists of the following standard paragraphs: B, C1, and D2.

Standard Paragraphs

A4. Development Application—Public notice of the filing of the initial development application, which has already been given, established the due date for filing competing applications or notices of intent. Under the Commission's regulations, any competing development application must be filed in response to and in compliance with public notice of the initial development application. No competing applications or notices of intent may be filed in response to this notice.

A5. Preliminary Permit—Anyone desiring to file a competing application for preliminary permit for a proposed project must submit the competing application itself, or a notice of intent to file such an application, to the Commission on or before the specified comment date for the particular application (see 18 CFR 4.36). Submission of a timely notice of intent allows an interested person to file the competing preliminary permit application no later than 30 days after the specified comment date for the particular application. A competing preliminary permit application must conform with 18 CFR 4.30(b) and 4.36.

A7. Preliminary Permit—Any qualified development applicant desiring to file a competing development application must submit to the Commission, on or before a specified comment date for the particular application, either a competing development application or a notice of intent to file such an application. Submission of a timely notice of intent to file a development application allows an interested person to file the competing application no later than 120 days after the specified comment date for the particular application. A competing license application must conform with 18 CFR 4.30(b) and 4.36.

A9. Notice of intent—A notice of intent must specify the exact name, business address, and telephone number of the prospective applicant, and must include an unequivocal statement of intent to submit, if such an application may be filed, either a preliminary permit application or a development application (specify which type of application). A notice of intent must be served on the applicant(s) named in this public notice.

A10. Proposed Scope of Studies under Permit—A preliminary permit, if issued, does not authorize construction. The term of the proposed preliminary permit would be 36 months. The work proposed under the preliminary permit would include economic analysis, preparation of preliminary engineering plans, and a study of environmental impacts. Based on the results of these studies, the Applicant would decide whether to proceed with the preparation of a development application to construct and operate the project.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "NOTICE OF INTENT TO FILE COMPETING APPLICATION", "COMPETING APPLICATION", "PROTEST", "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by

the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Federal Energy Regulatory Commission, at the above-mentioned address. A copy of any notice of intent, competing application or motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

D10. Filing and Service of Responsive Documents—The application is ready for environmental analysis at this time, and the Commission is requesting comments, reply comments, recommendations, terms and conditions, and prescriptions.

The Commission directs, pursuant to Section 4.34(b) of the Regulations (see Order No. 533 issued May 8, 1991, 56 FR 23108, May 20, 1991) that all comments, recommendations, terms and conditions and prescriptions concerning the application be filed with the Commission within 60 days from the issuance date of this notice (May 13, 1996 for Project No. 2616–004). All reply comments must be filed with the Commission within 105 days from the date of this notice (June 26, 1996 for Project No. 2616–004).

Anyone may obtain an extension of time for these deadlines from the Commission only upon a showing of good cause or extraordinary circumstances in accordance with 18 CFR 385.2008.

All filings must (1) bear in all capital letters the title "COMMENTS", "REPLY COMMENTS", "RECOMMENDATIONS," "TERMS AND CONDITIONS," or "PRESCRIPTIONS;" (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person submitting the filing; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, recommendations, terms and conditions or prescriptions must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). Agencies may obtain copies of the application directly from the applicant. Any of these documents must be filed by providing the original and the number of copies required by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426. An additional copy must be sent to Director, Division of Project Review, Office of Hydropower Licensing, Federal Energy Regulatory Commission, at the above address. Each filing must be accompanied by proof of service on all persons listed on the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b), and 385.2010.

Dated: March 18, 1996, Washington, D.C.

Lois D. Cashell,

Secretary.

[FR Doc. 96–6966 Filed 3–21–96; 8:45 am]

BILLING CODE 6717–01–P

Office of Hearings and Appeals

Implementation of Special Refund Procedures

AGENCY: Office of Hearings and Appeals, Department of Energy.

ACTION: Notice of Implementation of Special Refund Procedures.

SUMMARY: The Office of Hearings and Appeals (OHA) of the Department of Energy announces the procedures for disbursement of $721,973.05 (plus accrued interest) in alleged or adjudicated crude oil overcharges obtained by the DOE from Brio Petroleum, Inc. (Case No. VEF–0017), Merit Petroleum Company (Case No. VEF–0018), Transcontinental Energy Corp. (VEF–0020) and Utex Oil Co. (Case No. VEF–0021). The OHA has determined that the funds obtained from these firms, plus accrued interest, will be distributed in accordance with the DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases, 51 FR 27899 (August 4, 1986).

FOR FURTHER INFORMATION CONTACT: Richard W. Dugan, Associate Director, Office of Hearings and Appeals, 1000 Independence Avenue, S.W., Washington, D.C. 20585–0107, (202) 586–2860.

SUPPLEMENTARY INFORMATION: In accordance with 10 CFR 205.282(c), notice is hereby given of the issuance of the Decision and Order set forth below. The Decision and Order sets forth the procedures that the DOE has tentatively formulated to distribute a total of $721,973.05, plus accrued interest, remitted to the DOE by Brio Petroleum, Inc., Merit Petroleum, Inc., Transcontinental Energy Corp., and Utex Oil Co. The DOE is currently holding these funds in interest bearing escrow accounts pending distribution.

The OHA will distribute these funds in accordance with the DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases, 51 FR 27899 (August 4, 1986) (the MSRP). Under the MSRP, crude oil overcharge monies are divided among the federal government, the states, and injured purchasers of refined petroleum products. Refunds to the states will be distributed in proportion to each state's consumption of petroleum products during the price control period. Refunds to eligible purchasers will be based on the volume of petroleum products that they purchased and the extent to which they can demonstrate injury.

Because the June 30, 1995, deadline for crude oil refund applications has passed, no new applications from purchasers of refined petroleum products will be accepted for the 20 percent of these funds allocated to individual claimants.

Dated: March 14, 1996.

Thomas O. Mann,

Acting Director, Office of Hearings and Appeals.

Implementation of Special Refund Procedures

Names of Firms:
Brio Petroleum, Inc.
Merit Petroleum Company
Transcontinental Energy Corporation
Utex Oil Company

Date of Filings:
September 1, 1995

Case Numbers:
VEF–0017
VEF–0018
VEF–0020
VEF–0021

In accordance with the procedural regulations of the Department of Energy (DOE), 10 CFR Part 205, Subpart V, the Office of General Counsel, Regulatory Litigation (OGC) (formerly the Economic Regulatory Administration (ERA), Office of Enforcement Litigation), filed four Petitions for the Implementation of Special Refund Procedures with the Office of Hearings and Appeals (OHA) on September 1, 1995. The Petitions request that OHA formulate and implement procedures to distribute funds received by the DOE from Brio Petroleum, Inc. (Brio), Merit Petroleum Company (Merit), Transcontinental Energy Corp. (Transcontinental), and Utex Oil Company (Utex), as a result of enforcement proceedings against the firms.

On January 16, 1996, we issued a Proposed Decision and Order (PDO) that tentatively established refund procedures for the distribution of crude oil overcharge funds obtained from these four firms.[1] *Brio Petroleum, Inc.*, Case Nos. VEF–0017 *et al.*, 61 FR 1919 (January 24, 1996). We provided a period of 30 days from the date of the PDO's publication in the **Federal Register** in which the public could comment on the tentative refund procedures. More than 30 days have elapsed, and the OHA has received no comments concerning the proposed procedures. Accordingly, this Decision and Order sets forth the OHA's plan to distribute these funds received from the four firms.

I. Background

As indicated by the following summaries of the relevant enforcement proceedings, all of the funds that are subject to this Decision were obtained through enforcement actions involving alleged or adjudicated crude oil overcharges.

A. Brio

Brio [2] was a reseller of crude oil during the period May 1, 1978 through December 31, 1979 (the audit period), and was subject to the crude oil reseller regulations set forth at 10 CFR Part 212, Subpart L. As the result of an ERA audit of Brio's operations, on November 20, 1984, the ERA issued a Proposed Remedial Order (PRO) to the firm alleging that it had engaged in layered crude oil transactions in violation of 10 C.F.R. 212.186, by charging prices for crude oil in excess of actual purchase prices without providing any service or other function traditionally and historically associated with the resale of crude oil during the audit period. After denying a Statement of Objections filed by White, Brio was issued a Remedial Order (RO) by the OHA on April 16, 1987. *Brio Petroleum, Inc.*, 15 DOE ¶ 83,033 (1987).[3]

Subsequently, the matter was referred to the U.S. Department of Justice (DOJ) for enforcement of the RO. Although judgment was entered against Brio, the firm had previously filed for bankruptcy. The firm possessed assets insufficient to satisfy claims of general unsecured creditors, including the DOE. On July 14, 1993, the DOJ compromised the claim against White for $5,000. As of February 29, 1996, the Brio Consent Order fund contained $5,000 in principal plus $613.86 in accrued interest.

B. Merit

Merit [4] was a reseller of crude oil, and was subject to the crude oil reseller regulations set forth at 10 CFR Part 212, Subpart L. As the result of an ERA audit of Merit's operations, on October 20, 1986, the ERA issued a PRO to the firm alleging that during the period November 1978 through December 1980, the firm engaged in layered crude oil transactions in violation of 10 CFR Part 212.186, by charging prices for crude oil in excess of actual purchase prices without providing any service or other function traditionally and historically associated with the resale of crude oil. Merit submitted a Statement of Objections to the PRO. After considering and rejecting Merit's objections, the OHA issued an RO to Merit on January 31, 1990. *Merit Petroleum, Inc.*, 20 DOE ¶ 83,002 (1990). The RO found that Merit's layered transactions resulted in overcharges amounting to $48,290,793.17. The RO was affirmed by the Federal Energy Regulatory Commission (FERC). *Merit Petroleum, Inc.*, 65 FERC ¶ 61,175. During the course of a subsequent federal district court proceeding, Merit and the DOE stipulated to an Agreed Judgment, which resolved the Merit enforcement proceeding. Pursuant to the Agreed Judgment, Merit agreed to pay to the DOE the sum of $64,715. Merit has fulfilled its financial obligation to the DOE. As of February 29, 1996, the Merit Consent Order fund contained $64,715 in principal plus $3,766.80 in accrued interest.

C. Transcontinental

Transcontinental was a producer of crude oil during the period of January 1975 through December 1980, and was subject to the Federal petroleum price and allocation regulations. On March 30, 1979, the ERA issued a Notice of Probable Violation to Transcontinental alleging $372,151.67 in crude oil overcharge violations from several properties it operated. Transcontinental had filed a petition in bankruptcy on October 14, 1977, and had been adjudicated bankrupt on October 5, 1978. The trustee appointed by the Bankruptcy Court opposed DOE's claim, but the United States District Court in Nevada on appeal ruled in favor of the DOE. *In re Transcontinental Energy Corp.* v. *United States Department of Energy*, 3 Fed. Energy Guidelines ¶ 26,638 (D. Nev. 1990), *aff'd*, 950 F.2d 733 (Temp. Emer. Ct. App. 1991). Transcontinental's estate was insufficient to satisfy completely the claims of unsecured creditors, including the DOE. As a result, DOE received $231,335.32. As of February 29, 1996, the Transcontinental settlement fund contained $231,335.32 in principal plus $18,696.40 in accrued interest.

D. Utex

During the period of Federal petroleum price controls, Utex was engaged in producing and selling crude oil. Utex was therefore subject to the regulations governing the pricing of crude oil set forth at 10 C.F.R. Parts 205, 210, 211, and 212 of the Mandatory Petroleum Price and Allocation Regulations. On June 16, 1982, the ERA issued a PRO to the firm in which it alleged that during the period from July 1, 1975 through April 30, 1980, Utex improperly classified and priced crude oil produced from several properties it operated. In addition, the PRO also alleged that Utex disregarded the current cumulative deficiency rule, erroneously computed the base production control level, and erroneously applied the stripper well lease exemption to certain properties. As a result of these violations, the PRO alleged that Utex overcharged its customers by $502,833.21. Utex filed a Statement of Objections to the PRO on September 29, 1982. On February 19, 1985, the OHA issued the PRO as a RO. *Utex Oil Co.*, 12 DOE ¶ 83,031 (1985). The RO was affirmed by the FERC. *Utex Oil Co.*, 36 FERC ¶ 61,099 (1986). In the course of an appeal to the United States District Court in Utah, Utex and the DOE entered into a Stipulation for Withdrawal of Appeal and Judgment on Counterclaim and Order (Stipulation). Accepting the Stipulation, the Court granted DOE a judgment against Utex of $884,794.01. The judgment provided the basis for DOE's claim in the bankruptcy proceeding initiated by Utex on August 1, 1986. Utex's estate was insufficient to satisfy completely the claims of general unsecured creditors, including the DOE. As a result, DOE received distributions totalling $420,922.73. As of February 29, 1996, the Utex settlement fund contained $420,922.73 in principal plus $117,473.37 in accrued interest.

II. Jurisdiction and Authority

The Subpart V regulations set forth general guidelines which may be used by the OHA in formulating and implementing a plan of distribution of funds received as a result of an enforcement proceeding. The DOE policy is to use the Subpart V process to distribute such funds. For a more detailed discussion of Subpart V and the authority of the OHA to fashion procedures to distribute refunds, *see Petroleum Overcharge Distribution and Restitution Act of 1986*, 15 U.S.C. §§ 4501 *et seq.*; *see also Office of Enforcement*, 9 DOE ¶ 82,508 (1981), and *Office of Enforcement*, 8 DOE ¶ 82,597 (1981).

III. The Refund Procedures

A. Crude Oil Refund Policy

We adopt the tentative determination of the PDO to distribute the funds obtained from the four enforcement proceedings in accordance with DOE's Modified Statement of Restitutionary Policy in Crude Oil Cases (MSRP), 51 Fed. Reg. 27899 (August 4, 1986), which was issued as a result of the Settlement Agreement approved by the court in *In re The Department of Energy Stripper Well Exemption Litigation*, 653 F. Supp. 108 (D. Kan. 1986). Shortly after the issuance of the MSRP, the OHA issued an Order that announced that this policy would be applied in all Subpart V proceedings involving alleged crude oil violations. Order Implementing the MSRP, 51 Fed. Reg. 29689 (August 20, 1986) (the August 1986 Order).

Under the MSRP, 40 percent of crude oil overcharge funds will be disbursed to the federal government, another 40 percent to the states, and up to 20 percent may initially be reserved for the payment of claims to injured parties. The MSRP also specified that any funds remaining after all valid claims by injured purchasers are paid will be disbursed to the federal government and the states in equal amounts.

In April 1987, the OHA issued a Notice analyzing the numerous comments received in response to the August 1986 Order. 52 Fed. Reg. 11737 (April 10, 1987) (April 10 Notice). This Notice provided guidance to claimants that anticipated filing refund applications for crude oil monies under the Subpart V regulations. In general, we stated that all claimants would be required to (1) document their purchase volumes of petroleum products during the August 19, 1973 through January 27, 1981 crude oil price control period, and (2) prove that they were injured by the alleged crude oil overcharges. Applicants who were end-users or ultimate consumers of petroleum products, whose businesses are unrelated to the petroleum industry, and who were not subject to the DOE price regulations would be presumed to have been injured by any alleged crude oil overcharges. In order to receive a refund, end-users would not need to submit any further evidence of injury beyond the volume of petroleum products purchased during the period of price controls. See *City of Columbus Georgia*, 16 DOE ¶ 85,550 (1987).

B. Refund Claims

The amount of money subject to this Decision is $721,973.05 plus accrued interest. In accordance with the MSRP, we shall initially reserve 20 percent of those funds ($144,394.61 plus accrued interest) for direct refunds to applicants who claim that they were injured by crude oil overcharges. We shall base refunds to claimants on a volumetric amount which has been calculated in accordance with the description in the April 10 Notice. That volumetric refund amount is currently $0.0016 per gallon. See 60 FR 15562 (March 24, 1995).

Applicants who have executed and submitted a valid waiver pursuant to one of the escrows established by the Stripper Well Settlement Agreement have waived their rights to apply for a crude oil refund under Subpart V. See *Mid-America Dairyman Inc.* v. *Herrington*, 878 F.2d 1448, 3 Fed. Energy Guidelines ¶ 26,617 (Temp. Emer. Ct. App. 1989); *In re Department of Energy Stripper Well Exemption Litigation*, 707 F. Supp. 1267, 3 Fed. Energy Guidelines ¶ 26,613 (D. Kan 1987). Because the June 30, 1995, deadline for crude oil refund applications has passed, we shall not accept any new applications for these funds. See *Western Asphalt Service, Inc.*, 25 DOE ¶ 85,047 (1995). Instead, these funds will be added to the general crude oil overcharge pool used for direct restitution.[5]

C. Payments to the States and Federal Government

Under the terms of the MSRP, the remaining 80 percent of the alleged crude oil violation amounts subject to this Decision, or $577,578.44 plus accrued interest, should be disbursed in equal shares to the states and federal government, for indirect restitution. Refunds to the states will be in proportion to the consumption of petroleum products in each state during the period of price controls. The share or ratio of the funds which each state will receive is contained in Exhibit H of the Stripper Well Settlement Agreement. When disbursed, these funds will be subject to the same limitations and reporting requirements as all other crude oil monies received by the states under the Stripper Well Agreement.

Accordingly, we will direct the DOE's Office of the Controller to transfer one-half of that amount, or $288,789.22, plus interest, into an interest bearing subaccount for the states, and one-half or $288,789.22, plus interest, into an interest bearing subaccount for the federal government. In accordance with previous practice, when the amount available for distribution to the states reaches $10 million, we will direct the DOE's Office of the Controller to make the appropriate disbursement to the individual states.

It is therefore ordered That:

(1) The Director of Special Accounts and Payroll, Office of Departmental Accounting and Financial Systems Development, Office of the Controller of the Department of Energy shall take all steps necessary to transfer the consent order funds shown in the Appendix to this Decision and Order, plus all accrued interest from the escrow accounts of the firms listed in the Appendix, pursuant to Paragraphs (2), (3), and (4) of this Decision.

(2) The Director of Special Accounts and Payroll shall transfer $288,789.22 plus accrued interest, of the funds referenced in Paragraph (1) above, into the subaccount denominated "Crude Tracking-States," Number 999DOE0003W.

(3) The Director of Special Accounts Payroll shall transfer $288,789.22, plus

[1] One other firm, Texas American Oil Corporation (Texas American), was included in the PDO. However, because of additional information that we have received concerning the Texas American proceeding, that firm has been omitted from the present Decision and instead will be the subject of a new Proposed Decision.

[2] References to Brio in this Decision include L.B. White, President, Treasurer, and a Director (White), who maintained a controlling interest in the firm during the price control period.

[3] The RO found that the firm alone was liable for refunding $1,093,546, plus accrued interest, for the layering violations that occurred from May through July 1978. White and the firm were jointly liable for the layering violations which occurred after August 1, 1978, that resulted in overcharges amounting to $849,570.

[4] References to Merit in this Decision include Thomas H. Battle, President and a Director of Merit, and Anton E. Meduna, Vice President, a Director, General Manager and Secretary of Merit.

[5] A crude oil refund applicant is only required to submit one application for its share of all available crude oil overcharge funds. See, *e.g.*, *Ernest A. Allerkamp*, 17 DOE ¶ 85,079 at 88,176 (1988).

accrued interest, of the funds referenced in Paragraph (1) above, into the subaccount denominated "Crude Tracking-Federal," Number 999DOE002W.

(4) The Director of Special Accounts and Payroll shall transfer $144,394.16, plus accrued interest, of the funds referenced in Paragraph (1) above, into the subaccount denominated Crude Tracking-Claimants 4," Number 999DOE0010Z.

(5) This is a final Order of the Department of Energy.

Dated: March 14, 1996.

Thomas O. Mann for George B. Breznay,

Director, Office of Hearings and Appeals.

Federal Energy Regulatory Commission

Sunshine Act Meeting

The following notice of meeting is published pursuant to Section 3(a) of the Government in the Sunshine Act (Pub. L. No. 94–409), 5 U.S.C. 552b:

AGENCY HOLDING MEETING: Federal Energy Regulatory Commission.

DATE AND TIME: March 27, 1996—10:00 a.m.

PLACE: 888 First Street, N.E., Room 2C, Washington, D.C. 20426.

STATUS: Open.

MATTERS TO BE CONSIDERED: Agenda.

Note.—Items listed on the agenda may be deleted without further notice.

CONTACT PERSON FOR MORE INFORMATION: Lois D. Cashell, Secretary, Telephone (202) 208–0400. For a recording listing items stricken from or added to the meeting, call (202) 208–1627.

This is a list of matters to be considered by the Commission. It does not include a listing of all papers relevant to the items on the agenda; however, all public documents may be examined in the reference and information center.

ENVIRONMENTAL PROTECTION AGENCY

[AD–FRL–5444–9]

Agency Information Collection Activities: Proposed Collection; Comment Request; Renewal for Application Requirements for the Approval and Delegation of Federal Air Toxics Programs to State and Local Agencies

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3506 (c)(2)), this notice announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Renewal for Application Requirements for the Approval and Delegation of Federal Air Toxics Programs to State and Local Agencies, OMB No. 2060–0264 (ICR # 1643.02), expiration date July 31, 1996. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before May 21, 1996.

ADDRESSES: U.S. Environmental Protection Agency, Office of Air and Radiation, Office of Air Quality Planning and Standards, Information Transfer and Program Integration Division, Integrated Implementation Group, MD–12, Research Triangle Park, North Carolina 27711. Interested persons may obtain a copy of the ICR without charge by contacting Pamela J. Smith, at (919) 541–5319. Electronic copies of the ICR can be obtained from the Technology Transfer Network (TTN) Bulletin Board under "Recently Signed Rules".

FOR FURTHER INFORMATION CONTACT: Mr. Gil Wood, (919) 541–5272 (phone)/(919) 541–4028 (fax).

SUPPLEMENTARY INFORMATION: Affected Entities: Entities potentially affected by this action are State and local agencies participating in this voluntary program.

Title: Renewal for Application Requirements for the Approval and Delegation of Federal Air Toxics Programs to State and Local Agencies, OMB No. 2060–0264 (ICR # 1643.02), Expiration date July 31, 1996.

Abstract: The rule was developed in accordance with section 112(l)(2) of the Clean Air Act, as amended in 1990, which calls for the U.S. Environmental Protection Agency (EPA) to "publish guidance that would be useful to the States in developing programs. . . allowing for delegation of the Administrator's authorities and responsibilities to implement and enforce emissions standards and prevention requirements." Affected entities include State and local agencies choosing to participate in this voluntary program. No industries are included among respondents. The approval process consists of selecting one or any combination of three options that allow the respondent to adjust or substitute for a Federal rule or program. These three options include (1) approval of a rule which adjusts a section 112 rule, (2) approval of a rule which substitutes for a section 112 rule, and (3) approval of a program which substitutes for some or all of section 112 emission standards. These three approval options vary in the types of changes allowed and in the level of demonstrations required for approval. Respondents interested in utilizing this program are required to submit an application package to the reviewing agency. The contents of each submission varies with the option(s) chosen. Criteria applicable to all options include a letter from the State Attorney General assuring delegation authority, a copy of State statutes, resource demonstration, implementation schedule, compliance plan, and enforcement procedures. All submissions are voluntary on the part of the State or local agency and, therefore, the information collection requirements apply only to those agencies that voluntarily submit applications for delegation of authority. All application packages are submitted to the Administrator for approval. The information is needed to determine if a State or local agency submitting a request has met the criteria established in the 40 CFR part 63, subpart E rule. Certain information is necessary for the Administrator to determine acceptability of approving State rules or programs in lieu of Federal rules or programs. This collection is a one-time collection of information in the application package for the purpose of determining that the State or local agency has met the criteria specified in the rule. Resubmission is only required in instances where the State rule or program has been revised or if the approval has been withdrawn. The collection of information is authorized under 42 U.S.C. 7401–7671q. Information obtained by EPA is safeguarded according to the Agency policies set forth in Title 40, Chapter 1, part 2, subpart B, Confidentiality of Business Information. See 40 CFR 2; 41 FR 36902, September 1, 1976; amended by 43 FR 39999, September 8, 1978; 43 FR 42251, September 28, 1978; 44 FR 17674, March 23, 1979.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR chapter 15.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: As a part of this ICR renewal, the Agency will evaluate this rulemaking's burden and cost. "Burden" means the total time and effort expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency, including the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information. "Cost" means the value of resources expended to accomplish the tasks listed above, including the cost of labor and capital expenditures.

States, Tribal entities, and local entities will be the only affected entities for this rulemaking. Out of 54 States and Territories, the Agency estimates 40 percent (or 22) States will submit applications under this program. The Agency also expects each participating State will submit two applications under Options 1 and 2 during a 1-year period following promulgation of the rule and will submit a one-time application under Option 3.

Out of 80 local agencies, Indian tribes, etc., the Agency estimates 25 percent (or 20) local agencies, Indian tribes, etc. will submit applications under this program. It also estimates each participating agency will submit two applications under Options 1 and 2 during a 1-year period following promulgation of the rule and submit a one-time application under Option 3.

The Agency believes these submission estimates establish an upper bound to the potential scope of this rulemaking since State and local agencies may choose any combination of the three options and since reports for approval are expected to decrease in later years.

The Agency estimates the annual burden for the General criteria common to all options to be 39,608 person-hours per year. The estimated cost to State and local agencies is $1,269,232 per year.

The annual burden for Option #1, Adjusting a section 112 Rule, is estimated to be 4,367 person-hours per year. The Agency estimates the associated cost to State and local agencies is $148,599 per year.

The annual burden for Option #2, Substituting a section 112 rule, is estimated to be 26,082 person-hours per year. The Agency expects Option #2 will cost $835,858 per year.

The annual burden and cost for Option #3, Substituting a section 112 program, is estimated to be 8,936 person-hours and $286,354 per year.

The Agency estimates the annual burden for Review and Withdrawal at 621 person-hours per year, at a cost of $19,899 per year.

The total estimated cost for the three approval options including General criteria and Review and Withdrawal cost is $2.6 million; or $60 thousand per affected entity. The total burden for all options totals 80 thousand person-hours per year or two thousand person-hours per year for each affected entity. There may be variations in the annual bottom line since this is a one-time submittal. Periodic audits may occur at the discretion of the compliance and enforcement authorities.

Use of this rulemaking allows State and local agencies to gain approval of State air toxics rules and programs, which they can implement at a lower costs, thus providing them with a net decrease in terms of overall program expenditure. Because the above burdens and costs are based upon the *voluntary* participation of affected entities, it is believed that the use of this rulemaking will result in a net reduction in burden and costs to States, Tribal entities, and local entities. Additionally, the Agency believes this rulemaking is not significant because its cost is less than the $25 million significance level established under Executive Order 12866.

Send comments regarding these matters, or any other aspect of the information collection, including suggestions for reducing the burden, to the address listed above.

Dated: March 13, 1996.

Karen Blanchard,

Acting Director, Information Transfer and Program, Integration Division.

Agency Information Collection Activities; Ecosystem Monitoring Survey

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed Information Collection Request (ICR) to the Office of Management and Budget (OMB): Ecosystem Monitoring Survey. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before May 21, 1996.

ADDRESSES: Pacific Northwest Ecorisk Assessment Research Program, Western Ecology Division, National Health and Environmental Effects Laboratory, Office of Research and Development, U.S. Environmental Protection Agency, 200 SW 35th St., Corvallis, OR 97333. A copy of the ICR may be obtained without charge from the contact identified below.

FOR FURTHER INFORMATION CONTACT: Paul L. Ringold, Ph.D., (503) 754–4565, FAX (503) 754–4716, EMail: ringold@heart.cor.epa.gov.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which are involved with the use of monitoring data to support natural resource-related decisions in the Pacific Northwest.

Title: Ecosystem Monitoring Survey.

Abstract: The primary goal of the survey is to obtain information regarding the possible future requirements and applications of natural resources monitoring data in the Pacific Northwest. The survey will contribute to the process of designing monitoring programs for ecosystem management in the region, and will advance the ability of scientific and regulatory entities in the region to make informed decisions regarding resource management. Results of the survey will be used by the EPA in developing an integrated monitoring plan for the region. The survey will identify strengths and weaknesses of monitoring data, and suggest areas of broad data gaps in monitoring data specific to future regional natural resource management issues. The survey is targeted at monitoring issues which have not been specifically addressed by

FEMAT. There are three explicit objectives of the survey:

1. Identify the strengths and weaknesses of monitoring programs or data used in conjunction with one past natural resource-related decision.

2. Identify two of the most important future issues or decisions that could substantially affect natural resources in the region and identify monitoring data needs pertinent to each decision.

3. Identify the strengths and weaknesses of existing monitoring programs and data available to support these future decisions.

The survey is exploratory, and is not designed for statistical analysis of how monitoring data is used, or a critical evaluation of any specific monitoring program or system. The survey is voluntary, and although a list of interviewed individuals will accompany the published report, these individuals or organizations which they represent will not be associated with specific comments. The survey involves one and one-half hour interviews with approximately 30 persons representing State and local governments or other resource management entities in western Oregon and Washington. The information collection method will be personal interviews to maximize the likelihood of frank, informal perceptions of future resource issues and evaluations of monitoring programs, and longer responses containing valuable anecdotal information in regards to monitoring data supporting past decisions. The basic assumption is that the length and complexity of responses will be maximized in an interview situation where someone will be there to listen to respondent's ideas rather than read them later at some undetermined time, although respondents are encouraged to bring supporting materials to the interview if desired. Interviews will be tape recorded to minimize use of the respondent's time, and respondents will be offered the opportunity to review a summary of the interview before publication. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15. The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Estimates of the projected cost and hour burdens for this ICR are as follows.:

Hour burden (survey respondents): The public reporting burden (no recordkeeping is involved) for this one-time collection of information is estimated to average 2 hours and 40 minutes, comprised of the following components:

(i) 10 minute telephone contact to set up interviews (using a response rate of 50%, 60 persons will be contacted to arrange 30 interviews);

(ii) 30 minute review of background information and interview script;

(iii) 1.5 hour interview for 30 individuals; and

(iv) 30 minute review of interview summary (this is optional).

Total hour burden for survey: 2 hours and 40 minutes per respondent x 30 respondents = 80 hours, plus 5 hours (10 minutes x 30 persons) for persons who are contacted but choose not to participate in a personal interview, for a total of 85 hours.

Cost burden: There is no additional financial burden to respondents in the disclosure of information for this survey.

Dated: March 5, 1996.

Paul L. Ringold,

Ecologist, Regional Ecology Branch.

BILLING CODE 6560–50–P

[FRL–5444–1]

Agency Information Collection Activities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following proposed and/or continuing Information Collection Requests (ICRs) to the Office of Management and Budget (OMB). Before submitting the ICRs to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collections as described below.

DATES: Comments must be submitted on or before May 15, 1996.

ADDRESSES: Office of Grants and Debarment, 401 M Street SW., Washington, D.C. 20460, Mailstop 3903F.

FOR FURTHER INFORMATION CONTACT: Remit comments to: William G. Hedling, (202) 260–8269/Fax: (202) 401–2350/ hedling.william@epamail.epa.gov

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which apply for EPA assistance.

Title: GENERAL ADMINISTRATIVE REQUIREMENTS FOR ASSISTANCE PROGRAMS. EPA ICR #0938.05, OMB Control #2030–0020, Expiration 6/30/ 96.

Abstract: The information is collected from applicants/recipients of EPA assistance and is used to make awards, pay recipients and collect information on how Federal funds are being spent. EPA needs the information to meet its Federal stewardship. This Information Collection Request (ICR) renewal request authorizes the collection of information under EPA's General Regulations for Assistance Programs that establishes minimum management requirements for all recipients of EPA grants or cooperative agreements (assistance agreements). 40 CFR Part 30 "Grants with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations" includes the management requirements for these potential grantees. 40 CFR Part 31 "Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments" includes the management requirements for these potential grantees. These regulations include only those provisions mandated by statute, required by OMB Circulars or added by EPA to ensure sound and effective financial assistance management. This SF–83 combines all of these requirements under OMB Control Number 2030–0020. The information required by these regulations will be used by the EPA award official to make assistance awards, to make assistance payments, and to verify that the recipient is using Federal funds appropriately to comply with OMB Circulars. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9.

The EPA would like to solicit comments to:

(i) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) enhance the quality, utility, and clarity of the information to be collected; and

(iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The annual record keeping burden for this collection is estimated to average 32 hours per application. The estimated annual number of respondents is approximated 4,474. The estimated total burden hours on respondents: 143,168. The frequency of collection: as required.

Send comments regarding these matters, or any other aspect of information collection, including suggestions for reducing the burden, to the address listed above.

Dated: March 14, 1996.

Gary M. Katz,

Director, Grants Administration Division.

Acid Rain Program: Notice of Draft Written Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of draft written exemptions.

SUMMARY: The U.S. Environmental Protection Agency is issuing draft written exemptions from Acid Rain permitting and monitoring requirements to 11 utility units at 5 plants in accordance with the Acid Rain Program regulations (40 CFR part 72). Because the Agency does not anticipate receiving adverse comments, the exemptions are also being issued as a direct final action in the notice of written exemptions published elsewhere in today's **Federal Register**.

DATES: Comments on the exemptions proposed by this action must be received on or before April 22, 1996 or 30 days after publication of a similar notice in a local newspaper.

ADDRESSES: *Administrative Records.* The administrative record for the exemptions, except information protected as confidential, may be viewed during normal operating hours at the following locations: For plants in New York: EPA Region 2, 290 Broadway, New York, NY 10007–1866; for plants in Texas: EPA Region 6, First Interstate Bank Tower, 1445 Ross Avenue, Dallas, TX, 75202–2733; and for plants in Kansas and Missouri: EPA Region 7, 726 Minnesota Ave., Kansas City, KS, 66101.

Comments. Send comments to: For plants in New York, Conrad Simon, Director, Air and Waste Management Division, EPA Region 2, (address above); for plants in Texas, Samuel Coleman, P.E., Director, Compliance Assurance and Enforcement Division, EPA Region 6, (address above); and for plants in Kansas and Missouri, William Spratlin, Director, Air and Toxics Division, EPA Region 7, (address above).

Submit comments in duplicate and identify the exemption to which the comments apply, the commenter's name, address, and telephone number, and the commenter's interest in the matter and affiliation, if any, to the owners and operators of the unit covered by the exemption.

FOR FURTHER INFORMATION CONTACT: For plants in New York, Gerry DeGaetano, 212–637–4020; for plants in Texas, Dan Meyer, 214–665–7233, and for plants in Kansas and Missouri, Lisa Hanlon, 913–551–7599.

SUPPLEMENTARY INFORMATION: If no significant, adverse comments are timely received, no further activity is contemplated in relation to these draft written exemptions and the exemptions issued as a direct final action in the notice of written exemptions published elsewhere in today's **Federal Register** will automatically become final on the date specified in that notice. If significant, adverse comments are timely received on any exemption, that exemption in the notice of written exemptions will be withdrawn and all public comment received on that exemption based on the relevant exemption in this notice of draft written exemptions. Because the Agency will not institute a second comment period on this notice of draft written exemptions, any parties interested in commenting should do so during this comment period.

For further information and a detailed description of the exemptions, see the information provided in the notice of written exemptions elsewhere in today's **Federal Register**.

Dated: March 19, 1996.

Brian J. McLean,

Director, Acid Rain Division, Office of Atmospheric Programs, Office of Air and Radiation.

Acid Rain Program: Notice of Direct Final Written Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of written exemptions.

SUMMARY: The U.S. Environmental Protection Agency is issuing, as a direct final action, written exemptions from the Acid Rain permitting and monitoring requirements to 11 utility units at 5 plants in accordance with the Acid Rain Program regulations (40 CFR part 72). Because the Agency does not anticipate receiving adverse comments, the exemptions are being issued as a direct final action.

DATES: Each of the exemptions issued in this direct final action will be final on May 1, 1996 or 40 days after publication of a similar notice in a local newspaper, whichever is later, unless significant, adverse comments are received by April 22, 1996 or 30 days after publication of a similar notice in a local newspaper, whichever is later. If significant, adverse comments are timely received on any exemption in this direct final action, that exemption will be withdrawn through a notice in the **Federal Register**.

ADDRESSES: *Administrative Records.* The administrative record for the exemptions, except information protected as confidential, may be viewed during normal operating hours at the following locations. For plants in New York: EPA Region 2, 290 Broadway, New York, NY 10007–1866; for plants in Texas: EPA Region 6, First Interstate Bank Tower, 1445 Ross Avenue, Dallas, TX, 75202–2733; and for plants in Kansas and Missouri: EPA Region 7, 726 Minnesota Ave., Kansas City, KS, 66101.

FOR FURTHER INFORMATION CONTACT: For plants in New York, Gerry DeGaetano, 212–637–4020; for plants in Texas, Dan Meyer, 214–665–7233, and for plants in Kansas and Missouri, Lisa Hanlon, 913–551–7599.

SUPPLEMENTARY INFORMATION: All public comment received on any exemption in this direct final action on which significant, adverse comments are timely received will be addressed in a subsequent issuance or denial of exemption based on the relevant draft exemption in the notice of draft written exemptions that is published elsewhere in today's **Federal Register** and that is identical to this direct final action.

Under the Acid Rain Program regulations (40 CFR 72.7), utilities may petition EPA for an exemption from permitting and monitoring requirements for any new utility unit that serves one or more generators with total nameplate capacity of 25 MW or less and burns only fuels with a sulfur content of 0.05 percent or less by weight. On the earlier of the date a unit exempted under 40 CFR 72.7 burns any fuel with a sulfur content in excess of 0.05 percent by weight or 24 months prior to the date the exempted unit first serves one or more generators with total nameplate capacity in excess of 25 MW, the unit shall no longer be exempted under 40 CFR 72.7 and shall be subject to all permitting and monitoring requirements of the Acid Rain Program.

EPA is issuing written exemptions to the following new units, effective from January 1, 1996 through December 31, 2000:

Wamego units 1920–3, 1920–4, and 1920–5 in Kansas, operated by the City of Wamego. The designated representative for Wamego is Larry Fechter.

Malden units 2, 3, and 4 in Missouri, operated by the City of Malden. The designated representative for Malden is Gary Youngquist.

Vandalia units 4 and 5 in Missouri, operated by the City of Vandalia. The designated representative for Vandalia is Todd Hileman.

Additionally under the Acid Rain Program regulations (40 CFR 72.8), utilities may petition EPA for an exemption from Phase II permitting requirements for units that are retired prior to the issuance of a Phase II Acid Rain permit. Units that are retired prior to the deadline for continuous emissions monitoring system (CEMS) certification may also petition for an exemption from monitoring requirements.

While the exempt retired units have been allocated allowances under 40 CFR part 73, units exempted under 40 CFR 72.8 must not emit any sulfur dioxide or nitrogen oxides on or after the date the units are exempted, and the units must not resume operation unless the designated representative submits an application for an Acid Rain permit and installs and certifies its monitors by the applicable deadlines.

EPA is issuing written exemptions from Phase II permitting requirements and monitoring requirements, effective from January 1, 1996, through December 31, 2000, to the following retired units:

Waterside units 51 and 52 in New York, operated by Consolidated Edison. The designated representative for Waterside is M. Peter Lanahan, Jr.

Victoria unit 5 in Texas, operated by Central and Southwest Services, Inc. The designated representative for Victoria is E. Michael Williams.

Dated: March 19, 1996.

Environmental Impact Statements and Regulations; Availability of EPA Comments

Availability of EPA comments prepared March 4, 1996 through March 8, 1996 pursuant to the Environmental Review Process (ERP), under Section 309 of the Clean Air Act and Section 102(2)(c) of the National Environmental Policy Act as amended. Requests for copies of EPA comments can be directed to the Office of Federal Activities at (202) 564–7167.

An explanation of the ratings assigned to draft environmental impact statements (EISs) was published in FR dated April 14, 1996 (60 FR 19047).

Draft EISs

ERP No. D–AFS–J65243–MT Rating LO, Castle Mountians Allotment Management Plan, Implementation, Lewis and Clark National Forest, Musselshell and King Hill Ranger Districts, White Sulphur Springs, Meagher County, MT.

Summary: EPA expressed lack of objections and recommended that additional information including improved descriptions of State Water Quality Standards and linkages to State lists of water quality limited streams be included in the FEIS.

ERP No. D–BLM–K67032–NV Rating EO2, Round Mountain Mine Mill and Tailings Facility, Construction and Operation for the Smoke Valley Operation, Plan of Operations Amendment Approval, Nye County, NV.

Summary: EPA expressed environmental objections to the proposed project because it could result in significant adverse cumulative impacts to waterfowl attracted to the pit lake which could exceed water quality standards for wildlife. We also recommended additional information in the Final Environmental Impact Statement (FEIS) regarding mitigation measures; impacts to soil, vegetation, wildlife, livestock, and springs and seeps; and monitoring.

ERP No. D–SFW–G64012–00 Rating LO, Mexican Wolf (Canis lupus baileyi) Reintroduction within the Historic Range, Implementation, in the Southwestern United States, Catron, Dona Ana, Grant and Lincoln Counties, NM and Apache and Greenlee Counties, AZ.

Summary: EPA had no objections to the proposed action and concurs with the Fish and Wildlife Service's selection of Alternative A as the environmentally preferred alternative.

Final EISs

ERP No. F–NPS–K61128–CA Santa Rosa Island Development Concept Plan, Implementation and Funding, Channel Islands National Park, Santa Barbara County, CA.

Summary: EPA requested that the NEPA Record of Decision contain a commitment to implement the water quality protection measures contained in the FEIS.

Dated: March 18, 1996.

William D. Dickerson,

Director, NEPA Compliance Division, Office of Federal Activities.

BILLING CODE 6560–50–U

[ER–FRL–5414–5]

Intent To Prepare a Supplemental Environmental Impact Statement (SEIS) for the Alaska–Juneau (AJ) Mine Project, Juneau, AK

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of intent to prepare an SEIS.

SUMMARY: In accordance with Section 511(c)(1) of the Clean Water Act (CWA) and Section 102(2)(c) of the National Environmental Policy Act (NEPA) EPA has identified a need to prepare an SEIS and publishes this Notice of Intent in accordance with 40 CFR 1501.7.

FOR FURTHER INFORMATION OR TO SEND SCOPING COMMENTS: William Riley, Office of Water Mining Coordinator OW–135, EPA, 1200 Sixth Avenue, Seattle, WA 98101, phone (206) 553–1412. Local contact is Steve Torok, EPA's Juneau office, phone (907) 586–7619.

SUPPLEMENTARY INFORMATION: The proposed AJ Mine Project is subject to EPA authorization through CWA Section 402, including the National Pollutant Discharge Elimination System (NPDES) permit program. The project is a new source (40 CFR 122.2 and 122.29), and under CWA Section 511(c)(1) is subject to NEPA prior to the NPDES permit decision (40 CFR Part 6, Subpart F). The AJ Mine is an underground gold mine, located south of Juneau, Alaska, which closed in 1944. In 1988, Echo Bay, Alaska (Echo Bay) filed necessary permit applications to reopen the mine and an EIS was completed by the Bureau of Land Management in 1992. During the permitting phase, EPA completed a technical assistance report which concluded there was a high potential for significant degradation of the waters of the United States. Echo Bay proposed modifications to address concerns raised and filed new permit applications. EPA also commenced a rule-making that would allow consideration of submarine tailings disposal. New field studies to characterize marine and other resources are ongoing.

Project Description—The reopened AJ Mine would produce 15,000 tons per day of ore, and 80 million tons during the 13-year project life. Gold recovery would be by means of gravity separation and froth flotation processes in an underground mill. No cyanide would be used. Surface facilities would be located at the Rock Dump area south of Juneau. The tailings would be pumped through a pipeline in Gastineau Channel for discharge at depth in Stephens Passage. Power would be supplied by diesel-gas turbine generators. Staffing is estimated at 400 personnel.

Project alternatives currently considered include: (1) Douglas Island Dry Tailings—the tailings would be piped across Gastineau Channel, dewatered and conveyed to a dry tailings disposal area on Douglas Island, (2) Sheep Creek Subaqueous Tailings—similar to the proposed action in the 1992 FEIS except the impoundment would hold less tailings, no cyanide would be used, and the flows of Sheep Creek would be partially diverted around the impoundment, (3) Powerline Gulch Subaqueous Tailings—similar to an option in the 1992 FEIS, except the impoundment would hold less tailings, no cyanide would be used, and surface runoff would be diverted around the impoundment, (4) Mine Backfill and Douglas Island Dry Tailings—combining backfilling of cemented tailings with surface disposal at a reduced dry tailings site on Douglas Island, (5) Submarine Tailings Disposal Upland Pipeline—similar to the proposal, except the tailings pipeline would follow an upland route along Gastineau Channel and to Stephens Passage for discharge.

SCOPING MEETING DATE AND COMMENT DEADLINE: On April 17, 1996, EPA will host an SEIS scoping open house at Centennial Hall in Juneau from 3:00 to 9:00 p.m. Scoping comments from the public will be welcomed that day, or they may be submitted to EPA in writing. The scoping period comment deadline is April 30, 1996.

ESTIMATED DATE OF DRAFT SEIS RELEASE: September, 1996.

Dated: March 20, 1996.

Richard E. Sanderson,

Director, Office of Federal Activities.

[FRL–5445–6]

Underground Injection Control Program Hazardous Waste Land Disposal Restrictions; Petition for Exemption—Class I Hazardous Waste Injection Well, American Ecology Environmental Services Corporation (AEESC)

AGENCY: Environmental Protection Agency.

ACTION: Notice of Final Decision on Exemption Modification.

SUMMARY: Notice is hereby given that a petition for modification to an exemption to the land disposal restrictions under the 1984 Hazardous and Solid Waste Amendments to the Resource Conservation and Recovery Act has been granted to AEESC, for the Class I injection wells located at the Winona, Texas facility. As required by 40 CFR Part 148, the company has adequately demonstrated to the satisfaction of the Environmental Protection Agency by petition and supporting documentation that, to a reasonable degree of certainty, there will be no migration of hazardous constituents from the injection zone for as long as the waste remains hazardous. This final decision allows the underground injection by AEESC of the specific restricted hazardous waste identified in the petition modification, into the Class I hazardous waste injection wells at the Winona, Texas facility specifically identified in the petition for as long as the basis for granting an approval of this petition remains valid, under provisions of 40 CFR 148.24. As required by 40 CFR 124.10, a public notice was issued on May 17, 1995. The public comment period ended on July 7, 1995, was re-opened on August 10, 1995 and closed on September 8, 1995. This decision constitutes final Agency action and there is no Administrative appeal.

DATES: This action is effective as of March 14, 1996.

ADDRESSES: Copies of the petition for modification and all pertinent information relating thereto are on file at the following location: Environmental Protection Agency, Region 6, Water Quality Protection Division, Source Water Protection Branch (6WQ–S), 1445 Ross Avenue, Dallas, Texas 75202–2733.

FOR FURTHER INFORMATION CONTACT: Larry Wright, Chief, Ground Water/UIC Section, EPA—Region 6, telephone (214) 665–7165.

William B. Hathaway,

Director, Water Quality Protection Division.

Receipt of a Notification to Conduct Small-Scale Field Testing of a Genetically-Engineered Microbial Pesticide

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has received from American Cyanamid Company of New Jersey a notification (241-NMP-G) of intent to conduct small-scale field testing involving a baculovirus *Autographa californica* Multiple Nuclear Polyhedrosis Virus (ACMNPV) which has been genetically engineered to contain a gene which encodes for an insect-specific protein toxin from the venom of the scorpion *Androctonus australis*. American Cyanamid intends to test this microbial pesticide on cotton, tobacco, and leafy vegetables in 12 states. Target pests for these field trials include the cabbage looper (*Trichoplusia ni*) and the tobacco budworm (*Heliothis virescens*). The Agency has determined that the application may be of regional and national significance. Therefore, in accordance with 40 CFR 172.11(a), the Agency is soliciting public comments on this application.

DATES: Written comments should be submitted to EPA by April 22, 1996.

ADDRESSES: Comments in triplicate, must bear the docket control number OPP–50816 and be submitted to: Public Docket and Freedom of Information Section, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington DC 20460.

Comments and data may also be submitted electronically by sending electronic mail (e-mail) to: opp-docket@epamail.epa.gov. Electronic comments must be submitted in ASCII file avoiding the use of special characters and any form of encryption. Comments and data will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All comments and data in electronic form must be identified by docket number OPP–50816. No CBI should be submitted through e-mail. Electronic comments on this action may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found under the SUPPLEMENTARY unit of this document.

FOR FURTHER INFORMATION CONTACT: Linda Hollis, Biopesticides and Pollution Prevention Division (7501W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location, telephone number, and e-mail address: 5th Floor, CS #1, 2805 Jefferson Davis Hwy., Arlington, VA, (703)308–8733; e-mail: hollis.linda@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: A notification of intent to conduct small-scale field testing pursuant to EPA's Statement of Policy entitled, "Microbial Products Subject to the Federal Insecticide, Fungicide, and Rodenticide Act and the Toxic Substances Control Act," published in the **Federal Register** of June 26, 1986 (51 FR 23313), has been received from American Cyanamid Company of New Jersey (NMP No. 241-NMP-E). The proposed small-scale field trial involves the introduction of a genetically-engineered isolate of the baculovirus *Autographa californica* Multiple Nuclear Polyhedrosis Virus (AcMNPV). The strain to be tested (vEGTDEL-AaIT) has been genetically modified with approximately 1 kilobase internal deletion in the ecdysteroid UDP-glucosyltransferase gene and an inserted gene which encodes an insect-specific toxin protein from the venom of the scorpion *Androctonus australis*.

The purpose of the proposed testing will be to evaluate the efficacy of this genetically-altered AcMNPV (relative to the gene-deleted construct and a commercial *Bacillus thuringiensis* insecticide) against certain lepidopteran species (*Trichoplusia ni* (cabbage looper) and *Heliothis virescens* (tobacco budworm) on tobacco, cotton and leafy vegetables.

The proposed program consists of a total of 20 field trials to be conducted in spring 1996 thru fall 1996. Testing will occur in 12 states: Alabama, Arkansas, California, Florida, Georgia, Illinois, Louisiana, Mississippi, New Jersey, North Carolina, Texas, and Virginia. For each crop to to be treated, the following number of trials and treatments are proposed: Leafy vegetables/6 trials, 5 total treatments; cotton/11 trials, 10 total treatments; and tobacco/3 trials, 6 total treatments. All sites will be located on secured research or commercial farmland with limited public access.

There will be a maximum of four plots per treatment and a maximum of six applications per treatment. The maximum size of a given treatment plot in each test will be 0.02 acres (4 rows wide x 75ft. long). The total acreage treated with the genetically modified construct will consist of 7.4 acres. The total amount of active ingredient to be used will be 98.25g.

Treated plots will be buffered on either side by an untreated row. Alleyways (6') will be cut between replicates. Entire trials will be surrounded by a 10' crop-free buffer zone. Small-scale ground-based spray equipment will be used. Equipment will be cleaned with hypochlorite after applications with construct. Upon completion of the trials, crops will remain standing for at least 2 weeks to maximize the natural degradation of the remaining Polyhedral Inclusion Bodies (PIBs) before being shredded and interred into the soil.

Weekly monitoring of target insects and those non-target insects will take place within treated plots. Following review of American Cyanamid Company's application and any comments received in response to this notice, EPA will decide whether or not an experimental use permit is required.

EPA has established a record for this notice under docket number OPP–50816 (including comments and data submitted electronically as described below). A public version of this record, including printed, paper versions of electronic comments, which does not include any information claimed as (CBI), is available for inspection from 8 a.m. to 4:30 p.m., Monday through Friday, except legal holidays. The public record is located in Room 1132 of the Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

Electronic comments can be sent directly to EPA at:

opp-docket@epamail.epa.gov

The official record for this document, as well as the public version, as described above will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all comments submitted directly in writing. The official record is the paper record maintained at the "ADDRESSES" unit at the beginning of this document.

Reporting Requirements for Risk/Benefit Information; Notification to the Secretary of Agriculture

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification to the Secretary of Agriculture.

SUMMARY: Notice is given that the Administrator of EPA has forwarded to the Secretary of Agriculture a final regulation under section 6(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). The rule defines the obligations of pesticide registrants under section 6(a)(2) to report to the Agency information indicating their products may cause unreasonable adverse effects. This action is required by FIFRA section 25(a)(2).

FOR FURTHER INFORMATION CONTACT: By mail: James V. Roelofs, Policy and Special Projects Staff (7501C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington DC 20460. Office location and telephone number: Rm. 1113, CM #2, 1921 Jefferson Davis Highway, Arlington, VA., telephone: 703–308–2964, e-mail: roelofs.james@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: Section 25(a)(2) of FIFRA provides that the Administrator shall provide the Secretary of Agriculture with a copy of any final regulation at least 30 days before signing it for publication in the **Federal Register**. If the Secretary comments in writing regarding the final regulation within 15 days after receiving it, the Administrator shall issue for publication in the **Federal Register**, with the final regulation, the comments of the Secretary, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. If the Secretary does not comment in writing within 15 days after receiving the final regulation, the Administrator may sign the regulation for publication in the **Federal Register** anytime thereafter.

Authority: 7 U.S.C. 136 et seq.

Dated: March 13, 1996.

FEDERAL COMMUNICATIONS COMMISSION

[WT Docket 96–41; FCC 96–85]

Hearing Designation Order; Liberty Cable Co., Inc.

AGENCY: Federal Communications Commission.

ACTION: Notice of Hearing Designation Order and Notice of Opportunity for Hearing.

SUMMARY: Fifteen applications for operational fixed microwave service (OFS) facilities filed by Liberty Cable Co., Inc. (Liberty) are designated for hearing. The Commission has determined that substantial and material questions of fact exist as to whether Liberty possesses the requisite qualifications to be a Commission licensee.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT: Joseph Weber, Enforcement Division, Wireless Telecommunications Bureau, (202) 418–1317.

SUPPLEMENTARY INFORMATION: This is a summary of Hearing Designation Order and Notice of Opportunity for Hearing in WT Docket 96–41, adopted March 4, 1996, and released March 5, 1996.

The full text of Commission decisions are available for inspection and copying during normal business hours in the FCC Dockets Branch (Room 230), 1919 M Street, N.W., Washington, D.C. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., 2100 M Street, N.W., Suite 140, Washington, D.C. 20037, (202) 857–3800.

Summary of Hearing Designation Order and Notice of Opportunity for Hearing

The Commission has designated 15 OFS applications filed by Liberty for hearing. Liberty is a multichannel video programming distributor and provides video services to customers in New York City using OFS facilities. The Commission has learned that Liberty has been providing service to non-commonly owned buildings which Liberty has interconnected with hardwire without a cable franchise. At the time Liberty was interconnecting these buildings, the Communications Act defined the interconnection of non-commonly owned buildings a operating a cable system. The Act requires in order to be a cable operator, a cable franchise must first be obtained. Because Liberty never obtained a cable franchise, Liberty is in apparent

violation of the Communications Act. Several of the applications Liberty has filed were to replace the hardwire connection with an OFS path. Those applications were designated to determine whether the facts and circumstances surrounding Liberty's interconnecting of non-commonly owned buildings without a franchise bears on its qualifications to be a Commission licensee.

Second, Liberty has admitted to commencing operation of several facilities prior to being granted authority to do so. In some instances, Liberty commenced operation prior to applying for such authority. The Commission determined that this raises a substantial and material question of fact regarding Liberty's qualifications to be a licensee. Accordingly, all of the applications for facilities which Liberty commenced operation without prior authority were designated for hearing.

Finally, one Liberty official, who at the time certain statements were made was Liberty's chief of engineering, filed contradictory statement with the Commission and the U.S. District Court for the Southern District of New York. The statements concerned the reasons for the premature operation of the facilities. Because the Commission could not resolve the discrepancy between the two statements, the Commission found that material and substantial questions of fact exist regarding Liberty's truthfulness before the Commission, and an appropriate issue was designated.

Pursuant to Section 309(e) of the Communications Act of 1934, as amended, 15 of Liberty's applications for operational fixed microwave services facilities have been designated for hearing upon the following issues listed below:

(1) (a) To determine the facts and circumstances surrounding Liberty Cable Co., Inc.'s operation of hardwired interconnected, non-commonly owned buildings, without first obtaining a franchise. *See* 47 U.S.C. 541(b)(1), 47 U.S.C. Title VI and 47 CFR § *76* et seq.

(b) To determine whether Liberty Cable Co., Inc. has violated Section 1.65 of the Commission's Rules, 47 CFR § 1.65, by failing to notify the Commission of its provision of service to interconnected, non-commonly owned buildings.

(c) To determine whether, based on (1)(a) and (b) above, Liberty is qualified to be granted the above-captioned private operational fixed microwave authorizations.

(2) (a) To determine the facts and circumstances surrounding Liberty Cable Co., Inc.'s admitted violations of Section 301 of the Communications Act and Section 94.23 of the Commission's Rules, 47 U.S.C. 301, 47 CFR § 94.23, by operating certain private operational fixed microwave facilities without first obtaining Commission authorization.

(b) To determine whether Liberty Cable Co., Inc. has violated Section 1.65 of the Commission's Rules, 47 CFR 1. § 1.645, by failing to notify the Commission of its premature operation of service in either its underlying applications or its requests for special temporary authority.

(c) To determine whether, based on (2)(a) and (b) above, Liberty is qualified to be granted the above-captioned private operational fixed microwave authorizations.

(3) (a) To determine whether Liberty Cable Co., Inc., in relation to its interconnection of non-commonly owned buildings and its premature operation of facilities, misrepresented facts to the Commission, lacked candor in its dealings with the Commission, or attempted to mislead the Commission, and in this regard, whether Liberty Cable Co., Inc. has violated Section 1.17 of the Commission's Rules, 47 CFR § 1.17.

(b) To determine whether, based on (3)(a), above, Liberty is qualified to be granted the above-captioned private operational fixed microwave authorizations.

(4) To determine, based on the evidence adduced in issues (1) through (3) above, whether Liberty Cable Co., Inc. possesses the requisite character qualifications to be granted the above-captioned private operational fixed microwave authorizations for which it has applied and, accordingly, whether grant of its applications would serve the public interest, convenience and necessity.

The Commission has further placed Liberty on notice that the presiding administrative law judge may find that Liberty has violated any provision of the Communications Act or any Commission rule and impose a forfeiture up to the statutory maximum.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

BILLING CODE 6712–01–M

Low Power Television and Television Translator Filing Window From April 22, Through April 26, 1996

AGENCY: Federal Communications Commission.

ACTION: Notice of Filing Window.

SUMMARY: This action gives notice of an application filing window for the tendering of applications for major changes in existing facilities for low power television and television translator stations. This notice sets forth the filing procedures, including when and where to file and the applicable application form to be used, and information concerning application filing fees.

DATES: April 22, 1996 through April 26, 1996.

FOR FURTHER INFORMATION CONTACT: Hossein Hashemzadeh, Low Power Television Branch, Mass Media Bureau, (202) 418–1650.

SUPPLEMENTARY INFORMATION:

Notice of Low Power Television/ Television Translator "Major Change Only" Filing Window From April 22, 1996 Through April 26, 1996

Released: March 18, 1996.

Commencing April 22, 1996, and continuing to and including April 26, 1996, the Commission will permit the filing of applications for MAJOR CHANGES ONLY in existing facilities for low power television and television translator stations (LPTV).

Major Change Limitation

As set forth in Section 73.3572 of the Commission's Rules, a major change in facilities for a LPTV station includes any change in frequency (output channel) assignment, transmitting antenna system, antenna height or authorized operating power. Any change in antenna location exceeding 200 meters also constitutes a major change. Section 73.3572 does not explicitly limit the distance by which a major change applicant may propose to move its station's antenna location. In previous LPTV filing windows, which were open generally to applicants for new station construction permits, as well as major change applicants, we have seen major change applicants that proposed to change antenna locations well beyond 200 meters, resulting in cessation of service in the current viewing area and movement to an entirely new community. In all significant respects, those applications were the equivalent of applications for new station construction permits. In view of our decision to proscribe the filing of new LPTV construction permit applications at this time, some geographic limitation on antenna relocations must be imposed. Accordingly, applications to change antenna locations will not be accepted in this filing window if they propose to move the location of the antenna more than 64.4 kilometers (40 miles) from the presently authorized location. This limitation should afford applicants ample flexibility to relocate transmitting facilities and improve their existing operations.

New Station Prohibition

The filing of applications for new construction permits for LPTV stations will not be permitted at this time. In previous filing windows, the Commission has allowed the filing of applications for new LPTV stations that specify transmitter site coordinates (geographic latitude and longitude) located more than 161 kilometers (100 miles) from reference coordinates of 36 urban areas. These geographic restrictions were necessitated by the Commission's proceeding on Advanced Television Systems (ATV) and the large number of low power television and television translator stations already authorized in and around these metropolitan areas. Because it is possible that some of these stations would be displaced in channel, if and when the spectrum is needed by full-service stations for ATV use, the geographic restriction against additional new stations in and around these urban areas was intended to minimize the extent to which LPTV service to the public could be disrupted. Limiting this window to the filing of certain major change applications, pending further action in the ATV proceeding, will further minimize possible disruption of low power television and television translator service to the public.

Filing Locations

All LPTV applications that are subject to the payment of a fee must be filed at the Pittsburgh, Pennsylvania locations specified herein. Those LPTV applicants that are fee exempt, as explained later in this Public Notice, must file their applications directly with the Federal Communications Commission at the location specified herein.

Applications Requiring a Fee

Generally, applicants seeking to make a major change in the facilities of an existing low power television or television translator station are required to pay and submit a fee with the filing of the application. The March 1996 edition of FCC Form 346, which is to be used during this window period, contains instructions for providing the fee information called for in Section I, Questions 1 and 2 of the application. Applicants should complete those questions, specifying "MOL" as the Fee Type Code and attaching (but not stapling) their $490.00 remittance for the requisite fee.

Payment of the required fee can be made by check, bank draft, money order or credit card. If paying by check, bank draft or money order, your remittance must be denominated in U. S. dollars, drawn upon a U.S. financial institution and made payable to the Federal Communications Commission. No postdated, altered or third-party check will be accepted. DO NOT SEND CASH. Checks dated six months or older will not be accepted for filing.

Applicants who wish to pay their filing fee by money order or credit card must submit FCC Form 159 (Remittance Advice), together with their application. Applicants who wish to pay for more than one major change application with a single payment must also submit FCC Form 159, listing each application as a separate item on FCC Form 159. If additional entries are necessary, FCC Form 159C (Continuation Sheet) is to be used. Those applicants electing to pay in a manner that requires the submission of FCC Form 159 must still complete Section I, Question 1 of FCC Form 346 (March 1996 edition). Question 2 of Section I need not be completed, but FCC Form 159 must be submitted instead. If other than the March 1996 edition of FCC Form 346 is utilized, FCC Form 159 MUST be used regardless of the manner of payment.

The March 1996 edition of FCC Form 346, as well as FCC Forms 159 and 159C, can be obtained by calling the FCC's Forms Distribution Center at Telephone Number (202) 418–3676 or 1–800–418–3676 and leaving your request on the answering machine provided for this purpose. These forms are also available by using the FCC's Fax-On-Demand system. Copies may be ordered via fax 24-hours a day by calling Telephone Number (202) 418–0177 from the handset of any fax machine. For the March 1996 edition of FCC Form 346, the document retrieval number is 000346, whereas the document retrieval number for FCC Form 159 and 159C is 000159. Callers should follow the system voice prompts and enter the document retrieval numbers when requested. Due to the limited number of telephone lines into the FCC's Fax-On-Demand system, callers may wish to call during non-business hours. If callers have any difficulty with transmission of their fax, they should contact Dorothy Conway at Telephone Number (202) 418–0217.

For applications requiring a fee, the Commission will utilize the facilities of a Treasury Department lockbox bank. These filings can be made, either by mail or by person, at the following locations ONLY:

If mailed—Federal Communications Commission, Low Power Television Window Filing, P.O. Box 358992, Pittsburgh, PA 15251–5992

If hand-delivered—Federal Communications Commission, Low Power Television Window Filing, Three Mellon Bank Center, 525 William Penn Way, Pittsburgh, PA 15259, Attn: Wholesale Lockbox Shift Supervisor.

Mailed applications must be *actually received* no later than Friday, April 26, 1996. Hand-carried or couriered applications can be delivered at the Three Mellon Bank Center location at any time during the window period up through 11:59 p.m. on Friday, April 26, 1996. Submissions tendered after 11:59 p.m. on Friday, April 26, 1996, will not be accepted. Detailed instructions to get to this location are included in this Public Notice as Attachment I.

An original and two copies of the application and all required exhibits must be filed. To facilitate the initial processing of these applications, all applicants are requested to enclose in a single envelope the original and duplicate copies of the application, with each duplicate copy clearly denoted by the applicant. Where more than one major change application is being filed, separate envelopes enclosing the individual application (*i.e.*, an original and two copies) can be mailed in a single package. Receipts will not be provided by the lockbox bank facility. However, a "stamp receipted copy" will be furnished by the lockbox bank facility *provided* the applicant clearly identifies the copy to be stamped, and the filing is submitted with the "stamp receipted copy" on top of the original application package. Requests for "stamp receipted copies" must include a stamped, self-addressed envelope of sufficient size to accommodate the stamp receipted copy to be returned. If the "stamp receipted copy" is submitted in any other format or the envelope is not of sufficient size, it will not be stamped and returned. For hand-carried or couriered applications delivered to the Three Mellon Bank Center location, bank personnel, if requested in person, will date stamp as received a proffered copy of the application and return it to the requester. Only one piece of paper per individual application will be stamped for receipt purposes.

Applications submitted without a FCC Form 159, if required, with insufficient or inappropriate payments, or without any payments will be dismissed and returned to the applicant

without processing. See Section 1.1107 of the Commission's Rules. Following the fee review process, applications that are found to be patently defective or not "substantially complete," will be rejected and returned to the applicant. See Section 73.3564 of the Commission's Rules.

Applications Not Requiring a Fee

Governmental entities are exempt from the $490.00 fee. As defined by the Commission's rules, governmental entities include "any possession, state, city, county, town, village, municipal corporation or similar political organization or subpart thereof controlled by publicly elected and/or duly appointed public officials exercising sovereign direction and control over their respective communities or programs." Also exempted from this fee are noncommercial educational FM and full-service television broadcast station licensees seeking to make major changes in the facilities of their existing low power television or television translator stations, *provided* those stations operate or will be operated on a noncommercial educational basis. A licensee or permittee of a low power television or television translator station, which is filing a major change application and which earlier obtained either a fee refund because of a NTIA facilities grant for that station or a fee waiver because of demonstrated compliance with the eligibility and service requirements of Section 73.621 of the Commission's Rules, is similarly exempt from payment of the $490.00 fee. *See* Section 1.1112 of the Commission's Rules. To avail itself of any fee exemption an applicant must indicate its eligibility by checking the most appropriate box in Question 2, Section I of FCC Form 346 (March 1996 edition). Again, the March 1996 edition of FCC Form 346 can be obtained by calling the FCC Forms Distribution Center or the FCC's Fax-On-Demand system.

Filing of LPTV window applications not requiring the payment of a fee can be made either by mail or by person, at the following locations ONLY:

If mailed—Federal Communications Commission, Low Power Television Window Filing, Room 222, 1919 M Street NW., Washington, D.C. 20554

If hand-delivered—Federal Communications Commission, Secretary's Office, Room 222, 1919 M Street NW., Washington, D.C. 20554.

Mailed applications must be *actually received* no later than April 26, 1996. Hand-carried or couriered applications can be delivered daily during the filing window at the Secretary's Office from 8:00 a.m. to 5:30 p.m. Applications tendered after 5:30 p.m. on Friday, April 26, 1996, will not be accepted.

For further information concerning the filing window, contact Hossein Hashemzadeh, Low Power Television Branch, Mass Media Bureau at Telephone Number (202) 418–1650.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

Attachment—Directions to Three Mellon Bank Center

From Greater Pittsburgh International Airport and Interstate 79

Proceed east on Parkway (Interstate 279) towards downtown Pittsburgh. Go through the Fort Pitt tunnels and across the Fort Pitt Bridge. Follow signs to Parkway East (Monroeville). Travel approximately 1/4 of a mile to the Grant Street Exit (Exit 3). Proceed on Grant Street to 6th Street. Make a left on 6th Street, go one block, make another left onto William Penn Way. The street address is 525 William Penn Way. Enter building at designated entrance and follow signs.

From Pennsylvania Turnpike

Take Exit 6 (Monroeville) to Parkway (Interstate 376). Go west on Parkway to the Grant Street Exit (Exit 3). Proceed on Grant Street to 6th Street. Make a left on 6th Street, go one block, make another left onto William Penn Way. The street address is 525 William Penn Way. Enter building at designated entrance and follow signs.

Parking

Parking is available in several parking garages which are within two blocks of Three Mellon Bank Center. Kaufman Department Store garage is located on Smithfield Street; and Mellon Square Garage is on 6th Avenue (across from the Alcoa Building). There is also a loading area located behind One Mellon Bank Center on Ross Street.

BILLING CODE 6712–01–P

FEDERAL EMERGENCY MANAGEMENT AGENCY

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed new, revised, or continuing information collections. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), this notice seeks comments concerning the proposed extension to an existing information collection previously approved and assigned OMB Control Number 3067–0248. The current approval expires April 30, 1996.

Title: Emergency Management Exercise Report System (EMERS).

Type of Review: Extension of a currently approved information collection.

Form Numbers: FEMA Form 95–44. An automated reporting system that mirrors the form is also being used.

Abstract: EMERS is an annual exercise/training reporting system that identifies emergency functions that are major components of an effective emergency management preparedness, response and recovery program. the functions are: alert notification; communications; coordination and control; emergency public information (effectiveness); damage assessment; health and medical; individual/family assistance; public safety; public works; resource management; warning; and effectiveness of warning. The completed EMERS form is submitted by States to FEMA Headquarters, through the appropriate Regional Office. Headquarters staff uses the information to evaluate the effectiveness of program elements and sub-elements as demonstrated in an actual disaster response. The data be useful in determining annual program emphasis, budgetary levels, or changes in or initiation of new policies and guidance; determining necessary changes, improvements or initiatives in training programs required to support State and local emergency managers; identifying potential problem areas that could be expected to arise in State and local jurisdictions, and improving Federal, State, and local disaster relief and assistance relationships; and supporting FEMA's annual budget request.

The process of completing an EMERS form is useful to the State and local jurisdictions affected by disaster. It provides a format for reviewing actual response capability and noting those areas where some remedial actions may be required, serving as the basis for a post-disaster critique. States and local governments may also request exercise credit for actual response operations in Presidentially declared or undeclared disasters.

Affected Public: State, local or tribal governments.

Number of Respondents: States—56; Local jurisdictions—3,200.

Estimated Total Annual Burden Hours: 3,000.

COMMENTS: Written comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Comments should be received within 60 days of the date of this notice.

ADDRESSES: Direct all comments to Muriel B. Anderson, FEMA Information Collections Officer, Federal Emergency Management Agency, 500 C Street, SW., Room 311, Washington, DC 20472. Telephone number (202) 646–2625. FAX number (202) 646–3524.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection can be obtained by contacting the person listed in the "Addressee" section of this notice.

Dated: March 1, 1996.

Mike Bozzelli,

Acting Director, Program Services Division, Operations Support Directorate.

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed new, revised, or continuing information collections. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), this notice seeks comments concerning the proposed extension to an existing information collection previously approved and assigned OMB Control Number 3067–0001. The current approval expires May 31, 1996. There is no change in burden.

Title: National Defense Executive Reserve Personal Qualifications Statement.

Type of Review: Extension of a currently approved information collection.

Form Number: FEMA Form 85–3.

Abstract: The National Defense Executive Reserve (NDER) is a Federal Government program coordinated by the Federal Emergency Management Agency. The program provides a reserve of highly qualified individuals from industry, organized labor, professional groups, and academia to serve in executive positions in time of emergency. Such individuals must use FEMA Form 85–3 to apply for the NDER program. FEMA uses the form to ensure that individuals are qualified to perform in assigned emergency positions and are eligible for membership in the Executive Reserve.

Affected Public: Individuals.

Number of Respondents: 100.

Estimated Time per Respondent: 30 minutes.

Estimated Total Annual Burden Hours: 50.

Frequency of Response: One-time.

COMMENTS: Written comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), this notice seeks comments concerning the proposed extension to an existing information collection previously approved and assigned OBM Control Number 3067–0163. The current approval expires April 30, 1996.

Title: Individual and Family (IFG) Grant Program Information.

Type of Review: Extension of a currently approved information collection.

Form Numbers: FEMA Form 76–27, 76–28, 76–29, 76–30, 76–32, 76–34, 76–35, 76–38.

Abstract: Individual and Family Grant (IFG) Program Information is essential to the effective monitoring and management of the State-administered IFG program by FEMA Regional office staff. FEMA Regions have oversight responsibility for ensuring that the States perform and adhere to FEMA regulations and policy guidance.

This collection of information is a series of forms and reports which assist the FEMA Regional office staff in monitoring program delivery to disaster applicants and complying with other Federal requirements (flood insurance, environmental assessments, and floodplain management). FEMA Forms included in this collection are as follows:

(1) FEMA Form 76–27, DARIS Entry Document, Initial Report. This report is initiated by FEMA Regional Offices based on the data provided by States.

States provides FEMA preliminary information on the IFG program for staffing and management purposes. This report is completed once for each disaster, and establishes a DARIS report for each new IFG program.

(2) FEMA Form 76–28, DARIS Entry Document, Status Report. This report is completed by State IFG staff and provided to the FEMA Regional Director. It serves as the framework for reviewing, analyzing, and monitoring the progress of the program. The report tracks the number of dollar amount of applications approved by the State, the number and dollar amounts of grants disbursed, and the number of grant appeals. The data carried on this report is used to make determinations on the need for additional allocation and obligation of funds for program activity.

(3) FEMA Form 76–29, DARIS Entry Document, Final Statistical Report. This report captures the funding history by category of each IFG program. The information reveals the total IFG Program cost, and is used to prepare reports to OMB and the Congress. The report is also used as a management tool to check on the State's record of accuracy in estimating IFG Program costs and in requesting advances. States are responsible for completing the form, and the FEMA Regional Offices are responsible for entering the information into DARIS.

(4) FEMA Form 76–30, Environmental Review, IFG Program. The National Environmental Policy Act (NEPA) requires an environmental review process before certain IFG assistance in the housing category can be approved. When the review is conducted, the State is required to use the form to record the necessary information.

(5) FEMA Form 76–32, Worksheet for Case File Reviews. FEMA requires States to keep IFG program information and, on occasion, requests the States to provide such information, as needed.

(6) FEMA Form 76–34, Checklist for IFG Program Review. The checklist is used during the interview stage of the IFG Mid-Program Review of the State's administration of the program. It covers all items that must be monitored by FEMA to ensure effective management of the IFG program.

(7) FEMA Form 76–35, Worksheet for Preparing and Reviewing State Administrative Plans. The worksheet is used to develop or update State Administrative Plans that must be approved by FEMA. The plans are used by State IFG personnel to administratively manage the IFG Program.

(8) FEMA Form 76–38, Floodplain Management Analysis. Executive Orders 11988, Floodplain Management Analysis, and 11990, Protection of Wetlands, place a responsibility on FEMA and States to perform reviews before certain IFG assistance in the housing category can be approved. The review involves an eight-step decision-making process if the action could affect a floodplain or wetland.

Burden Estimates per Response.

FEMA Form No.	No. of Respondents	Hours per response
76–27	25	15 minutes.
76–28	25	30 minutes.
76–29	25	30 minutes.
76–30	1	1 hour.
76–32	25	30 minutes.
76–34	25	4 hours.
76–35	25	2.5 hours.
76–38	2	2 hours.

Estimated Total Annual Burden Hours: 2,700.

Affected Public: State, local or tribal governments.

COMMENTS: Written comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. Comments should be received within 60 days of the date of this notice.

ADDRESSES: Direct all comments to Muriel B Anderson, FEMA Information Collections Officer, Federal Emergency Management Agency, 500 C Street, SW., Room 311, Washington, DC 20472. Telephone number (202) 646-2625. FAX number (202) 646-3524.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection can be obtained by contacting the person listed in the "Addresses" section of this notice.

Dated: March 1, 1996.

Mike Bozzelli,

Acting Director, Program Services Division, Operations Support Directorate.

BILLING CODE 6718–01–M

Agency Information Collection Activities: Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed new, revised, or continuing information collections. In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3506(c)(2)(A)), this notice seeks comments concerning the proposed extension to an existing information collection previously approved and assigned OMB Control Number 3067–0195. The current approval expires April 30, 1996. There are two information collections associated with this clearance package. There are no changes in burden estimates for either of the information collections.

Title 1: Community Rating System (CRS) Program—Application Worksheets and Commentary.

Forms: Application Worksheets; and Commentary.

Title 2: NFIP Repetitive Loss Correction Worksheet.

FEMA Form: 81–83

Type of Review: Extension of a currently approved information collection.

Abstract: The Community Rating System (CRS) was designed by the Federal Insurance Administration to encourage, through the use of flood insurance premium discounts, communities and States to undertake activities that will mitigate flooding and flood damage beyond the minimum standards for National Flood Insurance Program participation. Communities use the NFIP/CRS Coordinator's Manual which includes the schedule, commentary and application worksheets. The application worksheets, requisite documentation, and certification are submitted to the appropriate FEMA Regional Office. The NFIP Repetitive Loss Correction Worksheet is used to correct/update property location/address, dates of loss, total number of losses per property, community name community number, and reason for change.

Affected Public: State, local or tribal government.

Number of Respondents: 255.

Estimated Time per Respondent: 33 hours.

Estimated Total Annual Burden and Recordkeeping Hours: 8,425.

Frequency of Response: Other—once per respondent with annual updates regarding participation.

COMMENTS: Written comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. Comments should be received within 60 days of the date of this notice.

ADDRESSES: Direct all comments to Muriel B. Anderson, FEMA Information Collections Officer, Federal Emergency Management Agency, 500 C Street, SW, Room 311, Washington, DC 20472. Telephone number (202) 646–2625. FAX number (202) 646–3524.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection can be obtained by contacting the person listed in the "Addressee" section of this notice.

Dated: February 26, 1996.

Mike Bozzelli,

Acting Director, Program Services Division, Operations Support Directorate.

Title: Notice of Interest/Private Non-Profit Checklist.

Type of Review: Extension of a currently approved information collection.

Form Numbers: FEMA Form 90–49.

Abstract: Section 406 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act authorizes the President to make contributions to State and local governments and private non-profit organizations (PNP's) for repair, restoration, reconstruction, or replacement of a public or private non-profit facility damaged or destroyed by a major disaster and for associated expenses incurred by the applicant. FEMA regulation 44 CFR section 202.202(c) requires applicants applying for Federal disaster assistance to submit a completed Notice of Interest in Applying for Federal Disaster Assistance, FEMA Form 90–49. Applicants use the form to list damages to property and facilities so that inspections may be appropriately assigned for formal surveys. The form is signed by the applicant and submitted to the Governor's Authorized Representative. The Private Non-Profit Checklist documents the applicant's private non-profit eligibility status and facilitates the processing of the applicant's application for assistance.

Affected Public: State, local or tribal governments.

Burden Estimates Per Response:

FEMA Form 90–49	No. of Respondents	Hours Per response
Notice of Interest	3,000	30 minutes.
Private Non-Profit Checklist.	1,000	15 minutes.

Estimated Total Annual Burden Hours: 1,750.

COMMENTS: Written comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. Comments should be received within 60 days of the date of this notice.

ADDRESSES: Direct all comments to Muriel B. Anderson, FEMA Information Collections Officer, Federal Emergency Management Agency, 500 C Street, SW, Room 311, Washington, DC 20472. Telephone number (202) 646–2625. FAX number (202) 646–3524.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection can be obtained by contacting the person listed in the "Addressee" section of this notice.

Dated: March 1, 1996.

Mike Bozzelli,

Acting Director, Program Services Division, Operations Support Directorate.

BILLING CODE 6718–01–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of Banks or Bank Holding Companies

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. Once the notices have been accepted for processing, they will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than April 5, 1996.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Kenneth Erie, Benidji, Minnesota; to acquire an additional 35.62 percent, for a total of 55.87 percent, of the voting shares of MEDR Bankshares, Inc., Erskine, Minnesota, and thereby indirectly acquire American State Bank of Erskine, Erskine, Minnesota, and Twin Valley State Bank, Twin Valley, Minnesota.

Board of Governors of the Federal Reserve System, March 18, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 96–6917 Filed 3–21–96; 8:45 am]

BILLING CODE 6210–01–F

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act, including whether the acquisition of the nonbanking company can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 15, 1996.

A. Federal Reserve Bank of Minneapolis (James M. Lyon, Vice President) 250 Marquette Avenue, Minneapolis, Minnesota 55480:

1. Absarokee Bancorporation, Absarokee, Montana; to acquire 100 percent of the voting shares of United Bank of Columbus, N.A., Columbus, Montana, a *de novo* bank.

Board of Governors of the Federal Reserve System, March 18, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 96–6918 Filed 3–21–96; 8:45 am]

BILLING CODE 6210–01–F

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.25 of Regulation Y (12 CFR 225.25) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act, including whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 5, 1996.

A. Federal Reserve Bank of Chicago (James A. Bluemle, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

1. Heritage Bancshares Group, Inc., Minneapolis, Minnesota; to engage in making and servicing loans, pursuant to § 225.25(b)(1) of the Board's Regulation Y.

Board of Governors of the Federal Reserve System, March 18, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 93N–0008]

John W. Bushlow; Denial of Hearing; Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is denying a hearing for and is issuing a final order under the Federal Food, Drug, and Cosmetic Act (the act) permanently debarring Mr. John W. Bushlow, 9704 Tartuffe Dr., Richmond, VA 23233, from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Mr. Bushlow was convicted of a felony under Federal law for conduct relating to the regulation of a drug product under the act. Mr. Bushlow has failed to file with the agency information and analyses sufficient to create a basis for a hearing concerning this action.

EFFECTIVE DATE: March 22, 1996.

ADDRESSES: Application for termination of debarment to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Tamar S. Nordenberg, Center for Drug Evaluation and Research (HFD–7), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–2041.

SUPPLEMENTARY INFORMATION:

I. Background

On February 21, 1992, the United States District Court for the District of Maryland entered judgment against Mr. John W. Bushlow, former Vice President of Manufacturing and plant manager of Vitarine Pharmaceuticals, Inc., for one count of failing to establish and maintain records, with the intent to mislead, a Federal felony offense under 21 U.S.C. 331(e) and 333(a)(2). As a result of this conviction, FDA served Mr. Bushlow by certified mail on April 9, 1993, a notice proposing to permanently debar him from providing services in any capacity to a person that has an approved or pending drug product application, and offered him an opportunity for a hearing on the proposal. The proposal was based on a finding, under section 306(a)(2)(B) of the act (21 U.S.C. 335a(a)(2)(B)), that Mr. Bushlow was convicted of a felony under Federal law for conduct relating to the regulation of a drug product.

The certified letter informed Mr. Bushlow that his request for a hearing could not rest upon mere allegations or denials, but must present specific facts showing that there was a genuine and substantial issue of fact requiring a hearing. The letter also notified Mr. Bushlow that if it conclusively appeared from the face of the information and factual analyses in his request for a hearing that there was no genuine and substantial issue of fact which precluded the order of debarment, FDA would enter summary judgment against him and deny his request for a hearing.

In a letter dated May 4, 1993, Mr. Bushlow requested a hearing. The letter in its entirety is as follows:

> In accordance with the requirements of 21 U.S.C. 335a(i), I set forth below the information relied upon to justify a hearing on the Food and Drug Administration's Proposed Notice to Debar, dated February 5, 1993.
>
> I. The Proposal to Permanently Debar Violates the Double Jeopardy Clause of the Fifth Amendment
>
> II. The Proposed Notice to Permanently Debar violates the Ex Post Facto Clause of the Constitution
>
> III. The Proposed Notice to Permanently Debar violates the Constitution in that it is too broad, too vague and too unspecific.
>
> In accordance, and within the required 60 days from receipt of the Proposal to Debar Notice, additional information will be filed to justify a hearing.

Despite his stated intention, Mr. Bushlow did not follow up with additional information to justify a hearing.

The Deputy Commissioner for Operations has considered Mr. Bushlow's letter and concludes that it is unpersuasive and fails to raise a genuine and substantial issue of fact requiring a hearing. The constitutional claims that Mr. Bushlow offers do not create a basis for a hearing because hearings are not granted on matters of policy or law, but only on genuine and substantial issues of fact (21 CFR 12.24(b)(1)). The constitutional arguments are, in any event, unconvincing, for the reasons discussed below.

II. Mr. Bushlow's Arguments in Support of a Hearing

Mr. Bushlow states that the debarment proposal violates the Ex Post Facto Clause and Double Jeopardy Clause of the U.S. Constitution. Mr. Bushlow was convicted on February 21, 1992, prior to the enactment of the Generic Drug Enforcement Act (GDEA) on May 13, 1992.

An ex post facto law is one that reaches back to punish acts that occurred before enactment of the law or that adds a new punishment to one that was in effect when the crime was committed. (*Ex Parte Garland*, 4 Wall. 333, 377, 18 L. Ed. 366 (1866); *Collins* v. *Youngblood*, 497 U.S. 37 (1990).)

The Double Jeopardy Clause states that no person shall "be subject for the same offense to be twice put in jeopardy of life or limb."

In determining whether a statutory provision such as the one being challenged is unconstitutional under the Ex Post Facto Clause or Double Jeopardy Clause, the critical consideration is whether the provision is remedial or punitive in nature. The intent of debarment under the GDEA is not to punish, but rather to remedy the past fraud and corruption in the drug industry. In upholding the GDEA against an ex post facto challenge, the court in *Bae* v. *Shalala* stated,

> Without question, the GDEA serves compelling governmental interests unrelated to punishment. The punitive effects of the GDEA are merely incidental to its overriding purpose to safeguard the integrity of the generic drug industry while protecting public health.

(*Bae* v. *Shalala*, 44 F.3d 489, 493 (7th Cir. 1995); see also, *Manocchio* v. *Kusserow*, 961 F.2d 1539, 1542 (11th Cir. 1992); *Hawker* v. *New York*, 170 U.S. 189, 190 (1898); *DeVeau* v. *Braisted*, 373 U.S. 154 (1960).)

Therefore, Mr. Bushlow's claim that the GDEA violates the Ex Post Facto Clause and Double Jeopardy Clause is unpersuasive.

Mr. Bushlow also asserts that the proposal to debar him is unconstitutional because it is "too broad, too vague, and too unspecific." Such an argument does not provide the basis for a hearing.

Neither the proposal to debar nor the act's debarment provisions, on which the proposal to debar was based, are vague or unspecific. The debarment proposal sets forth expressly the conduct on which the proposal is based, the findings of FDA, the agency's proposed action, and the procedure for requesting a hearing. Section 306(a)(2)(B) of the act clearly mandates the debarment of an individual who has been convicted of a Federal felony for conduct relating to the regulation of any drug product. The act defines the conduct and felony conviction that lead to debarment. The period of debarment is also set forth in section 306(c)(2) of the act, which states that the debarment is permanent.

Finally, Mr. Bushlow does not explain his argument that the debarment proposal is over broad. In fact, the debarment provisions are narrowly drawn to accomplish the legitimate government purposes of ensuring the integrity of the drug regulatory process and protecting the public health. The debarment provisions further the compelling governmental interest of "restor[ing] consumer confidence in generic drugs by eradicating the widespread corruption in the generic drug approval process." (*Bae* v. *Shalala*, 44 F.3d 489, 493 (7th Cir. 1995).)

Mr. Bushlow does not dispute the fact that he was convicted as alleged by FDA in its proposal to debar him, and he has raised no genuine and substantial issue of fact regarding this conviction. Also, Mr. Bushlow's legal arguments do not create a basis for a hearing and, in any event, are unpersuasive. Accordingly, the Deputy Commissioner for Operations denies Mr. Bushlow's request for a hearing.

III. Findings and Order

Therefore, the Deputy Commissioner for Operations, under section 306(a) of the act, and under authority delegated to him (21 CFR 5.20), finds that Mr. John W. Bushlow has been convicted of a felony under Federal law for conduct relating to the regulation of a drug product (21 U.S.C. 335a(a)(2)(B)).

As a result of the foregoing findings, Mr. John W. Bushlow is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application under sections 505, 507, 512, or 802 of the act (21 U.S.C. 355, 357, 360b, or 382), or under section 351 of the Public Health Service Act (42 U.S.C. 262), effective March 22, 1996, (21 U.S.C. 335a(c)(1)(B) and (c)(2)(A)(ii) and 21 U.S.C. 321(dd)). Any person with an approved or pending drug product application who knowingly uses the

services of Mr. Bushlow, in any capacity, during his period of debarment, will be subject to civil money penalties (section 307(a)(6) of the act (21 U.S.C. 335b(a)(6)). If Mr. Bushlow, during his period of debarment, provides services in any capacity to a person with an approved or pending drug product application, he will be subject to civil money penalties (section 307(a)(7) of the act). In addition, FDA will not accept or review any abbreviated new drug applications from Mr. Bushlow during his period of debarment.

Any application by Mr. Bushlow for termination of debarment under section 306(d)(4) of the act should be identified with Docket No. 93N–0008 and sent to the Dockets Management Branch (address above). All such submissions are to be filed in four copies. The public availability of information in these submissions is governed by 21 CFR 10.20(j). Publicly available submissions may be seen in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

Dated: March 3, 1996.

Michael A. Friedman,

Deputy Commissioner for Operations.

BILLING CODE 4160–01–F

Advisory Committees; Notice of Meetings

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: This notice announces forthcoming meetings of public advisory committees of the Food and Drug Administration (FDA). This notice also summarizes the procedures for the meetings and methods by which interested persons may participate in open public hearings before FDA's advisory committees.

FDA has established an Advisory Committee Information Hotline (the hotline) using a voice-mail telephone system. The hotline provides the public with access to the most current information on FDA advisory committee meetings. The advisory committee hotline, which will disseminate current information and information updates, can be accessed by dialing 1–800–741–8138 or 301–443–0572. Each advisory committee is assigned a 5-digit number. This 5-digit number will appear in each individual notice of meeting. The hotline will enable the public to obtain information about a particular advisory committee by using the committee's 5-digit number. Information in the hotline is preliminary and may change before a meeting is actually held. The hotline will be updated when such changes are made.

MEETINGS: The following advisory committee meetings are announced:

Vaccines and Related Biological Products Advisory Committee

Date, time, and place. April 10 and 11, 1996, 8 a.m., Holiday Inn—Bethesda, Versailles Ballrooms III and IV, 8120 Wisconsin Ave., Bethesda, MD.

Type of meeting and contact person. Open committee discussion, April 10, 1996, 8 a.m. to 8:15 a.m.; open public hearing, 8:15 a.m. to 8:30 a.m., unless public participation does not last that long; open committee discussion, 8:30 a.m. to 10:45 a.m.; closed committee deliberations, 10:45 a.m. to 3 p.m.; open public hearing, 3 p.m. to 3:30 p.m., unless public participation does not last that long; open committee discussion, 3:30 p.m. to 6 p.m.; open committee discussion, April 11, 1996, 8 a.m. to 10:30 a.m.; open public hearing, 10:30 a.m. to 11 a.m., unless public participation does not last that long; open committee discussion, 11 a.m. to 11:30 a.m.; closed committee deliberations, 11:30 a.m. to 1 p.m.; open committee discussion, 1 p.m. to 2:30 p.m.; closed committee deliberations, 2:30 p.m. to 3:30 p.m.; Nancy T. Cherry or Sandy M. Salins, Center for Biologics Evaluation and Research (HFM–21), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852, 301–827–0314, or FDA Advisory Committee Information Hotline, 1–800–741–8138 (301–443–0572 in the Washington, DC area), Vaccines and Related Biological Products Advisory Committee, code 12388.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of vaccines intended for use in the diagnosis, prevention, or treatment of human diseases.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 3, 1996, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. On April 10, 1996, the committee will discuss data issues pertaining to pediatric studies using vaccines for the prevention of Lyme disease. The committee will also review safety and efficacy data pertaining to a Bacille Calmette-Guerin (BCG) vaccine from Connaught Laboratories, Ltd., for the prevention of tuberculosis. On April 11, 1996, the committee will: (1) Discuss vaccine safety issues, (2) review a research program in the Division of Viral Products, and (3) hear a briefing on reverse transcriptase in avian cells.

Closed committee deliberations. On April 10 and 11, 1996, the committee will review trade secret and/or confidential commercial information relevant to pending investigational new drug applications, product licensing applications, or approved products. These portions of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)). On April 11, 1996, the committee will also discuss personal information concerning an individual associated with a research program at the center, disclosure of which would constitute a clearly unwarranted invasion of personal privacy. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(6)).

Anesthetic and Life Support Drugs Advisory Committee

Date, time, and place. April 29 and 30, 1996, 8:30 a.m., Holiday Inn—Bethesda, Versailles Ballroom, 8120 Wisconsin Ave., Bethesda, MD.

Type of meeting and contact person. Open public hearing, April 29, 1996, 8:30 a.m. to 9:30 a.m., unless public participation does not last that long; open committee discussion, 9:30 a.m. to 5 p.m.; open committee discussion, April 30, 1996, 8:30 a.m. to 2 p.m.; closed committee deliberations, 2 p.m. to 5 p.m.; Stephen P. Pollitt, Center for Drug Evaluation and Research (HFD–21), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–443–5455, or FDA Advisory Committee Information Hotline, 1–800–741–8138 (301–443–0572 in the Washington, DC area), Anesthetic and Life Support Drugs Advisory Committee, code 12529.

General function of the committee. The committee reviews and evaluates data on the safety and effectiveness of marketed and investigational human drugs for use in the field of anesthesiology and surgery.

Agenda—Open public hearing. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Those desiring to make formal presentations should notify the contact person before April 20, 1996, and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time required to make their comments.

Open committee discussion. The committee will discuss the new drug application (NDA) 20–630, Remifentanyl, Glaxo Welcome, for use as a general anesthetic, and a report of the post-market experience and phase IV commitments of NDA 20–478, Ultane® (sevoflurane), Abbott Laboratories.

Closed committee deliberations. On April 30, 1996, the committee will review trade secret and/or confidential commercial information. This portion of the meeting will be closed to permit discussion of this information (5 U.S.C. 552b(c)(4)).

Each public advisory committee meeting listed above may have as many as four separable portions: (1) An open public hearing, (2) an open committee discussion, (3) a closed presentation of data, and (4) a closed committee deliberation. Every advisory committee meeting shall have an open public hearing portion. Whether or not it also includes any of the other three portions will depend upon the specific meeting involved. The dates and times reserved for the separate portions of each committee meeting are listed above.

The open public hearing portion of each meeting shall be at least 1 hour long unless public participation does not last that long. It is emphasized, however, that the 1 hour time limit for an open public hearing represents a minimum rather than a maximum time for public participation, and an open public hearing may last for whatever longer period the committee chairperson determines will facilitate the committee's work.

Public hearings are subject to FDA's guideline (subpart C of 21 CFR part 10) concerning the policy and procedures for electronic media coverage of FDA's public administrative proceedings, including hearings before public advisory committees under 21 CFR part 14. Under 21 CFR 10.205, representatives of the electronic media may be permitted, subject to certain limitations, to videotape, film, or otherwise record FDA's public administrative proceedings, including presentations by participants.

Meetings of advisory committees shall be conducted, insofar as is practical, in accordance with the agenda published in this **Federal Register** notice. Changes in the agenda will be announced at the beginning of the open portion of a meeting.

Any interested person who wishes to be assured of the right to make an oral presentation at the open public hearing portion of a meeting shall inform the contact person listed above, either orally or in writing, prior to the meeting. Any person attending the hearing who does not in advance of the meeting request an opportunity to speak will be allowed to make an oral presentation at the hearing's conclusion, if time permits, at the chairperson's discretion.

The agenda, the questions to be addressed by the committee, and a current list of committee members will be available at the meeting location on the day of the meeting.

Transcripts of the open portion of the meeting may be requested in writing from the Freedom of Information Office (HFI–35), Food and Drug Administration, rm. 12A–16, 5600 Fishers Lane, Rockville, MD 20857, approximately 15 working days after the meeting, at a cost of 10 cents per page. The transcript may be viewed at the Dockets Management Branch (HFA–305), Food and Drug Administration, rm. 1–23, 12420 Parklawn Dr., Rockville, MD 20857, approximately 15 working days after the meeting, between the hours of 9 a.m. and 4 p.m., Monday through Friday. Summary minutes of the open portion of the meeting may be requested in writing from the Freedom of Information Office (address above) beginning approximately 90 days after the meeting.

The Commissioner has determined for the reasons stated that those portions of the advisory committee meetings so designated in this notice shall be closed. The Federal Advisory Committee Act (FACA) (5 U.S.C. app. 2, 10(d)), permits such closed advisory committee meetings in certain circumstances. Those portions of a meeting designated as closed, however, shall be closed for the shortest possible time, consistent with the intent of the cited statutes.

The FACA, as amended, provides that a portion of a meeting may be closed where the matter for discussion involves a trade secret; commercial or financial information that is privileged or confidential; information of a personal nature, disclosure of which would be a clearly unwarranted invasion of personal privacy; investigatory files compiled for law enforcement purposes; information the premature disclosure of which would be likely to significantly frustrate implementation of a proposed agency action; and information in certain other instances not generally relevant to FDA matters.

Examples of portions of FDA advisory committee meetings that ordinarily may be closed, where necessary and in accordance with FACA criteria, include the review, discussion, and evaluation of drafts of regulations or guidelines or similar preexisting internal agency documents, but only if their premature disclosure is likely to significantly frustrate implementation of proposed agency action; review of trade secrets and confidential commercial or financial information submitted to the agency; consideration of matters involving investigatory files compiled for law enforcement purposes; and review of matters, such as personnel records or individual patient records, where disclosure would constitute a clearly unwarranted invasion of personal privacy.

Examples of portions of FDA advisory committee meetings that ordinarily shall not be closed include the review, discussion, and evaluation of general preclinical and clinical test protocols and procedures for a class of drugs or devices; consideration of labeling requirements for a class of marketed drugs or devices; review of data and information on specific investigational or marketed drugs and devices that have previously been made public; presentation of any other data or information that is not exempt from public disclosure pursuant to the FACA, as amended; and, deliberation to formulate advice and recommendations to the agency on matters that do not independently justify closing.

This notice is issued under section 10(a)(1) and (2) of the Federal Advisory Committee Act (5 U.S.C. app. 2), and FDA's regulations (21 CFR part 14) on advisory committees.

Dated: March 15, 1996.

Michael A. Friedman,

Deputy Commissioner for Operations.

1995 Revision of the National Shellfish Sanitation Program Manual of Operations, Part I "Sanitation of Shellfish Growing Areas" and Part II "Sanitation of the Harvesting, Processing, and Distribution of Shellfish;" Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the 1995 revision of the

National Shellfish Sanitation Program (NSSP) Manual of Operations, part I, "Sanitation of Shellfish Growing Areas," and part II, "Sanitation of the Harvesting, Processing, and Distribution of Shellfish." This revision was initiated in cooperation with the Interstate Shellfish Sanitation Conference (ISSC) to help assure that only safe and sanitary shellfish are offered for sale in interstate commerce.

ADDRESSES: Submit written requests for single copies of the manual (free of charge) from the contact person in the nearest Regional Office listed in the table below:

Addresses	Contact Person
FDA, Stoneham District Office, State Programs Branch, One Montvale Ave., Stoneham, MA 02180.	David Field
FDA, New York Regional Office, 850 Third Ave., Brooklyn, NY 11232–1593	Jerry Mulnick
FDA, Baltimore District Office, Investigations Branch, 900 Madison Ave., Baltimore, MD 21201	Al Ondis
FDA, Atlanta Regional Office, State Cooperative Programs, 60 Eighth St. NE., Atlanta, GA 30309	Robert Creasy
FDA, Charleston Resident Post, 334 Meeting St., rm. 505, P.O. Box 21077, Charleston, SC 29413	Donald M. Hesselman

FDA, Detroit District Resident Post, 1560 East Jefferson Ave., Detroit, MI 48207	Nicholas Majerus
FDA, Dallas Regional Office, 7920 Elmbrook Dr., suite 102, Dallas, TX 75247	Linda Collins
FDA, Seattle District Office, 100 Second Ave., suite 2400, Seattle, WA 98104	Tim Sample
FDA, Shellfish Program Implementation Branch (HFS–628), 200 C St. SW., Washington, DC 20204	Stanley Ratcliffe

Requests should be identified with the docket number found in brackets in the heading of this document. Send two self-addressed adhesive labels to assist in processing your requests. The manual is available for public examination in the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857, between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Paul W. DiStefano, Office of Seafood, Center for Food Safety and Applied Nutrition (HFS–417), 200 C St. SW., Washington, DC 20204, 202–418–3177.

SUPPLEMENTARY INFORMATION: FDA is responsible for the Federal administration of the NSSP, which is a voluntary program involving State shellfish control agencies, the shellfish industry, FDA, and other Federal agencies. Five foreign countries also actively participate in the NSSP through international bilateral agreements.

The NSSP is concerned with the sanitary control of fresh and frozen molluscan shellfish (oysters, clams, mussels, and scallops) offered for sale in interstate commerce. The program has been in existence since 1925. In the interest of assuring uniform administration and technical controls, the NSSP has developed and maintained recommended shellfish control practices. These control practices have been published in the form of a Manual of Operations, parts I and II.

In 1982, interested State officials and members of the shellfish industry formed the Interstate Shellfish Sanitation Conference (ISSC) to provide a formal structure wherein State regulatory authorities could establish regularly updated and uniform guidelines for improving shellfish sanitation and safety. Those persons interested in obtaining additional information about the ISSC should contact: Kenneth Moore, Interstate Shellfish Sanitation Conference, 115 Atrium Way, suite 117, Columbia, SC 29223.

FDA and the ISSC entered into a Memorandum of Understanding (MOU) that was published in the **Federal Register** of March 30, 1984 (49 FR 12751), agreeing, among other things, that FDA would provide technical assistance to the ISSC and participate in the cooperative program of the Conference to develop or revise program criteria and guidelines.

Based on the MOU, FDA developed draft revisions of the NSSP Manual of Operations, parts I and II, in cooperation with the ISSC. FDA announced the availability of the 1986 revision of part I in the **Federal Register** of June 5, 1987 (52 FR 21375). An initial working draft of part II was made available for comment in the **Federal Register** of September 11, 1985 (50 FR 37055), with a revised second draft being made available for further comment in the **Federal Register** of July 11, 1986 (51 FR 25261). Based on the comments received, and in consideration of later comments expressed by State regulatory officials, industry representatives, and other interested parties at the ISSC's 1987 and 1988 annual meetings in Austin, TX, and Denver, CO, respectively, FDA announced the availability of the 1988 revision of the manual in the **Federal Register** of February 17,1989 (54 FR 7281). Subsequent revisions were announced in the **Federal Register** of April 25, 1990 (55 FR 17503), December 13, 1990 (55 FR 51341), and January 13, 1993 (58 FR 4174).

The 1995 manual revision contains changes and improvements to the NSSP that were considered and passed at the ISSC's 1994 and 1995 annual meetings in Tacoma, WA and Orlando, FL, respectively. Noteworthy changes include: (1) A detailed shellfish laboratory evaluation checklist for State and Federal laboratory evaluation officers to use for certifying that laboratories are operated in compliance with criteria of the National Shellfish Sanitation Program; (2) new time temperature controls to prevent excessive post harvest increases in the levels of *Vibrio vulnificus* bacteria in shellfish harvested from the waters confirmed as an original source of product associated with two or more *V. vulnificus* illnesses. Matrix controls establish times for shellfish to be under refrigeration following harvest. The time from harvest until shellfish are placed under refrigeration needs to decrease as water temperatures rise. Matrix time/temperature controls are recommended for use with shellfish that are harvested from waters with a *Vibrio* problem and then sold for raw consumption; and (3) new tagging procedures to improve the traceability of wet-stored shellstock to its original harvest site. These procedures include a recommendation to use a shipping tag that identifies the certified wet-storage facility and the storage dates for shellstock that has entered interstate commerce and then been wet stored for 90 days or less.

Dated: March 15, 1996.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

BILLING CODE 4160–01–F

National Institutes of Health

A Comprehensive Alcohol Education Program for Pre-Adolescents Using Interactive Multimedia

Proposed Data Collection

In compliance with Section 3506 (c)(2)(A) of the Paperwork Reduction Act of 1995, the National Institute on Alcohol Abuse and Alcoholism (NIAAA), National Institutes of Health (NIH) is publishing this notice to solicit public comment on the data collection proposed for the study on "A Comprehensive Alcohol Education Program for Pre-Adolescents Using Interactive Multimedia." To request copies of the data collection plans and interview instruments, call Dr. Kendall Bryant, (301) 443–8820 (not a toll-free number).

Comments are invited on: (a) Whether the proposed collection is necessary, including whether the information has a practical use; (b) ways to enhance the clarity, quality, and use of the information to be collected; (c) the accuracy of the agency estimate of burden of the proposed collection; (d) ways to minimize the collection burden of the respondents. Written comments are requested within 60 days of the publication of this notice. Send comments to Dr. Kendall Bryant, Prevention Research Branch, Division of Clinical and Prevention Research (DCPR), NIAAA, NIH, Building 6000, Room 505, 6000 Executive Boulevard, MSC 7003, Bethesda, Maryland 20892–7003.

Proposed Project

The Prevention Research Branch (PRB), intends to conduct the study for "A Comprehensive Alcohol Education Program for Pre-Adolescents Using Interactive Multimedia." The PRB is authorized by Section 452 of Part G of Title IV of the Public Health Service Act (42 U.S.C. 288) as amended by the NIH Revitalization Act of 1993 (Public Law 103–43).

The information proposed for collection will be used by the NIAAA to determine the efficacy of interactive multimedia for delaying the onset of drinking among 7th and 8th grade males and females. Interactive multimedia enables the combination of the elements of television and movies that engage and motivate the target population with computer-based interaction, simulations, and games to (1) increase information about the negative consequences of teen drinking and (2) teach practical skills for avoiding and refusing alcohol. Subject participation will involve (1) focus groups, during development of the multimedia program, and (2) post-development behavioral trials.

The annual burden estimates are as follows:

Type and No. of respondents	Responses per respondent	Total responses	Hours	Total hours
Focus Group Subjects: 40	1	40	0.5	20
Trial Subjects: 268	4	1072	0.5	536
Total Number of Repondents: 308. Total Number of Responses: 1112. Total Hours: 556.				

Dated: March 12, 1996.

Martin K. Truscy,

Executive Officer, NIAAA.

[FR Doc. 96–7014 Filed 3–21–96; 8:45 am]

BILLING CODE 4140–01–M

Proposed Data Collections Available for Public Comment and Recommendations

Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that Federal Agencies provide a 60-day notice in the **Federal Register** concerning each proposed collection of information. The National Institutes of Health (NIH) is publishing this notice to solicit public comment on a proposed data collection for the Undergraduate Scholarship Program for Individuals from Disadvantaged Backgrounds (UGSP). To request copies of the data collection plans and instruments, call Mr. Marc Horowitz on (301) 402–5666 (not a toll-free number).

Comments are invited on: (a) Whether the proposed collection is necessary, including whether the information has practical use; (b) ways to enhance the clarity, quality, and use of the collection; (c) the accuracy of the agency's estimate of burden of the proposed collection; and (d) ways to minimize the collection burden of the respondents. Written comments are requested within 60 days of the publication of this notice. Send comments to Marc S. Horowitz, J.D., Director, Loan Repayment and Scholarship Programs, Office of Science Education, NIH, 7550 Wisconsin Avenue, Room 604, Bethesda, MD 20892–9015.

Proposed Project

The NIH intends to make available scholarships to undergraduate students under the NIH Undergraduate Scholarship Program for Individuals from Disadvantaged Backgrounds (UGSP). The UGSP is authorized by § 487D of the Public Health Service

(PHS) Act (42 USC 288–2), as amended by the NIH Revitalization Act of 1993 (Pub. L. 103–43). This program intends to provide scholarships, in an amount not to exceed $20,000 per academic year, toward expenses associated with full-time attendance at an accredited undergraduate institution, including tuition and reasonable education and living expenses. For each year of scholarship support from the NIH, the recipient agrees to two service obligations or pay-back requirements: (1) Ten consecutive weeks of pay-back as a full-time NIH employee during the months of June–August during the academic year (in-school service obligation) and (2) one year (12 months) of pay-back as a full-time NIH employee after graduation from the undergraduate institution (post-graduation service obligation). The post-graduation service obligation or pay-back requirement may be deferred, at the request of the scholarship recipient and with the approval of the Secretary, Department of Health and Human Services, during continuous periods of graduate or medical/dental/veterinarian school training.

The UGSP is designed to provide an incentive to undergraduate students from disadvantaged backgrounds to pursue studies which will prepare them for careers in biomedical research at the NIH.

The information proposed for collection will be used by the OSE to determine an applicant's eligibility for participation in the UGSP. The UGSP application consists of two parts: Part I (Information About the Applicant) is completed by the applicant; and Part II (Verification) is completed by the Undergraduate Institution.

The annual burden estimates are as follows:

	No. respondents	No. responses per respondent	Avg. burden per response (Hrs)
Applicant	500	1	3.0
Undergraduate institution	500	1	0.5

Dated March 13, 1996.

Ruth Kirschstein,

Deputy Director, NIH.

BILLING CODE 4140–01–M

National Institute of Environmental Health Sciences: Opportunity for a Cooperative Research and Development Agreement (CRADA) for the Application of Highly Potent and Ultraselective δ Opioidmimetic Peptide Antagonists for Biochemical, Pharmacological, Clinical and Therapeutic Studies

AGENCY: National Institute of Environmental Health Sciences, National Institutes of Health, PHS, DHHS.

ACTION: Notice.

SUMMARY: The National Institutes of Health (NIH) seeks an agreement with a company(s) which can pursue commercial development of highly selective δ opioid dipeptide antagonists (U.S. Patent Application Serial No. 08/347,531). The National Institute of Environmental Health Sciences has also determined that the developed technology can be utilized in several scientific areas, including development of a radiochemically labelled ligand, production of gram quantities of the dipeptide, application in the treatment of many clinical syndromes with therapeutic application to numerous health problems. A CRADA for the application of these compounds will be granted to the awardee(s).

ADDRESSES: Proposals and questions about this opportunity may be addressed to Dr. Lawrence H. Lazarus, NIEHS, Mail Drop C3–04, P.O. Box 12233, Research Triangle Park, NC 27709; Telephone 919/541–3238; Fax 919/541–0626; Email Lazarus@niehs.nih.gov

Requests to view the patent application and questions related to licensing this technology should be addressed to Leopold J. Luberecki, Jr., J.D., Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, MD 20852–3804 (Telephone: 301/496–7735 ext. 223; Fax: 301/402–0220).

Respondees interested in submitting a CRADA proposal should be aware that it may be necessary to secure a license to the above patent rights in order to commercialize products arising from a CRADA agreement.

DATES: Capability statements must be received by NIH on, or before May 21, 1996.

SUPPLEMENTARY INFORMATION: The National Institute of Environmental Health Sciences has determined the specific chemical structure, high potency and selectivity of a series of unique opiod di- and tripeptide antagonists. The most active dipeptide exhibited an affinity for the δ opioid receptor of 0.022 nM and a δ selectivity of 150,000 (relative to the μ receptor); affinity toward κ receptors was negligible (> 20 μM). the tripeptide had δ selectivity of 20,000 and was similarly without effect on κ receptors (> 50 μM). Pharmacological functional bioassays *in vitro* indicated antagonistic activity at δ receptors without activity toward μ receptors (> 10 μM), which makes these compounds more utilitarian than the commonly employed δ antagonist naltrindole. Similarly, *in vivo* data in mice confirmed the antagonistic behavior of these peptides. Furthermore, the molecular model of the low energy conformer indicated a unique solution topography of a universal antagonist.

The commercial advantage of these substances is manifold:

1. The preparation of radiolabelled ligands for the biochemical characterization of the δ opioid receptor, localization of this receptor in animal tissues by various immunohistochemical methods, and body distribution/compartmentalization kinetics, such as in determining the extend of transit across the blood-brain barrier. Current radioactive opioid ligands generally have lower affinities and are considerably less selective by orders of magnitude than our opioid dipeptide.

2. The preparation of large quantities of highly pure peptide for pharmacological and physiological studies in the laboratory, and their availability for animal and clinical trials, and eventually for therapeutic applications in medical orientated facilities. For example, the potential for treatment of alcohol dependency and narcotic addition, obesity, and suppression of the immune response in organ transplants, in addition to other numerous clinical situations. These proposed studies would eventually necessitate multigram quantities of the dipeptide in spite of its high affinity and selectivity.

3. Production of monoclonal antibodies to these peptides would provide science with high affinity substances that could be effectively used in both the laboratory and clinical settings.

The CRADA awardees will have an option to negotiate for an exclusive license to market and commercialize any new technology developed within the scope of the research plan for the ultraselective δ opioid dipeptide antagonists. This CRADA may be directed toward the preparation of radioligands, synthesis of gram quantities of peptide, its application in animal model studies, as well as in clinical and therapeutic situations, and in the formation of monoclonal antibodies.

Roles of NIEHS

1. Provide design and specifications of synthesizing the opioid dipeptide and assist in beta testing both the labeled and unlabled ligands, and monoclonal antibodies.

2. Work cooperatively with the company(s) to determine the market potential for these opioidmimetic peptides.

Roles of the CRADA Partner

1. Provide expertise in application and commercial-oriented production of large quantities of opioid peptides.

2. Provide knowledge on the formation, purification, and stabilization of radioactive substances.

3. Provide the expertise for the production of high affinity, high specific monoclonal antibodies.

4. Develop a plan for the production, testing and commercialization of the dipeptide, radiolabeled compounds and monoclonal antibodies.

Selection criteria for choosing the CRADA partner(s) will include, but will not be limited to the following:

1. Experience in peptide synthesis.

2. Capability to produce stable radiolabeled peptides with high specific activity.

3. Ability to develop, implement and manage the product commercialization so as to ensure the dissemination of the substances of research or health care services.

4. Capacity to test labeled peptides and monoclonal antibodies.

Dated: March 13, 1996.

Barbara M. McGarey,

Deputy Director, Office of Technology Transfer.

BILLING CODE 4140–01–M

National Heart, Lung, and Blood Institute; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following Heart, Lung, and Blood Special Emphasis Panel (SEP) meetings:

Name of SEP: Family Heart Study.

Date: April 8–9, 1996.

Time: 7:30 p.m.

Place: Holiday Inn, Bethesda, Maryland.

Contact Person: Anthony M. Coelho, Jr., Ph.D., Rockledge II, Room 7182, 6701 Rockledge Drive, Bethesda, Maryland 20892–7924, (301) 435–0277.

Purpose/Agenda: To review and evaluate grant applications.

This notice is being published less than fifteen days prior to this meeting due to the urgent need to meet limitations imposed by the grant review cycle.

Name of SEP: The Etiology of Excess Cardiovascular Disease in Diabetes Mellitus.

Date: April 15–16, 1996.

Time: 8:00 a.m.

Place: Ramada Inn, Bethesda, Maryland.

Contact Person: S. Charles Selden, Ph.D., Rockledge II, Room 7196, 6701 Rockledge Drive, Bethesda, Maryland 20892–7924, (301) 435–0288.

Purpose/Agenda: To review and evaluate grant applications.

These meetings will be closed in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. Applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

(Catalog of Federal Domestic Assistance Programs Nos. 93.837, Heart and Vascular Diseases Research; 93.838, Lung Diseases Research; and 93.839, Blood Diseases and Resources Research, National Institutes of Health)

Dated: March 19, 1996.

Susan K. Feldman,

Committee Management Officer, NIH.

National Institute of General Medical Sciences; Notice of Closed Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following meeting:

Purpose: To review grant applications.

Committee Name: National Institute of General Medical Sciences Special Emphasis Panel—Anesthesiology.

Date: March 19, 1996.

Time: 9 a.m.–11 a.m. (Teleconference).

Place: 45 Center Drive, Conference Room 1AS–13, Bethesda, Maryland 20892–6200.

Contact Person: Dr. Arthur L. Zachery, Scientific Review Administrator, NIGMS, 45 Center Drive, Room 1AS–13, Bethesda, MD 20892–6200.

This meeting will be closed in accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. The discussions of these applications could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than fifteen days prior to the above meeting due to the partial shutdown of the Federal Government and the urgent need to meet timing limitations imposed by the review and funding cycle.

National Institute of Allergy and Infectious Diseases; Notice of Meeting: AIDS Research Advisory Committee, NIAID

Pursuant to Public Law 92–463, notice is hereby given of the meeting of the AIDS Research Advisory Committee, National Institute of Allergy and Infectious Diseases, on May 21, 1996 in Conference Room E1 & 2 of the Natcher Conference Center (Building 45) at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland.

The entire meeting will be open to the public from 8:30 a.m., until adjournment. The AIDS Research Advisory Committee (ARAC) advises and makes recommendations to the Director, National Institute of Allergy and Infectious Diseases, on all aspects of research on HIV and AIDS related to the mission of the Division of AIDS (DAIDS).

The Committee will provide advice on scientific priorities, policy, and program balance at the Division level. The Committee will review the progress and productivity of ongoing efforts, and identify critical gaps/obstacles to progress. Attendance by the public will be limited to space available.

Ms. Rona L. Siskind, Executive Secretary, AIDS Research Advisory Committee, DAIDS, NIAID, NIH, Solar Building, Room 2A21, telephone 301–496–0545, will provide a summary of the meeting and a roster of committee members upon request. Individuals who plan to attend and need special

assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Siskind in advance of the meeting.

(Catalog of Federal Domestic Assistance Program Nos. 93.855, Immunology, Allergic and Immunologic Diseases Research; 93.856, Microbiology and Infectious Diseases Research, National Institutes of Health)

Dated: March 19, 1996.

National Institute of Child Health and Human Development; Notice of Meeting of the National Advisory Board on Medical Rehabilitation Research

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the National Advisory Board on Medical Rehabilitation Research, National Institute of Child Health and Human Development, April 18, 1996, Hyatt Regency Bethesda, One Bethesda Metro Center, Bethesda, Maryland 20814.

The meeting will be open to the public from 8:30 a.m. to 5:00 p.m. on April 18. Attendance by the public will be limited to space available. Board topics will include: (1) a report on fiscal issues concerning the National Center for Medical Rehabilitation Research (Center) and the Institute; (2) reports on program activities of the Center; (3) a discussion of general priority areas of research for the Center; and (4) a discussion of support for medical rehabilitation research by government agencies.

Ms. Debbie Welty, Board Secretary, NICHD, 6100 Building, Room 2A03, National Institutes of Health, Bethesda, Maryland 20892, Area Code 301–402–2242, will provide a summary of the meeting and a roster of Advisory Board members as well as substantive program information. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Ms. Welty.

Dated: March 19, 1996.

BILLING CODE 4140–01–M

Office of Research on Women's Health; Notice of Meeting

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of a meeting of the Advisory Committee on Research on Women's Health (ACRWH) to be held April 11 and 12, 1996 in Conference Room 10, C Wing, 6th Floor, Building 31, 9000 Rockville Pike, Bethesda, Maryland 20892. The meeting will be held from 8:30 am to 5:00 pm on April 11 and from 8:30 am to 5:00 pm on April 12. The meeting is open to the public, with attendance limited to space available.

The purpose of the meeting will be for the Committee to provide advice to the Office of Research on Women's Health (ORWH) on its research agenda and to provide recommendations regarding ORWH activities. The agenda will include an update on ORWH activities and programs to meet the mandates of the Office and discussion of scientific issues.

Anne R. Bavier, M.N., F.A.A.N., Executive Secretary, ACRWH, and Deputy Director, Office of Research on Women's Health, OD, NIH, Building 1, Room 209, Bethesda, Maryland 20892, (301) 402–1770, (301) 402–1798 (Fax), will furnish the meeting agenda, roster of Committee members, and substantive program information upon request. Individuals who plan to attend the meeting and need special assistance, such as sign language interpretation or other special accommodations, should contact Ms. Bavier by April 4, 1996.

Dated: March 19, 1996.

Susan K. Feldman,

Committee Management Officer, NIH.

BILLING CODE 4140–01–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–3917–N–54]

Office of the Assistant Secretary for Housing; Notice of Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: May 21, 1996.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Oliver Walker, Housing, Department of Housing and Urban Development, 451–7th Street SW., Room 9116, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Oliver Walker, Telephone number (202) 708–1694 (this is not a toll-free number) for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to MOB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

The Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to

be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Title I Property Improvement and Manufactured Home Loan Programs (24 CFR Part 201).

OMB Control Number: 2502–0328.

Description of the need for the information and the proposed use: Title I loans are made by private lenders, and HUD insures the lender against loss from borrower defaults. These information collections are needed by HUD to evaluate individual lender and overall program performance, and to determine whether claims are eligible for payment.

Agency form numbers: HUD–92802, 56001, 56001–MH, 56004, 55013, 55014, 27029, 27030 and 637.

Members of affected public: Individuals or households.

An estimation of the total numbers of hours needed to prepare the information collection is 263,822 number of respondents is 404,995 frequency response is dependent upon the occasion of the application process and the hour of response varies.

Status of the proposed information collection: Extension of a currently approved collection.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: March 6, 1996.

Nicolas P. Retsinas,

A/S Secretary for Housing—Federal Housing Commissioner.

[FR Doc. 96–6883 Filed 3–21–96; 8:45 am]

BILLING CODE 4210–27–M

Office of the Assistant Secretary for Housing

[Docket No. FR–3917–N–52]

Notice of Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reducation Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: May 21, 1996.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Oliver Walker, Housing, Department of Housing and Urban Development, 451–7th Street SW., Room 9116, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Barbara D. Hunter, Telephone number (202) 708-3944 (this is not a toll-free number) for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

The Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Flexible Subsidy Program.

OMB Control Number: 2502-0492.

Description of the need for the information and proposed use: Section 201 of the Housing and Community Development Amendments of 1978 (Public Law 95-557) authorizes the provision of assistance to some HUD assisted projects. These include projects assisted under Section 236, Section 221(d)(3), and some Section 202 and Section 8 projects. This assistance is provided under the Flexible Subsidy Program. HUD form 9826 is used by owners when applying for Flexible Subsidy assistance under this program.

An estimation of the total numbers of hours needed to prepare the information collection is 75, the number of respondents is 150, frequency of response is 1, and the hours of response is 75.

Status of the proposed information collection: Extension without change.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: March 11, 1996.

Nicolas P. Retsinas,

A/S Secretary for Housing—Federal Housing Commissioner.

[Docket No. FR–3917–N–56]

Office of the Assistant Secretary for Policy Development and Research; Notice of Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: May 21, 1996.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Reports Liaison Officer, Office of Policy Development and Research, Department of Housing and Urban Development, 451 7th Street SW., Room 8226, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: Contact Ronald J. Sepanik at (202) 708–1060, Ext. 334 (this is not a toll-free number) for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Survey of Market Absorption of New Apartment Buildings (SOMA).

Description of the need for the information and proposed use: The Survey of Market Absorption provides the data necessary to measure the rate at which new rental apartments and new condominium apartments are absorbed, that is, taken off the market, usually by being rented or sold, over the course of the first twelve months following completion of a building. The data are collected at quarterly intervals until the twelve months expire or until the units in a building are completely absorbed. The survey also provides estimates of certain characteristics, i.e., asking rent/price, number of bedrooms, of apartments being absorbed, which provides a basis for analyzing the degree to which new apartment construction is meeting the present and future needs of the public.

Members of affected public: Business firms (builders) Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response:

Number of respondents: 12,000 (maximum).

Frequency of response: four times (maximum).

Time per respondent: .3 hours.

Total hours to respond: 3,600.

Status of the proposed information collection: Pending OMB approval.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: March 15, 1996.

Michael A. Stegman,

Assistant Secretary, Office of Policy, Development and Research.

[Docket No. FR–3917–N–55]

Office of the Assistant Secretary for Public and Indian Housing; Notice of Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: May 21, 1996.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Mildred M. Hamman, Reports Liaison Officer, Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street, SW, Room 4255, Washington, D.C. 20410–5000.

FOR FURTHER INFORMATION CONTACT: Mildred M. Hamman, (202)–708–0846, (This is not a toll-free number.) for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have

practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Public and Indian Housing-Resident Satisfaction and Management Needs Survey for the Chicago Housing Authority.

OMB Control Number:

Description of the need for the information and proposed use: HUD is in the process of assessing management needs at the CHA, and as part of that effort, has planned a survey of CHA residents to obtain their perceptions of living conditions in CHA developments and their satisfaction with CHA services. It is HUD's intent that this survey capture a baseline of resident satisfaction that can be used to measure changes in satisfaction one year after the initial survey. There are three instruments which will be used in this study: Building Level Data form, Record of Contact Sheet, and the CHA Resident Satisfaction and Management Needs Survey. The Building Level form will be completed for each building in the survey sample. The information collected includes size of the building, history of modernization activities, and type of CHA management. The Contact Sheet is a record of the interviewer's attempts to contact residents in a particular unit. The final study instrument is the CHA Resident Satisfaction and Management Needs Survey. The survey will be administered face-to-face by trained interviewers who will record each resident's answers. The questions on the survey cover the following topics: perceptions of maintenance of residents' apartments and buildings, CHA management performance, perceptions of crime and safety, use of services on-site, effect of HUD takeover, and basic demographic data.

Agency forms numbers, if applicable: 2577–

Members of affected public: Chicago Housing Authority Residents Estimation of the total number of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of response: 1,175 respondents, on occasion, 15 average minutes per response, 2 responses per respondent, 588 hours for a total reporting burden.

Status of the proposed information collection: New.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: March 18, 1996.

Michael B. Janis,

General Deputy Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210–33–M

[Docket No. FR–3235–N–04]

Office of Housing; Submission for OMB Review: Comment Request

AGENCY: Office of the Assistant Secretary for Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below has been submitted to the Office of Management and Budget (OMB) for emergency review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due date: April 1, 1996.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments must be received within seven-ten (7–10) days from the date of this Notice. Comments should refer to the proposal by name and/or OMB approval number should be sent to: Joseph F. Lackey, Jr., OMB Desk Officer, Office of Management and Budget, Room 10235, New Executive Office Building, Washington, D.C. 20503.

FOR FURTHER INFORMATION CONTACT: Kay F. Weaver, Reports Management Officer, Department of Housing and Urban Development, 451 7th Street, Southwest, Washington, D.C. 20410, telephone (202) 708–0050. This is not a toll-free number. Copies of the proposed forms and other available documents submitted to OMB may be obtained from Ms. Weaver.

The Notice is soliciting comments from members of the public and affecting agencies concerning the proposed collection of information to: (1) evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) enhance the quality, utility, and clarity of the information to be collected; and (4) minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

This Notice also lists the following information:

Title of Proposal: Notice of Funding Availability for the Federally Assisted Low-Income Housing Drug Elimination Grant Program—FY 1996 (FR–3235).

OMB Control Number: 2502–0476.

Description of the need for the information and proposed use: This information collection is required in connection with HUD's proposed issuance of a Notice of Funding Availability (NOFA) that will announce the availability of $10,000,000 in grant funds authorized under Chapter 2, Subtitle C, Title V of the Anti-Drug Abuse Act of 1988 (42 U.S.C. 11901 et seq.), as amended by Section 581 of the National Affordable Housing Act of 1990 (NAHA) approved November 28, 1990, Public Law 101–625. The requirements of the Notice of Funding Availability will provide guidance for applicants that will implement the funding while the rulemaking is pending.

Housing owners are eligible to apply for Drug Elimination Grants for drug elimination activity in federally assisted low-income housing projects. Unlike drug elimination grants made by HUD to Public Housing Authorities, grant funds to private owners are limited to the following activities: Systems designed to limit building access to project residents, the installations of barriers, lighting systems, fence bolts, locks; the landscaping or reconfiguration of common areas to discourage drug-related crime; and other physical improvements designed to enhance security and discourage drug-related activity. In particular, HUD is seeking plans that provide successful, proven and cost effective drug crime deterrents designed to address the realities of low-income assisted housing environments.

Information provided by the housing owner will be reviewed by HUD to determine that it meets the requirements of the Notice of Funding Availability and to assign points in accordance with the selection criteria.

SUPPLEMENTARY INFORMATION: The Department has submitted the proposal for the collection of information, as described below, to OMB for emergency review, as required by the Paperwork Reduction Act (44 U.S.C. Chapter 35).

March 27, 1996 is requested for OMB approval.

The Notice lists the information: (1) the title of the information collection proposal; (2) the office of the agency to collect the information; (3) the OMB approval number, if applicable; (4) the description of the need for the information and its proposed use; (5) the agency form number, if applicable; (6) what members of the public will be affected by the proposal; (7) how frequently information submissions will be required; (8) an estimate of the total number of hours needed to prepare the information submission including number of respondents, frequency of response, and hours of response; (9) whether the proposal is new, an extension, reinstatement, or revision of an information collection requirement; and (10) the names and telephone numbers of an agency official familiar with the proposal and of the OMB Desk Officer for the Department.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. 35, as amended.

Dated: March 18, 1996.

David S. Cristy,

Director, IRM Policy and Management Division.

Notice of Submission of Proposed Information Collection to OMB

Title of Proposal: Notice of Funding Availability for the Federal Assisted Low-Income Housing Drug Elimination Grant Program—FY 1996 (FR–3235).

Office: Office of the Assistant Secretary Housing-Federal Housing Commissioner.

OMB Approval Number: 2502–0476.

Description of the Need for the Information and its Proposed Use: Drug Elimination Grant Housing owners must apply for grants to use in eliminating drug-related crime in Federally assisted low-income housing. The application process includes developing a plan, seeking tenant comments, certifying compliance with HUD requirements and outlining a comprehensive drug prevention program.

Form Number: SF–424, 424A, LLL, HU–50070 and 2880.

Respondents: 1,000.

Frequency of Submission: One time plan and application.

Reporting Burden:

Number of respondents	x	Frequency of responses	x	Hours per response	=	Burden hours
1,000		1		40		40,000

Total Estimated Burden Hours: 40,000.

Status: Reinstatement.

Availability of Final Environmental Impact Statement for Proposed Issuance of a Permit to Allow Incidental Take of Golden-cheeked Warbler, Black-capped Vireo, and Six Karst Invertebrates in Travis County, Texas

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of Availability of a Final Environmental Impact Statement (EIS) for the proposed issuance of a section 10(a)(1)(B) permit to allow the incidental take of golden-cheeked warblers, black-capped vireos, and six karst invertebrates for land development on private lands in Travis County, Texas.

SUMMARY: The City of Austin and Travis County have applied for a permit from the U.S. Fish and Wildlife Service to allow for incidental take of Federally listed endangered species black-capped vireo, golden-cheeked warbler, and six karst invertebrates under section (10)(a)(1)(B) of the Endangered Species Act. This will be incidental to otherwise lawful activities that would occur as a result of clearing of vegetation and grading or other earth-moving activities necessary for residential, commercial, and industrial construction and infrastructure projects within Travis County, Texas.

The proposed permit will allow approved incidental take outside of proposed preserve lands within the proposed permit boundaries. In general, this area includes all of the lands within Travis County, excluding that portion of Balcones Canyonlands National Wildlife Refuge that falls within Travis County, and the city limits and planning jurisdictions of municipalities not participating in the Balcones Canyonlands Conservation Plan. The permit period is 30 years. Potential development for this time period is estimated to affect between 30,000 and 60,000 acres within the permit area. Of the approximately 2,000 acres of known occupied black-capped vireo habitat located within Travis County, 933 acres

will be preserved within the Conservation Plan area and approximately 1,000 acres will be subject to incidental take in the permit area. For the golden-cheeked warbler, approximately 26,753 acres of potential habitat is located within the permit area and may be subject to incidental take. This potential warbler habitat could support from 1,605 to 3,210 pairs of warblers. Of the 45,368 acres of potential karst invertebrate habitat occurring in the permit area, approximately 38,349 acres will be unprotected by the proposed Conservation Plan.

To minimize and mitigate the impacts of take, the applicants propose to conserve a minimum of 30,428 acres of black-capped vireo and golden-cheeked warbler habitat in a preserve system; provide for the ongoing maintenance, patrol, and biological management of the conserved habitat; conduct the biological monitoring and research activities in support of the Conservation Plan; and provide funds to implement the habitat Conservation Plan. Alternatives considered include no action; issuance of the permit with the submitted Balcones Canyonlands Conservation Plan and a 30,428 acre preserve; and issuance of the permit with the submitted Balcones Canyonlands Conservation Plan and a 35,428 acre preserve.

DATES: Comments will be accepted until April 22, 1996.

ADDRESSES: Comments should be sent to the U.S. Fish and Wildlife Service, 10711 Burnet Road, Suite 200; Austin Texas 78758.

FOR FURTHER INFORMATION CONTACT: Joseph E. Johnston, U.S. Fish and Wildlife Service, Ecological Services, Austin Field Office, 10711 Burnet Road, Suite 200; Austin, Texas 78758, telephone: (512) 490–0063; facsimile (505) 490–0974.

SUPPLEMENTARY INFORMATION: A limited number of individual copies of the Final EIS/Habitat Conservation Plan (HCP) may be obtained by Notices of Availability of the Final EIS/HCP will be sent to everyone currently on the U.S. Fish and Wildlife Service's mailing list for information on the Balcones Canyonlands Conservation Plan.

Copies of the final EIS/HCP are available for inspection at Travis County Precinct offices; City of Austin Municipal Building, Town Lake Center on Barton Springs Road, and Two Commodore Plaza; and the U.S. Fish and Wildlife Service at the above Address.

Dated: March 12, 1996.

Nancy M. Kaufman,

Regional Director, Fish and Wildlife Service.

Geological Survey

Information Collection Submitted to the Office of Management and Budget for Review Under the Paperwork Reduction Act

A request extending the collection of information listed below will be submitted to the Office of Management and Budget (OMB) for approval under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35). Copies of the proposed collection of information and related forms may be obtained by contacting the bureau clearance officer at the phone number listed below. Comments and suggestions on the requirement should be made directly to the bureau clearance officer and to the Office of Management and Budget, Paperwork Reduction Project (1032–0004), Washington, D.C. 20503, telephone 202–395–7340.

Title: Nonferrous Metals Surveys.

OMB approval number: 1032–0004.

Abstract: Respondents supply the U.S. Geological Survey (USGS) with domestic production and consumption data on nonfuel mineral commodities. This information is published in USGS publications including the Mineral Industry Surveys, Volumes I, II, and III of the Minerals Yearbook, and Mineral Commodity Summaries for use by private organizations and other Government agencies.

Bureau form number: 6–1151–MA et al (29 forms).

Frequency: Monthly, Quarterly, and Annual.

Description of respondents: Producers and Consumers of Nonferrous Metals.

Annual responses: 8,505.

Annual burden hours: 9,494.

Bureau clearance officer: Alice J. Floyd 703 648–4918.

Dated: March 11, 1996.

John H. DeYoung, Jr.,

Chairman, Minerals Information Management Council.

BILLING CODE 4310–31–M

Bureau of Land Management

[WO–330–1030–2–24 1A]

Extension of Approved Information Collection, OMB Number 1004–0001

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Land Management (BLM) is announcing its intention to request renewal of existing approval to collect certain information from those requesting a free-use permit for timber or other plant material when product sale is either not feasible or in the best interest of the Government. BLM needs this information to: 1) determine whether the timber or plant material requested qualifies for free use, 2) determine if disposal is consistent with local land use plans, and 3) ensure that the appropriate office is issuing the permit.

DATES: Comments on the proposed information collection must be received by May 21, 1996 to be assured of consideration.

ADDRESSES: Comments may be mailed to: Regulatory Management Team (420), Bureau of Land Management, 1849 C Street NW, Room 401LS, Washington, D.C. 20240.

Comments may be sent via Internet to: !WO140@attmail.com. Please include "ATTN: 1004–0001" and your name and return address in your Internet message.

Comments may be hand-delivered to the Bureau of Land Management Administrative Record, Room 401, 1620 L Street, NW, Washington, DC.

Comments will be available for public review at the L Street address during regular business hours (7:45 a.m. to 4:15 p.m.), Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Bill Torgersen, (202) 452–7759.

SUPPLEMENTARY INFORMATION: In accordance with 5 CFR 1320.12(a), BLM is required to provide 60-day notice in the **Federal Register** concerning a collection of information contained in a published current rule to solicit comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology. BLM will receive and analyze any comments sent in response to this notice and include them with its request for approval from the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

BLM grants free use of timber and other vegetative resources on public lands through authority provided by the Acts of June 3, 1878 (20 Stat. 88, 16 U.S.C. 604–606) and March 3, 1891 (26 Stat. 1093, 16 U.S.C. 607), as supplemented by the Act of January 11, 1921 (41 Stat. 1088, 16 U.S.C 604, 612), to settlers, citizens, residents of States, and corporations. The implementing regulations are found at 43 CFR Subpart 5510—Free Use of Timber; General. The regulations were issued on June 13, 1970 (35 FR 10012) and last amended on September 29, 1995 (60 FR 50448). Applicants for free-use permits for timber or other plant material must provide the information listed at 43 CFR 5511.1–1(f). BLM collects the applicant's name and post-office address, and the name and address of any agent or agents who may be employed to procure the material, and the intended purpose of the free-use material using BLM Form 5510–1. The type of material, quantity, legal description of the location, and State and County are completed by the issuing office.

BLM uses the information provided by the applicant to: 1) determine whether the timber or plant material requested qualifies for free use, 2) determine if disposal is consistent with local land use plans, and 3) ensure that the appropriate office is issuing the permit. If BLM did not collect this information, it could not ensure proper authorization of free-use material in accordance with the law. If the ability to regulate use is not ensured, unauthorized degradation of the environment could occur, including unauthorized cutting or collection of plants on non-Public land.

The collection of information is short, simple and not inconvenient to the applicant. Valuable dialogue normally occurs at the time a permit is issued concerning location of the material, collection methods, and any required mitigation measures. Based on BLM's experience administering the activities described above, the public reporting burden for the information collected is estimated to average one-half hour per response. The respondents are settlers, citizens, residents of States and corporations. The type of information collected is already maintained by the respondents for their own recordkeeping purposes and needs only be entered on the application form. The frequency of response is once, upon applying for a one year free-use permit. The number of responses per year is estimated to be about 160. The estimated total annual burden on new respondents is about 80 hours.

Any interested member of the public may request and obtain, without charge, a copy of Form 5510–1 by contacting the person identified under **FOR FURTHER INFORMATION CONTACT.**

All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will also become a matter of public record.

Dated: March 18, 1996.

Dr. Annetta L. Cheek,

Chief, Regulatory Management Team.

Extension of Currently Approved Information Collection; OMB Approval Number 1004–0012

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Land Management (BLM) is announcing its intention to request extension of approval for the collection of information from States and local government agencies, and from qualified nonprofit corporations and associations, who seek to obtain public lands and benefits under the Recreation and Public Purpose Act of 1926, for recreational and public purposes. The BLM uses the information to determine if an applicant meets the requirements of the Act.

DATES: Comments on the proposed information collection must be received by May 21, 1996 to be considered.

ADDRESSES: Comments may be mailed to: Regulatory Management Team (420), Bureau of Land Management, 1849 C Street NW., Room 401LS, Washington, D.C. 20240.

Comments may be sent via Internet to: !WO140@attmail.com. Please include "Attn: 1004–0012" and your name and address in your Internet message.

Comments may be hand delivered to the Bureau of Land Management Administrative Record, Room 401 L Street NW., Washington, D.C.

Comments will be available for public review at the L Street address during regular business hours (7:45 a.m. to 4:15 p.m., Monday through Friday).

FOR FURTHER INFORMATION CONTACT: Alzata L. Ransom, Realty Use Group, at (202) 452–7772.

SUPPLEMENTARY INFORMATION: In accordance with 5 CFR 1320.12(a), BLM is required to provide 60-day notice in the **Federal Register** concerning a collection of information contained in a published current rule to solicit comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or technological collection techniques or other forms of information technology.

The Recreation and Public Purpose Act (R&PP), as amended (43 U.S.C. 869 *et seq.*), authorizes the Secretary of the Interior to lease or convey certain public lands to States and local government agencies, and to qualified nonprofit corporations and associations, for recreational and public purposes under specified conditions. The regulations in 43 CFR Part 2740 provide guidelines and procedures for the lease or conveyance of public lands under the Act. The regulations were last revised on July 23, 1992 (57 FR 32732).

The term "public purpose" means for the purpose of providing facilities or services for the benefit of the public in connection with, but not limited to, public health, safety, or welfare. Use of lands or facilities for habitation, cultivation, trade, or manufacturing is permissible only when necessary for and integral to, i.e., essential part of, the public purpose.

The Act applies to all public lands, except lands within national forests, national parks and monuments, national wildlife refuges, Indian lands, and acquired lands. Revested Oregon and California Railroad grant lands and

reconveyed Coos Bay Wagon Road grant lands in western Oregon may only be leased to State and Federal instrumentalities and political subdivisions and to municipal corporations.

Lease periods may be for any length, but shall not exceed 20 years for nonprofit entities, and 25 years for Federal, State, and local governmental entities. Leases are issued subject to appropriate environmental and legal stipulations, and contain provisions for compliance with: (a) Nondiscrimination based on race, color, sex, age, religion, or national origin; (b) an approved plan of management and development upon which the lease was considered and issued (Leases may be canceled for nonuse or a use other than that for which the lease was issued without prior consent of the BLM.); (c) under certain conditions, the Federal Government may reserve the standing timber, use of water, or place other limitations on the use of natural resources; and (d) other reasonable stipulations as may be required as part of the consideration for the moderate charge being made for land.

Patents issued under the Act convey a restricted title since they contain provisions or clauses which, if not complied with, may result in reversion of the title to the United States. These provisions are: (a) Nondiscrimination clauses providing that the patentee may not restrict or permit restriction of the use of the lands conveyed or facilities thereon because of race, color, sex, age, religion, or national origin; (b) a provision that, if the patentee or its successor in interest attempts to transfer title or control over the land to another, or the land is devoted to a use other that for which it was conveyed without the consent of the BLM, title will revert to the United States; (c) the patent will stipulate that the lands will be used in perpetuity for the purposes for which they are acquired (The lease or patent may stipulate that certain provisions of the development program, including the management plan, may be subject to review by the Secretary of the Interior or his delegate.); and (d) all minerals will be reserved to the United States.

The information collected on Form 2740–1 is required by the regulations in 43 CFR Subpart 2741 to process requests for public lands under the provisions of the R&PP Act. Based on its reviews and evaluation, the BLM may approve or disapprove any application in whole or in part, or require its revision. The following information is collected on the form: (a) Applicant's name and address (home and business telephone number); (b) proposed use, and type of authorization requested; (c) description of the proposed use of the land; (d) State or political subdivision, and applicant's statutory authority to hold lands for the purpose requested; (e) copy of the applicant's authority to file the application and to take actions necessary to fulfill the requirements of the R&PP Act; (f) applicant's compliance with nondiscrimination as to access to the lands and facilities based on race, color, religion, sex, age or national origin in accordance with Title VI of the Civil Rights Act of 1964 (78 Stat. 241). In addition, the form instructs the applicant to submit: (a) A copy of their charter, a copy of their articles of incorporation, and a copy of their authority to operate in the State where the lands applied for are located; (b) a plan of development, use, and maintenance that includes a statement of proposed use of the lands, description of the proposed project, anticipated expenditure for development, source of funds to be used for development, and a statement describing administration of the tract; (c) maps showing the nature and location of facilities, land ownership of the entire project, and access routes; (d) timetable for development; and (e) explanation of proposed maintenance responsibilities and procedures.

After receiving the form, BLM will: (a) Determine if the applicants proposal is in conformance with land use planning, review land status to determine if the lands are subject to application, and determine if the application meets all requirements of the law and regulations; (b) review the development and management plans to determine their adequacy and effectiveness, and evaluate the construction schedule and estimated financing to ensure they are realistic and practicable; (c) secure the views of other agencies that may have an interest in the lands, including State and local planning and zoning departments; (d) check for the presence of unpatented mining claims (R&PP leases and conveyances cannot be issued where mining claims are present, and if it is necessary to determine the validity of a mining claim in order to allow the lease, the cost of the determination will be the responsibility of the applicant.); (e) conduct a field examination and other investigations to gather information and data on the environmental considerations and proper classification of the lands; and (f) publish a notice to solicit views and comments from the public concerning the proposal. Potential applicants should contact the appropriate District Office of the BLM well in advance of the anticipated submission of Form 2740–1. Early consultation with the BLM is needed to familiarize a potential applicant with management responsibilities, and terms and conditions which may be required in a lease or conveyance.

BLM estimates that approximately 55 R&PP applications (Form 2740–1) are received annually. Based on its experience administering this program, BLM estimates it takes an average of 40 hours for a applicant to supply the requested information. The estimate also includes the time required for assembling the information, as well as the time of clerical personnel, if needed. The information is collected once for each application. Based on the number of applications BLM receives annually and the average time it takes an applicant to supply the requested information, the total annual burden is collectively 2,200 hours.

Any interested member of the public may request and obtain, without charge, a copy of the R&PP application (Form 2740–1) by contacting the person identified under **FOR FURTHER INFORMATION CONTACT.** All responses to this notice will be summarized and included in the request for Office of Management and Budget approval. All comments will also become part of the public record.

Dated: March 18, 1996.

BILLING CODE 4310–84–P

[ID–016–06–1220–00]

Shooting Closures and Restrictions in Ada, Canyon, Elmore, and Owyhee Counties, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Public lands within and immediately adjacent to a portion of the Snake River Birds of Prey National Conservation Area (NCA) are hereby closed to the discharge of firearms as outlined below:

1. The following described public lands are closed year-round to the discharge of rifles and pistols:

A. All public lands lying south of the Union Pacific Railroad within the following townships:

T. 2 N., R. 1 W.,
T. 1 N., R. 1 W.,
T. 1 N., R. 1 E.,
T. 1 N., R. 2 E.,
T. 1 N., R. 3 E.,

B. All public lands within T. 1 S., R. 2 W. lying within the NCA north of the Snake River Canyon.

C. All public lands within T. 1 S., R. 1 W. lying north of the Snake River Canyon and west of Swan Falls Road. Also within the same township, all of Section 1 and that portion of Sections 12 and 13 lying north of the Pacific Power and Light Company 500 KV electric transmission line.

D. All public lands within T. 1 S., R. 1 E. lying north of the Pacific Power and Light Company 500 KV electric transmission line.

E. All public lands within T. 2 S., R. 1 W. and T. 2 S., R. 1 E. lying west of Swan Falls Road and east of the Snake River Canyon.

2. The following described public lands are closed from February 15 to August 31 to the discharge of shotguns and muzzleloaders, and closed year-round to the discharge of rifles and pistols, with the exception that rifles may be used during established deer hunting seasons in Hunting Unit 40.

All public lands from Grandview, Idaho downstream to Guffey Bridge, lying within ½ mile of either side of the Snake River or 100 yards back from the canyon rim, whichever is the greater distance.

SUPPLEMENTARY INFORMATION: The NCA was established on August 4, 1993 to protect and enhance raptors, their habitat, and associated natural and scientific resources. The NCA encompasses 484,873 acres of public land in southwest Idaho, extending along 80 miles of the Snake River. The above-described closures and restrictions are effective immediately, and will continue in effect until specifically revoked or modified.

This order is issued pursuant to the authority of 43 CFR 8364.1. The order implements decisions in the 1995 Snake River Birds of Prey National Conservation Area Management Plan to improve safety for persons visiting the NCA, and is consistent with land use plan decisions found in the Bruneau, Kuna, and Owyhee Management Framework Plans. Violation of this order is punishable by a fine not to exceed $1000 and/or imprisonment not to exceed 12 months.

FOR FURTHER INFORMATION CONTACT: Contact John Sullivan, National Conservation Area Manager, Bureau of Land Management, Lower Snake River District, 3948 Development Avenue, Boise, Idaho 83705.

Rodger E. Schmitt,

District Resource Coordinator.

[ID–016–06–1220–00]

Vehicle Management Area Designation and Road Closure Order; Ada, Elmore, Canyon, and Owyhee Counties, ID

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: Effective immediately, the Snake River Birds of Prey National Conservation Area (NCA) is declared a Designated Vehicle Management Area except for those portions of the NCA currently included within the Owyhee Front Special Recreation Management Area and the Fossil Creek Off-Highway Motor Vehicle Management Unit. Also excepted from this order is military training maneuvers within the Orchard Training Area. Operation of motorized vehicles within the Designated Vehicle Management Area will be restricted to designated roads and trails. In addition, the following described roads and trails are closed to motorized vehicles:

1. The unimproved dirt road extending downstream along the north side of the Snake River from the Initial Butte Farms pump station in Section 35, T. 1 S., R. 1 W. to where the road enters private land in Section 36, T. 1 S., R. 2 W.

2. The unimproved dirt road, known as Priest Grade, that traverses the wall of the Snake River Canyon in Section 33, T. 1 S., R. 1 W.

3. The trail that extends along the south side of the Snake River from near the pump station at the end of Con Shea Basin Road in Section 6, T. 1 S., R. 1 W. downstream to Guffey Bridge.

4. The trail on the south side of the Snake River extending downstream from the lower end of the old Priest Ranch.

5. The Cabin Draw road in Section 11, T. 4 S., R. 2 E. Except for the above-described road closures, visitors to the NCA may drive on existing roads or trails unless or until they are designated as "closed". As road inventories are completed, designated vehicle routes will be signed as "open". Roads or trails designated as "closed" will be signed, blocked where necessary, and rehabilitated as needed to reduce soil erosion and improve wildlife habitat.

The Bureau of Land Management retains the right to use or authorize use of roads and trails, or authorize specific off-road travel for administrative or emergency purposes. This vehicle management area designation and closure order shall remain in effect until specifically revoked or modified.

SUPPLEMENTARY INFORMATION: The NCA was established on August 4, 1993 to protect and enhance raptors, their habitat, and associated natural and scientific resources. The NCA encompasses 484,873 acres of public land in southwest Idaho, extending along 80 miles of the Snake River. This order is issued pursuant to the authority of 43 CFR 8364.1, and is consistent with decisions in the 1995 Snake River Birds of Prey National Conservation Area Management Plan, the Bruneau, Kuna, and Owyhee Management Framework Plans, and the Jarbidge Resource Management Plan. Violation of this order is punishable by a fine not to exceed $1000 and/or imprisonment not to exceed 12 months.

FOR FURTHER INFORMATION CONTACT: John Sullivan, National Conservation Area Manager, Bureau of Land Management, Lower Snake River District, 3948 Development Avenue, Boise, Idaho 83705.

Rodger E. Schmitt,

District Resource Coordinator.

BILLING CODE 4310–GG–P

[NM–017–1430–00]

Shooting Closure on Public Lands in Placitas, New Mexico

AGENCY: Bureau of Land Management, Interior.

ACTION: Shooting closure.

SUMMARY: The Bureau of Land Management (BLM), Rio Puerco Resource Area is closing approximately 2,499.09 acres of public lands in the Rio Puerco Resource Area, located in Sandoval County, New Mexico, to the discharge of firearms (including black powder and antique arms). This action will provide the necessary public safety and will also decrease potential conflicts with recreational users by keeping a logical shooting area open. Unrestricted discharge of firearms in this area has lead to a public health and safety issue with recreational users including hikers, bicyclists, horseback riders, bird watching groups, and others.

The public lands closed to discharging of firearms under this closure will be posted with signs at the most prominent points of public access as well as being displayed on a map available for public information at the area office.

EFFECTIVE DATE: Notice is hereby given that effective March 22, 1996, shooting on public lands is prohibited on approximately ten sections of public lands in Sandoval County, New Mexico.

SUPPLEMENTARY INFORMATION: The public lands affected by this closure are described as follows:

New Mexico Principal Meridian

T. 13 N., R. 4 E.,
Secs. 14, Lots 13 to 15, inclusive, NE¼SE¼; S½SE¼;
15, Lot 10;
22, Lots 7, 8, SE¼NE¼;
23, N½, NE¼SW¼, SE¼;
24, N½.
T. 13 N., R. 5 E.,
Secs. 19, Lots 1, 3, N½;
20, NW¼NW¼, E½NW¼, NE¼, NE¼SW¼, SE¼;
29, Lots 1, 2, 3, 4;
30, SE¼;
30, SE¼;
31, NE¼NE¼.
Aggregating approximately 2,499.09 acres.

The areas not included in the shooting closure are described as follows:

T. 13 N., R. 4 E.,
Sec. 13, Lots 6 to 9, S½;
Sec. 14, Lot 12, SE¼SE¼, S½SE¼;
Sec. 23, NE¼NE¼NE¼.
T. 13 N., R. 5 E.,
Sec. 18, Lots 1 to 6, inclusive, S½SE¼;
Sec. 17, Lots 1 to 4, inclusive, S½S½.
Aggregating approximately 1,092.27 acres.

The Public Service Company of New Mexico powerline will serve as the south boundary for the Open Area and the north boundary for the Closure Area with an exception in NE¼NE¼NE¼ of section 23, T. 13 N., R. 4 E., NMPM. (The westerly bank of Las Huertas Creek and the easterly of the PNM substation will serve as the boundary for this exception.) The BLM will be posting signs on the southerly boundary of the exemption area.

The purpose of this action is to enhance visitor safety on public lands, to minimize conflict, and adhere to the concept of multiple use. This designation remains in effect until further notice. The purpose of this shooting closure is to ensure public safety on public lands. This closure order is in accordance with the provisions of 43 CFR 8364.1, and applies to all persons.

FOR FURTHER INFORMATION CONTACT: Joe Jaramillo, Realty Specialist, Bureau of Land Management, Rio Puerco Resource Area, 435 Montano NE., Albuquerque, New Mexico 87107, (505) 761–8779.

Michael R. Ford,
District Manager.

Environmental Statements; Cedar City District, UT

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Availability.

SUMMARY: The Bureau of Land Management, Cedar City District, Dixie Resource Area, has completed an Environmental Analysis (EA)/Finding of No Significant Impact (FONSI) of the Proposed Plan Amendment to the Virgin River Management Framework Plan. The Proposed Amendment involves the addition of five new land exchange criteria.

DATES: The protest period for this Proposed Plan Amendment will commence with the date of publication of this notice and last for 30 days. Protests must be received on or before April 22, 1996.

ADDRESSES: Protests must be addressed to the Director (480), Bureau of Land Management, Resource Planning Team, Box 10, 1620 L Street, N.W., Washington, D.C. 20036 within 30 days after the date of publication of this Notice of Availability.

FOR FURTHER INFORMATION CONTACT: Jim Crisp, Area Manager, Dixie Resource Area, Cedar City District at 345 East Riverside Drive, St. George, Utah 84770, (801) 673–4654. Copies of the proposed Plan Amendment are available for review at the Dixie Resource Area.

SUPPLEMENTARY INFORMATION: This action is announced pursuant to Section 202(a) of the Federal Land Management Act (1976) and 43 CFR Part 1610. This Proposed Amendment is subject to protests by any party who has participated in the planning process. Protest must be specific and contain the following information:

—The name, mailing address, phone number, and interest of the person filing the protest.
—A statement of the issue(s) being protested.
—A statement of the part(s) of the proposed amendment being protested and citing pages, paragraphs, maps etc., of the Proposed Plan Amendment.
—A copy of all documents addressing the issue(s) submitted by the protestor during the planning process or a reference to the date when the protester discussed the issue(s) for the record.
—A concise statement as to why the protester believes the BLM State Director is incorrect.

Dated: March 14, 1996.

G. William Lamb,
State Director, Utah.

Notice of Realty Action; Non-Competitive Sale of Lands

AGENCY: Bureau of Land Management, Interior.

ACTION: Designation of public lands located in Archuleta County, Colorado, as being suitable for disposal out of federal ownership through sale.

SUMMARY: The following described public lands have been determined to be suitable for disposal by sale utilizing non-competitive procedures, at not less than the fair market value as determined by an appraisal completed by a Federal or independent appraiser using the principles contained in the "Uniform Appraisal Standards for Federal Land Acquisitions". Authority for the sale is Section 203 of Public Law 94–597, the Federal Land Policy and Management Act of 1976.

New Mexico Principal Meridian, Colorado

T. 32 N., R. 2 W.,
Sec. 2, lot 7,
Containing 3.48 acres.

The lands will not be offered for sale until at least 60 days after the date of publication of this notice in the **Federal Register**. This land is being offered as a direct non-competitive sale to Navajo River Ranch, L.C.C. BLM has determined a direct sale is necessary to protect existing equities in the land and to resolve an unauthorized occupancy of the land.

In the event of sale, the mineral interests shall be conveyed simultaneously with the surface interest. The mineral interests being offered for conveyance have no known mineral value. Upon acceptance of a direct sale offer, the purchaser shall be required to make application for conveyance of those mineral interests.

Upon publication of this notice in the **Federal Register**, the lands will be segregated from all forms of appropriation under the public land laws, including the general mining law. This segregation will terminate upon issuance of a patent or 270 days from the date of this publication. The patent, when issued, will contain a reservation for a right-of-way thereon for ditches and canals constructed by the authority of the United States, Act of August 30, 1890, 26 Stat. 391, 443 U.S.C. 945.

FOR FURTHER INFORMATION: Additional information about this sale is available for review at the Bureau of Land Management, San Juan Resource Area Office, 701 Camino del Rio, Durango, Colorado 81301. Comments shall be submitted by May 6, 1996, to the San Juan Resource Area Manager, who may sustain, vacate, or modify this realty action. In the absence of any adverse comments, this realty action will become the final determination of the Department of the Interior.

Dated: March 11, 1996.

Jenny L. Saunders,
Realty Officer, Division of Resource Services, Colorado State Office.

Colorado: Filing of Plats of Survey

March 15, 1996.

The plats of survey of the following described land, will be officially filed in the Colorado State Office, Bureau of Land Management, Lakewood, Colorado, effective 10:00 am., March 15, 1996.

The plat, in 12 sheets, representing the dependent resurvey of the west and north boundaries, a portion of the subdivisional lines, certain mineral claims, or portions thereof, certain segregated mineral portions, or portions thereof, and a portion of the subdivision of section 6 in Township 1 North, Range 72 West, Sixth Principal Meridian, Group 875, Colorado, was accepted January 31, 1996.

The plat representing the dependent resurvey of a portion of the Georgetown Townsite and a portion of M.S. No. 17365, Sentinel Lode, in Township 4 South, Range 74 West, Sixth Principal Meridian, Colorado, Group 1074, was accepted February 6, 1996.

These surveys were executed to meet certain administrative needs of this Bureau.

The plat representing the dependent resurvey of portions of the south and east boundaries, the subdivisional lines, and the subdivision of certain sections in Township 35 North, Range 3 West, New Mexico Principal Meridian, Colorado, Group 1007, was accepted January 24, 1996.

The plat representing the dependent resurvey of portions of the Second Standard Parallel South (south boundary T. 10 S., R. 70 W.), a portion of the subdivisional lines, and the subdivision of section 34, in Township 10 South, Range 70 West, Sixth Principal Meridian, Colorado, Group 1050, was accepted January 9, 1996.

The plat representing the dependent resurvey of portions of the west boundary, a portion of west boundary of T. 50 N., R. 5 W., and a portion of the subdivisional lines, and the subdivision of certain sections, in Township 50 North, Range 5½ West, New Mexico Principal Meridian, Colorado, Group 969, was accepted January 24, 1996.

These surveys were executed to meet certain administrative needs of the U.S. Forest Service, Rocky Mountain Region.

The plat representing the dependent resurvey of portions of the subdivisional lines and the subdivision of a portion of sections 18 and 19 in Township 33 North, Range 9 West, New Mexico Principal Meridian, Colorado, Group 1041, was accepted January 12, 1996.

The plat representing the dependent resurvey of portions of the east boundary, subdivisional lines, and the subdivision of a portions of sections 13 and 24 in Township 33 North, Range 10 West, New Mexico Principal Meridian, Colorado, Group 1041, was accepted January 12, 1996.

The plat representing the metes and bounds survey of a Southern Ute Home Site number SUHS–23–78 in the N ½ of the NW ¼ of the NE ¼ in Section 9, Township 33 North, Range 7 West, New Mexico Principal Meridian, Group 980, Colorado, accepted on September 14, 1995, *was cancelled* on January 12, 1996. A new plat was accepted January 29, 1996.

The plat representing the metes and bounds survey of a Southern Ute Home Site number SUHS–34–78 in the SE ¼ of the NE ¼ in Section 13U, Township 34 North, Range 7 West, South of the Ute Line, New Mexico Principal Meridian, Group 1036, Colorado, accepted on September 14, 1995, *was cancelled* effective March 5, 1996, 1996. A new plat was accepted March 5, 1996, 1996.

The plat representing the metes and bounds survey of a Southern Ute Home Site number SUHS–33–78 in the NW ¼ of the SW ¼ in Section 3, Township 32 North, Range 7 West, New Mexico Principal Meridian, Group 970, Colorado, accepted on September 14, 1995, *was cancelled* effective March 5, 1996. A new plat was accepted March 5, 1996.

These surveys were executed to meet certain administrative needs of the Southern Ute Indian Reservation.

The following plats, accepted September 14, 1995, were found to have errors requiring corrections:

The three plats representing the dependent surveys, and metes and bounds surveys for Southern Ute Tribe Homesites, in sections 6, 27, and 33 in Township 33 North, Range 7 West, New Mexico Principal Meridian, Group 980, Colorado and the plat representing the dependent resurvey and metes and bounds surveys for Southern Ute Tribe Homesites, in section 23 in Township 34 North, Range 7 West (South of the Ute Line), New Mexico Principal Meridian, Group 1036, Colorado. 1995.

Proper notations were made upon the plats and they were accepted January 12, 1996.

All inquiries should be sent to the Colorado State Office, Bureau of Land Management, 2850 Youngfield Street, Lakewood, Colorado 80215.

Darryl A. Wilson,
Chief Cadastral Surveyor for Colorado.

Filing of Plats of Survey; Wyoming

AGENCY: Bureau of Land Managment, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Wyoming State Office, Cheyenne, Wyoming, thirty (30) calendar days from the date of this publication.

Sixth Principal Meridian Wyoming

T. 47 N., R. 69 W., Accepted March 7, 1996.
T. 49 N., R. 69 W., Accepted March 7, 1996.
T. 30 N., R. 97 W., Accepted March 15, 1996.
T. 31 N., R. 97 W., Accepted March 15, 1996.

If protests against a survey, as shown on any of the above plats, are received prior to the official filing, the filing will be stayed pending consideration of the protest(s) and or appeal(s). A plat will not be officially filed until after disposition of protest(s) and or appeal(s). These plats will be placed in the open files of the Wyoming State Office, Bureau of Land Management, 5353 Yellowstone Road, Cheyenne, Wyoming, and will be available to the public as a matter of information only. Copies of the plats will be made available upon request and prepayment of the reproduction fee of $1.10 per copy.

A person or party who wishes to protest a survey must file with the State Director, Bureau of Land Management, Cheynne, Wyoming, a notice of protest prior to thirty (30) calendar days from the date of this publication. If the protest notice did not include a statement of reasons for the protest, the protestant shall file such a statement with the State Director within thirty (30) calendar days after the notice of protest was filed.

The above-listed plats represent dependent resurveys, subdivision of sections.

FOR FURTHER INFORMATION CONTACT: Bureau of Land Management, P.O. Box 1828, 5353 Yellowstone Road, Cheyenne, Wyoming 82003.

Dated: March 15, 1996.

John P. Lee,

Chief, Cadastral Survey Group.

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

Notice is hereby given that a proposed consent decree embodying a partial settlement in *United States* versus *Allied-Signal, Inc.*, Civil Action No. 93–6490 MRP, was lodged on March 14, 1996, with the United States District Court for the Central District of California. The decree resolves the liability of the settling defendants for reimbursement of response costs incurred pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9601 *et seq.*, by the United States Environmental Protection Agency at the North Hollywood Operable Unit ("NHOU") of the San Fernando Valley Basin Superfund Site ("SFVB"), in the greater Los Angeles Area. The settling defendants, Lockheed Martin Corporation, Airport Group International, Inc., Waste Management Recycling & Disposal Services of California, Inc., CalMat Co., Pick-Your-Part Auto Wrecking, Pacific Steel Treating Company, Inc., Fleetwood Machine Products, Inc., the Erik and Else Bruun-Andersen Trust, and the Amended Cooke Family Trust, have agreed to pay a total of $4.75 million to the United States to resolve their liability for past and future NHOU response costs and past SFVB Basin-wide costs through April 30, 1992.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Allied-Signal, Inc.*, DOJ Ref. #90–11–3–1149.

The proposed consent decree may be examined at the office of the United States Attorney, Central District of California, Federal Building, Room 7516, 300 North Los Angeles Street, Los Angeles, California; the Region IX Office of the Environmental Protection Agency, 75 Hawthorne Street, San Francisco, California; and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $12.00 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Joel Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Notice of Lodging of Stipulation and Settlement Under the Clean Water Act

In accordance with Departmental policy, 28 CFR § 50.7, notice is hereby given that a proposed Stipulation and Settlement in *U.S.* v. *Caribe Tuna, Inc.*, Civ. No. 91–1926 (D.P.R.), was lodged on March 13, 1996 with the United States District Court for the District of Puerto Rico. The complaint in this action seeks injunctive relief and civil penalties under Section 301 of the Clean Water Act ("the Act"), 33 U.S.C. 1311, in connection with Caribe Tuna, Inc.'s ("CTI") operation of a tuna processing plant located in Ponce, Puerto Rico.

The proposed Stipulation and Settlement provides for CTI to pay a civil penalty to the United States of $300,000.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Stipulation and Settlement. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, D.C. 20044–7611, and should refer to *U.S.* v. *Caribe Tuna, Inc.*, DOJ Ref. No. 90–5–1–3638.

The proposed consent decree may be examined at the Office of the United States Attorney, Federal Office Building, Room 452, Carlos E. Chardon Avenue, Hato Rey, Puerto Rico 00918; the Region II Office of the Environmental Protection Agency, Region II Records Center, 290 Broadway, New York, New York 10007–1866; and at the Consent Decree Library, 1120 G Street, N.W., Fourth Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G. Street, Fourth Floor, N.W. Washington D.C. 20005. In requesting a copy, please refer to the referenced case and enclose a check in the amount of $2.00 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Joel Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Notice of Lodging of Consent Decree Pursuant to the Clean Water Act

In accordance with Departmental policy, 28 C.F.R. § 50.7, notice is hereby given that a proposed Consent Decree in *United States* v. *Lone Star Industries, Inc.*, Civil Action No. 1:96CV33SNL, was lodged on March 14, 1996, with the United States District Court for the Eastern District of Missouri.

In its complaint, which was filed along with the Consent Decree, the United States alleges that defendant Lone Star Industries Inc. ("Lone Star") failed to comply with Section 113(b) of the Clean Air Act ("Act"), 42 U.S.C. §§ 7413. In particular, the United States contends that Lone Star violated the New Source Performance Standards ("NSPS") for Nonmetallic Mineral Processing Plants, 40 C.F.R. Part 60, Subpart 000, promulgated pursuant to Section 111 of the Act, 42 U.S.C. § 7411, in that the defendant failed to comply with certain reporting and testing requirements at its nonmetallic mineral processing plant located in Cape Girardeau, Missouri.

Under the Consent Decree, Lone Star will pay a civil penalty in the amount of $40,000 to the United States. In addition, Lone Star will implement a Supplemental Environmental Project ("SEP") at its Cape Girardeau plant designed to control fugitive dust emissions by paving certain roads within the plant at an estimated cost of $150,000 by no later than December 31, 1996.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and should refer to *United States* v. *Lone Star Industries, Inc.*, DOJ Ref. No. 90–5–2–1–1938.

The proposed Consent Decree may be examined at the office of the United States Attorney, U.S. Courthouse, 1114 Market Street, St. Louis, Missouri 63101–2075; the Region 7 Office of the Environmental Protection Agency, 726 Minnesota, Kansas City, Kansas 66101; and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $4.50 (25 cents per page reproduction costs), payable to the Consent Decree Library.

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–01–M

Drug Enforcement Administration

[Docket No. 94–42]

William P. Jerome, M.D.; Grant of Restricted Registration

On March 29, 1994, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to William P. Jerome, M.D., (Respondent) of Davenport, Iowa, notifying him of an opportunity to show cause as to why DEA should not deny his application for registration as a practitioner under 21 U.S.C. 823(f), as being inconsistent with the public interest. Specifically, the Order to Show Cause alleged in substance that the Respondent (1) between December 1988 and February 1990, prescribed and dispensed controlled substances to individuals in exchange for money, cocaine and/or sexual favors; (2) allowed an individual to grow marijuana on his property; (3) falsified the names of individuals on prescriptions that he issued for controlled substances; (4) on February 7 and 8, 1990, dispensed 316 dosage units of controlled substances to an undercover officer for no legitimate medical reason; (5) on February 22, 1990, was indicted in the U.S. District Court for the Southern District of Iowa on nine felony counts related to the unlawful distribution and prescription of controlled substances; (6) pled guilty on April 26, 1990, to one count of conspiracy to distribute controlled substances, and as a condition of the plea agreement, voluntarily surrendered his DEA registration, was sentenced to twelve months imprisonment with a five year term of supervised release probation, and fined $15,000.00; and (7) on November 29, 1990, as a result of the criminal conviction, the Iowa Board of Medical Examiners (Medical Board) revoked his medical license, which was subsequently reinstated on October 13, 1992, subject to certain terms and conditions.

On April 21, 1994, the Respondent, through counsel, filed a timely request for a hearing, and following prehearing procedures, a hearing was held in Des Moines, Iowa, on February 8 and 9, 1995, before Administrative Law Judge Mary Ellen Bittner. At the hearing, both parties called witnesses to testify and introduced documentary evidence, and after the hearing, counsel for both sides submitted proposed findings of fact, conclusions of law and argument. On August 22, 1995, Judge Bittner issued her Opinion and Recommended Ruling, recommending that the Respondent's application be granted with specified restrictions. Neither party filed exceptions to her decision, and on September 25, 1995, Judge Bittner transmitted the record of these proceedings to the Deputy Administrator.

The Deputy Administrator has considered the record in its entirety, and pursuant to 21 CFR 1316.67, hereby issues his final order based upon findings of fact and conclusions of law as hereinafter set forth. The Deputy Administrator adopts, in full, the Opinion and Recommended Ruling, Findings of Fact, Conclusions of Law and Decision of the Administrative Law Judge, and his adoption is in no manner diminished by any recitation of facts, issues and conclusions herein, or of any failure to mention a matter of fact or law.

The Deputy Administrator finds that in November of 1989, a DEA diversion investigator (Investigator) received information from a special agent of the Iowa Division of Narcotics Enforcement (Special Agent) that the Respondent gave prescription drugs and prescriptions written under fictitious names to a Ms. M. in exchange for sexual favors. On January 16, 1990, the Investigator interviewed Ms. M., and she stated that she had received controlled substance samples and prescriptions from the Respondent in exchange for sexual favors, that the Respondent had written prescriptions for her, using about twenty names other than her own, and that she had taken the prescriptions to a number of different pharmacies to be filled. The Investigator testified before Judge Bittner, stating that Ms. M. also had provided the name of another individual (Mr. S.) who had received prescriptions from the Respondent for controlled substances intended for her use, and that this individual had filled the prescriptions and had given the substances to her in exchange for sexual favors, all with the Respondent's knowledge. Further, Ms. M. provided the name of an individual (Mr. D.) who had supplied cocaine to the Respondent. Ms. M. also told the Investigator that the respondent had provided her with cocaine, and that she had witnessed him use cocaine.

Ms. M. testified before a grand jury the same day that the Investigator

interviewed her, and the grand jury testimony basically corroborated the information she had provided to the Investigator. Ms. M. also testified that she was a drug addict and had used cocaine and narcotic pain medication.

The Investigator testified that, at the end of January and the beginning of February of 1990, she, another DEA diversion investigator, and an investigator from the Iowa Board of Pharmacy Examiners, had conducted a survey of approximately 15 to 20 area pharmacies to obtain prescriptions issued by the Respondent. The prescription survey showed that (1) between March 11 and September 28, 1989, Ms. M. had received 16 prescriptions totaling 450 dosage units of drugs containing propoxyphene, a Schedule IV controlled substance, which she had filled at nine different pharmacies; (2) between November 1, 1988, and April 14, 1989, the Respondent had issued Mr. S. 15 prescriptions totaling 500 dosage units of drugs containing propoxyphene, which Mr. S. had filled at three different pharmacies; (3) on December 3, 1988, and May 19, 1989, the Respondent had issued prescriptions to Mr. D. for 30 Ativan, a brand name for a drug containing lorazepam, a Schedule IV controlled substance, and for 30 Percocet, a brand name for a drug containing oxycodone, a Schedule II controlled substance; and (4) on February 15, 1989, the Respondent had issued a prescription for 20 Darvocet-N, a brand name for a drug containing propoxyphene, to Ms. M.'s husband, in the name of "Mike Barnes." However, the Investigator also testified that these prescriptions probably constituted no more than five percent of the Respondent's total number of prescriptions reviewed. The survey also showed that Ms. M. had received numerous prescriptions for controlled substances in false names between March of 1989 and September of 1989.

In February of 1990, the Special Agent arranged a controlled substance buy from the Respondent, and the Respondent, seeking cocaine, provided the Special Agent, among other substances, 60 Xanax .5 mg. tablets, 30 Xanax 1 mg. tablets, and 39 Vicodin tablets. Vicodin is a brand name product containing hydrocodone and is listed in Schedule III, and Xanax is a brand name drug containing the Schedule IV substance alprazolam. The Special Agent gave the Respondent $300.00 in cash and promised to bring cocaine the next day. The Special Agent also testified before Judge Bittner that during this transaction the Respondent was intoxicated.

The next evening the Special Agent again met with the Respondent, and prior to the meeting he had agreed to provide the Respondent with cocaine in return for double the quantity of pharmaceutical controlled substances he had received the previous night. According to the Special Agent's testimony, the Respondent appeared completely sober, and he tried to return the $300.00 received from the Special Agent the previous night, but the Special Agent told him to keep the money. The Special Agent asked the Respondent if he could obtain Percodan or Dilantin, but the Respondent had refused, stating that acquiring Schedule II drugs would be too difficult to make the effort worthwhile. Dilantin is not a controlled substance, but Percodan contains oxycodone, a Schedule II controlled substance. Ultimately, the Respondent gave the Special Agent three envelopes, each containing 25 Vicodin, and he again asked for the cocaine. However, he was then arrested.

After his arrest, the Investigator interviewed the Respondent, who stated that he thought controlled substance samples were his to use as he pleased and that he was not required to keep any records of them. The Respondent also told the Investigator that he had given away drugs, but that he had not sold them. He also admitted that on two occasions he had traded controlled substance samples for cocaine. With the Respondent's consent, the Investigator searched his office, where she found patient records for Ms. M. and Mr. S., but not for Mr. D.

Subsequently, in February of 1990, the Investigator interviewed Mr. D., who stated that the Respondent had obtained cocaine from him once or twice a month, that the Respondent sometimes had provided him with unused syringes, and that he had grown marijuana on the Respondent's property. Further, Mr. D. testified before the grand jury on February 20, 1990, stating that for approximately two years beginning in October of 1987, he had provided at least one and three-quarters grams of cocaine per week to the Respondent, and that the Respondent never had written him prescriptions for controlled substances. Rather, the Respondent had traded controlled substances such as Xanax, Valium Librium, Vicodin, or Lortab, for the cocaine. Mr. D. also testified that he had grown marijuana on the Respondent's property with his knowledge and consent.

On February 22, 1990, an indictment against the Respondent was filed in the United States District Court for the Southern District of Iowa, and on April 26, 1990, the Respondent entered into a plea agreement, specifying that he would plead guilty to one count of conspiracy to distribute controlled substances in violation of 21 U.S.C. 846, and that he would surrender his DEA registration. In exchange, the government agreed to dismiss the other counts, to include six counts of unlawful distribution of controlled substances, and one count of unlawful prescribing. On July 31, 1990, the court accepted the Respondent's guilty plea and sentenced him to twelve months incarceration to be followed by five years supervised probation, to include a program of testing and treatment for drug and alcohol abuse, and a fine of $15,000.00.

On September 13, 1990, the Medical Board filed a complaint, seeking action against the Respondent's medical license based on his felony conviction "for a crime related to his profession." On December 31, 1990, the Medical Board issued an Order revoking the Respondent's license to practice medicine.

Testifying before Judge Bittner, the Respondent denied ever trading prescriptions for sexual favors, and stated that he had terminated his client and prostitute relationship with Ms. M. after she had discovered that he was a physician. The Respondent also asserted that he had issued some prescriptions to Ms. M. in an attempt to help her, and that other call-in prescriptions were written in different names, but that he had assumed he had patients with those names, or that when he was covering for other physicians, that they had patients with those names. He testified that "[s]ome of those prescriptions I wrote under duress, with the threats of extortion, under the circumstances of my addiction." However, the Respondent also testified that he had falsified prescriptions for Ms. M. "[o]n one or two occasions * * * at her request." He also stated that Ms. M. had continued to demand drugs from him, that she had called him at night, and that she had demanded money and had threatened to expose him to his family and the medical community. The Respondent testified that in May or June of 1989, he told Ms. M. that he would no longer see or speak with her.

The Respondent also testified about the undercover operation, stating, "I was a desperate man trying to score my fix, and I was desperately trying to negotiate a deal. And at the time I would have done whatever it took to get it." The Respondent also stated that he did not use marijuana, that he had nothing to do with the marijuana grown on his property, that when he found out about it, he "repeatedly asked that it be removed," and that ultimately it was removed.

A United States Probation Officer (Officer) testified that, following the Respondent's incarceration, he was placed on supervised release on August 5, 1991, for a term of five years. The Officer testified that she had been the Respondent's probation officer since December of 1991, and she was responsible for monitoring his compliance with the terms of his supervised release. She stated that the Respondent had accomplished everything she asked of him, had arrived promptly for meetings with her, and submitted required monthly reports in a timely manner, and "has done his best to comply with all the conditions." The Officer also testified that the Respondent was eligible for early parole and that, conditioned upon the Respondent's paying his fine, she planned to recommend early termination to the court.

On March 9, 1992, the Respondent petitioned the Medical Board for reinstatement of his Iowa medical license. On August 19, 1992, the Medical Board held a hearing on that petition, and on October 13, 1992, the Medical Board issued an Order adopting the recommendation of a panel and reinstating the Respondent's license, subject to a five-year probation. The terms of probation included, among other things, that the Respondent (1) abstain from the use of alcohol and illicit drugs, (2) obtain psychiatric counseling and attend meetings of Alcoholics Anonymous or a similar organization twice weekly, (3) submit quarterly reports of his controlled substance prescriptions to the Medical Board, and (4) associate with at least one other physician in his practice. A Medical Board Investigator testified that he was responsible for monitoring the Respondent on behalf of the Medical Board, and that to the best of his knowledge, the Respondent was in complete compliance with the terms of his probation.

By letter dated November 19, 1992, the Respondent's eligibility to participate in Medicare was reinstated. On February 22, 1993, the Respondent applied for a DEA Certificate of Registration as a practitioner, disclosing information about his prior conviction and subsequent surrender of his prior DEA registration. Also, by letter dated September 22, 1993, the Iowa Board of Pharmacy Examiners notified counsel for the Respondent that the Respondent's application for a state controlled substance registration was approved.

The Program Manager of the Start InPatient Program for the Center for Alcohol and Drug Services (Center) in Davenport, testified that the Respondent had been evaluated at the Center in July of 1991, and that a treatment program had been established for him. The Program Manager testified that the Respondent had undergone urinalysis examinations at frequencies ranging from once to six times per month between August of 1991 and June of 1993, and that none of the tests were positive. Beginning again in September of 1994, through January of 1995, the Respondent was tested from one to three times per month, with no adverse test results. The Program Manager also stated that, had the Respondent been using cocaine, these urinalysis tests would have detected it.

The Program Manager also testified that he had been in both individual and group counseling sessions with the Respondent from 1991 until 1993, and that the Respondent had expressed remorse about the effects of his chemical abuse on his family, other physicians in the area, and about the loss of his medical practice. The Program Manager also stated that he believed that:

> [A]t this point in time * * * Mr. Jerome has successfully completed the process that's been required in terms of treatment for rehabilitation for his chemical dependency. I think that he has worked under some supervision of numerous qualified other physicians who have maintained contact with him on a regular basis. My understanding is that he has contact in terms of support units with other physicians who are recovering in Iowa. * * *. I think that Mr. Jerome has gained enough skills during treatment and recovery to be able to seek help if he has urges, * * *. Those are specifically what he's been trained to react to in different fashion than he has in the past.

A psychiatrist (Psychiatrist), testified that he had known the Respondent since 1980, and that in November of 1989, the Respondent became his patient. He testified that, as of the date of the hearing before Judge Bittner, he saw the Respondent monthly, that the Respondent had shown remorse for his actions, and that he has had to deal with the consequences of his misconduct. The Psychiatrist testified that the Respondent had become more mature and better able to see how his behavior affected others.

The Psychiatrist further testified that there was a shortage of internists in Davenport, and that the Respondent's lack of a DEA registration hampered his ability to treat his patients. He also stated that the Respondent was a competent physician, and that he would not hesitate to refer a patient to the Respondent for treatment.

The Respondent testified before Judge Bittner concerning his personal rehabilitation, stating that, while he was in prison, he thought about the people he had hurt, including his patients, his friends, his family, and himself. Also while he was incarcerated, the Respondent enrolled in a chemical dependency program and "learned through treatment that about all I can do is try to make my amends to the people that I have hurt, to do the best job I can to move forward, and to make sure it doesn't happen again." The Respondent stated that he felt tremendous regret for his past actions, and that as of the hearing, he felt that he was a "more caring, [calm[er], a little more rational individual who doesn't use drugs or alcohol."

The Respondent testified that after he was transferred to a halfway house, he continued outpatient treatment, with individual counseling sessions once or twice per week, that he also attended Narcotics Anonymous and Alcoholics Anonymous meetings twice per week, and that in June of 1991, he was transferred to a work release program in Davenport, where he resumed seeing a psychiatrist he had seen there prior to his arrest. According to the Respondent, he has learned how to prevent relapse, has continued to regularly attend twelve-step meetings, and has developed some insight into his own behavior. The Respondent also testified that he did not want to put either himself or his family "through this again."

The Director of the Iowa Department of Public Health (Director) testified that studies have indicated that the Iowa Medical Board is the second strictest in the United States in terms of penalties imposed on physicians who have been disciplined. He also testified that he was familiar with the disciplinary proceedings involving the Respondent, and that to the best of his knowledge, the Respondent had satisfied the conditions imposed upon him. The Director also testified that he believed that reinstatement of the Respondent's DEA registration would be in the public interest, for the Medical Board had also considered the best interest of the public, as well as the Respondent's professional credentials and compliance with the requirements it imposed, in deciding to restore his license to practice medicine.

The Respondent also offered into evidence letters from various physicians, one of whom was a patient of his, attesting to the Respondent's expertise, compassion, and concern for

his patients. The Respondent also submitted letters from physicians to United States Senator Charles E. Grassley, seeking his support for the Respondent's application, and letters to the Medical Board from various patients, colleagues, and friends, all supporting reinstatement of the Respondent's medical license. Also, the Respondent submitted letters written to the Administrator of DEA from Governor Branstad of Iowa, and from United States Representative James A. Leach of Iowa.

It is undisputed that the United States Department of Health and Human Services has designated Scott County, Iowa, which includes Davenport, as an area with a shortage of primary care physicians willing and able to treat Medicaid patients. The Respondent testified that as of the date of the hearing, he was practicing in a clinic in the inner city of Davenport, and that his patients were older, sicker, had less access to medical care, and were more likely to be on Medicaid than those he treated prior to the revocation of his medical license. The Respondent stated that he believed that granting his application for a DEA registration would be in the public interest, because he felt that the lack of authority to handle controlled substances severely handicapped his ability to treat his patients. Without such a registration, he had had great difficulty obtaining either hospital staff privileges or professional liability insurance, and he was ineligible to participate in several managed care plans. In addition, the Respondent testified that he had been offered a position as assistant director for the Center of Alcohol and Drug Services, but that the offer was contingent on having a DEA registration.

Pursuant to 21 U.S.C. 823(f), the Deputy Administrator may deny an application for a DEA Certificate of Registration, if he determines that registration would be inconsistent with the public interest. Section 823(f) requires that the following factors be considered:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing, or conducting research with respect to controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health or safety.

These factors are to be considered in the disjunctive; the Deputy Administrator may rely on any one or a combination of factors and may give each factor the weight he deems appropriate in determining whether a registration should be revoked or an application for registration denied. See *Henry J. Schwarz, Jr., M.D.*, Docket No. 88–42, 54 FR 16422 (1989).

In this case, all five factors are relevant in determining whether the Respondent's registration would be inconsistent with the public interest. As to factor one, "recommendation of the appropriate State licensing board * * *", as a result of the Respondent's misconduct resulting in a felony conviction, the Medical Board revoked his medical license on December 31, 1990. Although his license was reinstated on October 13, 1992, it was subject to five-year's probation with significant conditions to be met.

As to factor two, the Respondent's "experience in dispensing * * * controlled substances," uncontroverted evidence was presented that, on two occasions in February of 1990, the Respondent distributed controlled substances to the Special Agent without a legitimate medical purpose. The record also contains evidence that the Respondent misused samples of controlled substances by trading them for cocaine or by improperly giving them away.

As to factor three, the Respondent's "conviction record under Federal * * * laws relating to the * * * distribution, or dispensing of controlled substances," and factor four, the Respondent's [c]ompliance with applicable State, Federal, or local laws relating to controlled substances," uncontroverted evidence demonstrated that the Respondent was convicted in Federal court of conspiracy to distribute controlled substances in violation of 21 U.S.C. 846. Further, the Respondent admitted he engaged in the unlawful possession and use of cocaine prior to his conviction.

As to factor five, "[s]uch other conduct which may threaten the public health or safety," the Deputy Administrator agrees with Judge Bittner's observations regarding the Respondent's testimony concerning his writing of prescriptions under duress or as a result of threats of extortion linked with his drug addiction, referencing his prior relationship with Ms. M. Specifically, Judge Bittner wrote: "I also note, however, that I find disturbing Respondent's contention that he issued prescriptions in false names either by mistake or under duress. A physician obviously should not issue a controlled substance prescription to a patient he is not sure is under his treatment and care." Such prescribing practices are not consistent with the responsibilities inherent in receiving a DEA Certificate of Registration. Therefore, the Deputy Administrator agrees with Judge Bittner, that the Respondent's past misconduct "constitutes sufficient grounds to deny his application for DEA registration."

However, the Respondent has also submitted extensive evidence of his rehabilitation. Specifically, the Respondent has demonstrated that his ability to participate in Medicare was reinstated on November 19, 1992, and his application for a state controlled substances registration was approved on September 22, 1993. Further, as Judge Bittner noted, the record established that at the time the Respondent engaged in the misconduct at issue, he was actively addicted to alcohol and cocaine. Yet, the record also demonstrates that he has actively participated in, and successfully completed, a rehabilitation program for his chemical dependency. Although he has submitted to urinalysis testing periodically since 1991, all results have been negative.

As Judge Bittner noted, "as of the date of the hearing[,] Respondent had maintained his sobriety for nearly five years."

Also, the Respondent submitted extensive favorable evidence from colleagues and patients, attesting to his professional expertise, as well as to the community's need for his specialty as a primary care physician. Finally, the Respondent testified as to his remorse for his past misconduct and his determination that he will not engage in such conduct in the future. Although none of his remedial activities justifies the grievous nature of his past misconduct, the Deputy Administrator agrees with Judge Bittner's conclusion that, "on balance I conclude that the Government has not established by a preponderance of the credible evidence that [the] Respondent's registration would be inconsistent with the public interest." However, also on balance, the Deputy Administrator agrees that a registration subject to the following conditions would best serve the public's interest:

(1) The Respondent's controlled substance handling authority shall be limited to writing of prescriptions only, and he shall not dispense, possess, or store any controlled substance, except that the Respondent may administer controlled substances in a hospital, and may possess controlled substances which are medically necessary for his own use and which he has obtained pursuant to a written prescription from another licensed practitioner (unless the substance is legitimately obtainable without a prescription); and

(2) the Respondent shall submit, every calendar quarter, a log of all controlled substance prescriptions he has written during the previous quarter to the Special Agent in Charge of the nearest DEA office, or his designee. These restrictions will run for a period of three years from the effective date of the Respondent's registration.

Therefore, the Deputy Administrator finds that the public interest is best served by granting the Respondent's application with the above conditions. The Respondent submitted extensive evidence demonstrating the need for the DEA Certificate of Registration in his current practice, as well as evidence of the community's need for a physician of his speciality with full prescribing capabilities. Given these needs, the Deputy Administrator has determined that the public interest will be better served in making this final order effective upon publication, rather than thirty days from the date of publication.

Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824, and 28 CFR 0.100(b) and 0.104, hereby orders that the application for a DEA Certificate of Registration submitted by William P. Jerome, M.D., be, and it hereby is, granted, subject to the above conditions. This order is effective upon publication in the **Federal Register**.

Dated: March 18, 1996.

Stephen H. Greene,

Deputy Administrator.

BILLING CODE 4410–09–M

[Docket No. 94–43]

Ekambaram Parameswaran, M.D.; Denial of Application

On March 31, 1994, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration (DEA), issued an Order to Show Cause to Ekambaram Parameswaran, M.D. (Respondent) of Inez, Kentucky, notifying him of an opportunity to show cause as to why DEA should not deny his application for registration as a practitioner under 21 U.S.C. 825(f), as being inconsistent with the public interest.

The Respondent filed a timely request for a hearing, and the matter was docketed before Administrative Law Judge Paul A. Tenney. After numerous delays at the request of the Respondent, the hearing was scheduled to commence on September 26, 1995. However, prior to that date, the Government filed a Motion for Summary Disposition, noting that the Respondent's license to practice medicine had been revoked by the Kentucky State Board of Medical Licensure (Medical Board) by final order dated July 20, 1995, a copy of which was attached to the motion. The Respondent was afforded an opportunity to respond to the Government's motion, on or before August 16, 1995, but no response was filed. On August 29, 1995, Judge Tenney issued his Conclusions of Law and Recommended Ruling, in which he found that the Respondent lacked authorization to handle controlled substance in Kentucky, granted the Government's Motion for Summary Disposition, and recommended that the Respondent's application of a DEA Certificate of Registration be denied. Neither party filed exceptions to his decision, and on September 28, 1995, Judge Tenney transmitted the record of these proceedings and his opinion to the Deputy Administrator.

The Deputy Administrator has considered the record in its entirety, and pursuant to 21 CFR 1316.67, hereby issues his final order based upon findings of fact and conclusions of law as hereinafter set forth. The Deputy Administrator adopts, in full, the decision of the Administrative Law Judge.

Specifically, the Deputy Administrator finds that by final order dated July 20, 1995, the Medical Board revoked the Respondent's license to practice medicine. From this fact, Judge Tenney inferred that since the Respondent was not authorized to practice medicine, he also was not authorized to handle controlled substances. The Deputy Administrator agrees with Judge Tenney's inference, and he also notes that the Respondent has not filed an exception to this portion of his decision.

The Drug Enforcement Administration cannot register or maintain the registration of a practitioner who is not duly authorized to handle controlled substances in the state in which he conducts his business. 21 U.S.C. 802(21), 832(f), and 824(a)(3). The prerequisite has been consistently upheld. See Dominick A. Ricci, M.D., 58 FR 51,104 (1993); James H. Nickens, M.D., 57 FR 59,847 (1992); Roy E. Hardman, M.D. 57 FR 49,195 (1992); Myong S. Yi, M.D., 54 FR 30,618 (1989); Bobby Watts, M.D., 53 FR 11,919 (1988). Therefore, because the Respondent lacks state authority to handle controlled substances, he currently is not entitled to a DEA registration.

Judge Tenney also properly granted the Government's motion for summary disposition. Here, the parties did not dispute that the Respondent was unauthorized to handle controlled substances in Kentucky, the state in which he proposed to conduct his practice. Therefore, it is well-settled that when no question of fact is involved, a plenary, adversary administrative proceeding involving evidence and cross-examination of witnesses is not obligatory. See Dominick A. Ricci, M.D., 58 FR at 51,104 (finding it well settled that where there is no question of material fact involved, a plenary, adversarial administrative hearing was not required); see also Phillip E. Kirk, M.D., 48 FR 32,887 (1983), aff'd sub nom Kirk V. Mullen, 749 F.2d 297 (6th Cir. 1984); *Alfred Tennyson Smurthwaite, M.D.*, 43 FR 11,873 (1978); NLRB v. International Association of Bridge, Structural and Ornamental Ironworkers, AFL–CIO, 549 F.2d 634 (9th Cir. 1977).

Accordingly, the Deputy Administrator of the Drug Enforcement Administration, pursuant to the authority vested in him by 21 U.S.C. 823 and 824, and 28 CFR 0.100(b) and 0.104, hereby orders that the Respondent's application for a DEA Certificate of Registration be, and it hereby is, denied. This order is effective April 22, 1996.

Dated: March 18, 1996.

Stephen H. Greene,

Deputy Administrator.

BILLING CODE 4410–09–M

DEPARTMENT OF LABOR

Employment and Training Administration

Unemployment Compensation for Federal Employees Excepted Employee Program; Unemployment Insurance Program Letters Implementing the Unemployment Compensation for Federal Employees Excepted Employee Program

On January 6, 1996, Public Law 104–92 was enacted. Section 312 of Title III of the Act created the Unemployment Compensation for Federal Employees Excepted Employee Program (UCFE–EEP) effective January 2, 1996. Under the UCFE–EEP, Federal employees excepted from furlough and who are not being paid due to a lapse in appropriations shall be deemed to be totally separated from Federal service and eligible for unemployment

compensation under the regular UCFE program with no waiting period to accrue for eligibility.

In its role as principal in the UCFE–EEP, the Department of Labor issued controlling guidance for the States and cooperating State agencies in the operating instructions set forth in Unemployment Insurance Program Letter (UIPL) No. 7–96, dated January 24, 1996, and UIPL 7–96, Change 1, dated March 8, 1996. The States administer the UCFE Program pursuant to agreements between the States and the Secretary of Labor. Since the UCFE–EEP is a sub-program of the UCFE Program, the same agreement applies.

The States and cooperating State agencies may not vary from the operating instructions provided in UIPL 7–96 or UIPL 7–96, Change 1, (or any subsequent or supplemental operating instructions), without the prior approval of the Department of Labor. Therefore, UIPLs No. 7–96 and 7–96, Change 1, are published below assuring public notification of the required procedures.

Signed at Washington, DC on March 14, 1996.

Timothy M. Barnicle,

Assistant Secretary.

Directive: Unemployment Insurance Program Letter No. 7–96

To: All State Employment Security Agencies

From: Mary Ann Wyrsch, Director, Unemployment Insurance Service

Subject: Unemployment Compensation for Federal Employees (UCFE)—Federal Employees Excepted from Furlough (UCFE-Excepted Employees Program)

1. *Purpose.* To advise State Employment Security Agencies (SESAs) of the provisions of Section 312 of Title III of P.L. 102–94 (Continuing Resolution) concerning eligibility for UCFE for Federal civilian employees excepted from furlough and to provide instructions for implementing the legislation to ensure the timely and accurate payment of benefits under the UCFE-Excepted Employee Program (UCFE–EEP) and to provide fiscal and reporting instructions.

2. *References.* Title III of P.L. 102–94 (H.R. 1643) enacted January 6, 1996; Subchapter I of chapter 85, title 5 of the United States Code (5 U.S.C. 8501 *et seq.*) (UCFE law); 20 CFR Part 609 (UCFE regulations); Secretary of Labor's Agreement with States to administer the UCFE and Unemployment Compensation for Ex-servicemembers (UCX) Programs.

3. *Background.* Generally, whenever there is a lapse in appropriations to fund a Federal government agency, the agency must shut down activities and furlough its employees. However, there are exceptions that permit certain employees to remain working to continue selected functions. This includes those functions which the failure to perform would result in an imminent threat to the safety of human life or the protection of property, or where there is an implied authority by statute that the function should continue.

Rescissions

None.

Expiration Date: January 31, 1997.

Unless there are special provisions enacted after the furlough which retroactively provide a different outcome, furloughed employees may be eligible for UCFE under subchapter I of chapter 85 of title 5 of the United States Code. However, employees excepted from such furloughs would neither be compensated (because of the laps in appropriations) nor eligible for UCFE because they perform services during the furlough period and would not be considered unemployed or otherwise eligible for benefits in accordance with State and Federal laws governing the payment of unemployment compensation.

Section 312 of P.L. 102–94 changes and suspends some UCFE eligibility requirements, through September 30, 1996, to convey UCFE eligibility to employees excepted from furlough who are not being paid due to a lapse in appropriations. These changes have, in effect, created a sub-program of the regular UCFE program which will be known as the UCFE-Excepted Employees Program (UCFE–EEP).

The purpose of the UCFE–EEP is to provide a weekly payment to unpaid workers who are excepted from furlough through September 30, 1996, similar to that paid under the UCFE program to furloughed individuals. To the extent possible these instructions so provide; however, in certain instances provisions have had to be changed or new provisions added in order to provide a weekly benefit amount to individuals not otherwise eligible for UCFE in the absence of Section 312.

This document provides the Department's interpretation of the requirements of Section 312 and sets forth operating instructions prescribed by the Department to guide the States in implementing the provisions of the UCFE–EEP.

4. *Legal Requirements of Section 312 of P.L. 102–94.*

Section 312 provides—

Eligibility for Unemployment Compensation.— Nothwithstanding any other provisions of law, beginning on January 2, 1996, any Federal employee who is excepted from furlough and is not being paid due to lapse in appropriations shall be deemed to be totally separated from Federal service and eligible for unemployment compensation benefits under subchapter I of chapter 85 of title 5 of the United States Code with no waiting period for such eligibility to accrue.

Section 8502(b) of 5 U.S.C. 8501 *et seq.*, as implemented by 20 CFR 609.9(a) of the Secretary's regulations implementing the UCFE program, relative to State law applicability, provides that—

Except where the result would be inconsistent with the provisions of the Act or this part or the procedures thereunder prescribed by the Department, the terms and conditions of the applicable State law which apply to claims for, and the payment of, State unemployment compensation shall apply to claims for, and the payment of, UCFE and claims for waiting period credit.

To effectuate the provisions of Section 312 of P.L. 102–94, it is necessary to differ, in part, from the State and Federal laws normally governing the payment of UCFE. The exceptions to the laws and regulations necessitated by this section are described in section 7. below.

5. *Effective Dates.* Section 312, the UCFE–EEP provisions, are effective beginning January 2, 1996 and remain in effect through the end of Federal Fiscal Year (FY) 1996 (September 30, 1996). However, it has been determined that only weeks of unemployment beginning on or after January 27, 1996 are compensable under the provisions of Section 312 as the Continuing Resolution provided for retroactive pay for excepted employees from December 16, 1995 through January 6, 1996.

The Continuing Resolution which provided funding for Federal agencies that are without FY 1996 appropriations expires on January 26, 1996. In the absence of another Continuing Resolution or FY 1996 appropriations for Federal agencies not funded, the UCFE–EEP will become operations for UCFE–EEP claims filed for a week beginning on or after January 27, 1996 and thereafter as long as such conditions exist, through a week ending on or before September 30, 1996.

6. *Policy.* The instructions in this document are issued to the States and the cooperating State agencies and constitute controlling guidance provided by the Department of Labor in its role as the principal in the UCFE program. As agents of the United States, the States and the cooperating State agencies may not vary from the operating instructions in this directive (or any subsequent or supplemental operating instructions) without the prior approval of the Department of Labor.

7. *The Department's Interpretation of the Requirements of Section 312 of P.L. 102–94 and Controlling Implementation Guidance.*

The Department's interpretation is that all State and Federal laws and regulations applicable to UCFE claims are applicable to UCFE–EEP claims, except where the result of such application would be inconsistent with the provisions of Section 312 of P.L. 102–94, as described below.

Section 312 deems all excepted employees to be totally unemployed with respect to Federal service and eligible for unemployment compensation "under" the UCFE law for as long as such excepted states continues (but not beyond September 30, 1996) without having to serve any waiting week. Thus, even excepted employees having insufficient wages under the State law base period must be determined eligible, as well as excepted employees outside the United States (i.e., outside the States of the United States, District of Columbia, Puerto Rico and the Virgin Islands).

a. Notwithstanding the requirements governing the determination of entitlement under the UCFE/State UI laws, a weekly benefit amount for UCFE–EEP claimants must be established for all Federal employees excepted from furlough who are not being paid due to a lapse in appropriations and who file such claims. (This includes excepted employees who would otherwise have insufficient base period employment and wages to establish monetary entitlement and excepted employees performing excepted services outside the United States). The weekly benefit amount so determined could potentially be paid through a week ending on or before September 30k 1996. Therefore, the State law or Federal law maximum total benefit amount does not apply, since, potentially, an individual could receive UCFE–EEP for a number of weeks that exceed any State's maximum.

b. Monetary entitlement for UCFE–EEP claims must be determined under the qualifying requirements for regular UCFE claims by the State in which the excepted employee's official duty station is located or deemed located for purposes of UCFE–EEP. To effect this requirement, all base period wages covered under any State or Federal law will be used in computing UCFE–EEP entitlement under the State law.

The official duty station of an excepted employee who is performing services outside of the United States is deemed to be the State in which the headquarters of the Federal agency is located.

c. Charges resulting from the payment of UCFE–EEP benefits must be charges to the Federal agency that designated the individual filing such claim as a Federal excepted employee.

d. Section 312 of P.L. 102–94 does not apply to weeks of unemployment during which an individual is not in excepted employee status. Therefore, UCFE–EEP benefits are not payable for weeks during which the individual is not in excepted employee status. In order to receive benefits for such weeks, an individual must establish or have a separate claim in existence with a remaining balance under any of the other unemployment programs and meet all the eligibility conditions for the receipt of regular benefits.

3. Section 312 prohibits the application of any State or Federal law requiring availability for work or active work search to UCFE–EEP claims, including weeks claimed during which the excepted employee performed no excepted services because of annual or sick leave.

f. UCFE–EEP benefit eligibility will be determined in accordance with UCFE/UI requirements defining total unemployment and deductible earnings with respect to any services other than excepted Federal service performed by an excepted employee during a week claimed since Section 312 provides only that excepted service is treated as being totally unemployed.

g. The pension deduction provisions of State law applies to benefits payable under the UCFE–EEP.

h. Section 312 prohibits the application of any State or Federal law requiring an unpaid waiting week or period as a condition to receiving compensation for a week claimed by an excepted employee.

8. *UCFE–EEP Implementation Instructions Based on the Department's Interpretation of Section 312 of P.L. 102–94.* Operating procedures to implement the requirements of Section 312 of P.L. 102–94 as prescribed by the Department are set forth below.

a. *UCFE–EEP Claims Filing Procedures.* Most excepted employees will be performing full-time excepted services, during the weeks involved in the furlough period. Since most excepted employees will be working during the normal workday, SESAs should utilize methods for filing claims that will allow an excepted employee to remain at his/her job site.

If a State agency waives regular reporting provisions with respect to excepted employees, no issue will arise with respect to 20 CFR 609.9.

b. *Initial Claims.*

(1) *New.* When a UCFE–EEP claim is filed, the State agency will issue a UCFE–EEP monetary determination based on all employment and wages during the base period applicable to the claim, without regard to separate monetary entitlement under any State or Federal law, including UCFE.

c. *Monetary Entitlement.*

(1) *Excepted Employee has Sufficient Base Period Wages to Qualify.* Monetary entitlement for UCFE–EEP claims will be determined by the State in which the excepted employee's official duty station is located or deemed located, based on all base period employment covered under any State or Federal law to establish the weekly benefit applicable to the UCFE–EEP claim.

The Federal agency that designates the individual as an excepted employee has been instructed to furnish the State agency, of the State in which the excepted employee's official duty Station is located or deemed located, with the excepted employee's name, social security number, annual Federal salary, base period employment and wage information, home address, and effective date of excepted designation, within the first week of the Federal agency furlough, in accordance with the format and procedures established with the State agency prior to the beginning of such furlough. In the event of a delay of submittal of required information by such Federal agency or if it is deemed to be more expeditious, the SESA may utilize an affidavit to determine entitlement as outlined in *ET Handbook 391*, Chapter XIII, page XIII–2.

To obtain information pertaining to employment and wages covered under another State's law, the State agency should follow its regular procedures to obtain information pertaining to such wages, including using the Request for Wage Transfer procedures (TC–IB4) (or the Interstate Inquiry, IBIQ, via the ICON). However, if the TC–IB4 is used, such use must not interfere with the processing of a regular claim and the employment and wages must be returned as unused.

(2) *Excepted Employee has Insufficient Base Period Wages to Qualify.* If the excepted employee has insufficient employment and wages in the base period to qualify, the State agency will prorate the individual's annual salary, as reported by the Federal agency that designated the individual as a Federal excepted employee, in terms of quarters or weeks of wages in the base period, as appropriate, and issue a monetary determination, accordingly. In addition, the excepted worker's most recent earnings and leave statement will reflect the excepted employee's annual and weekly salary and may be utilized for the projection utilizing the affidavit procedure.

d. *UCFE–EEP Weeks Claimed.* When an employee is designated as an excepted employee, even for a portion of a week, such individual shall be determined eligible for UCFE–EEP for the entire week. This includes excepted employees who may be on leave during an entire week or portion thereof.

e. *Overpayments.* Should an appropriation or continuing resolution occur that retroactively provides for the payment of salary to excepted employees, State and Federal laws governing overpayments will need to be applied to weeks paid under the UCFE–EEP program (20 CFR 609.11).

f. *Relationship to Other Programs.* Eligibility for UCFE–EEP has no effect on unemployment compensation payable under any other State or Federal law. Benefits under this program are payable only to an excepted employee. If an excepted employee's status changes for any week during the furlough period, UCFE–EEP benefits are not payable and the individual must establish eligibility under the regular requirements for such week.

9. *Instructions for Reporting UCFE–EEP Transactions on Form ETA 2112.* Advances and expenditures under the Excepted Employee Program are to be reported on the ETA 2112 in the same manner as transactions for the regular UCFE program.

Drawdowns: On line 23, include in columns C and E, amounts which have been received as advances or reimbursements from the Federal Employees Compensation Account (FECA) for payment of benefits to Federal civilians under provisions of the UCFE–EEP. Disbursements: On line 43, include in columns C and F, net benefit payments made to Federal civilians under the UCFE–EEP with funds received from the FECA.

10. *Fiscal Requirements.* All UCFE–EEP paid to an excepted employee during the furlough period will be billed to the Federal agency placing the individual in excepted employee status. Administrative costs for the workload associated with UCFE–EEP claims will be paid from contingency funds at the Fiscal Year 1996 allocated MPU level.

11. *Reporting Instructions.* While counts of UCFE–EEP claims will be incorporated in the existing UCFE reporting, separate counts for three items of data are required to track the UCFE–EEP claimants. Separate counts should be reported weekly on: (a) the number of individuals who file new and additional initial claims for UCFE–EEP benefits; (b) the number of weeks of UCFE–EEP benefits that were compensated during the report week; and (c) the amount of UCFE–EEP benefits paid for those weeks.

Because this should be a temporary situation, this data is to be reported electronically on the Quick Response Report. The Quick Response Report is a blank report found in the UI Required Reports (UIRR) electronic entry system. Once in the UIRR system, "Access Reports" should be chosen, followed by "Special Programs" and then "arQuick Response Report". This is a blank report where 12 unlabeled items may be

reported. Items 1 through 3 are already being used for Self Employment data reporting in those few States which have that program. Therefore, items 6, 7 and 8 will be used for UCFE-Expected Employee claimant data reporting.

Fill in the report date item using the Saturday week ending date of the week in which the activity occurred. Report in item 6 the total number of initial claims, both new and additional, filed by UCFE–EEP claimants during the report week. Report in item 7 the total number of weeks compensated for UCFE–EEP claimants during the report week. Report in item 8 the total amount of benefits paid for the weeks reported in item 7. Please note in comments that the data is for UCFE–EEP claimants. No edits are available on the Quick Response Report.

This report will be due the Friday following the week in which the activity took place. Reporting will continue as long as there is activity. These reporting requirements have been submitted to the Office of Management and Budget (OMB) for approval under the Paperwork Reduction Act of 1995. States are not required to report until that approval is received. When the approval is received, States will be notified and provided the OMB approval number and expiration data.

12. *Action Required.*

a. *Department of Labor.* The Department of Labor has instructed affected Federal agencies, directly and through the Office of Personnel Management (OPM), to furnish SESAs with the list of each agency's excepted employees, including the employee's home address, Social Security Number, annual Federal salary rate, effective date of designation, and base period qualifying wage and employment information. Also, Federal agencies are being instructed to furnish an on-going list of employee changes to and from excepted employee status if applicable. Once the State agency has been provided with all of the information pertaining to an excepted employee, the Federal agency will furnish only the pertinent information for changes.

In addition, Federal agencies are being advised to establish a liaison person(s) to work with each SESA in administering the UCFE program for excepted workers. This may be the same person already assigned UCFE program liaison responsibilities.

To the extent possible, the Department of Labor National Office and Regional Offices will work with the affected Federal agencies to provide information to the SESAs that will expedite and administratively ease the establishment of UCFE–EEP by the SESAs.

b. *State Agencies.* SESA Administrators shall:

(1) Provide the above guidance in this UIPL to appropriate staff.

(2) Ensure that appropriate staff perform all actions necessary to provide for the proper payment of UCFE–EEP to excepted employees for a program that could begin as early as January 27, 1996. This will include—

(A) When contacted by the Federal agency liaison, coordinating with such individual(s) actions necessary to receive the information, described in section a. above and any other actions determined necessary by the State agency, that will enable UCFE–EEP claims to be processed. The claims filing procedures that excepted employees are to follow should also be explained to the Federal agency;

(B) Establishing UCFE–EEP claims for excepted employees in a prompt manner, minimizing any in-person reporting by such employees. For example, the State could send appropriate claims forms to individuals identified by the Federal agency as excepted employees in order for such individuals to file claims;

(C) Promptly determining monetary eligibility for UCFE–EEP claims based on base period qualifying employment and earnings or the annual salary figure supplied by the Federal agency and/or the earnings and leave statement furnished by the applicant through the use of the ES–935 affidavit process in the absence of base period wages reported by the Federal agency;

(D) Making prompt payment of UCFE–EEP benefits to excepted employees including payment for what would otherwise be a waiting period;

(E) Developing any other procedures with Federal agencies that will ease administration of this special program;

(F) Adhering to the fiscal guidelines set forth in this document and furnishing required reports in a timely manner.

13. *Inquiries.* Questions should be directed to the appropriate Regional Office.

Directive: Unemployment Insurance Program Letter No. 7–96, Change 1
To: All State Employment Security Agencies
From: Mary Ann Wyrsch, Director, Unemployment Insurance Service
Subject: Unemployment Compensation for Federal Employees (UCFE) Excepted Employee Program (UCFE–EEP)

1. *Purpose.* To inform States of Office of Management and Budget approval of the reporting on the UCFE–EEP and to correct the reference to Public Law (P.L.) 104–92 in UIPL 7–96.

2. *Reference.* UIPL 7–96.

3. *OMB Approval.* Reporting requirements set forth in the referenced UIPL are approved by OMB under the Paperwork Reduction Act of 1995. The OMB number is 1205–0364 with an expiration date of April 30, 1996. States are not required to respond to this collection of information unless it displays a currently valid OMB control number.

4. *Burden Estimate.* Public reporting burden for this collection of information is estimated to average 1 hour per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the U.S. Department of Labor, Office of Unemployment Insurance, 200 Constitution Avenue NW., Room S–4519, Washington, D.C. 20210 (Paperwork Reduction Project 1205–0364).

5. *Correction to UIPL 7–96.* All referenced to P.L. 102–94 in UIPL 7–96 should be changed to read P.L. 104–92.

6. *Action Required.* States are now required to report UCFE-Excepted Employee data, when appropriate as outlined in the referenced UIPL.

7. *Questions.* Inquiries should be directed to the appropriate Regional Office.

Rescissions
None.

Expiration date:

Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR Part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailng by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR Part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3014, Washington, D.C. 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the six separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C., this 15th day of March 1996.

Philip J. Gloss,
Chief, Branch of Construction Wage Determinations.

BILLING CODE 4510–27–M

Pension and Welfare Benefits Administration

[[Prohibited Transaction Exemption 96–17; Exemption Application No. D–09930, et al.]

Grant of Individual Exemptions; General Motors Hourly-Rate Employees Pension Plan; General Motors Retirement Program for Salaried Employees; Saturn Individual Retirement Plan for Represented Team Members; Saturn Personal Choices Retirement Plan for Non-Represented Team Members; Employees' Retirement Plan for GMAC Mortgage Corporation; National Car Rental System, Inc. Salaried Employees Pension Plan; and National Car Rental System, Inc. Hourly Paid Employees Pension Plan (Collectively, the Plans), et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition, the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

General Motors Hourly-Rate Employes Pension Plan; General Motors Retirement Program for Salaried Employes; Saturn Individual Retirement Plan for Represented Team Members; Saturn Personal Choices Retirement Plan for Non-Represented Team Members; Employees' Retirement Plan for GMAC Mortgage Corporation; National Car Rental System, Inc. Salaried Employees Pension Plan; and National Car Rental System, Inc. Hourly Paid Employees Pension Plan (collectively, the Plans) Located in New York, New York

[Prohibited Transaction Exemption 96–17; Exemption Application Nos. D–09930, D–09931]

Exemption

(a) *General Exemption.* The restrictions of section 406(a)(1)(A) through (D) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to any transaction arising in connection with the acquisition, ownership, management, development, leasing, financing, or sale of real property (including the acquisition, ownership or sale of any joint venture or partnership interest in such property) or the borrowing or lending of money in connection therewith, between a party in interest and the Plans, provided that the following conditions are satisfied:

(1) The terms of the transaction are negotiated on behalf of the Plans by, or under the authority and general direction of, General Motors Investment Management Corporation (GMIMCo), as described in the summary of facts in the notice of proposed exemption, and GMIMCo makes the decision to invest the assets of the Plans in such transaction. Notwithstanding the foregoing, a transaction involving an amount of $20 million or more, which has been negotiated on behalf of a Plan by GMIMCo will not fail to meet the requirements of this section (a)(1) solely because General Motors Corporation or its designee retains the right to veto or approve such transaction;

(2) Any such party in interest is not—

(i) GMIMCo or any person directly or indirectly controlling, controlled by, or under common control with GMIMCo, any officer, director or employee of GMIMCo or any of its subsidiaries, or any partnership in which GMIMCo is a 10 percent or more (directly or indirectly in capital or profits) partner;

(ii) General Motors Corporation (GM) or any of its subsidiaries, any officer or director of GM or any of its subsidiaries;

(iii) any named fiduciary of any Plan, or any person who has discretionary authority in the selection, supervision or operation of GMIMCo or any of its officers, directors or employees;

(iv) a sponsor of any of the Plans (Plan Sponsor) or any subsidiary of a Plan Sponsor, or a ten percent or more shareholder, partner, or joint venturer of a Plan Sponsor, or any officer or director of any of them;

(v) any person who exercises discretionary authority, responsibility or control, or who provides investment advice [within the meaning of 29 CFR 2510.3–21(c)], with respect to the investment of Plan assets involved in the transaction;

(3) The transaction is not part of an agreement, arrangement or understanding designed to benefit a party in interest;

(4) At the time the transaction is entered into, and at the time of any subsequent renewal or modification thereof that requires the consent of GMIMCo, the terms of the transaction are at least as favorable to the Plans as the terms generally available in arm's-length transactions between unrelated parties;

(4) GM or GMIMCo shall maintain for a period of six years from the date of each transaction mentioned above the records necessary to enable the persons described in subparagraph (5) of this section (a) to determine whether the conditions of this exemption have been met, except that (i) a prohibited transaction will not be deemed to have occurred if, due to circumstances beyond the control of GM and GMIMCo, the records are lost or destroyed prior to the end of the six-year period, and (ii) no party in interest except GM and GMIMCo shall be subject to the civil penalty which may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by subparagraph (5) below;

(5)(i) Except as provided in subsection (ii) of this subparagraph (5) and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in subparagraph (4) of this section (a) are unconditionally available at GM's headquarter offices, or, upon prior arrangement with GM, at any other customary location for the maintenance and/or retention of such records, for examination during normal business hours by:

(A) Any duly authorized employee or representative of the Department of Labor or the Internal Revenue Service,

(B) Any fiduciary of a Plan or any duly authorized employee or representative of such fiduciary, and

(C) Any participant or beneficiary of any Plan or any duly authorized representative of such participant or beneficiary.

(ii) None of the persons described in subdivisions (i)(B) and (i)(C) of this subparagraph (5) shall be authorized to examine GM's trade secrets or commercial or financial information which is privileged, confidential or of a proprietary nature.

(b) *Specific exemption.* The restrictions of sections 406(a)(1) (A) through (D) and sections 406(b)(1) and (2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the furnishing of services, facilities, and any goods incidental thereto by a place of public accommodation which is or may be considered an asset of a Plan if the services, facilities or incidental goods are furnished on a comparable basis to the general public, and if the requirements of subparagraphs (a)(4) and (5) of this exemption are met.

For a more complete statement of the facts and representations supporting this exemption, refer to the notice of proposed exemption published on November 28, 1995 at 60 FR 58662.

EFFECTIVE DATE: This exemption is effective as of July 1, 1994.

TEMPORARY NATURE OF THE EXEMPTION: This exemption is temporary in nature and will expire on the date of

publication by the Department of the final class exemption for plan asset transactions determined by in-house asset managers, which was proposed by the Department on March 24, 1995 at 60 FR 15597 (application no. D–09602).

WRITTEN COMMENTS: The Department received one written comment and no requests for a hearing. The comment, which was submitted by the applicant, General Motors Corporation, informed the Department that two additional pension plans (the New Plans) became participants in the General Motors Hourly-Rate Employees Pension Trust effective August 1, 1995: (1) the National Car Rental System, Inc. Salaried Employees Pension Plan, plan no. 001, with 1,439 participants as of December 31, 1994, and (2) the National Car Rental System, Inc. Hourly Paid Employees Pension Plan, plan no. 002, with 2,363 participants as of December 31, 1994. The applicant requested that the New Plans be included among the Plans to which the exemption is applicable.

In response to the comment, the Department has added the New Plans to the Plans identified in the heading of the exemption.

After consideration of the entire record, the Department has determined to grant the exemption.

FOR FURTHER INFORMATION CONTACT: Ronald Willett of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

H.E.B. Investment and Retirement Plan (the Plan) Located in San Antonio, Texas

[Prohibited Transaction Exemption 96–18; Application No. D–10035]

Exemption

The restrictions of sections 406(a), 406(b)(1) and 406(b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed cash sale by the Plan to H.E. Butt Grocery Company (the Company), a party in interest with respect to the Plan, of an interest in a certain parcel of improved real property (the Property) known as the South Congress Shopping Center in Austin, Texas, provided that the following conditions are met:

(a) The sale is a one-time transaction for cash;

(b) The Plan will receive an amount equal to the greater of either: (1) $2,975,666, or (2) the fair market value of the Property at the time of the transaction, as determined by a qualified, independent appraiser;

(c) The Plan will not pay any commissions or other expenses with respect to the sale; and

(d) The Plan's trustees determine that the sale of the Property to the Company is appropriate for the Plan and in the best interests of the Plan and its participants and beneficiaries at the time of transaction.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on January 31, 1996, at 61 FR 3474.

WRITTEN COMMENTS: The Department received one written comment on the notice of proposed exemption, which was from a former employee and Plan participant who is now retired (the Commenter). The Commenter indicated that he was familiar with the Property and supported the granting of an exemption for the sale of the Property to the Company.

No other written comments, and no requests for a hearing, were received by the Department.

Accordingly, the Department has determined to grant the exemption.

FOR FURTHER INFORMATION CONTACT: Mr. E.F. Williams of the Department, telephone (202) 219–8194. (This is not a toll-free number.)

Rose's Stores, Inc., Retirement Savings 401(k) Plan, (the Retirement Savings Plan), Located in Henderson, NC

[Prohibited Transaction Exemption 96–19; Exemption Application No. D–10062]

Exemption

The restrictions of sections 406(a), 406 (b)(1) and (b)(2), and 407(a) of the Act and the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to (1) the past acquisition and holding by the Rose's Stores, Inc. Variable Investment Plan (the Variable Investment Plan) of subscription rights (the Subscription Rights) offered by Rose's Stores, Inc. (the Employer) to purchase shares of new common stock (the New Stock) upon the emergence of the Employer from bankruptcy; (2) the past acquisition and continued holding by the Variable Investment Plan and subsequently, the Retirement Savings Plan, of warrants (the Warrants) to purchase shares of the Employer's New Stock; and (3) the proposed acquisition of shares of the New Stock by the Retirement Savings Plan upon the exercise of the Warrants.

This exemption is subject to the following conditions:

(a) The acquisition and holding of the Subscription Rights and the Warrants by the Variable Investment Plan occurred in connection with the Employer's bankruptcy proceeding pursuant to which all holders of the old common stock of the Employer were treated in the same manner.

(b) The Variable Investment Plan had little, if any, ability to affect the negotiation of the Employer's plan of reorganization with respect to the bankruptcy proceeding.

(c) The Subscription Rights and the Warrants were acquired automatically and without any action on the part of the Variable Investment Plan.

(d) The Variable Investment Plan did not pay any fees or commissions in connection with the receipt and holding of the Subscription Rights and the Warrants, nor will the Retirement Savings Plan pay any fees or commissions in connection with the holding and exercise of the Warrants.

(e) Any decision to exercise the Warrants now held by the Retirement Plan will be made by participants in accordance with the terms of such Plan.

EFFECTIVE DATE: This exemption will be effective February 7, 1995 with respect to the acquisition and holding by the Variable Investment Plan of the Subscription Rights and April 28, 1995 with respect to the acquisition and holding by the Variable Investment Plan (and subsequently the Retirement Savings Plan) of the Warrants.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on January 31, 1996 at 61 FR 3485.

Comments

The Department received one written comment with respect to the proposed exemption and no requests for a public hearing. In the comment, the commentator requested assurance that her pension benefits would not be jeopardized in the event future problems affected the Employer's business. Following a discussion of the comment with a Department representative, the commentator decided to withdraw the comment.

Thus, after giving full consideration to the entire record, the Department has decided to grant the subject exemption. The comment letter has been included as part of the public record of the exemption application. The complete application file, including all supplemental submissions received by the Department, is made available for public inspection in the Public Documents Room of the Pension and

Welfare Benefits Administration, Room N–5638, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady, Department of Labor, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application are true and complete and accurately describe all material terms of the transaction which is the subject of the exemption. In the case of continuing exemption transactions, if any of the material facts or representations described in the application change after the exemption is granted, the exemption will cease to apply as of the date of such change. In the event of any such change, application for a new exemption may be made to the Department.

Signed at Washington, D.C., this 19th day of March, 1996.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor.

[FR Doc. 96–6990 Filed 3–21–96; 8:45 am]

BILLING CODE 4510–29–P

[Application No. D–09410, et al.]

Proposed Exemptions; RREEF USA Fund-I (The Trust)

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Notice of proposed exemptions.

SUMMARY: This document contains notices of pendency before the Department of Labor (the Department) of proposed exemptions from certain of the prohibited transaction restriction of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Written Comments and Hearing Requests

Unless otherwise stated in the Notice of Proposed Exemption, all interested persons are invited to submit written comments, and with respect to exemptions involving the fiduciary prohibitions of section 406(b) of the Act, requests for hearing within 45 days from the date of publication of this **Federal Register** Notice. Comments and request for a hearing should state: (1) the name, address, and telephone number of the person making the comment or request, and (2) the nature of the person's interest in the exemption and the manner in which the person would be adversely affected by the exemption. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing. A request for a hearing must also state the issues to be addressed and include a general description of the evidence to be presented at the hearing.

ADDRESSES: All written comments and request for a hearing (at least three copies) should be sent to the Pension and Welfare Benefits Administration, Office of Exemption Determinations, Room N–5649, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20210. Attention: Application No. stated in each Notice of Proposed Exemption. The applications for exemption and the comments received will be available for public inspection in the Public Documents Room of Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5507, 200 Constitution Avenue, N.W., Washington, D.C. 20210.

Notice to Interested Persons

Notice of the proposed exemptions will be provided to all interested persons in the manner agreed upon by the applicant and the Department within 15 days of the date of publication in the **Federal Register**. Such notice shall include a copy of the notice of proposed exemption as published in the **Federal Register** and shall inform interested persons of their right to comment and to request a hearing (where appropriate).

SUPPLEMENTARY INFORMATION: The proposed exemptions were requested in applications filed pursuant to section 408(a) of the Act and/or section 4975(c)(2) of the Code, and in accordance with procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Therefore, these notices of proposed exemption are issued solely by the Department.

The applications contain representations with regard to the proposed exemptions which are summarized below. Interested persons are referred to the applications on file with the Department for a complete statement of the facts and representations.

RREEF USA Fund-I (The Trust) Located in San Francisco, California

[Application No. D–09410]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990.) If the exemption is granted, the restrictions of sections 406(a), 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed receipt by RREEF America L.L.C., the investment manager of the Trust (the Manager), of a certain performance compensation fee (the Performance Fee) in connection with the liquidation of the Trust, provided that the following conditions are satisfied:

(a) The terms and the payment of the Performance Fee shall be approved in writing, through approval of an amendment to the Group Trust Agreement (the Group Trust Agreement), by independent fiduciaries of the plans that participate in the Trust (the Participating Plans);

(b) The terms of the Performance Fee shall be at least as favorable to the Participating Plans as those obtainable in an arm's-length transaction between unrelated parties;

(c) The total fees paid to the Manager by the Participating Plans that have invested in the Trust, shall constitute no more than reasonable compensation;

(d) The Performance Fee will be payable only when all of the assets of the Trust have been completely liquidated;

(e) The Performance Fee received by the Manager will be based on distributions, adjusted for inflation and present value, and will be calculated using two real hurdle rates of return (the Hurdle Rates). The Performance Fee will equal 10% after the Participating Plans have earned a 5% real return on the initial value of their investment and 20% after the Participating Plans have earned an 8% real return on the initial value of their investment;

(f) In the event of the Manager's resignation or termination as the investment manager to the Trust, the Investment Management Agreement would also terminate [1] and the Manager will not receive a Performance Fee.

(g) The Manager or its affiliates shall maintain, for a period of six years, the records necessary to enable the persons described in paragraph (2) of this Section (g) to determine whether the conditions of this exemption have been met, except that:

(1)(a) a prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the Manager or its affiliates, the records are lost or destroyed prior to the end of the six year period; and (b) no party in interest, other than the Manager, shall be subject to the civil penalty that may be assessed under section 502(i) of the Act or the taxes imposed by section 4975 (a) and (b) of the Code if the records are not maintained or are not available for the examinations required from (2) below.

(2)(a) Except as provided in paragraph (3) and notwithstanding any provisions of section 504(a)(2) and (b) of the Act, the records referred to in paragraph (1) of this Part (g) shall be unconditionally available at their customary location for examination during normal business hours by:

(i) Any duly authorized employee or representative of the Department or the Internal Revenue Service;

(ii) Any fiduciary of a Participating Plan or any duly authorized employee or representative of such fiduciary;

(iii) Any contributing employer to a Participating Plan or any duly authorized employee or representative of such employer; and

(iv) Any participant or beneficiary of a Participating Plan or any duly authorized employee or representative of such participant or beneficiary.

(3) None of the persons described above in paragraph (2)(a)(ii)–(iv) shall be authorized to examine the trade secrets of the Manager and its affiliates or any commercial or financial information which is privileged or confidential.

EFFECTIVE DATE: If granted this exemption will be effective as of January 1, 1993.

Summary of Facts and Representations

1. The assets of the Trust consist of direct or indirect [2] ownership interests in commercial or industrial real property (the Properties). Currently, there are six Properties held by the Trust which are located in California, Pennsylvania, New Jersey, New York and Illinois. The Trust is a closed-end real estate tax-exempt group trust organized in 1979 in the State of California pursuant to the IRS Revenue Ruling 81–100. The Trust was organized to allow the Participating Plans to pool their assets to purchase income-producing real property for investment. The Trust was created and is operated in accordance with the terms of the Group Trust Agreement dated September 7, 1979, with certain amendments thereto (the Amendments). Initially, the Trust provided for a ten year holding period of the Properties with additional extensions of two years if consented to by more than sixty percent of outstanding beneficiaries. The end of the initial holding period of the Trust was 12/31/92. As of December 31, 1992, the net asset value of the Trust was $325,040 million. It is represented that this figure was based on the most recent independent annual appraisals obtained prior to December 31, 1992, and it is also the "base" amount against which the Manager's asset management fee (the Base Fee) is determined, as discussed further in paragraph 5 below.

2. The Participating Plans are seven large ERISA plans (including one or more master or group trusts holding assets of multiple ERISA plans) and one governmental plan (as defined in section 3(32) of ERISA), each with assets in excess of $1 billion.

3. RREEF America L.L.C. is the investment manager to the Trust (the Manager) and the trustees of the Trust are principals and officers of the Manager (the Trustees), (the Manager and the Trustees, collectively; the Fiduciaries). The Trustees and the Manager have entered into an Investment Management Agreement, also dated September 7, 1979. Pursuant to that Investment Management Agreement, the Manager has the authority to acquire and dispose of any and all properties on behalf of the Trust; perform day-to-day investment and administrative operations of the Trust; and prepare the financial and other reports as provided in the Group Trust Agreement. The Investment Management Agreement is terminable by the Trustees or by a vote or written consent of the Participating Plans holding sixty percent of the outstanding units in the Trust at any time upon not less than sixty days written notice.

4. Pursuant to the Group Trust Agreement, the Trust was scheduled to terminate on December 31, 1992, whereupon an orderly liquidation of the Trust was to begin as soon as practicable. On September 11, 1991, the Participating Plans' representatives and the Fiduciaries held a conference to discuss the pending expiration of the Trust and liquidation of its assets. Due to a downturn in the real estate market, the Participating Plans' representatives proposed to the Fiduciaries that the Trust's liquidation period (the Liquidation Period) be extended for a period of up to six years to avoid "fire sale" prices. This extension of the Liquidation Period also involved restructuring of the fees payable to the Manager so as to provide further incentives to maximize sales prices while liquidating the Trust's real estate assets as soon as practicable. Accordingly, as of December 31, 1992, subject to the unanimous consent of the Participating Plans, the Trustees adopted Amendment #7 to the Group Trust Agreement in order to: (1) Extend the period for liquidating the Trust's real property assets up to six years from its scheduled expiration date; (2) reduce the annual Base Fee payable to the Manager during the Liquidation Period as discussed more fully below; (3) add a performance component (the Performance Fee) to the Base Fee.

5. Until December 31, 1992, the annual investment management fee (the Base Fee) under the Group Trust

[1] Unless termination was in bad faith wherein the Manager may seek legal recourse.

[2] Several of the real properties of the Trust are held indirectly through wholly owned Code section 501(c)(2) or 501(c)(25) corporations.

Agreement remained at 1% of the net asset value of the Trust as of the preceding December 31 (based on annual independent appraisals), and was payable 1/12th monthly in advance.

However, effective January 1, 1993, pursuant to the unanimous consent of the Participating Plans, and conditioned upon the grant of this proposed exemption, the Base Fee was reduced from 1% to .45% of "the adjusted December 31, 1992, net asset value of the Trust", also payable 1/12th monthly in advance. The "adjusted December 31, 1992 net asset value of the Trust" is the net asset value determined pursuant to the most recent independent appraisals of the Trust's properties at or before December 31, 1992. The net asset value is the base amount on which the Base Fee is determined, and it can be reduced (*not increased*) at the time the Base Fee is calculated to reflect any subsequent material changes in the value of the Trust's properties as evidenced by the Manager's subsequent quarterly internal appraisals. The net asset value and any subsequent reductions to it, if required by the Manager's internal appraisals, will be used by the Manager solely for the determination of the Base Fee. With respect to the Liquidation Period, the Participating Plans determined that continuing to obtain annual appraisals by independent qualified appraisers was too costly and inconsistent with their goal of maximizing their returns. It is represented, however, that the Manager will obtain independent appraisals every three years, and will compare them to the Manager's quarterly internal appraisals.

6. The Performance Fee was proposed by the Participating Plans as an incentive for the Manager to liquidate the assets of the Trust as quickly as possible while achieving the best possible sales prices for the Trust's assets. However, in the event this proposed exemption is not granted, the Base Fee will be calculated on the basis of .60% of the adjusted December 31, 1992 net asset value of the Trust; this resulting increase in the Base Fee will be payable retroactive from January 1, 1993 (without interest); and no Performance Fee will be paid.

7. For the purpose of the Performance Fee, the initial value of the Trust's assets is based on the greater of the Trust's value on December 31, 1991 or December 31, 1992. The Performance Fee will reflect all gains and losses of the Trust with respect to the Properties [3] and will be calculated as a cash flow fee with two real (inflation-adjusted) hurdle rates of 5% and 8% (the Hurdle Rates) of the initial value of the Trust's assets. It is represented that the payment of the Performance Fee to the Manager is dependent upon distribution to the Participating Plans' of such initial value plus interest at the real Hurdle Rates.

The Performance Fee is calculated with respect to the cash flow. The applicant represents that prior to the Trust's liquidation, cash flow is all cash actually distributed by the Trust to the Participating Plans, either from operations or capital events. The major sources of cash are rents, interest or dividends on invested reserves, and proceeds of sale, net of all expenses. Upon the liquidation of the Trust, cash flow means all cash available for distribution to the Participating Plans after payment of (or reservation for) all remaining liabilities of the Trust, but before the payment of the Performance Fee.

8. The Performance Fee is payable to the Manager in cash as of the date the last real property asset in the Trust is liquidated and the Trust is fully terminated. The calculation of the Performance Fee is accomplished by converting the annual distributions to the Participating Plans into 1993 dollars (January 1, 1993 is the effective date of the addition of the Performance Fee component to the fees paid by the Trust to the Manager). The annual distributions include, among other things, proceeds from capital events and rents. First, the annual distributions are discounted for inflation using the CPI index. Second, the inflation adjusted annual distributions are discounted to the present value using appropriate discount rates of 5% or 8%, which are identical to the Hurdle Rates to arrive at the discounted distributions (the Discounted Distributions). The amounts by which the Discounted Distributions exceed the initial value of the Trust as of January 1, 1993 are then calculated (the Excess Distributions).

For purposes of the Performance Fee calculation, these Excess Distributions are converted into the current value (i.e., value during the year when the Manager is paid the Performance Fee). This conversion is calculated as follows. The Excess Distributions are divided first by the inflation CPI index for the year when the Performance Fee is paid, and second, they are divided by the appropriate 5% or 8% discount rates. The result is current excess distributions (Current Excess Distributions).

The Performance Fee paid to the Manager is ten percent (10%) of the Current Excess Distributions when the Participating Plans earn a 5% real Hurdle Rate on the initial value of their investment in the Trust and *until* the Participating Plans earn an 8% real Hurdle Rate return on the initial value of their investment in the Trust. When the Participating Plans earn an 8% real Hurdle Rate return on the initial value of their investment in the Trust, the Performance Fee paid to the Manager is twenty percent (20%) of the Current Excess Distributions in the 8% real Hurdle Rate context *after* they have been *reduced* by 10% Performance Fee amount.

9. In this regard, the applicant submitted a numerical example of how the Performance Fee will work under certain assumptions if the inflation rate is 4% annually. Under these assumptions the Trust holds a single real property with an initial value of $100,000 as of December 31, 1992, and this property generates distributable (before fees) cash flow of $10,000 a year for three years. At the end of the third year the property is sold for $110,000.

At a 5% real Hurdle Rate, the Discounted Distributions are as follows:

	Year 1	Year 2	Year 3	Total
Nominal $	$10,000+	$10,000+	$120,000=	$140,000
CPI	*.9615=	*.9246=	*.8890=	
Discount	$9,615	$9,246	$106,680	
5% Discount	*.9524	*.9070	*.8638	
Adjusted $	$9,157+	$8,386+	$92,150=	$109,693

The present value of the Excess Distributions, at a 5% real Hurdle Rate, is $109,693−$100,000=$9,693.

Converting the Excess Distributions to current value, the excess is $12,622. This is calculated as follows: 9,693/.8890=10,903 then 10,903/.8638=$12,622 (the Current Excess Distributions).

At an 8% real Hurdle Rate, the Discounted Distributions are as follows:

	Year 1	Year 2	Year 3	Total
Nominal $	$10,000+	$10,000+	$120,000=	$140,000
CPI	*.9615=	*.9246=	*.8890=	
Discount	$9,615	$9,246	$106,680	
8% Discount	*.9259	*.8573	*.7938	
Adjusted $	$8,903+	$7,927+	$84,683=	$101,513

The present value of the Excess Distributions at an 8% real Hurdle Rate, is $101,513−$100,00=$1,513. Converting the Excess Distributions to current value, the excess is $2,144. This is calculated as follows: 1,513/.8890=1701.9 then 1701.9/.7938=$2,144 (Current Excess Distributions).

For Current Excess Distributions above the 5% real Hurdle Rate and *until* the 8% Hurdle Rate, the Performance Fee is 10%:

$12,622−$2,144=$10,478 * 10%=$1,048

This fee payment reduces the remaining amount available for distribution. Accordingly, after subtracting the 10% fee, the remaining Current Excess Distributions are subject to a 20% Performance Fee:

$2,144−$1,048=$1,096 * 20%=$219

As such, in this example the total Performance Fee paid is $1,048 +$219=$1,267.

The applicant represents that the cash flow will not be reinvested and the Performance Fee would not be determined and paid until all of the Trust's assets have been liquidated and the Trust is terminated.

10. In the event that the Manager is terminated [4] or resigns with respect to the Trust, the Manager will not receive a Performance Fee, and the Investment Management Agreement, including all obligations of the Trustees to continue to compensate the Manager thereunder, would also terminate. If, however, the Manager is terminated in bad faith, the Manager may seek legal recourse. Also, whether a replacement investment manager would receive a performance fee is dependent solely upon whether a performance fee was negotiated as part of the investment management agreement of the replacement manager.

11. The applicant represents that the interests of the Participating Plans are fully aligned by the Performance Fee because the Performance Fee is calculated as a "share" in all distributions after the Plans have received the initial value of their investment plus earnings at the designated real Hurdle Rates. Furthermore, the Performance Fee will reflect all gains and losses of the Trust with respect to the Properties and will be payable only at a pre-established point, i.e., the liquidation of all of the Trust's Properties. It is also represented that the Manager cannot use its discretion to accelerate sales to benefit itself without equally benefitting the Participating Plans, and the Manager cannot use its discretion over the timing of sales to the detriment of the Participating Plans without causing itself a similar detriment. If the Trust distributes a real return of at least 5%, the Manager would receive 10% of all distributions in excess of a 5% real return until the Participating Plans have received a real return of at least 8%. If the Trust distributes a real return of at least 8%, the Manager would receive 20% of all distributions in excess of an 8% real return. It is represented that the Performance Fee component will allow the Manager to potentially offset some or all of the reduction in the Base Fee and to provide other incentives to maximize the value and dispose of the Properties. If the Trust is completely liquidated earlier than the six year period, the Performance Fee will become payable at that time. The applicant also represents that making the payment of the Performance Fee contingent upon the complete liquidation of the Trust would prevent the Fiduciaries from causing the Trust to acquire assets with a view toward increasing the Performance Fee (e.g., by increasing risk).

12. In summary, the applicant represents that the transaction satisfies the statutory criteria of section 408(a) of the Act and section 4975(c)(2) of the Code because:

(a) The terms and the payment of the Performance Fee shall be approved in writing, through an amendment to the Group Trust Agreement, by independent fiduciaries of the Participating Plans;

(b) The terms of the Performance Fee shall be at least as favorable to the Participating Plans as those obtainable in an arm's-length transaction between unrelated parties;

(c) The total fees paid to the Manager by the Participating Plans that have invested in the Trust, shall constitute no more than reasonable compensation;

(d) The Performance Fee will be payable only when all of the assets of the Trust have been completely liquidated;

(e) The Performance Fee received by the Manager will be based on distributions, adjusted for inflation and present value, and will be calculated using two real Hurdle Rates of return. The Performance Fee will equal 10% after the Participating Plans have earned a 5% real return on the initial value of their investment and 20% after the Participating Plans have earned an 8% real return on the initial value of their investment;

(f) In the event of the Manager's resignation or termination as the investment manager to the Trust, the Investment Management Agreement would also terminate and the Manager will not receive a Performance Fee. However, if the Manager is terminated in bad faith, the Manager may seek legal recourse;

(g) The Performance Fee is a one-time payment to the Manager upon complete liquidation of the Trust within six years and upon final distribution of its assets; and

(h) The Participating Plans have proposed the Performance Fee as being in their interest because it would encourage the goal of the Participating

[3] By definition, all gains and losses with respect to the Properties will be realized prior to calculation of the Performance Fee, i.e., there will be no unrealized gains or losses.

[4] The Manager can be terminated by the Trustees, or by a vote or written consent of the Participating Plans holding sixty percent (60%) of the outstanding units in the Trust at any time upon not less than sixty days written notice.

Plans to liquidate the Properties as quickly as practicable while maximizing their sales prices.

Notice to Interested Persons

Those persons who may be interested in the pendency of this exemption include the fiduciaries who are responsible for directing the investment of the Participating Plans' assets in the Trust. The applicant represents that it proposes to notify the interested persons within ten (10) days of the publication of the notice of the proposed exemption in the **Federal Register**. Such notice will contain a copy of the notice of the proposed exemption published in the **Federal Register** and a statement advising interested persons of their right to comment and to request a hearing on the proposed exemption. Accordingly, comments and hearing requests on the proposed exemption are due forty (40) days after the date of publication of this proposed exemption in the **Federal Register**.

[Application No. D–09818]

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting an exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990).[5]

Section I. Covered Transactions

If the exemption is granted, the restrictions of section 406(a) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (D) of the Code, shall not apply, effective August 18, 1995, to the purchase or redemption of shares by an employee benefit plan, an individual retirement account (the IRA) or a retirement plan for a self-employed individual (the Keogh Plan) (collectively referred to herein as the Plans) in the PaineWebber Managed Accounts Services Portfolio Trust (the Trust) established in connection with such Plans' participation in the PaineWebber PACE Program (the PACE Program).

In addition, the restrictions of section 406(b) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (E) and (F) of the Code, shall not apply, effective August 18, 1995, to (a) the provision, by PaineWebber Managed Accounts Services (PMAS), a division of PaineWebber, of asset allocation and related services to an independent fiduciary of a Plan (the Independent Fiduciary) or to a directing participant (the Directing Participant) in a Plan that is covered under the provisions of section 404(c) of the Act (the Section 404(c) Plan), which may result in the selection by the Independent Fiduciary or the Directing Participant of portfolios of the Trust (the Portfolios) in the PACE Program for the investment of Plan assets; and (b) the provision of investment management services by Mitchell Hutchins Asset Management, Inc. (Mitchell Hutchins) to the PACE Money Market Investments Portfolio of the Trust.

This proposed exemption is subject to the conditions set forth below in Section II.

Section II. General Conditions

(a) The participation of each Plan in the PACE Program is approved by an Independent Fiduciary or, if applicable, Directing Participant.

(b) As to each Plan, the total fees paid to PMAS and its affiliates constitute no more than reasonable compensation and do not include the receipt of fees pursuant to Rule 12b–1 under the Investment Company Act of 1940 (the '40 Act) by PMAS and its affiliates in connection with the transactions.

(c) No Plan pays a fee or commission by reason of the acquisition or redemption of shares in the Trust.

(d) The terms of each purchase or redemption of Trust shares remain at least as favorable to an investing Plan as those obtainable in an arm's length transaction with an unrelated party.

(e) PMAS provides written documentation to an Independent Fiduciary or a Directing Participant of its recommendations or evaluations based upon objective criteria.

(f) Any recommendation or evaluation made by PMAS to an Independent Fiduciary or Directing Participant is implemented only at the express direction of such fiduciary or participant.

(g) PMAS provides investment advice in writing to an Independent Fiduciary or Directing Participant with respect to all available Portfolios.

(h) With the exception of the PACE Money Market Investments Portfolio, any sub-adviser (the Sub-Adviser) appointed by Mitchell Hutchins to exercise investment discretion with respect to a Portfolio is independent of PaineWebber and its affiliates.

(i) The quarterly fee that is paid by a Plan to PMAS for asset allocation and related services rendered to such Plan under the PACE Program (i.e., the outside fee) is offset by such amount as is necessary to assure that Mitchell Hutchins retains 20 basis points as a management fee from any Portfolio (with the exception of the PACE Money Market Investments Portfolio from which Mitchell Hutchins retains an investment management fee of 15 basis points) containing investments attributable to the Plan investor. However, the quarterly fee of 20 basis points that is paid to Mitchell Hutchins for administrative services is retained by Mitchell Hutchins and is not offset against the outside fee.

(j) With respect to its participation in the PACE Program prior to purchasing Trust shares,

(1) Each Independent Fiduciary receives the following written or oral disclosures from PaineWebber:

(A) A copy of the prospectus (the Prospectus) for the Trust discussing the investment objectives of the Portfolios comprising the Trust; the policies employed to achieve these objectives; the corporate affiliation existing between PaineWebber, PMAS, Mitchell Hutchins and their affiliates; the compensation paid to such entities; any additional information explaining the risks of investing in the Trust; and sufficient and understandable disclosures relating to rebalancing of investor accounts.

(B) Upon written or oral request to PaineWebber, a Statement of Additional Information supplementing the Prospectus, which describes the types of securities and other instruments in which the Portfolios may invest, the investment policies and strategies that the Portfolios may utilize and certain risks attendant to those investments, policies and strategies.

(C) An investor questionnaire.

(D) A written analysis of PMAS's asset allocation decision and recommendation of specific Portfolios.

(E) A copy of the agreement between PMAS and such Plan relating to participation in the PACE Program.

(F) Upon written request to Mitchell Hutchins, a copy of the respective investment advisory agreement between Mitchell Hutchins and the Sub-Advisers.

(G) Copies of the proposed exemption and grant notice describing the exemptive relief provided herein.

(2) In the case of a Section 404(c) Plan, the Independent Fiduciary will—

(A) Make copies of the foregoing documents available to Directing Participants.

(B) Allow Directing Participants to interact with PaineWebber Investment Executives and receive information relative to the services offered under the PACE Program, including the rebalancing feature, and the operation and objectives of the Portfolios.

(3) If accepted as an investor in the PACE Program, an Independent Fiduciary of an IRA or Keogh Plan, is required to acknowledge, in writing to PMAS, prior to purchasing Trust shares that such fiduciary has received copies of the documents described in paragraph (j)(1) of this Section II.

(4) With respect to a Section 404(c) Plan, written acknowledgement of the receipt of such documents is provided by the Independent Fiduciary (i.e., the Plan administrator, trustee, investment manager or named fiduciary, as the recordholder of Trust shares). Such Independent Fiduciary will be required to represent in writing to PMAS that such fiduciary is—

(A) Independent of PaineWebber and its affiliates;

(B) Knowledgeable with respect to the Plan in administrative matters and funding matters related thereto, and;

(C) Able to make an informed decision concerning participation in the PACE Program.

(5) With respect to a Plan that is covered under Title I of the Act, where investment decisions are made by a trustee, investment manager or a named fiduciary, such Independent Fiduciary is required to acknowledge, in writing, receipt of such documents and represent to PMAS that such fiduciary is—

(A) Independent of PMAS and its affiliates;

(B) Capable of making an independent decision regarding the investment of Plan assets;

(C) Knowledgeable with respect to the Plan in administrative matters and funding matters related thereto; and

(D) Able to make an informed decision concerning participation in the PACE Program.

(k) As applicable, subsequent to its participation in the PACE Program, each Independent Fiduciary receives the following written or oral disclosures with respect to its ongoing participation in the PACE Program:

(1) Written confirmations of each purchase or redemption transaction by the Plan with respect to a Portfolio.

(2) Telephone quotations from PaineWebber of such Plan's account balance.

(3) A monthly statement of account from PaineWebber specifying the net asset value of the Plan's investment in such account. Such statement is also anticipated to include cash flow and transaction activity during the month, unrealized gains or losses on Portfolio shares held; and a summary of total earnings and capital returns on the Plan's PACE Portfolio for the month and year-to-date.

(4) The Trust's semi-annual and annual report which will include financial statements for the Trust and investment management fees paid by each Portfolio.

(5) A written quarterly monitoring report that includes a record of the Plan's PACE Program portfolio for the quarter and since inception, showing the rates of return relative to comparative market indices (illustrated in a manner that reflects the effect of any fees for participation in the PACE Program actually incurred during the period); an investment outlook summary containing market commentary; and the Plan's actual PACE Program portfolio with a breakdown, in both dollars and percentages, of the holdings in each portfolio. The quarterly monitoring report will also contain an analysis and an evaluation of a Plan investor's account to ascertain whether the Plan's investment objectives have been met and recommending, if required, changes in Portfolio allocations.

(6) A statement, furnished at least quarterly or annually, specifying—

(A) The total, expressed in dollars, of each Portfolio's brokerage commissions that are paid to PaineWebber and its affiliates;

(B) The total, expressed in dollars, of each Portfolio's brokerage commissions that are paid to unrelated brokerage firms;

(C) The average brokerage commissions per share by the Trust to brokers affiliated with PaineWebber, expressed as cents per share; and

(D) The average brokerage commissions per share by the Trust to brokers unrelated to PaineWebber and its affiliates, expressed as cents per share for any year in which brokerage commissions are paid to PaineWebber by the Trust Portfolios in which a Plan's assets are invested.

(7) Periodic meetings with a PaineWebber Investment Executive by Independent Fiduciaries to discuss the quarterly monitoring report or any other questions that may arise.

(l) In the case of a Section 404(c) Plan where the Independent Fiduciary has established an omnibus account in the name of the Plan (the Undisclosed Account) with PaineWebber, the information noted above in subparagraphs (k)(1) through (k)(7) of this Section II may be provided directly by PaineWebber to the Directing Participants or to the Independent Fiduciary for dissemination to the Directing Participants, depending upon the arrangement negotiated by the Independent Fiduciary with PMAS.

(m) If previously authorized in writing by the Independent Fiduciary, the Plan investor's account is automatically rebalanced on a periodic basis to the asset allocation previously prescribed by the Plan or participant, as applicable, if the quarterly screening reveals that one or more Portfolio allocations deviates from the allocation prescribed by the investor by the agreed-upon formula threshold.

(n) The books and records of the Trust are audited annually by independent, certified public accountants and all investors receive copies of an audited financial report no later than 60 days after the close of each Trust fiscal year.

(o) PaineWebber maintains, for a period of six years, the records necessary to enable the persons described in paragraph (p) of this Section II to determine whether the conditions of this exemption have been met, except that—

(1) A prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of PaineWebber and/or its affiliates, the records are lost or destroyed prior to the end of the six year period; and

(2) No party in interest other than PaineWebber shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required by paragraph (p)(1) of this Section II below.

(p)(1) Except as provided in subparagraph (p)(2) of this paragraph and notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (o) of this Section II are unconditionally available at their customary location during normal business hours by:

(A) Any duly authorized employee or representative of the Department, the Internal Revenue Service (the Service) or the Securities and Exchange Commission (the SEC);

[5] For purposes of this proposed exemption, reference to provisions of Title I of the Act, unless otherwise specified, refer also to the corresponding provisions of the Code.

(B) Any fiduciary of a participating Plan or any duly authorized representative of such fiduciary;

(C) Any contributing employer to any participating Plan or any duly authorized employee representative of such employer; and

(D) Any participant or beneficiary of any participating Plan, or any duly authorized representative of such participant or beneficiary.

(p)(2) None of the persons described above in paragraphs (p)(1)(B)–(p)(1)(D) of this paragraph (p) are authorized to examine the trade secrets of PaineWebber or Mitchell Hutchins or commercial or financial information which is privileged or confidential.

Section III. Definitions

For purposes of this proposed exemption:

(a) The term "PaineWebber" means PaineWebber Incorporated and any affiliate of PaineWebber, as defined in paragraph (b) of this Section III.

(b) An "affiliate" of PaineWebber includes—

(1) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with PaineWebber.

(2) Any officer, director or partner in such person, and

(3) Any corporation or partnership of which such person is an officer, director or a 5 percent partner or owner.

(c) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

(d) The term "Independent Fiduciary" means a Plan fiduciary which is independent of PaineWebber and its affiliates and is either

(1) A Plan administrator, trustee, investment manager or named fiduciary, as the recordholder of Trust shares of a Section 404(c) Plan;

(2) A participant in a Keogh Plan;

(3) An individual covered under a self-directed IRA which invests in Trust shares;

(4) An employee, officer or director of PaineWebber and/or its affiliates covered by an IRA not subject to Title I of the Act;

(5) A trustee, Plan administrator, investment manager or named fiduciary responsible for investment decisions in the case of a Title I Plan that does not permit individual direction as contemplated by Section 404(c) of the Act; or

(e) The term "Directing Participant" means a participant in a Plan covered under the provisions of section 404(c) of the Act, who is permitted under the terms of the Plan to direct, and who elects to so direct, the investment of the assets of his or her account in such Plan.

(f) The term "Plan" means a pension plan described in 29 CFR 2510.3–2, a welfare benefit plan described in 29 CFR 2510.3–1, a plan described in section 4975(e)(1) of the Code, and in the case of a Section 404(c) Plan, the individual account of a Directing Participant.

Effective Date: If granted, this proposed exemption will be effective as of August 18, 1995.

Summary of Facts and Representations

1. The parties to the transactions are as follows:

(a) *Paine Webber Group (Paine Webber Group),* located in New York, New York, is the parent of PaineWebber.

Paine Webber Group is one of the leading full-line securities firms servicing institutions, governments and individual investors in the United States and throughout the world. Paine Webber Group conducts its businesses in part through PMAS, a division of PaineWebber and Mitchell Hutchins, a wholly owned subsidiary of PaineWebber. Paine Webber Group is a member of all principal securities and commodities exchanges in the United States and the National Association of Securities Dealers, Inc. In addition, it holds memberships or associate memberships on several principal foreign securities and commodities exchanges. Although Paine Webber Group is not an operating company and, as such, maintains no assets under management, as of September 30, 1994, Paine Webber Group and its subsidiaries rendered investment advisory services with respect to $36.1 billion in assets.

(b) *PaineWebber,* whose principal executive offices are located in New York, New York, provides investment advisory services to individuals, banks, thrift institutions, investment companies, pension and profit sharing plans, trusts, estates, charitable organizations, corporations and other business and government entities. PaineWebber is also responsible for securities underwriting, investment and merchant banking services and securities and commodities trading as principal and agent. PaineWebber serves as the dealer of Trust shares described herein.

(c) *PMAS,* located in Weehawken, New Jersey is responsible for individual investor account management and investor consulting services. PMAS provides such services to the investors involved in various PaineWebber investment programs by providing asset allocation recommendations and related services with respect to their investments. PMAS provides investment consulting and advisory services to more than 40,000 accounts, with account sizes ranging from institutional accounts in excess of $650 million in assets to individual accounts with $100,000 minimum investments. PMAS provides investors in the Trust with asset allocation recommendations and related services with respect to investments in the Trust Portfolios.

(d) *Mitchell Hutchins,* which is located in New York, New York, is a registered investment adviser under the Investment Adviser's Act of 1940 (the Advisers Act) and a wholly owned subsidiary of PaineWebber. Mitchell Hutchins provides investment advisory and asset management services to investors and develops and distributes investment products, including mutual funds and limited partnerships. Mitchell Hutchins also provides financial services to over $24.8 billion in client assets representing twenty-eight investment companies with fifty-five separate portfolios. Mitchell Hutchins is providing investment management and administrative services with respect to the Trust and investment advisory services with respect to one of the Trust's Portfolios.

(e) *State Street Bank and Trust Company (State Street),* located in North Quincy, Massachusetts, serves as the custodian of assets for the Trust. State Street is not affiliated with PaineWebber and its affiliates. It provides a full array of integrated banking products, focusing on servicing financial assets (i.e., asset custody, cash management, securities lending, multi-currency accounting and foreign exchange), managing assets and commercial lending. As of September 30, 1994, State Street rendered custodian services with respect to approximately $1.6 trillion in assets and provided investment management services to approximately $155 billion in assets.

(f) *PFPC, Inc. (PFPC),* a subsidiary of PNC Bank, National Association, and whose principal address is in Wilmington, Delaware, serves as the Trust's transfer and dividend disbursing agent. PFPC is not affiliated with PaineWebber and its affiliates. PFPC provides a complete range of mutual fund administration and accounting services to a diverse product base of domestic and international investment portfolios. PFPC is also one of the nation's leading providers of transfer and shareholder servicing services to mutual funds and asset management accounts. As of September 30, 1994, PFPC rendered accounting and administration services to over 400 mutual funds and provided transfer agency, dividend disbursing and/or shareholder servicing services with respect to more than 3.1 million shareholder accounts.

2. The Trust is a no load, open-end, diversified management investment company registered under the '40 Act. The Trust was organized as a Delaware business trust on September 9, 1994 and it has an indefinite duration. As of November 6, 1995, the Trust had $184 million in net assets. The Trust presently consists of twelve different portfolios which will pay dividends to investors. The composition of the Portfolios will cover a spectrum of investments ranging from foreign and U.S. Government-related securities to equity and debt securities issued by foreign and domestic corporations. Although a Portfolio of the Trust is permitted to invest its assets in securities issued by PaineWebber and/or its affiliates, the percentage of that Portfolio's net assets invested in such securities will never exceed one percent. With the exception of the PACE Money Market Investments Portfolio, shares in each of the Portfolios are being initially offered to the public at a net asset value of $10 per share. Shares in the PACE Money Market Investments Portfolio are being initially offered to the public at a net asset value of $1.00 per share.

3. Mitchell Hutchins serves as the distributor of Trust shares and PaineWebber serves as the dealer with respect to shares of the Portfolios.[6] Such shares are being offered by PaineWebber at no load, to participants in the PACE Program. The PACE Program is an investment service pursuant to which PMAS provides participants in the PACE Program with asset allocation recommendations and related services with respect to the Portfolios based on an evaluation of an investor's investment objectives and risk tolerances. As stated above, State Street will serve as the custodian of each Portfolio's assets and PFPC serves as the Portfolio's transfer and dividend disbursing agent.

To participate in the PACE Program, each investor must open a brokerage account with PaineWebber.[7] The minimum initial investment in the PACE Program is $10,000.

Although PaineWebber anticipates that investors in the Trust will initially consist of institutions and individuals, it is proposed that prospective investors will include Plans for which PaineWebber may or may not currently maintain investment accounts. A majority of these Plans may be IRAs or Keogh Plans. In addition, it is proposed that Plans for which PaineWebber or an affiliate serves as a prototype sponsor and/or a nondiscretionary trustee or custodian be permitted to invest in the Trust.[8]

The applicants represent that the initial purchase of shares in the Trust by a Plan participating in the PACE Program may give rise to a prohibited transaction where PaineWebber, or an affiliate thereof, is a party in interest with respect to the Plan. PaineWebber also acknowledges that a prohibited transaction could arise upon a subsequent purchase or redemption of shares in the Trust by a participating Plan inasmuch as the party in interest relationship between PaineWebber and the Plan may have been established at that point.

Accordingly, the applicants have requested retroactive exemptive relief from the Department with respect to the purchase and redemption of shares in the Trust by a Plan participating in the PACE Program where PaineWebber does not (a) sponsor the Plan (other than as prototype sponsor) or (b) have discretionary authority over such Plan's assets.[9] No commissions or fees will be paid by a Plan with respect to the sale and redemption transactions or a Plan's exchange of shares in a Portfolio for shares of another Portfolio. If granted, the proposed exemption will be effective as of August 18, 1995.

4. Overall responsibility for the management and supervision of the Trust and the Portfolios rests with the Trust's Board of Trustees (the Trustees). The Trustees will approve all significant agreements involving the Trust and the persons and companies that provide services to the Trust and the Portfolios.

5. Mitchell Hutchins also serves as the investment manager to each Portfolio. Under its investment management and administration agreement with the Trust, Mitchell Hutchins will provide certain investment management and administrative services to the Trust and the Portfolios that, in part, involve calculating each Portfolio's net asset value[10] and, with the exception of the PACE Money Market Investments Portfolio (for which Mitchell Hutchins will exercise investment discretion), making recommendations to the Board of Trustees of the Trust regarding (a) the

[6] As distributor or principal underwriter for the Trust, Mitchell Hutchins will use its best efforts, consistent with its other businesses, to sell shares of the Portfolios. Pursuant to a separate dealer agreement with Mitchell Hutchins, PaineWebber will sell Trust shares to investors. However, neither Mitchell Hutchins nor PaineWebber will receive any compensation for their services as distributor or dealer of Trust shares. According to the applicants, Mitchell Hutchins and PaineWebber may be regarded as having an indirect economic incentive by virtue of the fact that Mitchell Hutchins and PaineWebber will be paid for the services they provide to the Trust in their respective capacities as investment manager and administrator of the Trust (Mitchell Hutchins) and as the provider of asset allocation and related services (PaineWebber, through PMAS).

[7] According to the Statement of Additional Information that accompanies the Prospectus for the PACE Program, shares in the Trust are not certificated for reasons of economy and convenience. However, PFPC maintains a record of each investor's ownership of shares. Although Trust shares are transferable and accord voting rights to their owners, they do not confer pre-emptive rights (i.e., the privilege of a shareholder to maintain a proportionate share of ownership of a company by purchasing a proportionate share of any new stock issues). PaineWebber represents that in the context of an open-end investment company that continuously issues and redeems shares, a pre-emptive right would make the normal operations of the Trust impossible.

As for voting rights, PaineWebber states that they are accorded to recordholders of Trust shares. PaineWebber notes that a recordholder of Trust shares may determine to seek the submission of proxies by Plan participants and vote Trust shares accordingly. In the case of individual account plans such as Section 404(c) Plans, PaineWebber believes that most Plans will pass the vote through to Directing Participants on a pro-rata basis.

[8] The Department notes that the general standards of fiduciary conduct promulgated under the Act would apply to the participation in the PACE Program by an Independent Fiduciary. Section 404 of the Act requires that a fiduciary discharge his duties respecting a plan solely in the interest of the plan's participants and beneficiaries and in a prudent fashion. Accordingly, an Independent Fiduciary must act prudently with respect to the decision to enter into the PACE Program with PMAS as well as with respect to the negotiation of services that will be performed thereunder and the compensation that will be paid to PaineWebber and its affiliates. The Department expects that an Independent Fiduciary, prior to entering into the PACE Program, to understand fully all aspects of such arrangement following disclosure by PMAS of all relevant information.

[9] PaineWebber represents that to the extent employee benefit plans that are maintained by PaineWebber purchase or redeem shares in the Trust, such transactions will meet the provisions of Prohibited Transaction Exemption (PTE) 77–3 (42 FR 18734, April 8, 1977). PaineWebber further represents that, although the exemptive relief proposed above would not permit PaineWebber or an affiliate (while serving as a Plan fiduciary with discretionary authority over the management of a Plan's assets) to invest those assets over which it exercises discretionary authority in Trust shares, a purchase or redemption of Trust shares under such circumstances would be permissible if made in compliance with the terms and conditions of PTE 77–4 (42 FR 18732, April 8, 1977). The Department expresses no opinion herein as to whether such transactions will comply with the terms and conditions of PTEs 77–3 and 77–4.

[10] The net asset value of each Portfolio's shares, except for the PACE Money Market Investments Portfolio, fluctuates and is determined as of the close of regular trading on the New York Stock Exchange (the NYSE) (currently, 4:00 p.m. Eastern Time) each business day. The net asset value of shares in the PACE Money Market Investments Portfolio is determined as of 12:00 p.m. each business day. Each Portfolio's net asset value per share is determined by dividing the value of the securities held by the Portfolio plus any cash or other assets minus all liabilities by the total number of Portfolio shares outstanding.

investment policies of each Portfolio and (b) the selection and retention of the Sub-Advisers who will exercise investment discretion with respect to the assets of each Portfolio.[11]

The Sub-Advisers will provide discretionary advisory services with respect to the investment of the assets of the respective Portfolios (other than the PACE Money Market Investments Portfolio) on the basis of their performance in their respective areas of expertise in asset management. With the exception of the PACE Money Market Investments Portfolio which will be advised by Mitchell Hutchins, PaineWebber represents that all of the Sub-Advisers, will be independent of, and will remain independent of PaineWebber and/or its affiliates. The Sub- Advisers will be registered investment advisers under the Advisers Act and maintain their principal executive offices in various regions of the United States.

The administrative services for which Mitchell Hutchins will be responsible include the following: (a) supervising all aspects of the operations of the Trust and each Portfolio (e.g., oversight of transfer agency, custodial, legal and accounting services; (b) providing the Trust and each Portfolio with corporate, administrative and clerical personnel as well as maintaining books and records for the Trust and each Portfolio; (c) arranging for the periodic preparation, updating, filing and dissemination of the Trust's Registration Statement, proxy materials, tax returns and required reports to each Portfolio's shareholders and the SEC, as well as other federal or state regulatory authorities; (d) providing the Trust and each Portfolio with, and obtaining for it, office space, equipment and services; (e) providing the Trustees with economic and investment analyses and reports, and making available to the Trustees, upon request, any economic, statistical and investment services. These administrative services do not include any management services that might be performed by Mitchell Hutchins. As noted in Representations 17 and 18, Mitchell Hutchins is separately compensated for management services rendered to the Trust.

6. Through the PACE Program, PMAS is providing a Plan investor with non-binding, asset allocation recommendations with respect to such investor's investments in the Portfolios. In order to make these evaluations, PMAS will furnish copies of an investor questionnaire, designed to elicit information about the specific investment needs, objectives and expectations of the investor, to an Independent Fiduciary of a Title I Plan that does not permit individually-directed investments, to an Independent Fiduciary of an IRA or a Keogh Plan, or to a Directing Participant of a Section 404(c) Plan. Although the contents of the questionnaire may vary somewhat depending upon the type of Plan investing in the PACE Program, for a particular Plan, the same questionnaire will be given to each participant.

In the case of a Section 404(c) Plan where an Independent Fiduciary has established an Undisclosed Account with PaineWebber in the name of the Plan, PMAS will provide investor questionnaires to each Directing Participant through PaineWebber Investment Executives (who are registered representatives of PaineWebber), via the Plan's benefits personnel or independent recordkeeper (the Recordkeeper), or by other means requested by the Independent Fiduciary. The applicants recognize that Section 404(c) Plans typically employ a Recordkeeper to assist the Independent Fiduciary with maintaining Plan-related data which is used to generate benefit status reports, regulatory compliance reports and participant- and Plan-level investment performance reports. Therefore, the Undisclosed Account arrangement is intended to coordinate with the functions traditionally provided to Section 404(c) Plans by their Recordkeepers.[12]

7. Based upon data obtained from the investor questionnaire, PMAS will evaluate the investor's risk tolerances and investment objectives. PMAS will then recommend, in writing, an appropriate allocation of assets among suitable Portfolios that conforms to these tolerances and objectives.

PaineWebber represents that PMAS will not have any discretionary authority or control with respect to the allocation of an investor's assets among the Portfolios. In the case of an IRA or Keogh Plan, PaineWebber represents that all of PMAS's recommendations and evaluations will be presented to the Independent Fiduciary and will be implemented only if accepted and acted upon by such fiduciary.

In the case of a Section 404(c) Plan, PaineWebber represents that Directing Participants in such Plan will be presented with recommendations and evaluations that are tailored to the responses provided by that Directing Participant in his or her questionnaire. PMAS's recommendations will be disseminated to Directing Particpants in accordance with procedures established for the Plan.

After receipt of PMAS's initial recommendations, which may or may not be adopted, the Independent Fiduciary or Directing Participant, as applicable, will select the specific Portfolios. PMAS will continue to recommend to Independent Fiduciaries or Directing Participants asset allocations among the selected Portfolios.

8. Aside from the investor questionnaire, in order for a Plan to participate in the PACE Program, PaineWebber or PMAS will provide an Independent Fiduciary with a copy of the Trust Prospectus discussing (a) the investment objectives of the Portfolios comprising the Trust, (b) the policies employed to achieve these objectives, (c) the corporate affiliation existing between PaineWebber, PMAS, Mitchell Hutchins and their subsidiaries, and (d) the compensation paid to such entities by the Trust and information explaining the risks attendant to investing in the Trust. In addition, upon written or oral request to PaineWebber, the Independent Fiduciary will be given a Statement of Additional Information supplementing the Prospectus which describes, in further detail, the types of securities and other instruments in which the Portfolios may invest, the investment policies and strategies that the Portfolios may utilize and certain risks attendant to those investments, policies and strategies. Further, each Independent Fiduciary will be given a copy of the investment advisory agreement between PMAS and such Plan relating to participation in the PACE Program, including copies of the notice of proposed exemption and grant notice for the exemptive relief provided herein. Upon oral or written request to the Trust, PaineWebber will also provide an Independent Fiduciary with a copy of the respective investment advisory agreements between Mitchell Hutchins and the Sub-Advisers.

In the case of a Section 404(c) Plan, depending on the arrangement negotiated with the Independent Fiduciary, PaineWebber represents that the Independent Fiduciary will make available copies of the foregoing documents to Directing Participants.

In addition, Independent Fiduciaries and, if applicable, Directing Participants, will receive introductory documentation regarding the PACE Program in marketing materials and in other communications. Further, depending upon the arrangement negotiated between PMAS and the Independent Fiduciary, a PaineWebber Investment Executive will meet with a Directing Participant, upon oral or written request, to discuss the services offered under the PACE Program, including the rebalancing feature described in Representation 12, as well as the operation and objectives of the Portfolios.[13]

9. If accepted as an investor in the PACE Program, an Independent Fiduciary will be required by PMAS to acknowledge, in writing, prior to purchasing Trust shares, that such fiduciary has received copies of the documents referred to in Representation 8. With respect to a Plan that is covered by Title I of the Act (e.g., a defined contribution plan), where investment decisions will be made by a trustee, investment manager or a named fiduciary, PMAS will require that such Independent Fiduciary acknowledge in writing receipt of such documents and represent to PaineWebber that such fiduciary is (a) independent of PaineWebber and its affiliates, (b) capable of making an independent decision regarding the investment of Plan assets, (c) knowledgeable with respect to the Plan in administrative matters and funding matters related thereto, and (d) able to make an informed decision concerning participation in the PACE Program.

With respect to a Section 404(c) Plan, written acknowledgement of the receipt of such documents will be provided by the Independent Fiduciary (i.e., the Plan administrator, trustee, investment manager or named fiduciary, as the recordholder of Trust shares). Such Independent Fiduciary will be required to represent, in writing, to PMAS that such fiduciary is (a) independent of PaineWebber and its affiliates, (b) knowledgeable with respect to the Plan in administrative matters and funding matters related thereto, and (c) able to make an informed decision concerning participation in the PACE Program.

10. After the selection of specific Portfolios by an Independent Fiduciary or a Directing Participant,[14] PMAS will continue to provide recommendations to such persons relating to asset allocations among the selected Portfolios. However, with respect to a Section 404(c) Plan in which at least three Portfolios may be selected by the Independent Fiduciary, PMAS's initial asset allocation recommendation to Directing Participants will be limited to the suggested Portfolios offered under the Plan. PMAS anticipates that it may also work with the Independent Fiduciary of a Section 404(c) Plan to assist the fiduciary in (a) identifying and drafting investment objectives, (b) selecting suitable investment categories or actual Portfolios to be offered to Directing Participants or (c) recommending appropriate long-term investment allocations to a Directing Participant, if this individual receives such advice.

An Independent Fiduciary or a Directing Participant will be permitted to change his or her investment allocation by specifying the new allocation in writing or by other means authorized by the Plan (e.g., by use of a kiosk). Although PaineWebber currently imposes no limitation on the frequency with which an Independent Fiduciary or a Directing Participant may change his or her prescribed asset allocation, PaineWebber reserves the right to impose reasonable limitations.

11. Depending on the arrangement negotiated with PMAS, PaineWebber will provide each Independent Fiduciary with the following information: (a) Written confirmations of each purchase and redemption of shares of a Portfolio; (b) daily telephone quotations of such Plan's account balance; (c) a monthly statement of account specifying the net asset value of a Plan's assets that are invested in such account; and (d) a quarterly, written investment performance monitoring report.

The monthly account statement will include, among other information: (a) cash flow and transaction activity during the month, including purchase, sale and exchange activity and dividends paid or reinvested; (b) unrealized gains or losses on Portfolio shares held; and (c) a summary of total earnings and capital returns on the Plan's PACE Program Portfolio for the month and year-to-date. The quarterly investment performance report will include, among other information, the following: (a) a record of the performance of the Plan's PACE Program portfolio for the quarter and since inception showing rates of return relative to comparative market indices (illustrated in a manner that reflects the effect of any fees for participation in the PACE Program actually incurred during the period)[15]; (b) an investment outlook summary containing market commentary; and (c) the Plan's actual PACE Program portfolio with a breakdown, in both dollars and percentages, of the holdings in each Portfolio. In addition, to the extent required by the arrangement negotiated with the Independent Fiduciary, the quarterly performance monitoring report will (a) contain an analysis and an evaluation of a Plan investor's account to assist the investor to ascertain whether the investment objectives are being met, and (b) recommend, from time to time, changes in Portfolio allocations. The quarterly performance monitoring report is described in the summary of the PACE Program contained in the Trust Prospectus.

With respect to a Section 404(c) Plan, the quarterly investment performance report transmitted to the Independent Fiduciary will include the following aggregate information relative to the Undisclosed Account as well as market commentary: (a) a record of the performance of the Plan's assets and rates of return as compared to several

[11] Subject to the supervision and direction of the Trustees, Mitchell Hutchins will provide to the Trust investment management evaluation services principally by performing initial review on prospective Sub-Advisers for each Portfolio and thereafter monitoring each Sub-Adviser's performance. In evaluating prospective Sub-Advisers, Mitchell Hutchins will consider, among other factors, each Sub-Adviser's level of expertise, consistency of performance and investment discipline or philosophy. Mitchell Hutchins will have the responsibility for communicating performance expectations and evaluations to the Sub-Advisers and ultimately recommending to the Trustees whether a Sub-Adviser's contract should be continued.

[12] The applicants wish to emphasize that the PACE Program can currently be provided to participants in Section 404(c) Plans on either an Undisclosed Account or a disclosed account (the Disclosed Account) basis (i.e., where the Independent Fiduciary opens a separate PACE Program account with PaineWebber for each Directing Participant). In this regard, the applicants note that PaineWebber presently offers the PACE Program on a Disclosed Account arrangement to IRAs and Keogh Plans. However, for other Section 404(c) Plans such as those that are covered under the provisions of section 401(k) of the Code, PaineWebber prefers not to establish Disclosed Accounts for individual participants because of servicing and other administrative matters typically undertaken by such Plans' Recordkeepers. The applicants note that from the participant's perspective, there is no difference in the nature of the services provided under the PACE Program regardless of whether the participant's investment is held through a "Disclosed" or "Undisclosed" Account arrangement. The applicants state that these designations are primarily internal distinctions relating to whether the participant's name appears in the account set-up and reflects differences in the applicable sub-accounting functions.

Notwithstanding the above, the Department wishes to point out that, regardless of the arrangement negotiated with PaineWebber, an Independent Fiduciary of a Section 404(c) Plan has the responsibility to disseminate all information it receives to each Directing Participant investing in the PACE Program.

[13] The Department is expressing no opinion as to whether the information provided under the PACE Program is sufficient to enable a Directing Participant to exercise independent control over assets in his or her account as contemplated by section 404(c) of the Act.

[14] In the case of a Section 404(c) Plan, PMAS will receive electronically from the Recordkeeper each participant's investment selections.

[15] The comparative index is a blended index of the individual Portfolio indices that are weighted by the allocation percentages corresponding to those holdings that make up the investor's total investment in the PACE Program.

appropriate market indices (illustrated in a manner that reflects the effect of any fees for participation in the PACE Program actually incurred during the period); and (b) the Plan's actual investment portfolio with a breakdown of investments made in each Portfolio. As to each Directing Participant, PMAS will provide information to be contained in the quarterly performance monitoring report to such participants.

In addition, on both a quarterly and annual basis, commencing with the first quarterly report due after this notice of proposed exemption is issued, PaineWebber will provide, as applicable, an Independent Fiduciary or a Directing Participant with written disclosures of (a) the total, expressed in dollars, of each Portfolio's brokerage commissions that are paid to PaineWebber and its affiliates; (b) the total, expressed in dollars, of each Portfolio's brokerage commissions that are paid to unrelated brokerage firms; (c) the average brokerage commissions per share by the Trust to brokers affiliated with the PaineWebber, expressed as cents per share; and (d) the average brokerage commissions per share by the Trust to brokers unrelated to the PaineWebber and its affiliates, expressed as cents per share for any year in which brokerage commissions are paid to PaineWebber by the Trust Portfolios in which a Plan's assets are invested.

Further, the Independent Fiduciary or Directing Participant, as applicable, will have access to a PaineWebber Investment Executive for the discussion of the quarterly performance monitoring reports, the rebalancing feature described below in Representation 12 or any questions that may arise.

12. Depending on the arrangement negotiated with PMAS, for any investor who so directs PMAS, the investor's Trust holdings will be automatically rebalanced on a periodic basis to maintain the investor's designated allocation among the Portfolios. PMAS will receive no additional compensation to provide this service. At both the Independent Fiduciary and Directing Participant levels, the rebalancing election will be made in writing or in any manner permitted by the Plan (e.g., in the case of a Section 404(c) Plan, electronic transmission by the Recordkeeper to PMAS of the Directing Participant's election). The election will be accompanied by a disclosure that is designed to provide the Independent Fiduciary and the Directing Participant, as applicable, with an understanding of the rebalancing feature. Disclosure of the rebalancing feature is included in the Prospectus for the PACE Program which will be provided to each Independent Fiduciary and Directing Participant.

It is currently anticipated that screening will be performed quarterly with respect to the PACE Program accounts for which the investor has elected the rebalancing service and that rebalancing will be performed for each such account where any Portfolio allocation deviates from the allocation prescribed by the investor by the agreed-upon uniform threshold.[16] The threshold for triggering rebalancing is a percentage (presently, 2½ percent) that has been established by PaineWebber and is applied uniformly to all accounts subject to rebalancing. If PaineWebber were, in the future, to determine that this uniform threshold should be changed, PMAS would notify all investors (including Independent Fiduciaries and Directing Participants) who had elected the rebalancing feature. Then, in order to continue to provide this service, PMAS would need to obtain the consent of each such investor.

The applicants note that rebalancing is a feature that an investor chooses to apply indefinitely until the investor notifies PaineWebber that it wishes to have this service discontinued. After rebalancing has been discontinued, an investor may reactivate the rebalancing service by notifying PaineWebber in writing.

13. PaineWebber notes that not all of the services described above will be provided to every Plan. The services that will be provided will depend on what is decided upon by the Independent Fiduciary. Assuming the Independent Fiduciary requests a reduction in the level of services, there will be no corresponding reduction in the fee that the fiduciary pays PMAS. This is due to the bundled nature of the services provided in the PACE Program. For example, if the Independent Fiduciary were to limit the number of Portfolios available as investment options for its Plan participants, this might be deemed a reduction in the services available under the PACE Program that would not result in any reduction in the applicable Program fee. Similarly, under the PACE Program, an Independent Fiduciary of a Section 404(c) Plan may decide for its own reasons not to make the automatic rebalancing service available to Directing Participants. Under such circumstances, PMAS will not reduce its fees to reflect the absence of the provision of rebalancing services to the Plan. Further, under the particular arrangement which it has negotiated with PMAS, the Independent Fiduciary may or may not request PaineWebber Investment Executives to make presentations or be available to meet with Directing Participants.

Thus, an Independent Fiduciary may choose all, some or none of the PACE Program's optional services. If an Independent Fiduciary selects all of these services, the Plan will incur no greater an annual fee than had that Independent Fiduciary selected some or none of these services. The absence of a reduction in fees in the event not all services are requested is an issue that should be considered by the Independent Fiduciary.[17] Nonetheless, the Applicants represent that the reduction in the types of services provided will not cause the fees paid to PaineWebber by a Plan under the PACE Program to violate section 408(b)(2) of the Act.

14. Plans wishing to redeem their Trust shares may communicate their requests in writing or by telephone to PMAS. Redemption requests received in proper form prior to the close of trading on the NYSE will be effected at the net asset value per share determined on that day. Redemption requests received after the close of regular trading on the NYSE will be effected at the net asset value at the close of business of the next day, except on weekends or holidays when the NYSE is closed. A Portfolio will be required to transmit redemption proceeds for credit to an investor's account with PaineWebber within 5 business days after receipt of the redemption request.[18] In the case of an IRA or Keogh Plan investor, PaineWebber will not hold redemption proceeds as free credit balances and will, in the absence of receiving investment instructions, place all such assets in a money market fund (other than the PACE Money Market Investments Portfolio) that may be affiliated with PaineWebber.[19] In the case of Plans that are covered by Title I of the Act, the redemption proceeds will be invested by PaineWebber in accordance with the investment directions of the Independent Fiduciary responsible for the management of the Plan's assets. With respect to a Section 404(c) Plan, the treatment of such investment will depend upon the arrangement for participant investment instructions selected by the Plan sponsor. In the event that the Independent Fiduciary does not give other investment directions, such assets will be swept into a no-load money market fund that may be affiliated with PaineWebber. No brokerage charge or commission is charged to the participant for this service.

Due to the high costs of maintaining small PACE Program (Plan) accounts, the Trust may redeem all Trust shares held in a PACE Program account in which the Trust shares have a current value of $7,500 or less after the investor has been given at least thirty days in which to purchase additional Trust shares to increase the value of the account to more than the $7,500 amount. Proceeds of an involuntary redemption will be deposited in the investor's brokerage account unless PaineWebber is otherwise instructed.[20]

15. Through the PACE Program, shares of a Portfolio may be exchanged by an investor for shares of another Portfolio at their respective net asset values and without the payment of an exchange fee. However, Portfolio shares are not exchangeable with shares of other PaineWebber group of funds or portfolio families.

With respect to brokerage transactions that are entered into under the PACE Program for a Portfolio, such transactions may be executed through PaineWebber and other affiliated broker-dealers, if in the judgment of Mitchell Hutchins or the Sub-Adviser, as applicable, the use of such broker-dealer is likely to result in price and execution at least as favorable, and at a commission charge comparable to those of other qualified broker-dealers.

16. Each Portfolio will bear its own expenses, which generally include all costs that are not specifically borne by PaineWebber, Mitchell Hutchins or the Sub-Advisers. Included among a Portfolio's expenses will be costs incurred in connection with the Portfolio's organization, investment management and administration fees, fees for necessary professional and brokerage services, fees for any pricing service, the costs of regulatory compliance and costs associated with maintaining the Trust's legal existence and shareholder relations. No Portfolio, however, will impose sales charges on purchases, reinvested dividends, deferred sales charges, redemption fees; nor will any Portfolio incur distribution expenses. Investment management fees payable to Mitchell Hutchins and the Sub-Advisers will be disclosed in the Trust Prospectus.

17. As to each Plan, the total fees that are paid to PMAS and its affiliates will constitute no more than reasonable compensation.[21] In this regard, for its services under the PACE Program, PMAS charges an investor a quarterly fee for asset allocation and related services. This "outside fee," will not be more than 1.50 percent on an annual basis of the maximum annual value of the assets in the investor's PACE Program account. Such fee may be paid either from the assets in the account or by separate check. A smaller outside fee may be charged depending on such factors as the size of the PACE Program account (e.g., PACE Program accounts in excess of $100,000), the number of Plan participants or the number of PACE Program accounts. The outside fee is charged directly to an investor and is neither affected by the allocation of assets among the Portfolios nor by whether an investor follows or ignores PMAS's advice.[22] In the case of Plans, the outside fee may be paid by the Plan or the Plan sponsor or, in the case of IRAs only, the fee may be paid by the IRA owner directly.

For Plan investors, the outside fee will be payable in full within five business days (or such other period as may be required under applicable law or regulation) after the trade date for the initial investment in the Portfolios and will be based on the value of assets in the PACE Program on the trade date of the initial investment. The initial fee payment will cover the period from the initial investment trade date through the last calendar day of the subsequent calendar quarter, and the fee will be pro-rated accordingly. Thereafter, the quarterly fee will cover the period from the first calendar day through the last calendar day of the current calendar quarter. The quarterly fee will be based on the value of assets in the PACE Program measured as of the last calendar day of the previous quarter, and will be payable on the fifth business day of the current quarter.

If additional funds are invested in the Portfolios during any quarter, the applicable fee, pro-rated for the number of calendar days then remaining in the quarter and covering the amount of such additional funds, shall be charged and be payable five business days later. In the case of redemptions during a quarter, the fee shall be reduced accordingly, pro-rated for the number of calendar days then remaining in the quarter. If the 'net fee increase or decrease to an investor for additional purchases and/or redemptions during any one quarter is less than $20, the fee increase or decrease will be waived.

In addition, for investment management and administrative services provided to the Trust, Mitchell Hutchins will be paid, from each Portfolio, a fee which is computed daily and paid monthly at an annual rate ranging from .35 percent to 1.10 percent,

[16] Currently, with regard to investors who have elected the rebalancing feature, rebalancing is effected by an automated, mechanical system that, as to each account: (a) Calculates the current allocation for each Portfolio based on the quarter-end net asset value; (b) compares the current allocation for each Portfolio with the allocation prescribed by the investor; (c) identifies for rebalancing all accounts with one or more Portfolios whose current allocation deviates by the agreed-upon threshold from the allocation prescribed by the investor; and (d) for each account which has been identified for rebalancing pursuant to (a)–(c), (1) calculates the dollar difference between the current allocation and the allocation prescribed by the investor, (2) reduces each Portfolio whose current allocation exceeds the allocation prescribed by the investor by an amount equal to the dollar difference between the two allocations, and (3) increases each Portfolio whose current allocation is less than the allocation prescribed by the investor by an amount equal to the dollar difference between the two allocations. This rebalancing is accomplished by automatically exchanging, in the order of the Portfolio's respective CUSIP numbers, a dollar-equivalent number of shares of each Portfolio to be reduced for the corresponding number of shares of a Portfolio to be increased until the current allocation is equal to the allocation prescribed by the investor. Valuation of the Portfolios is done as of the close of regular trading on the NYSE each business day.

[17] In this regard, the Department emphasizes that it expects the Independent Fiduciary to consider prudently the relationship of the fees to be paid by the Plan to the level of services to be provided by PaineWebber. In response to the Department's concern over this matter, PaineWebber represents that it will amend the Trust Prospectus to include the following statement: "Investors who are fiduciaries or otherwise, in the process of making investment decisions with respect to Plans, should consider, in a prudent manner, the relationship of the fees to be paid by the Plan along with the level of services provided by PaineWebber."

[18] PaineWebber will provide clearance (on a fully disclosed basis), settlement and other back office services to other broker-dealers.

[19] The applicants are not requesting, nor is the Department proposing, exemptive relief with respect to the investment, by PaineWebber, of redemption proceeds in an affiliated money market fund where the Plan investor has not given investment instructions. The applicants represent that to the extent PaineWebber is considered a fiduciary, such investments will comply with the terms and conditions of PTE 77–4. However, the Department expresses no opinion herein on whether such transactions are covered by this class exemption.

[20] The thirty day limit does not restrict a Plan's ability to redeem its interest in the Trust. The thirty day notice period is provided to give a Plan an opportunity to increase the value of the assets in its Plan account with PaineWebber to an amount in excess of $7,500. If desired, the Plan may still follow the redemption guidelines described above.

[21] The applicants represent that PMAS and its affiliates will not receive 12b–1 Fees in connection with the transactions.

[22] PaineWebber represents that the outside fee will not be imposed on the accounts of the Paine Webber Group and its subsidiaries, including PaineWebber, PMAS, Mitchell Hutchins or their subsidiaries, accounts of their immediate families and IRAs and certain employee pension benefit plans for these persons. The applicants state that this fee will be waived to encourage employees to invest in PaineWebber, although PaineWebber reserves the right to impose such fees. However, with respect to IRAs or Plans maintained by PaineWebber or its affiliates for their employees, the applicants assert that such waiver would be required by PTE 77–3.

of which the management fee component ranges from .15 percent to .90 percent on an annual basis, of each Portfolio's average daily net assets depending upon the Portfolio's objective.[23] From these management fees, Mitchell Hutchins will compensate the applicable Sub-Adviser. This "inside fee," which is the difference between the individual Portfolio's total management fee and the fee paid by Mitchell Hutchins to the Sub-Adviser, will vary from the annual rate of .15 percent to .40 percent depending on the Portfolio. With the exception of the PACE Money Market Investments Portfolio from which Mitchell Hutchins is paid a management fee of 15 basis points, Mitchell Hutchins is retaining 20 basis points as a management fee from each remaining single Portfolio on investment assets attributable to the Plans. Pursuant to Transfer Agency and Service Agreements with the Trust, PFPC and State Street will be paid annual fees of $350,000 and $650,000, respectively, for transfer agent and custodial services.

18. The management fees that are paid at the Portfolio level to Mitchell Hutchins and the Sub-Advisers are set forth in the following table. For purposes of the table, Mitchell Hutchins and a Sub-Adviser are referred to as "MH" and "SA," respectively. As noted in the table, the sum of the management fees retained by Mitchell Hutchins and the Sub-Adviser with respect to a Portfolio will equal the total management fee paid by that Portfolio.

Portfolio	MH management fee (percent)	SA retained fee (percent)	MH retained fee (percent)
PACE Money Market Investments	.15	.00	.15
PACE Government Securities Fixed Income Investments	.50	.25	.25
PACE Intermediate Fixed Income Investments	.40	.20	.20
PACE Strategic Fixed Income Investments	.50	.25	.25
PACE Municipal Fixed Income Investments	.40	.20	.20
PACE Global Fixed Income Investments	.60	.35	.25
PACE Large Company Value Equity Investments	.60	.30	.30
PACE Large Company Growth Equity Investments	.60	.30	.30
PACE Small/Medium Company Value Equity Investments	.60	.30	.30
PACE Small/Medium Company Growth Equity Investments	.60	.30	.30
PACE International Equity Investments	.70	.40	.30
PACE International Emerging Markets Investments	.90	.50	.40

PMAS is offsetting, quarterly, against the outside fee such amounts as is necessary to ensure that Mitchell Hutchins retains no more than 20 basis points as a management fee from any Portfolio on investment assets attributable to any Plan.[24]

The administrative services fee payable to Mitchell Hutchins is not being offset against the outside fee. Instead, that fee is being retained by Mitchell Hutchins.

19. The following example demonstrates the operation of the fee offset mechanism, the calculation of the net inside fee, and the calculation of the total of a Plan investor's net outside fee and share of the investment management fees paid by the Portfolios in a given calendar quarter or year:

Assume that as of September 30, 1995, the net asset value of Trust Portfolio shares held by a Plan investor was $1,000. Investment assets attributable to the Plan were distributed among five Trust Portfolios: (1) PACE Money Market Investments in which the Plan made a $50 investment and from which Mitchell Hutchins would retain an inside fee of .15 percent; (2) PACE Intermediate Fixed Income Investments in which the Plan made a $200 investment and from which Mitchell Hutchins would retain an inside fee of .20 percent; (3) PACE Large Company Value Equity Investments in which the Plan made a $250 investment and Mitchell Hutchins would retain an inside fee of .30 percent; (4) PACE Small/Medium Company Growth Equity Investments in which the Plan made a $250 investment and Mitchell Hutchins would be entitled to receive an inside fee of .30 percent; and (5) PACE International Equity Investments in which the Plan made a $250 investment and Mitchell Hutchins would be entitled to receive an inside fee of .30 percent.

Assume that the Plan investor pays an outside fee of 1.50 percent so that the total outside fee for the calendar quarter October 1 through December 31, prior to the fee offset, would be as follows:

Portfolio	Amount invested	Maximum outside quarterly fee	Outside quarterly fee
PACE Money Market Investments	$50	1.50% (.25)	$0.1875
PACE Intermediate Fixed Income Investments	200	1.50% (.25)	.7500
PACE Large Company Value Equity Investments	250	1.50% (.25)	.9375
PACE Small/Medium Company Growth Equity Investments	250	1.50% (.25)	.9375
PACE International Equity Investments	250	1.50% (.25)	.9375
Total Outside Fee Per Quarter	1,000	.....	3.7500

Under the proposed fee offset, the outside fee charged to the Plan must be reduced by a Reduction Factor to ensure that Mitchell Hutchins retains an inside fee of no more than 20 basis points from each of the Portfolios on investment assets attributable to the Plan. The following table shows the Reduction Factor as applied to each of the Portfolios comprising the Trust:

Portfolio	MH retained fee (percent)	Maximum MH fee (percent)	Reduction factor (percent)
PACE Money Market Investments	.15	.15	.00
PACE Government Securities Fixed Income Investments	.25	.20	.05
PACE Intermediate Fixed Income Investments	.20	.20	.00
PACE Strategic Fixed Income Investments	.25	.20	.05
PACE Municipal Fixed Income Investments	.20	.20	.00
PACE Global Fixed Income Investments	.25	.20	.05
PACE Large Company Value Equity Investments	.30	.20	.10
PACE Large Company Growth Equity Investments	.30	.20	.10
PACE Small/Medium Company Value Equity Investments	.30	.20	.10
PACE Small/Medium Company Growth Equity Investments	.30	.20	.10
PACE International Equity Investments	.30	.20	.10
PACE International Emerging Markets Investments	.40	.20	.20

Under the proposed fee offset, a Reduction Factor of .10 percent is applied against the quarterly outside fee with respect to the value of Plan assets that have been invested in PACE Large Company Value Equity Investments, PACE Small/Medium Company Growth Equity Investments and PACE International Equity Investments. As noted above, the PACE Money Market Investments Portfolio and the PACE Intermediate Fixed Income Investments Portfolio do not require the application of a Reduction Factor because the management fee retained by Mitchell Hutchins for managing these Portfolios does not exceed 20 basis points. Therefore, the quarterly offset for the plan investor is computed as follows:

(.25) [($250).10% + ($250).10% + ($250).10%] = $0.1875 or $.19.

In the foregoing example, if the Plan investor elects to receive an invoice directly, the Plan investor would be mailed a statement for its PACE Program account on or about October 15, 1995. This statement would show the outside fee to be charged for the calendar quarter October 1 through December 31, as adjusted by subtracting the quarterly offset from the quarterly outside fee as determined above. The net quarterly outside fee that would be paid to PMAS would be determined as follows:

$3.75 − $.19 = $3.56.

The Plan investor that elects to receive an invoice directly would be asked to pay the outside fee for that quarter within 30 days of the date on which the statement was mailed (e.g., November 15, 1995). If the outside fee were not paid by that date, PMAS would debit the account of the Plan investor (as with other investors) for the amount of the outside fee (pursuant to the authorization contained in the PACE Program Investment Advisory Agreement, and as described in the PACE Program Description appended to the Prospectus).[25] A Plan investor that elects to have the outside fee debited from its account would receive, in November, a statement as of October 31 reflecting the outside fee and the quarterly offset therefrom.

Assuming the Plan investor's investment in and allocation among the Portfolios remains constant throughout the quarter, (a) the Plan investor's fees for the quarter for asset allocation and related services provided by PMAS (net outside fee) and (b) the fees paid by the Portfolios for investment management services provided by Mitchell Hutchins (inside fee) would be as follows:

$3.56 (net outside fee)+(.25) [($50+$200+$250+$250+$250).20%] (administrative services fee)+(.25) [($50).15% + ($200).20% + ($250 + $250 + $250).30%] (inside fee) = $4.74.

Assuming the Plan investor's investment in and allocation among the Portfolios remains constant throughout the year, the total net outside fee and inside fee borne by the Plan investor for the year would be as follows:

4[($4.74) = $18.96 or 1.89% per $1,000 invested.

20. PaineWebber notes that a potential conflict may exist by reason of the variance in retained inside fees between the different Portfolios. For example, Mitchell Hutchins will retain a lower inside fee with respect to assets invested in the PACE Money Market Investments Portfolio than all other Portfolios. PaineWebber recognizes that this factor could result in the recommendation of a higher fee-generating Portfolio to an investing Plan. Nonetheless, PMAS will be subject to and intends to comply fully with the standards of fiduciary duty that require that it act solely in the best interest of the Plan when making investment recommendations.

21. The books of the Trust will be audited annually by independent, certified public accountants selected by the Trustees and approved by the investors. All investors will receive copies of an audited financial report no later than sixty days after the close of each Trust fiscal year. All Trust financial statements will be prepared in accordance with generally accepted accounting principles and relevant provisions of the federal securities laws. The books and financial records of the Trust will be open for inspection by any investor, including the Department, the Service and SEC, at all times during regular business hours.

22. In summary, it is represented that the transactions will satisfy the statutory criteria for an exemption under section 408(a) of the Act because:

(a) The investment of a Plan's assets in the PACE Program will be made and approved by a Plan fiduciary or participant that is independent of PaineWebber and its affiliates such that the Independent Fiduciary or Directing Participant will maintain complete discretion with respect to participating in the PACE Program.

(b) An Independent Fiduciary or Directing Participant will have full discretion to redeem his or her shares in the Trust.

(c) No Plan will pay a fee or commission by reason of the acquisition or redemption of shares in the Trust and PMAS nor will its affiliates receive 12b-1 Fees in connection with the transactions.

(d) Prior to making an investment in the PACE Program, each Independent Fiduciary or Directing Participant will receive offering materials and disclosures from PMAS which disclose all material facts concerning the purpose, fees, structure, operation, risks and participation in the PACE Program.

(e) PMAS will provide written documentation to an Independent Fiduciary or Directing Participant of its

[23] The fees payable to Mitchell Hutchins under its investment management and administration agreement with the Trust are comprised of two components. One component is for administrative services provided to each Portfolio at the annual rate of .20 percent of each Portfolio's net assets. The second component is for investment management and related services provided to each Portfolio. The annualized fee range here is from .15 percent to .90 percent of the Portfolio's average daily net assets.

[24] PaineWebber asserts that it chose 20 basis points as the maximum net fee retained for management services rendered to the Portfolios because this amount represents the lowest percentage management fee charged by PaineWebber among the Portfolios (excluding the PACE Money Market Investments Portfolio for which a fee of 15 basis points will be charged).

[25] PaineWebber explains that the foregoing example illustrates the fact that Plan investors will get the benefit of the fee offset contemporaneously upon the payment of the outside fee. Because the inside fee is paid monthly and the fee offset is computed quarterly, the applicants also explain that PMAS does not receive the benefit of a "float" as a result of such calculations because the fee offset will always be realized no later than the time that the outside fee is paid. Since the inside fee is paid at the end of each calendar month, the applicants further explain that Plan investors will realize the full benefit of the offset before the time that the inside fee is paid for the second and third months of the calendar quarter.

recommendations or evaluations based upon objective criteria.

(f) With the exception of Mitchell Hutchins which will manage the PACE Money Market Investments Portfolio, any Sub- Adviser appointed to exercise investment discretion over a Portfolio will always be independent of PaineWebber and its and its affiliates.

(g) The quarterly investment advisory fee that is paid by a Plan to PMAS for investment advisory services rendered to such Plan will be offset by such amount as is necessary to assure that Mitchell Hutchins retains 20 basis points from any Portfolio (with the exception of the PACE Money Market Investments Portfolio) on investment assets attributable to the Plan investor. However, the quarterly fee paid to Mitchell Hutchins for administrative services will be retained by Mitchell Hutchins and will not be offset against the outside fee.

(h) Each participating Plan will receive copies of the Trust's semi-annual and annual report which will include financial statements for the Trust that have been prepared by independent, certified public accountants and investment management fees paid by each Portfolio.

(i) On a quarterly and annual basis, PaineWebber will provide written disclosures to an Independent Fiduciary or, if applicable, Directing Participant, with respect to (1) the total, expressed in dollars, of each Portfolio's brokerage commissions that are paid to PaineWebber and its affiliates; (2) the total, expressed in dollars, of each Portfolio's brokerage commissions that are paid to unrelated brokerage firms; (3) the average brokerage commissions per share by the Trust to brokers affiliated with the PaineWebber, expressed as cents per share; and (4) the average brokerage commissions per share by the Trust to brokers unrelated to the PaineWebber and its affiliates, expressed as cents per share for any year in which brokerage commissions are paid to PaineWebber by the Trust Portfolios in which a Plan's assets are invested.

Herzog, Heine, Geduld, Inc., Located in New York, New York

[Application No. D–10018]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code by reason of section 4975(c)(1)(A) through (D) of the Code, shall not apply to the extension of credit between Herzog, Heine, Geduld, Inc. (HHG) and various individual retirement accounts for which HHG serves as passive trustee or custodian (the HHG IRA or HHG IRAs) resulting from the proposed in-kind transfer to HHG IRAs at the direction of the owners of such HHG IRAs of certain senior subordinated notes (the Notes) issued by HHG, and thereafter the holding of such Notes by the HHG IRAs; provided that: (1) officers, directors, and employees in HHG who are also owners of HHG IRAs do not participate in the proposed transactions; (2) the owners of the HHG IRAs have exclusive responsibility and control over the investment of the assets of such accounts; (3) HHG has no discretionary authority or control with respect to the investment of the assets of the HHG IRAs involved in the proposed transactions, nor does HHG render investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets; (4) a separate accounting of the assets in the HHG IRAs, including the Notes which have been acquired by such accounts, will be maintained by HHG; (5) the value of the Notes in each HHG IRA will at no time exceed 25 percent (25%) of the value of the assets of each HHG IRA; (6) the HHG IRAs will pay no fees or commissions in connection with the transactions; and (7) the combined total of all fees received by HHG for the provision of services to the HHG IRAs is not in excess of "reasonable compensation" within the meaning of section 4975(d)(2) of the Code.[26]

Summary of Facts and Representations

1. HHG is a full service broker/dealer, registered with the Securities and Exchange Commission under the Securities Exchange Act of 1934. HHG also provides fully disclosed clearing services to other broker/dealers. HHG is a member of the New York Stock Exchange (NYSE) and is a leading market maker in NASDAQ and over-the-counter securities. As of September 29, 1995, HHG had total liabilities of $746.1 million, shareholders' equity of $107.5 million and $31.9 million in liabilities subordinated to the claims of general creditors.

2. It is represented that HHG has for many years offered individual retirement accounts to its customers. In this regard, HHG has been approved, since February 11, 1982, by the Internal Revenue Service to serve as a passive trustee or custodian for individual retirement accounts, Keoghs, and custodial accounts established under section 403(b)(7) of the Code. In its capacity as a custodian, HHG is a disqualified person with respect to the HHG IRAs, pursuant to section 4975(e)(2) of the Code.

It is represented that HHG has considerable experience in dealing with individual retirement accounts that contain investments of all types, including debt instruments. As of January 25, 1995, HHG maintained approximately 8,000 individual retirement accounts for its customers representing approximately $365 million dollars in assets.

3. In 1992 and 1993, HHG issued the Notes which are the subject of this proposed exemption in minimum face amounts on each of the Notes of $250,000. The Notes issued in 1992 pay interest quarterly at the annual rate of 11 percent (11%) on an aggregate principal amount of $7,500,000. The Notes issued in 1993 pay interest quarterly at the annual rate of 10 percent (10%) on an aggregate principal amount of $7,500,000. It is represented, as of February 19, 1996, that HHG had made all interest payments to the holders of the Notes. The Notes were issued for a term of five (5) years each. In this regard, the maturity date for the Notes issued in 1992 is January 1, 1997, and the maturity date for the Notes issued in 1993, is April 1, 1998. The Notes will pay principal in a balloon payment at maturity. The Notes are described as Senior Subordinated Notes of HHG. In this regard, the Notes are unsecured, rank equally with all other outstanding subordinated debt of HHG, and are subordinate to any senior claim of present or future creditors of HHG. A senior claim is defined as any present or future obligation of HHG, except those obligations which are the subject of subordination agreements.

The Notes were only offered for sale to investors who met the "accredited investor" net worth and income standards described in Regulation D, promulgated under the Securities Act of 1933.[27] It is represented that the Notes were acquired by all investors at face value, and were purchased in the same manner and on the same terms by all investors. It is represented that potential investors in the Notes received certain disclosures prior to making the investment. Such disclosures included, among other things, an outline of the nature of the Notes, a description of the risk factors involved in investing in the Notes, and detailed financial disclosures about HHG. It is represented that each investor acknowledged receipt of these disclosures in writing. In addition, it is represented that prior to acquiring the Notes, each purchaser certified in writing that the "accredited investor" net worth and income standards had been satisfied.

It is represented that the entirety of the Notes has been issued and are being held by individual investors and by individual retirement accounts unrelated to HHG. In this regard, approximately 90 percent (90%) of the Notes were sold to customers other than owners of individual retirement accounts, and at least 50 percent (50%) of the Notes are held by persons independent of HHG and/or the HHG IRAs.

There is no public trading market for the Notes. The Notes are not registered under the Securities Act of 1933, because the Notes are issued to "accredited investors;" and therefore, are exempt from registration, pursuant to an exemption described in section 4(2) and/or section 3(b) of the Securities Act of 1933 and by Regulation D. The Notes may not be sold or transferred, except in a transaction exempt from the registration requirements of federal and state securities laws. In addition, the Notes may not be sold or transferred, unless HHG is furnished with a satisfactory opinion of counsel to the effect that an exemption from the registration requirements of federal and state securities laws is available. Further, any proposed sale to another member of the NYSE is subject to a right of first refusal by HHG.

4. In 1992 and 1993 when the Notes were issued, HHG offered them for purchase by certain of its customers. However, the owners of HHG IRAs who met the "accredited investor" standards were not permitted to acquire the Notes, because HHG believed that prohibited transactions would arise, if the owners of such accounts were to direct HHG, the custodian of such HHG IRAs, to purchase the Notes on behalf of the HHG IRAs with funds from such HHG IRAs. Instead, HHG suggested that the owners of HHG IRAs who were interested in purchasing the Notes for their accounts set up other individual retirement accounts with other custodians or trustees (the Non-HHG IRAs or the Non-HHG IRA) and then arrange for these Non-HHG IRAs to purchase the Notes. Accordingly, it is represented that some owners of HHG IRAs transferred funds from their HHG IRAs into Non-HHG IRAs at other brokerage firms or banks and directed the trustees or custodians of such Non-HHG IRAs to purchase the Notes.[28]

HHG believes that the HHG IRAs which transferred funds from their HHG IRAs to Non-HHG IRAS in order to purchase the Notes contained assets with an aggregate fair market value of $4,400,000. It is estimated that for the average owner of a Non-HHG IRA the Notes constituted less than 30 percent (30%) of the total assets of such owner's account.

5. HHG seeks to permit the acquisition and holding of the Notes by the HHG IRAs. In order to accomplish this goal, the owners of the Non-HHG IRAs would transfer assets that include the Notes from the Non-HHG IRAs into the HHG IRAs. It is anticipated that the Notes would be transferred in kind at the direction of the owners of the Non-HHG IRAs from the current trustee of the Non-HHG IRAs to HHG. It is represented that such transfers will be direct custodian to custodian transfers. In this regard, each holder of a Non-HHG IRA who wishes to transfer the assets in such account to the custodianship of HHG will complete and sign a customer account transfer form, and direct that the assets be transferred in kind from the former custodian of the Non-HHG IRA to HHG.

6. HHG believes the transactions described in the paragraph above may be prohibited, pursuant to section 4975(c) of the Code in that such transactions may result in a direct or indirect lending of money or other extension of credit between a plan and a disqualified person with respect to such plan. Accordingly, HHG seeks exemptive relief from the prohibited transaction provisions, as set forth in section 4975(c)(1) (A) through (D) of the Code.

7. It is represented that the proposed transactions would be in the interest of the affected HHG IRAs, in that owners of the HHG IRAs would not need, solely for the purpose of acquiring and holding the Notes, to incur the additional custodial fees and other expenses related to maintaining the Non-HHG IRAs. In this regard, it is represented that HHG charges for an HHG IRA a custodial fee of $25 annually,[29] which HHG maintains is considerable less than the amount charged by trustees or custodians of the Non-HHG IRAs which currently hold the Notes.

8. It is represented that the proposed transactions would be protective of the rights of participants in the HHG IRAs and their beneficiaries, in that the percentage of the assets of the HHG IRAs involved in the Notes will at no time exceed 25 percent (25%) of the value of the assets of such accounts.

Further, it is represented that HHG has no discretion to direct any investment of any HHG IRA which will be involved in the proposed transactions. Under the terms of the HHG IRAs, the owners of such accounts, as fiduciaries, have exclusive responsibility for and control over the investment of the assets of such accounts. In this regard, it is represented that the owners of the Non-HHG IRAs which purchased the Notes are sophisticated investors who, in most cases, are long standing customers of HHG and are familiar with the firm. It is represented that the owners of the Non-HHG IRAs made the original decision to purchase the Notes with the assets in the Non-HHG IRAs, and, if the proposed exemption is granted, the same individuals who are also the owners of the HHG IRAs will make the decision to transfer all or a portion of the assets in the Non-HHG IRA, including the Notes, into an HHG IRA. It is estimated, as of the date of the application, that eleven (11) participants and beneficiaries may be affected by the requested exemption, as they may be

[26] Pursuant to 29 CFR 2510.3–2(d), the HHG IRAs are not within the jurisdiction of Title I of the Act. However, there is jurisdiction under Title II of the Act, pursuant to section 4975 of the Code.

[27] In general, the "accredited investor" net worth and income standards described in Regulation D promulgated under the Securities Act of 1933 provide that an "accredited investor" is one of the following: (a) an individual with a net worth (or joint net worth with a spouse) in excess of $1,000,000; (b) an individual who had an individual income in excess of $200,000 in each of the two most recent years or joint income with that person's spouse in excess of $300,000 in each of those years, and has a reasonable expectation of reaching the same income level in the current year; or (c) a trust with total assets in excess of $5,000,000.

[28] The Department expresses no opinion herein, as to whether the prohibited transactions provisions, as set forth in section 4975 of the Code, have been violated in connection with the purchase of the Notes by the Non-HHG IRAs at the direction of the owners of such accounts who are also officers, directors, or employees of HHG and the subsequent holding of the Notes in such Non-HHG IRAs by trustees or custodians other than HHG. The Department notes that the proposed relief is limited to the transactions described herein, and no relief has been provided in connection with the acquisition and holding of the Notes by the Non-HHG IRAs.

[29] The Department, herein, expresses no opinion as to whether the provision of services by HHG to the HHG IRAs and the compensation received therefor satisfies the terms and conditions of the statutory exemption, as set forth in section 4975(d)(2) of the Code. To the extent that such provision of services to the HHG IRAs by HHG does not satisfy the requirements of section 4975(d)(2) of the Code, the Department, herein, is offering no relief.

given the opportunity to transfer Notes from Non-HHG IRAs to HHG IRAs, but will not be obligated to make such a transfer. Of these eleven (11), two individuals are officers of HHG who are employed in the securities trading department of HHG. Under the terms of this proposed exemption, officers, directors and employees of HHG who are also owners of HHG IRAs will not be permitted to participate in the proposed transactions.

9. It is represented that the requested exemption is administratively feasible in that HHG already maintains an individual retirement program, is approved by the IRS to serve as a custodian for individual retirement accounts, and has experience dealing with such accounts. HHG believes that the owners of HHG IRAs would prefer to hold their investments in the Notes in HHG IRA custodial accounts, because it would be less expensive and would be administratively less awkward for both HHG and the owners of the HHG IRAs. In this regard, it is represented that HHG will maintain a separate accounting of all of the holdings in the HHG IRAs, including the Notes that may be acquired, for each owner of an HHG IRA. Further, it is represented that the HHG IRAs will not pay commissions as a result of the transfer of the Notes into the custodianship of HHG.

10. In summary, HHG, the applicant, represents that the proposed transactions meet the statutory criteria of section 4975(c)(2) of the Code because:

(a) officers, directors, or employees in HHG who are also owners of HHG IRAs will not be permitted to participate in the proposed transactions;

(b) the owners of the HHG IRAs have exclusive responsibility and control over the investment of the assets of such accounts;

(c) HHG has no discretionary authority or control with respect to the investment of the assets of the HHG IRAs to be involved in the proposed transaction, nor does HHG render investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets;

(d) a separate accounting of the assets in the HHG IRAs, including the Notes which have been acquired by such accounts, will be maintained by HHG;

(e) the percentage of the assets of the HHG IRAs involved in the Notes will at no time exceed 25 percent (25%) of the value of the assets of such accounts;

(f) the HHG IRAs will pay no fees or commissions in connection with the transactions;

(g) the combined total of all fees received by HHG for the provision of services to the HHG IRAs are not in excess of "reasonable compensation" within the meaning of section 4975(d)(2) of the Code; and

(h) the owners of the HHG IRAs will avoid the administrative burden and expense of maintaining the Non-HHG IRAs.

FOR FURTHER INFORMATION CONTACT: Angelena C. Le Blanc of the Department (202) 219–8883. (This is not a toll-free number.)

Pierre W. Mornell, M.D., A Sole Proprietorship, Defined Benefit Plan (the Plan) Located in Mill Valley, California

[Application No. D–10170]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 C.F.R. Part 2570, Subpart B (55 F.R. 32836, 32847, August 10, 1990). If the exemption is granted the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the proposed sale of certain unimproved real property located in Mill Valley, California (the Property) by the Plan to Pierre W. Mornell and Linda C. Mornell, parties in interest with respect to the Plan; provided that the following conditions are satisfied:

(A) All terms and conditions of the transaction are no less favorable to the Plan than those which the Plan could obtain in an arm's-length transaction with an unrelated party;

(B) The Plan receives a cash purchase price for the Property in the amount of the fair market value of the Property; and

(C) The Plan does not incur any expenses or suffer any loss with respect to the transaction.

Summary of Facts and Representations

1. The Plan is a defined benefit pension plan with one participant and total assets of $287,585 as of November 1, 1995. The Plan is sponsored by the medical practice of Pierre W. Mornell, M.D. (Dr. Mornell), which is a sole proprietorship (the Employer) located in Mill Valley, California. The Plan's sole participant is Dr. Mornell, who also serves as the Plan's trustee and administrator.[30]

2. The Property is a vacant parcel of 3,420 square feet of land located in Mill Valley, California at 19 Park Avenue, zoned for multi-family residential development. Dr. Mornell represents that the Property was purchased by the Plan in 1989 from parties unrelated to himself, his medical practice, and his spouse, and that the terms and conditions of that transaction were negotiated at arm's length with the sellers. The Plan paid a purchase price of $225,000, of which $90,000 was represented by a five-year promissory note (the Note) payable to the seller, secured by a first deed of trust on the Property, due on or before August 1, 1994. Dr. Mornell represents that the Note was timely paid in full by the Plan.

3. Dr. Mornell represents that as Plan trustee he caused the Plan to purchase the Property in 1989, and to invest a large percentage of the Plan's assets therein, for a variety of reasons, summarized as follows: During 1989, the value of real estate in the market in which the Property is situated was appreciating rapidly, and Dr. Mornell believed that the Property's value would continue to appreciate after purchase by the Plan. The Property is situated adjacent to a corner lot along a main thoroughfare in an affluent suburban community, and Dr. Mornell, as trustee, represents that he believed that the risk of a significant decline in the Property's value was small, due to these factors. Dr. Mornell notes that he was and is the sole participant in the Plan, and was aware that he would be the only person who would be adversely affected if the Property did not prove to be a favorable investment. Dr. Mornell represents that it had been his intention that the Property be developed by the construction of income-producing improvements thereon, but the value of the Property ceased to appreciate. Instead, Dr. Mornell represents that the Property's value commenced to decline before any improvements had been added to the Property, and the Property has never produced any income of any kind. Since the Property has proven to be an unfavorable investment, Dr. Mornell desires that the Plan divest of the Property and reinvest in other, more diversified assets with more potential for favorable return. Accordingly, Dr. Mornell and his spouse, Linda C. Mornell (together, the Mornells) propose to purchase the Property from the Plan and are requesting an exemption to permit this transaction under the terms and conditions described herein.

4. It is proposed that the Mornells will make a single cash payment to the Plan for the Property in the amount of no less than the fair market value of the Property, and in no event less than $215,000. The Property has been appraised by T.B. Combs (Combs), a professional real estate appraiser in Mill Valley, California. Combs represents that as of October 15, 1996, the Property had a fair market value of $215,000. The Plan will not incur any expenses related to the transaction. Dr. Mornell represents that the proposed transaction is in the best interests and protective of the Plan because it will enable the Plan to dispose of an non-income-producing asset and will receive a cash purchase price representing the Property's fair market value, which can be reinvested in more diverse assets with better prospects for favorable returns.

5. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 4975(c)(2) of the Code for the following reasons: (a) The Plan, in which Dr. Mornell is the sole participant, will receive cash for the Property for reinvestment in more diverse assets; (b) The purchase price will be the fair market value of the Property as determined by Combs' appraisal; (c) the Plan will not incur any expenses related to the proposed transaction; and (d) Dr. Mornell is the only participant affected by the transaction, and he desires that the transaction be consummated.

Notice to Interested Persons

Since Dr. Mornell is the only Plan participant to be affected by the proposed transaction, the Department has determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments and requests for a hearing are due within 30 days from the date of publication of this notice of proposed exemption in the **Federal Register**.

For Further Information Contact: Ronald Willett of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

Gail L. Belt Self Employed Retirement Plan (the Plan) Located in Vienna, Virginia

[Application No. D–10219]

Proposed Exemption

The Department is considering granting an exemption under the authority of section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990). If the exemption is granted, the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the proposed sale of a parcel of real property (the Property) by the Plan to Ms. Gail L. Belt, a disqualified person with respect to the Plan for $115,000, provided the following conditions are satisfied: a) the sale is a one-time transaction for cash; b) the Plan pays no commissions or expenses in connection with the transaction; c) the Plan receives not less than the greater of the fair market value of the Property or its cost in acquiring the Property; d) the fair market value of the Property has been determined by a qualified, independent appraiser; and e) Ms. Belt is the only Plan participant to be affected by the transaction, and she desires that the transaction be consummated.[31]

Summary of Facts and Representations

1. Ms. Belt is a self-employed real estate agent in Northern Virginia. Her primary business is facilitating the buying and selling of residential real estate. She is a realtor for Coldwell Banker, Stevens Realtors, located in Vienna, Virginia. Ms. Belt is the sole trustee and sole participant in the Plan, which is a defined contribution Plan with current assets of approximately $1,080,597.

2. In August, 1993, Ms. Belt, in her capacity as sole trustee for the Plan, acquired the Property as a Plan investment. The Property was purchased from Edward and Edith Schultz, parties unrelated to Ms. Belt and the Plan, for a purchase price of $110,000. The Property consists of an unimproved plot of land located at 1747 Lockerbie Lane, Vienna, Virginia.

3. The Plan now wishes to sell the Property to Ms. Belt. The applicant represents that the Property is not increasing in value in the current real estate market, and the Plan has ongoing administrative expenses for the Property. In addition, the Plan has been unable to procure liability insurance to cover any possible injuries on the site. Finally, the Plan would be disposing of an illiquid asset.

4. Mr. Douglas S. Waldron of Residential Appraisal Group, Inc., an independent licensed residential real estate appraiser in Annandale, Virginia, has appraised the Property as having a fair market value of $115,000 as of February 5, 1996. The applicant represents that Ms. Belt will pay this amount to the Plan since it exceeds the Plan's purchase price for the Property, plus expenses.

5. In summary, the applicant represents that the proposed transaction satisfies the criteria of section 4975(c)(2) of the Code because: a) the sale is a one-time transaction for cash; b) the Plan will pay no commissions or other expenses in connection with the transaction; c) the Plan will receive the greater of its acquisition price for the Property plus expenses, or the current fair market value of the Property as determined by a qualified, independent appraiser; and d) Ms. Belt is the sole participant in the Plan to be affected by the transaction, and she desires that the transaction be consummated.

Notice to Interested Persons

Since Ms. Belt is the only Plan participant to be affected by the proposed transaction, the Department has determined that there is no need to distribute the notice of proposed exemption to interested persons. Comments and requests for a hearing are due within 30 days from the date of publication of this notice of proposed exemption in the **Federal Register**.

For Further Information Contact: Gary H. Lefkowitz of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest of disqualified person from certain other provisions of the Act and/or the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(b) of the act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) Before an exemption may be granted under section 408(a) of the Act and/or section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interests of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

[30] Since Dr. Mornell is the sole proprietor and the only participant in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

[31] Since Ms. Belt is the sole owner of the Plan sponsor and the only participant in the Plan, there is no jurisdiction under Title I of the Act pursuant to 29 CFR 2510.3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

(3) The proposed exemptions, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transitional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(4) The proposed exemptions, if granted, will be subject to the express condition that the material facts and representations contained in each application are true and complete and accurately describe all material terms of the transaction which is the subject of the exemption. In the case of continuing exemption transactions, if any of the material facts or representations described in the application change after the exemption is granted, the exemption will cease to apply as of the date of such change. In the event of any such change, application for a new exemption may be made to the Department.

Signed at Washington, DC, this 19th day of March, 1996.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, Department of Labor.

BILLING CODE 4510–29–P

LIBRARY OF CONGRESS

Copyright Office

[Docket No. 96–2 CARP–CRA]

Adjustment of Cable Compulsory License Royalty Rates

AGENCY: Copyright Office, Library of Congress.

ACTION: Announcement of negotiation period; filing Notice of Intent to Participate.

SUMMARY: The Copyright Office of the Library of Congress is announcing the 30-day negotiation period to allow interested parties to the cable rate adjustment proceeding to settle their differences. The Office is also announcing, in the event that settlement negotiations are unsuccessful, the date by which parties wishing to participate in the rate adjustment proceeding before a Copyright Arbitration Royalty Panel (CARP) must file their Notice of Intent to Participate.

EFFECTIVE DATES: The 30-day negotiation period begins on April 15, 1996, and ends on May 15, 1996. Notices of Intent to Participate are due no later than May 20, 1996.

ADDRESSES: If sent by mail, an original and five copies of the Notice of Intent to Participate should be addressed to: Copyright Arbitration Royalty Panel (CARP), P.O. Box 70977, Southwest Station, Washington, DC 20024. If hand delivered, an original and five copies of the Notice of Intent to Participate should be brought to: Office of the Copyright General Counsel, James Madison Memorial Building, Room 407, First and Independence Avenue, S.E., Washington, DC 20540.

FOR FURTHER INFORMATION CONTACT: Marilyn Kretsinger, Acting General Counsel, or William Roberts, Senior Attorney, Copyright Arbitration Royalty Panel (CARP), P.O. Box 70977, Southwest Station, Washington, DC 20024. Telephone (202) 707–8380. Telefax (202) 707–8366.

SUPPLEMENTARY INFORMATION:

I. Background

Section 111 of the Copyright Act, 17 U.S.C., grants a compulsory copyright license to cable television systems for the retransmission of over-the-air broadcast stations to their subscribers. In exchange for the license, cable operators submit royalty payments, along with statements of account detailing their retransmissions, to the Copyright Office on a semi-annual basis. The Office then deposits the royalties with the United States Treasury for later distribution to copyright owners of broadcast programming. Royalties collected by the Office in recent years for the cable compulsory license have amounted to approximately $175 million annually.

A cable system calculates its royalty payments in accordance with the statutory formula described in 17 U.S.C 111(d). The cable system then makes a payment based upon its gross receipts from subscribers for the retransmission of broadcast signals. Section 111(d) subdivides cable systems, based on the amount of their gross receipts, into three categories: small, medium and large. Small systems pay a fixed amount without regard to the number of broadcast signals they retransmit, while medium-sized systems pay a royalty within a specified range, with a maximum amount, based on the number of signals they retransmit. Large cable systems calculate their royalties according to the number of distant broadcast signals which they retransmit to their subscribers.[1] Under this formula, a large cable system is required to pay a specified percentage of its gross receipts for each distant signal that it retransmits.

Congress established the gross receipts limitations that determine a cable system's size, and provided the gross receipts percentages (rates) for distant signals. 17 U.S.C. 111(d)(1). It also provided for adjustment of both the gross receipts limitations and the distant signal rates. 17 U.S.C 801(b)(2). The limitations and rates can be adjusted to reflect national monetary inflation, changes in the average rates charged by cable systems for retransmission of broadcast signals, or changes in certain cable rules of the Federal Communications Commission in effect on April 15, 1976. 17 U.S.C. 801(b)(2)(A), (B), (C) and (D). Prior rate adjustments of the Copyright Royalty Tribunal (CRT) made under section 801(b)(2) (B) and (C) may also be reconsidered at five year intervals. 17 U.S.C. 803(b). The current gross receipts limitations and rates are set forth in 37 CFR 256.2. Originally, the CRT performed the rate adjustment, but in 1993, Congress abolished the CRT and vested the rate adjustment authority in the Copyright Arbitration Royalty Panels (CARPs) as administered by the Library of Congress and the Copyright Office.

Section 803 of the Copyright Act, 17 U.S.C., provides that the gross receipts limitations and rates of the cable compulsory license may be adjusted in 1995, and every subsequent fifth calendar year, upon filing a petition with the Library of Congress requesting an adjustment during these window years. If the Library determines that the petitioner has a "significant interest" in the royalty rate or rates in which adjustment is requested, the Library must convene a CARP to determine the adjustment. 17 U.S.C. 803(a)(1). Section 251.63 of the Library's rules provides that "[t]o allow time for the parties to settle their differences regarding rate adjustments, the Librarian of Congress shall * * * designate a 30-day period for consideration of their settlement. The Librarian shall cause notice of the dates for that period to be published in the **Federal Register**." 37 CFR 251.63.

II. Petitions

Last year was a window year for filing cable rate adjustment petitions and the Copyright Office received two such petitions on December 29, 1995. The first, filed by the National Cable Television Association, Inc. ("NCTA") on behalf of its member cable companies, requests an upward adjustment of the gross receipts limitations to reflect national monetary inflation, and a downward adjustment of "the rates currently specified in 37 CFR 256.2 (c) and (d)(the "3.75 percent" rate and the "syndex surcharge")." NCTA petition at 1. NCTA asserts that it has a "significant interest" in the proposed adjustments as the trade association of cable systems serving over 80 percent of all cable subscribers. *Id.* at 1–2.

The second petition was filed by Program Suppliers, Joint Sports Claimants, the National Association of Broadcasters, Music Claimants (the American Society of Composers, Authors and Publishers, Broadcast Music, Inc., and SESAC, Inc.), Canadian Claimants, Devotional Claimants, the Public Broadcasting Service and National Public Radio (collectively, the "Copyright Owners"). The Copyright Owners request an upward adjustment of the rates specified in 37 C.F.R. 256.2, and claim that they have a "significant interest" in such adjustment as representatives of the major claimant categories entitled to distribution of cable royalty funds. Copyright Owners' petition at 1.

III. Negotiation Period and Notices of Intent to Participate

As discussed above, the Library of Congress rules provide a 30-day negotiation period prior to the filing of rate adjustment petitions to enable the parties to settle their differences. 37 C.F.R. 251.63(a). In accordance with this rule, the Library is designating the thirty day period to commence on April 15, 1996, and close on May 15, 1996. If settlement is not reached during this time period, those parties wishing to participate in a rate adjustment proceeding before a CARP must file a Notice of Intent to Participate no later than close of business on May 20, 1996. Failure to file a timely Notice of Intent to Participate will preclude a party from participating in the proceeding.

Dated: March 18, 1996.

Title: Loan Participation.

Description: As authorized by 12 U.S.C. § 1757(5)(E) and implemented by Section 701.22 of NCUA's Rules and

Regulations, federal credit unions that wish to engage in participation loans must establish a written loan participation policy and enter into a written loan participation agreement. Credit unions use the information to ensure that loan participation agreements are entered into in accordance with Board policy. NCUA uses the information during examinations to evaluate the safety and soundness of the Board's participation policy and to ensure that the participation agreements are in compliance with the policy.

Respondents: Federal credit unions.

Estimated Number of Respondents/Recordkeepers: 1,000.

Estimated Burden Hours per Response: 4 hours.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 4,000 total annual burden hours.

Estimated Total Annual Cost: $1,000.

OMB Number:

Form Number: None

Type of Review: New collection.

Title: Organization and Operations of Federal Credit Unions.

Description: NCUA has authorized federally insured credit unions to offer lending-related incentive pay plans, provided they establish written policies regarding such plans. 12 CFR 701.21(c)(8). NCUA believes written policies are necessary to ensure a plan is fully considered before being adopted and for the examination process. The information will be used by NCUA examiners in reviewing credit union lending policies for safety and soundness.

Respondents: Federally insured credit unions.

Estimated Number of Respondents/Recordkeepers: 1,000.

Estimated Burden Hours per Response: 1 hour.

Frequency of Response: On occasion.

Estimated Total Reporting Burden: 1,000 total annual burden hours.

Estimated Total Annual Cost: $25,000.

By the National Credit Union Administration Board on March 18, 1996.

Becky Baker,

Secretary of the Board.

BILLING CODE 7535–01–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards; Notice of Subcommittee Meeting on Severe Accidents

The ACRS Subcommittee on Severe Accidents will hold a meeting on April 8, 1996, Room T–2B3, 11545 Rockville Pike, Rockville, Maryland.

The meeting will be open to public attendance.

The agenda for the subject meeting shall be as follows: *Monday, April 8, 1996—8:30 a.m. until the conclusion of business.*

The Subcommittee will discuss the NRC severe accident codes (e.g., MELCOR, SCDAP/RELAP5, CONTAIN, and VICTORIA). The purpose of this meeting is to gather information, analyze relevant issues and facts, and to formulate proposed positions and actions, as appropriate, for deliberation by the full Committee.

Oral statements may be presented by members of the public with the concurrence of the Subcommittee Chairman; written statements will be accepted and made available to the Committee. Electronic recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Subcommittee, its consultants, and staff. Persons desiring to make oral statements should notify the cognizant ACRS staff engineer named below five days prior to the meeting, if possible, so that appropriate arrangements can be made.

During the initial portion of the meeting, the Subcommittee, along with any of its consultants who may be present, may exchange preliminary views regarding matters to be considered during the balance of the meeting.

The Subcommittee will then hear presentations by and hold discussions with representatives of the NRC staff, its consultants, and other interested persons regarding this review.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by contacting the cognizant ACRS staff engineer, Mr. Noel Dudley (telephone 301/415–6888) between 7:30 a.m. and 4:15 p.m. (EST). Persons planning to attend this meeting are urged to contact the above named individual one or two working days prior to the meeting to be advised of any potential changes to the agenda, etc., that may have occurred.

Date: March 18, 1996.

Sam Duraiswamy,

Chief, Nuclear Reactors Branch.

[FR Doc. 96–6937 Filed 3–21–96; 8:45 am]

BILLING CODE 7590–01–P

[Docket No. 50–029; License No. DPR–3]

Yankee Atomic Electric Company; Issuance of Supplemental Director's Decision Under 10 CFR 2.206

Notice is hereby given that by a Director's Decision (DD 96–02), dated March 18, 1996, the Director, Office of Nuclear Reactor Regulation, denied a supplemental Petition submitted by Citizens Awareness Network and New England Coalition on Nuclear Pollution (Petitioners) and dated February 9, 1996. Petitioners requested that the Nuclear Regulatory Commission (NRC) take action with regard to operation by Yankee Atomic Energy Company (YAEC or Licensee) of its Nuclear Power Station at Rowe, Massachusetts (Yankee Rowe).

Petitioners request that the NRC comply with *Citizens Awareness Network Inc.* v. *United States Nuclear Regulatory Commission and Yankee Atomic Electric Company,* 59 F.3d 284 (1st Cir. 1995) (*CAN* v. *NRC*). Specifically, Petitioners request that the Commission prohibit the licensee from conducting six activities prior to approval of a decommissioning plan. These activities are: (1) Consolidation of sediment in the reactor vessel; (2) removal of miscellaneous Safety Injection Building equipment; (3) installation of a temporary electrical system; (4) removal of pipe on the exterior of the Vapor Container; (5) removal of Main Coolant System insulation; and (6) installation of a temporary waste processing system. Petitioners state that none of these activities constitute minor alterations to the facility, and thus are not permitted.

The NRC staff also evaluated five other ongoing or planned activities at Yankee Rowe that were identified in the licensee's letters of January 29, 1996, February 16, 1996, and February 28, 1996. These activities are: (1) Preparation for decontamination of the Main Coolant System—removal of spool pieces; (2) removal of miscellaneous equipment outside the Vapor Container bioshield wall; (3) removal of Primary Auxiliary Building tanks; (4) removal of Turbine Building insulation; and (5) removal of spent fuel pool upender.

The staff concluded that the eleven activities are permissible, prior to approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulation, as explained in the "Director's Decision Pursuant to 10 CFR 2.206" (DD 96–02), the complete text of which follows this notice and is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW, Washington, DC and at the local public document room located at the Greenfield Community College Library, 1 College Drive, Greenfield, Massachusetts, 01301.

A copy of the decision will be filed with the Secretary of the Commission for the Commission's review in accordance with 10 CFR 2.206(c) of the Commission's regulations. As provided by this regulation, the Decision will constitute the final action of the Commission 25 days after the date of issuance unless the Commission, on its own motion, institutes a review of the Decision in that time.

Dated at Rockville, Maryland, this 18th day of March 1996.

For the Nuclear Regulatory Commission.

William T. Russell, Director, Office of Nuclear Reactor Regulation.

Attachment to Issuance of Supplemental Director's Decision Under 10 C.F.R. § 2.206

I. Introduction

On January 17, 1996, Citizens Awareness Network and New England Coalition on Nuclear Pollution (Petitioners) submitted an "EMERGENCY MOTION FOR COMPLIANCE WITH CIRCUIT COURT OPINION" (Petition). Petitioners requested that the United States Nuclear Regulatory Commission (NRC or Commission) take action with respect to activities conducted by Yankee Atomic Electric Company (YAEC or Licensee) at the Yankee Nuclear Power Station in Rowe, Massachusetts (Yankee Rowe or the facility). In particular, Petitioners requested that the NRC comply with *Citizens Awareness Network Inc.* v. *United States Nuclear Regulatory Commission* and *Yankee Atomic Electric Company,* 59 F. 3d 284 (1st Cir. 1995) (*CAN* v. *NRC*), and that the Commission immediately order YAEC not to undertake and the staff not to approve, and YAEC to cease, further major dismantling activities or other decommissioning activities, unless such activities are necessary to assure the protection of occupational and public health and safety. Petitioners requested that the Commission prohibit five of nine activities which the Licensee proposed to conduct prior to approval of a decommissioning plan, which activities were evaluated by the staff in a letter dated November 2, 1995.

By letter dated February 2, 1996, the NRC staff declined to take emergency action to prohibit the Licensee's shipment of low-level radioactive waste, and found that Petitioners' request to prohibit four other activities was moot.

By a Supplemental Petition, Petitioners requested the Commission to reverse the NRC staff's February 2, 1996 decision on the emergency aspects of the Petition, and contended that the staff had implicitly approved six additional activities, which the Licensee identified for the first time as under consideration in its January 29, 1996 response to the Petition, although the activities are not minor alterations to the facility. (A seventh activity was mentioned, but not contested). See Citizens Awareness Network's and New England Coalition on Nuclear Pollution's Motion for Exercise of Plenary Commission Authority to Reverse NRC Staff 2.206 Opinion (February 9, 1996).

By Order dated February 15, 1996, the Commission directed the Licensee to provide the NRC with at least two weeks advance notice before engaging in any of the seven new activities identified at page 13 of the Supplemental Petition, and directed the staff to address the arguments advanced by Petitioners at page 13 of the Supplemental Petition in a supplementary 10 CFR 2.206 decision.

By letter dated February 16, 1996, the Licensee notified the NRC staff and Petitioners that YAEC intended to commence five activities between March 1, 1996 and March 25, 1996.

On February 22, 1996, the staff issued a Director's Decision (DD 96–01) on the Petition as a whole. The staff denied Petitioners' request to prohibit the Licensee's shipments of low-level radioactive waste, and found four other activities contested by Petitioners to be moot.

By letter dated February 27, 1996, the NRC staff requested the Licensee to supply information regarding the seven activities identified by the Supplemental Petition, plus information regarding four other activities identified as ongoing in the Licensee's January 29, 1996 response to the Petition. The Licensee responded by letter dated February 28, 1996, providing information regarding the eleven activities plus an additional activity, removal of the Spent Fuel Pool Upender. Three activities were ongoing, and the remaining nine were scheduled to commence between March 1, 1996 and April 22, 1996.

By letter dated March 1, 1996, the staff notified the Licensee that three activities scheduled to commence March 1, 1996, are permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations, and thus, that there was no reason to take emergency action to prevent YAEC from starting or to order discontinuance of the ongoing activities. Additionally, the staff found no health or safety reason for immediate NRC action.

The staff has evaluated the six ongoing and planned activities contested by the Supplemental Petition and the five additional activities identified in the Licensee's letters of January 29, 1996, February 16, 1996, and February 28, 1996. Two activities, removal of miscellaneous equipment outside the Vapor Container bioshield wall and preparation for decontamination [1] of the Main Coolant System (removal of spool pieces) were completed in February 1996. For the reasons discussed below, the staff has concluded that the activities are permissible, prior to approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations. Accordingly, Petitioners' request that the NRC prohibit YAEC from undertaking or continuing the six contested activities identified at page 13 of the Supplemental Motion is denied.

II. Background

As explained in detail in DD 96–01, Petitioners sought judicial review of certain NRC actions, related to the Licensee's Component Removal Project (CRP). Petitioners challenged the CRP as an impermissible activity, before the approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

On July 20, 1995, the United States Court of Appeals held, in part, that the Commission had: (1) Failed to provide an opportunity for hearing to CAN, as required by Section 189 of the Atomic Energy Act, in connection with the Commission's decision to permit the CRP decommissioning activities; and (2) changed its pre-1993 interpretation of its decommissioning regulations without notice to the public and in violation of the Administrative

[1] Decontamination at a nuclear plant is the flushing of pipes, pumps, pressure vessels etc., with fluids to remove materials that are contaminated with radiation from the inner surfaces of these components.

Procedure Act. *Citizens Awareness Network* versus *NRC and Yankee Atomic Electric Company*, 59 F. 3d 284, 291–2, and 292–3 (lst Cir. 1995). The court remanded the matter to the Commission for proceedings consistent with the court's opinion.

The Commission implemented *CAN* versus *NRC*, in part, by issuing *Yankee Atomic Electric Company* (Yankee Nuclear Power Station), CLI–95–14, 42 NRC 130 (1995). In CLI–95–14, the Commission reinstated its pre-1993 interpretation of its decommissioning policy, required the issuance of a notice of opportunity for an adjudicatory hearing on the Yankee Rowe decommissioning plan,[2] held that YAEC may not conduct further "major" decommissioning activities at Yankee Rowe until approval of a decommissioning plan after completion of any required hearing, and directed YAEC to inform the Commission within 14 days of the steps it is taking to come into compliance with the reinstated interpretation of the Commission's decommissioning regulations. *Yankee Atomic Electric Company*, CLI–95–14, 42 NRC 130 (1995).

III. Discussion

A. *The licensee's planned and ongoing activities are permissible, prior to approval of a decommissioning plan, under the Commission's pre-1993 interpretation of its decommissioning regulations, and thus are permissible under CAN v. NRC and CLI 95–14.*

Petitioners contest six of the seven activities they mention in the Supplemental Petition on the ground that they do not constitute minor alterations to the facility, and thus are not permissible before approval of a decommissioning plan under the pre-1993 interpretation of the Commission's decommissioning regulations. Specifically, Petitioners object to: (1) Consolidation of sediment in the reactor vessel; (2) removal of miscellaneous Safety Injection Building equipment; (3) installation of a temporary electrical system; (4) removal of pipe on the exterior of the Vapor Container; (5) removal of Main Coolant System insulation; and (6) installation of a temporary waste processing system. Petitioners do not object to decontamination of the Main Coolant System. The staff has also evaluated the following five activities identified by the Licensee in its letters of January 29, 1996, February 16, 1996, and February 28, 1996: (1) Preparation for decontamination of the Main Coolant System—removal of spool pieces; (2) removal of miscellaneous equipment outside the Vapor Container bioshield wall; (3) removal of Primary Auxiliary Building tanks; (4) removal of Turbine Building insulation; and (5) removal of spent fuel pool upender.

Under the Commission's pre-1993 interpretation of its decommissioning regulations, a licensee "may proceed with some activities such as decontamination, minor component disassembly, and shipment and storage of spent fuel if the activities are permitted by the operating license and/or § 50.59" prior to final approval of a licensee's decommissioning plan,[3] as long as the activity does not involve major structural or other changes and does not materially and demonstrably affect the methods or options available for decommissioning or substantially increase the costs of decommissioning. *Long Island Lighting Company* (Shoreham Nuclear Power Station, Unit 1), CLI–90–8, 32 NRC 201, 207 n.3 (1990); *Long Island Lighting Company* (Shoreham Nuclear Power Station, Unit 1), CLI–91–2, 33 NRC 61, 73 n.5 (1991); and *Sacramento Municipal Utility District* (Rancho Seco Nuclear Generating Station), CLI–92–2, 35 NRC 47, 61 n. 7 (1992).

Activities such as normal maintenance and repairs, removal of small radioactive components for storage or shipment, and removal of components similar to that for maintenance and repair also were permitted prior to approval of a decommissioning plan under the Commission's pre-1993 interpretation of the Commission's decommissioning regulations. See NRC Inspection Manual, Chapter 2561, Section 06.06. (Issue Date: 03/20/92).[4]

Under the pre-1993 interpretation of the Commission's decommissioning regulations, examples of activities which were conducted at various facilities under a possession-only license, and which the staff considered permissible before approval of a decommissioning plan included:

Shoreham[5]

a. Core borings in biological shield wall.

b. Core borings of the reactor pressure vessel.

c. Regenerative heat exchanger removal and disassembly.

d. Various sections of reactor water clean-up system piping cut out and removed to determine effectiveness of chemical decontamination processes being used.

e. Removal of approximately half of reactor pressure vessel insulation and preparation for disposal.

f. Removal of fuel support castings and peripheral pieces removed and shipment offsite for disposal at Barnwell, South Carolina.

g. Reactor water clean-up system recirculation holding pump removed and shipped to James A. FitzPatrick Nuclear Power Plant.

h. Control rod drive pump shipped to Brunswick Nuclear Station.

i. One full set of control rod blade guides sold to Carolina Power and Light Company.

j. Control rod drives removed, cleaned, and stored in boxes for salvage.

k. Process initiated for segmenting and removing reactor pressure vessel cavity shield blocks.

l. Process initiated for removal of instrument racks, tubing, conduits, walkways, and pipe insulation presenting interferences for decommissioning activities and/or removal of salvageable equipment.

Fort St. Vrain[6]

a. Control rod drive and orifice assemblies and control rods removed from core during defueling and shipped offsite for processing or disposal as low-level waste.

b. All helium circulators removed and shipped offsite for disposal.

c. Core region constraint devices (internals) removed and approximately one-half shipped offsite for disposal.

d. About 50 core metal-clad reflector blocks (top layer of core) removed and stored in fuel storage wells.

e. Removal of remaining hexagonal graphite reflector elements, defueling elements, and metal-clad reflector blocks begun.

f. Pre-stressed concrete reactor vessel (PCRV) top cross-head tendons and some circumferential tendons detensioned.

g. Some detensioned tendons removed from PCRV.

h. Work initiated to cut and remove PCRV liner cooling system piping presenting interferences to detensioning of PCRV tendons, and

i. Asbestos insulation completely removed from piping under PCRV.

In its letter of November 2, 1995, the NRC staff identified certain activities, although not proposed by the Licensee, which may not be conducted before reapproval of a decommissioning plan. Those activities include dismantlement of systems such as the main reactor coolant system, the lower neutron shield tank, vessels that have significant radiological contamination, pipes, pumps and other such components and the vapor container (containment). The staff also identified segmentation or removal of the reactor vessel from its support structure as a major dismantlement not to be conducted until after the decommissioning plan is reapproved.

Upon review of the Supplemental Petition and the Licensee's letters of January 29, 1996, February 16, 1996, and February 28, 1996, the staff concludes that the eleven planned and ongoing activities are permissible, prior to approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(1) *Consolidation of sediment in the reactor vessel.*

This item is a decontamination activity. It involves flushing loose radioactive material from the bottom of the reactor vessel (RV) and binding it in a solid mass inside the RV, in a centralized volume and, thus, displacing the contamination from the lower head of the vessel. This activity results in a large reduction of external dose during later removal and shipping of the vessel, and in a reduction of external dose to personnel who must perform day-to-day maintenance and monitoring activities.

In view of the above, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(2) *Removal of miscellaneous Safety Injection Building equipment.*

This activity entails the removal of mechanical and electrical equipment and some seismic reinforcement that is no longer required in the Safety Injection Building. The components involved in this activity are small, and constitute a minor decommissioning activity. Similar activities were conducted at the Shoreham plant prior to decommissioning plan approval. See items c, d, and g, above. Accordingly, this activity is permissible prior to approval of a decommissioning plan under the pre-1993 interpretation of the Commission's decommissioning regulations.

(3) *Installation of a new electrical system.*

This activity is not decommissioning. This activity is part of the Licensee's overall project to enhance the safety of the Spent Fuel Pool by establishing independent systems dedicated to Spent Fuel Pool reliability, and is consistent with NRC Bulletin 94–01, "Potential Fuel Pool Draindown Caused by Inadequate Maintenance Practice at Dresden Unit 1" (April 14, 1994). Installation of the new electrical system involves installation of power supply and switching capability to the previously installed electrical conduit, which conduit installation the staff found to be permissible prior to approval of a decommissioning plan. *See* DD 96–01, Section III. A(7).

Accordingly, this activity is permissible before approval of a decommissioning plan under the pre-1993 interpretation of the Commission's decommissioning regulations.

(4) *Removal of pipe on the exterior of the Vapor Container.*

These pipe lines are located outdoors beneath the Vapor Container and are in secondary-side systems, such as piping carrying steam from the secondary side of the steam generator to the turbine. Because this involves the removal of piping from the secondary side, it is not a major decommissioning activity. Similar activities were conducted at the Shoreham plant, see items d and g, above, and at the Fort St. Vrain plant, see item b, above, prior to approval of the decommissioning plans.

In view of the above, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(5) *Removal of Main Coolant System insulation.*

This insulation will not be removed until after the decontamination of the Main Coolant System. This insulation is not a major component and its removal is, therefore, not a major decommissioning activity. Similar activities were conducted at the Shoreham plant, see item e, above, and at the Fort St. Vrain plant, see item i, above, prior to approval of the decommissioning plans.

In view of the above, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(6) *Installation of a temporary waste processing system.*

This activity is not decommissioning. It is permitted by the Defueled Technical Specifications, an appendix to the POL. The activity involves installation of a liquid waste processing system designed to process spent fuel pool water by removing contaminants. The activity will increase assurance of satisfactory long-term operation of the spent fuel pool and is, therefore, a safety enhancement.

In view of the above, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(7) *Preparation for decontamination of the Main Coolant System-removal of spool pieces.*

This is a decontamination activity which involved the removal of eight spool pieces, and was completed in February 1996. It was part of an ongoing project, preparation of pipe flanges for the chemical decontamination of the Main Coolant System.

Because this action is in preparation for decontamination and without which decontamination could not proceed, this activity is permissible. Decontamination is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations. In any event, the Petition, insofar as it can be inferred to request action in this matter, is moot.

(8) *Removal of miscellaneous equipment outside the Vapor Container bioshield wall.*

This activity involved the removal of heating and ventilating equipment from the Vapor Container, and was completed in mid-February 1996. The components removed are minor and do not constitute a major decommissioning activity. Similar activities were conducted at the Shoreham plant prior to approval of the decommissioning plan. *See* items c and d, above.

Accordingly, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations. In any

[2] Pursuant to CLI–95–14, a proceeding was commencad to offer an opportunity for hearing on the Licensee's decommissioning plan for Yankee Rowe. Petitioners sought intervention and a hearing. By an Order dated March 1, 1996, the Atomic Safety and Licensing Board denied the request for intervention and dismissed the proceeding. Yankee Atomic Electric Company, LBP–96–2. By Order dated February 27, 1996, the Commission stayed any order of the Board insofar as it may have the affect of authorizing decommissioning activities which were prohibited prior to approval of a decommissioning plan.

[3] Statement of Consideration, "General Requirements for Decommissioning Nuclear Facilities", 53 FR 24018, 24025–26 (June 27, 1988).

[4] "Examples of modifications and activities, that are allowed during the post-operational phase [the interval between permanent shutdown and the NRC's approval of the licensee's decommissioning plan] are (1) those that could be performed under normal maintenance and repair activities, (2) removal of certain, relatively small radioactive components, such as control rod drive mechanism, control rods, and core internals for disassembly, and storage or shipment, (3) removal of non-radioactive components and structures not required for safety in the post-operational phase, (5) shipment of reactor fuel offsite, and (6) activities related to site and equipment radiation and contamination characterization." *Id.*

[5] See letter dated December 11, 1991, from John D. Leonard, Jr., Long Island Lighting Company, to U.S. Nuclear Regulatory Commission, Docket No. 50–322.

[6] *See* letter dated September 4, 1992, from Donald M. Warembourg, Public Service Company of Colorado, to the U.S. Nuclear Regulatory Commission, Docket No. 50–267.

event, the Petition, insofar as it can be inferred to request action in this matter, is moot.

(9) *Removal of Primary Auxiliary Building tanks.*

This activity involves the removal of four low pressure or drain tanks from the Primary Auxiliary Building, because they are not needed to support operation of the spent fuel pool. Two of the tanks were removed during February 1996. Similar activities were conducted at the Shoreham plant prior to approval of the decommissioning plan. *See* items c, d, and g, above. This is not a major decommissioning activity because the removed equipment involves minor components.

In view of the above, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(10) *Removal of Turbine Building insulation.*

This is an ongoing activity involving the removal of non-radioactive material from a non-contaminated area of the plant. This is not a decommissioning activity.

Accordingly, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

(11) Removal of spent fuel pool upender.

This device was used during reactor operations to transfer fuel, during reload outages, into the Vapor Container. The upender is not needed to support storage of fuel in the spent fuel pool. The upender is not a major component or structure and, therefore, this is not a major decommissioning activity. Similar activities were conducted at the Shoreham plant, see items d and f, above and at Fort St. Vrain, see item a above, prior to approval of the decommissioning plan.

In view of the above, this activity is permissible, before approval of a decommissioning plan, under the pre-1993 interpretation of the Commission's decommissioning regulations.

B. *The eleven ongoing and planned activities will neither individually nor collectively substantially increase the costs of decommissioning.*

YAEC estimates the cost of the six activities contested by Petitioners and the five additional planned and ongoing activities to be approximately $6.0 million.[7] YAEC estimates the cost of the previously contested five activities to be $6.5 million. See DD 96–01, Section III.B. The total cost of all activities which have been evaluated by the staff is approximately $12.5 million or 3.4% of the estimated $368.8 million total decommissioning cost. It would be speculative to conclude that the decommissioning method proposed by Petitioners, SAFSTOR, would be less expensive. Moreover, there is no evidence that the combined activities will give rise to consequences that will increase the total cost of decommissioning. Thus, the staff concludes that there is no evidence the combined activities will substantially increase the costs of decommissioning.

C. *The activities contested by Petitioners will neither individually nor collectively demonstrably affect the methods or options available for decommissioning.*

As the staff explained in *Yankee Atomic Electric Company*, DD 96–01 (1996), the criteria for determining whether the Licensee's planned and ongoing activities will demonstrably affect the methods or options available for decommissioning have not been well-defined. During review of the Petition and the Supplemental Petition, the NRC staff has continued to examine the question of whether the Licensee's activities will demonstrably affect the methods or options available for decommissioning. In this case, the staff has now also compared the radiation dose involved in the contested activities with the radiation doses estimated for decommissioning of the Licensee's facility. This is because, under Petitioners' theory regarding the choice of the decommissioning option, as we understand it, it seems that adoption of a different decommissioning option would most likely be required to reduce dose.

The Licensee estimates that the radiation dose involved in the six activities contested by the Supplemental Petition is 23.6 person-rem.[8] The Licensee estimates that the radiation dose involved in shipment of low-level radioactive waste, contested in the Petition, is 17 person-rem.[9] The Licensee estimates that the radiation dose involved in the other four activities contested by the Petition is 24.7 person-rem.[10] Accordingly, the radiation dose involved in all activities contested by Petitioners is approximately 65.3 person-rem. Thus, the estimated dose from the contested activities is less than 10% of the total 755 person-rem estimate for total radiation exposure from decommissioning Yankee Rowe.[11] The staff estimates that the remaining estimated dose from decommissioning activities at Yankee Rowe is, at the most, approximately 358 person-rem.[12] Thus the estimated dose from the activities contested by Petitioners is approximately 18.3% of the remaining dose from decommissioning the facility.[13] Accordingly, the staff concludes that the contested activities will not demonstrably affect the methods and options available for decommissioning.

It is not possible to determine with precision how much of the 65.3 person-rem involved in the contested activities might be avoidable by using the SAFSTOR option, i.e., by delaying completion of those activities for several decades to allow for radioactive decay. But even if the entire 65.3 person-rem could be counted as part of the potential SAFSTOR dose savings (an unlikely situation), the SAFSTOR dose savings still available is substantially more than the 65.3 person-rem "lost" by carrying out the contested activities now. Thus, even in an unlikely worst case, the SAFSTOR option would be substantially preserved. Accordingly, the staff concludes that the contested activities will not demonstrably affect the methods and options available for decommissioning.

In sum, the NRC staff will not take action to halt relatively minor YAEC activities, many of which are closely similar to ones allowed at Shoreham and Ft. St. Vrain, where there is no evidence that these activities are consuming a significant portion of the remaining radioactive dose at Yankee Rowe. In the staff's judgment, the prohibition against dismantling major systems, such as the reactor vessel and other reactor components with substantial contamination,[14] sufficiently preserves the possibility of ultimately moving to the SAFSTOR option, should that be the result of the still-pending challenge to YAEC's decommissioning plan.

IV. Conclusion

For the reasons given above, Petitioner's request to prohibit six activities is denied. Those activities, plus an additional five activities identified by the Licensee as planned or ongoing, are permissible prior to approval of a decommissioning plan under the pre-1993 interpretation of the Commission's decommissioning regulations.

As provided by 10 CFR 2.206(c), a copy of this Decision will be filed with the Secretary of the Commission for the Commission's review. The Decision will become the final action of the Commission 25 days after issuance, unless the Commission on its own motion institutes review of the Decision within that time.

Dated at Rockville, Maryland, this 18th day of March 1996.

For the Nuclear Regulatory Commission.

William. T. Russell,

Director, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

[7] *See* NRC letter from Russell A. Mellor, YAEC, to Morton B. Fairtile, NRC, dated February 28, 1996.

[8] The Licensee estimates the radiation dose to be 13.8 person-rem for consolidation of sediment in the Reactor Vessel; 0.4 person-rem for removal of miscellaneous Safety Injection Building equipment; 0.5 person-rem for installation of a temporary electrical system; 0.4 person-rem for removal of pipe on the exterior of the Vapor Container; 7.7 person-rem for removal of Main Coolant system insulation; and 0.8 person-rem for installation of a temporary waste processing system. *See* letter dated February 28, 1996, from Russell A. Mellor, YAEC, to Morton B. Fairtile, NRC.

[9] *See* letter dated February 21, 1996, from K. J. Heider, YAEC, to Morton B, Fairtile, NRC.

[10] The Licensee estimates the radiation dose to be 4 person-rem for Fuel Chute Isolation and negligible for Spent Fuel Pool Electrical Conduit Installation. *See* letter dated February 21, 1996, from K. J. Heider, YAEC, to Morton B. Fairtile, NRC. The staff estimates the radiation dose to be 19.7 person-rem from completion of removal of the remaining portions of the Upper Neutron Shield Tank, and 1.0 person-rem from removal of Component Cooling Water System pipes and components and Spent Fuel Cooling System pipes and components based on a telephone conversation with the licensee on March 15, 1996.

[11] *See* Order Approving the Decommissioning Plan and Authorizing Decommissioning of Facility (Yankee Nuclear Power Station), "Environmental Assessment by the U.S. Nuclear Regulatory Commission Related to the Request to Authorize Facility Decommissioning", p. 22.

[12] To estimate the remaining dose from decommissioning, the staff subtracted, from the 755 person-rem estimate for total allotted dose, the personnel exposures reported for calendar years 1993, 1994 and 1995, or 163, 156 and 78 person-rem, respectively. *See* "Personnel Exposure Report by duty Function and 10 CFR 20.407 Personnel Monitoring Report", dated December 31, 1993, December 31, 1994, and December 31, 1995. The resulting estimate of approximately 358 person-rem may be an underestimate of the remaining available exposure. Some of the dose from 1993 includes non-decommissioning activities and some of the dose from the contested activities was incurred during calendar year 1995, but should not be counted as expended for purposes of estimating remaining dose.

[13] DD–96–01 compared the dose from the contested shipping activity to the total radiation exposure from decommissioning, see Section III.B.(9). It is, however, preferable to use the more sophisticated approach of comparing dose from contested activities to the remaining radiation exposure from decommissioning. Nonetheless, under both approaches the staff concludes that the contested activities will not demonstrably affect the options and methods available for decommissioning.

[14] *See letter dated November 2, 1995, from Morton B. Fairtile, NRC, to James A. Kay, YAEC.*

OFFICE OF MANAGEMENT AND BUDGET

Cumulative Report on Rescissions and Deferrals

March 1, 1996.

This report is submitted in fulfillment of the requirement of Section 1014(e) of the Congressional Budget and Impoundment Control Act of 1974 (Public Law 93–344). Section 1014(e) requires a monthly report listing all budget authority for the current fiscal year for which, as of the first day of the month, a special message had been transmitted to Congress.

This report gives the status, as of March 1, 1996, of seven rescission proposals and six deferrals contained in three special messages for FY 1996. These messages were transmitted to Congress on October 19, 1995, and February 21 and 23, 1996.

Rescissions (Attachments A and C)

As of March 1, 1996, seven rescission proposals totaling $960 million had been transmitted to the Congress. Attachment C shows the status of the FY 1996 rescission proposals.

Deferrals (Attachments B and D)

As of March 1, 1996, $2,760.4 million in budget authority was being deferred from obligation. Attachment D shows the status of each deferral reported during FY 1996.

Information From Special Message

The special messages containing information on the rescission proposals and deferrals that are covered by this cumulative report are printed in the editions of the **Federal Register** cited below:

60 FR 55154, Friday, October 27, 1995
61 FR 8691, Tuesday, March 5, 1996

Alice M. Rivlin,

Director.

UNITED STATES POSTAL SERVICE

Board of Governors; Addition to Closed Sunshine Act Meeting Agenda

By telephone vote on March 19, 1996, a majority of the members contacted and voting, the Board of Governors voted to add to the agenda of its April 1, 1996, meeting, closed to public observation (see 61 FR 10406, March 13, 1996), consideration of the Postal Rate Commission Opinion and Recommended Decision in Docket No. MC96–1, Experimental First-Class and Priority Mail, Small Parcel Automation Rate Category.

The Board determined that pursuant to section 552b(c)(3) of Title 5, United States Code, and section 7.3(c) of Title 39, Code of Federal Regulations, this portion of the meeting is exempt from the open meeting requirement of the Government in the Sunshine Act [5 U.S.C. 552b(b)] because it is likely to disclose information in connection with proceedings under Chapter 36 of Title 39, United Stated Code (having to do with postal ratemaking, mail classification and changes in postal services), which is specifically exempted from disclosure by section 410(c)(4) of Title 39, United States Code.

The Board has determined further that pursuant to section 552b(c)(10) of Title 5, United States Code, and section 7.3(j) of Title 39, Code of Federal Regulations, the discussion is exempt because it is likely to specifically concern participation of the Postal Service in a civil action or proceeding involving a determination on the record after opportunity for a hearing.

The Board further determined that the public interest does not require that the Board's discussion of these matters be open to the public.

In accordance with section 552b(f)(1) of Title 5, United States Code, and section 7.6(a) of Title 39, Code of Federal Regulations, the General Counsel of the United States Postal Service has certified that in her opinion the meeting may properly be closed to public observation pursuant to section 552b(c) (3) and (10) of Title 5, and section 410(c)(4) of Title 39, United States Code; and section 7.3 (c) and (j) of Title 39, Code of Federal Regulations.

Requests for information about the meeting should be addressed to the Secretary of the Board, Thomas J. Koerber, at (202) 268–4800.

Thomas J. Koerber,

Secretary.

BILLING CODE 7710–12–M

Board of Governors; Notice of a Sunshine Act Meeting

The Board of Governors of the United States Postal Service, pursuant to its Bylaws (39 CFR Section 7.5) and the Government in the Sunshine Act (5 U.S.C. Section 552b), hereby gives notice that it intends to hold a meeting at 1:00 p.m. on Monday, April 1, 1996, and at 9:00 a.m. on Tuesday, April 2, 1996, in Scottsdale, Arizona.

The April 1 meeting is closed to the public (see 61 FR 10406, March 13, 1996). The filing with the Postal Rate Commission for classification reform of special services has been deferred. The April 2 meeting is open to the public and will be held at the Scottsdale Princess Hotel, 7575 East Princess Drive, Scottsdale, in Ballrooms B and C. The Board expects to discuss the matters stated in the agenda which is set forth below. Requests for information about the meeting should be addressed to the Secretary of the Board, Thomas J. Koerber, at (202) 268–4800.

Agenda

Monday Session, April 1—1:00 p.m. (Closed)

1. Consideration of the Postal Rate Commission Opinion and Recommended Decision in Docket No. MC96–1, Experimental First-Class and Priority Mail Small Parcel Automation Rate Category. (John H. Ward, Vice President, Marketing Systems).

2. Consideration of a Filing with the Postal Rate Commission on Classification Reform for Nonprofits. (John H. Ward, Vice President, Marketing Systems).

Tuesday Session, April 2—9:00 a.m. (Open)

1. Minutes of the Previous Meeting, March 4–5, 1996.

2. Remarks of the Postmaster General/ Chief Executive Officer. (Marvin Runyon)

3. Report on the Phoenix District. (George L. Lopez, Phoenix District Manager, Customer Service and Sales)

4. Tentative Agenda for the May 6–7, 1996, meeting in Washington, D.C.

Thomas J. Koerber,

Secretary.

BILLING CODE 7710–12–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–21827; File No. 812–9902]

Connecticut Mutual Life Insurance Company, et al.

March 15, 1996.

AGENCY: Securities and Exchange Commission ("SEC" or "Commission").

ACTION: Notice of Application for Exemption under the Investment Company Act of 1940 (the "1940 Act").

APPLICANTS: Connecticut Mutual Life Insurance Company ("CML"), C.M. Life Insurance Company ("C.M. Life"), CML Accumulation Annuity Account E ("Account E"), Panorama Separate Account ("Panorama Account"), Connecticut Mutual Variable Life Separate Account I ("CML VLI Account"), Panorama Plus Separate Account ("Plus Account") and C.M. Life Variable Life Separate Account I ("C.M. Life VLI Account").

RELEVANT 1940 ACT SECTIONS: Order requested pursuant to Section 26(b) of the 1940 Act approving the proposed substitution of securities and pursuant to Section 17(b) of the 1940 Act exempting the proposed transaction from the provisions of Section 17(a) of the 1940 Act.

SUMMARY OF THE APPLICATION: Applicants seek an order approving the substitution of securities issued by certain management investment companies and held by Account E, Panorama Account, CML VLI Account, Plus Account and C.M. Life VLI Account (collectively, the "Accounts," and individually, an "Account") to support variable life insurance contracts and/or variable annuity contracts (collectively, the "Contracts") issued by CML or C.M. Life. Applicants also seek an order exempting them and Massachusetts Mutual Life Insurance Company ("MassMutual"), Connecticut Mutual Financial Services Series Fund I, Inc. ("CMFS Series Fund"), and Oppenheimer Variable Account Funds ("Oppenheimer Series Fund") (together, the "Funds," and indiyidually, a "Fund") from Section 17(a) of the 1940 Act to the extent necessary to permit C.M. Life and either CML or MassMutual to carry out the above referenced substitution of securities by redeeming securities issued by CMFS Series Fund in kind (or partly in kind) and using the redemption proceeds to purchase securities issued by Oppenheimer Series Fund.

FILING DATE: December 18, 1995.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the commission orders a hearing. Interested persons may request a hearing by writing to the Secretary of the commission and serving Applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on April 9, 1996, and should be accompanied by proof of service on Applicants in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the requester's interest, the reason for the request and the issues contested. Persons may request notification of a hearing by writing to the Secretary of the Commission.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. Applicants, Richard M. Howe, Esq., Second Vice President and Associate General Counsel, Massachusetts Mutual Life Insurance Company, 1295 State Street, Springfield, Massachusetts 01111; Michael A. Chong, Esq., and Bernard S. Carrey, Esq., Connecticut Mutual Life Insurance company, 140 Garden Street, Hartford, Connecticut 06154.

FOR FURTHER INFORMATION CONTACT: Mark C. Amorosi, Attorney, or Wendy Finck Friedlander, Deputy Chief, Office of Insurance Products, Division of Investment Management, at (202) 942–0670.

SUPPLEMENTARY INFORMATION: Following is a summary of the application; the complete application is available for a fee from the Public Reference Branch of the Commission.

Applicants' Representations

1. CML, a mutual life insurance company, is principally engaged in the offering of life insurance, annuity and disability income contracts and is authorized to conduct business in all 50 states, the District of Columbia and Puerto Rico. CML is the depositor and sponsor of Account E. Panorama Account and CML VLI Account.

2. C.M. Life, a stock life insurance company and wholly-owned subsidiary of CML, is principally engaged in the sale of life insurance and annuity contracts. It is authorized to conduct business in all states except New York. C.M. Life is the depositor and sponsor of Plus Account and C.M. Life VLI Account.

3. MassMutual, a mutual life insurance company, is currently licensed to transact life, accident, and health insurance business in all states, the District of Columbia and certain provinces of Canada. MassMutual is the depositor and sponsor of a number of variable life insurance and variable annuity separate accounts registered as investment companies.

4. Each of the Accounts is registered under the 1940 Act as a unit investment trust. The assets of each Account support either variable annuity contracts or variable life insurance contracts. Interests in each of the Accounts offered through such Contracts have been registered under the Securities Act of 1933 (the "1933 Act") on either Form S–6 or Form N–4.

5. Account E invests exclusively in shares of the Income Portfolio of CMFS Series Fund. CML has not sold Contracts offered through Account E since February, 1982.

6. The Panorama Account is divided into eight subaccounts: four holding assets supporting Contracts issued in connection with employee benefit plans or retirement programs receiving favorable treatment under the Internal Revenue Code of 1986, as amended, and four holding assets supporting Contracts issued to the general public. Two subaccounts invest exclusively in shares of each of the following investment portfolios of CMFS Series Fund: Money Market Portfolio, Income Portfolio, Total Return Portfolio and Growth Portfolio.

7. The CML VLI Account is currently divided into seven subaccounts, four of which invest exclusively in shares of one of the following investment portfolios of CMFS Series Fund: Income Portfolio, Total Return Portfolio, Growth Portfolio and Government Securities Portfolio. The other three subaccounts each invest in shares of open-end management investment companies that are not affiliated persons of CML or MassMutual.

8. The Plus Account is currently divided into six subaccounts, each of which invests in shares of one of the following investment portfolios of CMFS Series Fund: Money Market Portfolio, Income Portfolio, Total Return Portfolio, Growth Portfolio, Government Securities Portfolio and International Equity Portfolio.

9. The C.M. Life VLI Account is currently divided into eleven subaccounts, eight of which invest exclusively in shares of one of the following investment portfolios of the CMFS Series Fund: Government Securities Portfolio, Income Portfolio, Total Return Portfolio, Growth Portfolio, International Equity Portfolio, LifeSpan Capital Appreciation Portfolio, LifeSpan Balanced Portfolio and LifeSpan Diversified Portfolio. The remaining three subaccounts each invest in shares of open-end management investment companies that are not affiliated persons of CML or MassMutual.

10. The CMFS Series Fund was organized as a Maryland corporation on August 17, 1981 and is registered under the 1940 Act as an open-end management investment company. CMFS Series Fund is a series investment company as defined by Rule 18f–2 under the 1940 Act and is currently comprised of nine investment portfolios: Money Market Portfolio, Government Securities Portfolio, Income Portfolio, Total Return Portfolio, Growth Portfolio, International Equity Portfolio, LifeSpan Capital Appreciation Portfolio, LifeSpan Balanced Portfolio and LifeSpan Diversified Portfolio. CMFS Series Fund issues a separate series of shares in connection with each portfolio and has registered these shares under the 1933 Act on Form N–1A. G.R. Phelps & Co., Inc., a wholly-owned subsidiary of CML, is the investment adviser to CMFS Series Fund.

11. The Money Market Portfolio seeks as high a level of current income as is consistent with preservation of capital and maintenance of liquidity by investing in money market instruments. The Government Securities Portfolio seeks a high level of current income with a high degree of safety of principal by investing primarily in U.S. Government securities and U.S. Government-related securities. The Income Portfolio seeks high current income consistent with prudent investment risk and preservation of capital by investing primarily in corporate debt securities and securities issued by the U.S. Government and by U.S. Government agencies and instrumentalities.

12. Oppenheimer Series Fund was organized as a Massachusetts business trust on August 28, 1984 and is registered under the 1940 Act as an open-end management investment company. Oppenheimer Series Fund is a series investment company as defined by Rule 18f–2 under the 1940 Act and is currently comprised of nine investment portfolios: Oppenheimer Money Fund, Oppenheimer High Income Fund, Oppenheimer Bond Fund, Oppenheimer Capital Appreciation Fund, Oppenheimer Growth Fund, Oppenheimer Multiple Strategies Fund, Oppenheimer Growth & Income Fund, Oppenheimer Global Securities Fund and Oppenheimer Strategic Bond Fund. Oppenheimer Series Fund issues a separate series of shares of beneficial interest in connection with each portfolio and has registered these shares under the 1933 Act on Form N–1A. Oppenheimer Management Corporation, a subsidiary of MassMutual, is the investment adviser of Oppenheimer Series Fund.

13. The Oppenheimer Money Fund seeks the maximum current income from investments in "money market" securities consistent with low capital risk and the maintenance of liquidity. The Oppenheimer Bond Fund seeks a high level of current income from investments in high-yield, fixed-income securities rated "Baa" or better by Moody's or "BBB" or better by Standard & Poor's. As a secondary investment objective, the Oppenheimer Bond Fund seeks capital growth when consistent with its primary objective.

14. The Contracts income a variety of variable life insurance and variable annuity contracts issued by CML and C.M. Life. Applicants state that although considerable variation exists among the provisions of the various Contracts, all of the Contracts (except those issued through Account E which provides only one investment option) permit, subject to certain limitations, at least 4 transfers per Contract year of cash value among and between the subaccounts available as investment options without the imposition of a transfer charge. All of the Contracts that permit transfers of cash values among and between subaccounts reserve for CML or C.M. Life the right to eliminate or further restrict transfer privileges.

15. In order to achieve certain business purposes, CML and MassMutual signed a merger agreement dated September 13, 1995, pursuant to which CML would merge with and into MassMutual, leaving MassMutual as the surviving company. The merger agreement provided, among other things, that C.M. Life would become a wholly-owned subsidiary of MassMutual but that the Plus Account and C.M. Life VLI Account would remain intact and unchanged by the merger and that C.M. Life would remain the depositor of each.

16. The merger agreement also provided that the merger would operate to transfer the CML separate accounts, including Account E, the Panorama Account and the CML VLI Account (the "CML Accounts"), to MassMutual. MassMutual would then be the legal owner of the assets of the CML Accounts and thereby become the depositor of each. Applicants state that the merger agreement did not provide for the merger or consolidation of the CML Accounts with any other separate account of CML or MassMutual in connection with the merger. Except as contemplated by the proposed substitution, the merger agreement provided that the CML Accounts would continue to maintain the subaccounts that currently comprise each of the CML Accounts, and would continue to hold in each such subaccount shares of the same management investment company that each currently holds. The merger agreement also provided that no charges would be imposed upon owners of Contracts or other deductions made in connection with the transfer of the CML Accounts to MassMutual nor would such transfers affect the net asset value of any subaccount of the CML Accounts.

17. Applicants state that, in an effort to reduce expenses, the management of CML and MassMutual are seeking to consolidate the assets of a number of smaller management investment companies which are advised by affiliated persons of CML with those of larger management investment companies having substantially identical or very similar investment objectives advised by MassMutual or affiliated persons of MassMutual. Applicants state that the Money Market Portfolio, Government Securities Portfolio and Income Portfolio of CMFS Series Fund are relatively small when compared with many other similar investment portfolios of open-end management investment companies. As a result, the annual expense ratios of these portfolios have generally been higher than the ratios of most similar but larger portfolios. Applicants also state that although the past performance of these three portfolios has not been poor in recent years, neither has it been outstanding for any of them. The Money Fund an Bond Fund of Oppenheimer Series Fund are somewhat larger than their counterparts among the three portfolios of CMFS Series Fund.

18. By supplements to the various prospectuses for the Contracts and the Accounts, all current and prospective Contract owners were notified of the intent of CML, C.M. Life and MassMutual to substitute shares of Oppenheimer Money Fund and Oppenheimer Bond Fund (the "substitute funds") for those of the Money Market Portfolio, Government Securities Portfolio and Income Portfolio (the "removed funds") of CMFS Series Fund. The supplements advise current and prospective Contract owners that they will remain able to allocate net purchase payments to or transfer cash values to the subaccounts of the Accounts corresponding to each of the removed funds until the consummation of the merger but that sometime after the merger, the substitute funds will replace the removed funds as the underlying investment for such subaccounts. The supplements further apprise current and prospective Contract owners that from the date of the supplements until the date of the proposed substitution, Contract owners will be permitted to make one transfer of all cash value under a Contract invested in any one of the affected subaccounts on the date of the supplement to another subaccount other than one of the other affected subaccounts without that transfer counting as one of a limited number of transfers permitted in a Contract year or as one of a limited number of transfers permitted in a Contract year free of charge. In addition, the supplements inform current and prospective Contract owners that CML, C.M. Life and MassMutual will not exercise any rights reserved by CML or C.M. Life under any of the Contracts to impose additional restrictions on transfers (or discontinue transfer privileges entirely) until at least 30 days after the proposed substitution.

The Proposed Substitution

1. Applicants propose that C.M. Life and either CML or MassMutual substitute (1) shares of the Money Fund of Oppenheimer Series Fund for shares of the Money Market Portfolio of CMFS Series Fund held by corresponding subaccounts of the Accounts, (2) shares of the Bond Fund of Oppenheimer Series Fund for shares of the Government Securities Portfolio of CMFS Series Fund held by corresponding subaccounts of the Accounts, and (3) shares of the Bond Fund of Oppenheimer Series Fund for shares of the Income Portfolio of CMFS Series Fund held by corresponding subaccounts of the Accounts. Applicants propose to have C.M. Life and either CML or MassMutual redeem shares of each removed fund in kind (or partly in kind) and purchase with the proceeds shares of the corresponding substitute fund.

2. Applicants state that the proposed substitutions will take place at relative net asset value with no change in the amount of any Contract owner's cash value or death benefit or in the dollar value of his or her investment in any of the Accounts. Contract owners will not incur any fees or charges as a result of the proposed substitutions nor will their rights or MassMutual's or C.M. Life's obligations under the Contracts be altered in any way. Applicants state that all expenses incurred in connection with the proposed substitutions, including legal, accounting and other fees and expenses, will be paid by CML or MassMutual. Applicants also state that the proposed substitutions will not impose any tax liability on Contract owners. Furthermore, the proposed substitutions will not cause the Contract fees and charges currently being paid by existing Contract owners to be greater after the proposed substitutions than before the proposed substitutions.

3. Applicants state that in addition to the prospectus supplements distributed to current and prospective Contract owners, within 5 days after the proposed substitutions, any Contract owners who were affected by the substitutions will be sent a written notice informing them that the substitutions carried out and that they may make one transfer of all cash value under a Contract invested in any one of the affected subaccounts on the date of the notice to another subaccount without that transfer counting as one of a limited number of transfers permitted in a Contract year or as one of a limited number of transfers permitted in a Contract year free of charge.

4. Applicants state that CML and MassMutual are also seeking approval of the proposed substitutions from the Massachusetts Insurance Department and such other state insurance regulators as may be necessary or appropriate.

Applicants' Legal Analysis

Request for an Order Under Section 26(b)

1. Section 26(b) of the 1940 Act provides in pertinent part that "[i]t shall be unlawful for any depositor or trustee of a registered unit investment trust holding the security of a single issuer to substitute another security for such security unless the Commission shall have approved such substitution." The purpose of Section 26(b) is to protect the expectation of investors in a unit investment trust that the unit investment trust will accumulate the shares of a particular issuer and to prevent unscrutinized substitutions which might, in effect, force shareholders dissatisfied with the substituted security to redeem their shares, thereby incurring either a loss of the sales load deducted from initial proceeds, an additional sales load upon reinvestment of the redemption proceeds, or both. Section 26(b) affords this protection to investors by preventing a depositor or trustee of a unit investment trust holding shares of one issuer from substituting for those shares the shares of another issuer, unless the Commission approves that substitution.

2. Applicants represent that the proposed substitutions are consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. Applicants assert that, after the proposed substitutions, the substitute funds will provide Contract owners with more favorable or comparable overall investment results than would be the case if the proposed substitutions do not take place. In support of this, Applicants state that the proposed substitutions would effectively consolidate the assets of the substitute funds with those of the removed funds resulting, in most cases, in a larger fund with lower anticipated future expense ratios than the past expense ratios of the removed fund. Each of the three substitute funds is larger (and after it receives the assets of the removed fund(s) will be substantially larger) than the removed fund that it would replace. The Money Fund of Oppenheimer Series Fund has had more favorable expense ratios over the last three years than the Money Market Portfolio of CMFS Series Fund. The Bond Fund has had more favorable expense ratios over the last three years than the Government Securities Portfolio of CMFS Series Fund. The Bond Fund has had only somewhat less favorable expense ratios over the last three years than the Income Portfolio of CMFS Series Fund. Applicants also state that each of the substitute funds has had somewhat more favorable investment performance over the past three years than the removed fund that it would replace.

3. Applicants also maintain that each of the substitute funds is a suitable and appropriate investment vehicle for Contract owners. Except for the proposed substitution of shares of the Bond Fund of Oppenheimer Series Fund for those of CMFS Series Fund Government Securities Portfolio, each of the substitute funds has substantially identical investment objectives to the removed fund that it would replace. The Bond Fund has investment objectives that are similar to and compatible with those of the Government Securities Portfolio.

Request for an Order Under Section 17(b)

1. Section 17(a)(1) of the 1940 Act prohibits any affiliated person of a registered investment company, or an affiliated person of an affiliated person, acting as principal, from selling any security or other property to such registered investment company. Section 17(a)(2) of the 1940 Act prohibits any of such affiliated persons, acting as principal, from purchasing any security or other property from such registered investment company.

2. The proposed substitution may be deemed to entail one or more purchases or sales of securities between and among affiliated persons as a result of the purchase by the subaccounts of the Accounts of shares of the Money Fund and Bond Fund of the Oppenheimer Series Fund with proceeds from the redemption of shares in kind (or partly in kind) of the Money Market Portfolio, Government Securities Portfolio and Income Portfolio of the CMFS Series Fund. Applicants state that the proposed substitutions could come within the scope of Section 17(a) of the 1940 Act. In addition, the proposed substitution would not be exempt from Section 17 of the 1940 Act pursuant to Rule 17a–7 thereunder because (1) the affiliations among the Accounts, the Oppenheimer Series Fund and the CMFS Series Fund do not arise solely by reason of having common investment advisers, common directors, and/or common officers, and (2) the transaction will not satisfy the condition in Rule 17a–7 which requires that the transaction be a purchase or sale for no consideration other than cash payment against prompt delivery or a security for which market quotations are readily available. The proposed purchase of Oppenheimer Series Funds shares with portfolio investment securities entails the purchase and sale of securities for securities. Therefore, the proposed substitution requires an exemption from Section 17(a) of the 1940 Act, pursuant to Section 17(b) of the 1940 Act.

3. Section 17(b) of the 1940 Act provides that the Commission may grant an order exempting the transactions prohibited by Section 17(a) upon application if evidence establishes that: (a) The terms of the proposed transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned; (b) the proposed transaction is consistent with the investment policy of each registered investment company concerned, as recited in its registration statement and reports filed under the 1940 Act; and (c) the proposed transaction is consistent with the general purposes of the 1940 Act.

4. Applicants assert that the terms of the proposed transaction are reasonable and fair and do not involve overreaching. The boards of directors of both CMFS Series Fund and Oppenheimer Series Fund have adopted procedures pursuant to which each of the Funds may purchase and sell securities to and from its affiliates. Applicants also state the proposed substitutions will be carried out in conformity with all of the requirements of Rule 17a–7 and each Fund's procedures thereunder, except that the consideration paid for the securities being purchased or sold may not be entirely cash. Applicants state that although the transaction may not be

entirely for cash, each will be effected based upon (1) the independent market price of the portfolio securities valued as specified in paragraph (b) of Rule 17a–7, and (2) the net asset value per share of Oppenheimer Series Fund's Money Fund or Bond Fund or CMFS Series Fund's Money Market Portfolio, Income Portfolio or Government Securities Portfolio valued in accordance with the procedures disclosed in the respective Fund's registration statement and as required by Rule 22c–1 under the 1940 Act. Applicants state that no brokerage commission, fee or other remuneration will be paid to any party in connection with the proposed transaction. In addition, the boards of directors of both Funds will subsequently review the proposed substitutions and make the determinations required by paragraph (e)(3) of Rule 17a–7.

5. Applicants also assert that the proposed transaction is consistent with the investment policy of each investment company concerned. Applicants state the proposed redemption of CMFS Series Fund shares is consistent with the investment policy of the Fund and its Money Market Portfolio, Income Portfolio and Government Securities Portfolio, as recited in the Fund's registration statement, provided that the shares are redeemed at their net asset value in conformity with Rule 22c–1 under the 1940 Act. In addition, the sale of Oppenheimer Series Funds shares for investment securities is consistent with the investment policy of the Fund and its Money Fund and Board Fund as recited in the Fund's registration statement, provided that (1) the shares are sold at their net asset value, and (2) the portfolio securities are of the type and quality that the Money Fund and Bond Fund each would have acquired with the proceeds from share sales had the shares been sold for cash. Applicants state that to assure that the second of these conditions is met, the Oppenheimer Series Fund's investment adviser will examine the portfolio securities being offered to that Fund and accept only those securities as consideration for shares that it would have acquired for the Money Fund or the Bond Fund, as the case may be, in a cash transaction.

6. Applicants maintain that the proposed transaction is consistent with the general purposes of the Act. Applicants state the proposed transaction does not present any of the conditions or abuses that the 1940 Act was designed to prevent.

Applicants' Conclusion

For the reasons discussed above, Applicants represent that the terms of the proposed substitution, including the consideration to be paid and received, are reasonable and fair to: (1) Oppenheimer Series Fund, including its Money Fund and Bond Fund, (2) investors in the Money Fund and Bond Fund, (3) CMFS Series Fund, including its Money Market Portfolio, Income Portfolio and Government Securities Portfolio, and (4) Contract owners invested in the Money Market Portfolio, Income Portfolio and Government Securities Portfolio; and do not involve overreaching on the part of any person concerned. Furthermore, Applicants represent that the proposed substitutions will be consistent with the policies of Oppenheimer Series Fund and of its Money Fund and Bond Fund and with the policies of CMFS Series Fund and its Money Market Portfolio, Income Portfolio and Government Securities Portfolio as stated in the current registration statement and reports filed under the 1940 Act by each Fund and with the general purposes of the 1940 Act.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 35–26495]

Filings Under the Public Utility Holding Company Act of 1935, as Amended ("Act")

March 15, 1996.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public Reference.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by April 8, 1996, to the Secretary, Securities and Exchange Commission, Washington, DC 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

American Electric Power Co., (70–5943, 70–6126, 70–8429) AEP Resources, Inc.

American Electric Power Company, Inc. ("AEP"), a registered holding company, and AEP Resources, Inc. ("Resources"), a non-utility subsidiary company of AEP, both of 1 Riverside Plaza, Columbus, Ohio 43215, have filed a post-effective amendment to three application-declarations previously filed under sections 6(a), 7, 9(a), 10, 12(b), 32 and 33 of the Act and rules 45 and 53 thereunder.

By order dated December 22, 1994 (HCAR No. 26200) ("Order"), the Commission authorized AEP and Resources to issue and sell up to $300 million ("Investment Limit") in debt and/or equity securities through June 30, 1997 and to invest the proceeds in "exempt wholesale generators" ("EWGs"), as defined in section 32 of the Act, and in "foreign utility companies" ("FUCOs"), as defined in section 33 of the Act. The Order also authorized AEP and Resources to acquire the securities of one or more companies ("Project Parents") that directly or indirectly, but exclusively, hold the securities of one or more FUCOs or EWGs ("Power Projects").

The Order also authorized AEP to guarantee the debt securities and other commitments of Resources, AEP and Resources to guarantee the securities of one or more Project Parents or Power Projects, and Project Parents to guarantee the securities of their Power Projects, through June 30, 1997, in an aggregate amount which, with the securities issued, will never exceed the Investment Limit. Finally, the Order reserved jurisdiction over the terms of the issuance and sale by AEP of up to 10 million additional shares of its common stock ("Stock"), par value $6.50 per share, which are authorized but are unissued or are treasury shares. The gross proceeds from the sale of the Stock would not exceed the Investment Limit.

AEP proposes to increase the Investment Limit to an amount that, when added to its other direct or indirect investments in EWGs or FUCOs, is equal to 50% of the consolidated retained earnings of AEP determined in accordance with rule 53 ("New Investment Limit"). AEP also proposes to extend its authority to issue and sell debt and equity securities, to extend the authority of Resources and the Project Parents to acquire the securities of new Project Parents, and to extend the authority of AEP, Resources and the Project Parents to guarantee securities, to December 31, 2000. Finally, AEP proposes that the Commission release its reservation of jurisdiction over the issuance and sale by AEP of the Stock.

By orders dated December 1, 1993 and December 6, 1993 (HCAR No. 25936 and HCAR No. 25939) ("1993 Orders"), the Commission authorized AEP to issue and sell authorized but unissued common stock under its Dividend Reinvestment and Stock Purchase Plan or the American Electric Power Employees Savings Plan ("Plans"). The Orders stated that AEP would not use the proceeds of sales of its common stock under the Plans to acquire interests in EWGs or FUCOs.

AEP now proposes that it be authorized, subject to the New Investment Limit, to issue and sell common stock under the Plans through December 31, 2000 and to use the proceeds thereof to invest in EWGs and FUCOs.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

[Release No. 34–36977; File No. SR–CBOE–95–65]

Self-Regulatory Organizations; Order Approving a Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment No. 1 Thereto by the Chicago Board Options Exchange, Inc. Relating to Joint Account Participant Trading in Equity Options

March 15, 1996.

On October 20, 1995, the Chicago Board Options Exchange, Inc. ("CBOE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to revise its policy regarding joint account participation in equity options. Notice of the proposal was published for comment and appeared in the **Federal Register** on December 7, 1995.[3] No comment letters were received on the proposal. On February 28, 1996 the Exchange filed Amendment No. 1 to the proposal.[4] This order approves the CBOE's proposal as amended.

I. Description of the Proposal

The purpose of this rule change is to revise that provision of the Exchange's policy governing joint account participant trading in equity options that currently prohibits the simultaneous representation in a trading crowd by more than one member of a joint account.[5] Under the proposed regulatory circular, a joint account may be simultaneously represented in a trading crowd but only by participants trading in-person. All other provisions of the current regulatory circular would remain unchanged, including a prohibition against orders being entered in the crowd via a floor broker when a joint account participant is trading in the crowd in-person. The change in policy is also reflected in a deletion of one sentence from, and the addition of another sentence to, paragraph (a)(ii) of Rule 8.16, RAES Eligibility in Equity Options.

There are two reasons why the Exchange has determined to propose this change, which has been recommended by the Exchange's Equity Floor Procedure Committee. First, the change will make the policy governing joint account trading in equity options more consistent with the current policy governing index option trading, where multiple representation of orders for the same joint account is permitted by participants in the joint account trading in-person at the trading post, or by floor brokers representing the orders at the post.[6] The policy proposed for equity options nonetheless will remain more restrictive than the policy for index options, in that it will only permit joint representation by participants trading in-person, and will not permit multiple representation of orders for the same joint account if one or more of the orders is represented by a floor broker. The policy for index options reflects that, as a practical matter, floor broker representation is often required in index option trading crowds, where special trading practices and procedures have been adopted to deal with the special needs of these very large crowds. Since a trader from another crowd may be unfamiliar with these practices, he may need to use the services of a floor broker who is regularly present at the index crowd and who understands its trading practices. Smaller equity option trading posts do not present the same practical need for the services of floor brokers, which is why the proposed policy permitting joint account representation at equity option posts is limited to in-person representation of orders by market-makers.

A second reason why the Exchange has chosen to institute this policy is to ensure that member organizations that choose to employ a joint account for their Exchange trading, rather than using individual market-maker accounts, are not disadvantaged in participating in trades vis-a-vis those member organizations that do employ individual market-maker accounts. Some member organizations choose to have their various market-makers trade in a joint account so that the member organization's positions can be more easily monitored and managed. Under the current equity policy regarding joint accounts, however, these member organizations would only be able to be represented by one joint account participant in a trading crowd at one time. On the other hand, the member organization using the individual market-maker accounts would be able to be represented by each market-maker's individual account. The proposed change would eliminate the disadvantage currently suffered by member organizations using joint account structures.

In addition to revising the regulatory circular, one sentence will be deleted from, and another sentence added to, Rule 8.16(a)(ii). This rule currently prohibits more than one joint account participant from using the joint account for trading on RAES in a particular option class unless the Exchange's

[3] *See* Securities Exchange Act Release No. 36534 (November 30, 1995), 60 FR 62913 (December 7, 1995).

[4] In Amendment No. 1 the CBOE revises the proposed regulatory circular to make clear that it will be a member's responsibility to ensure that they do not trade in-person or enter orders through floor brokers such that a trade occurs in which the buyer and seller are representing the same joint account and are on opposite sides of the transaction. *See* Letter from Timothy Thompson, Senior Attorney, CBOE to James McHale, Attorney, Office of Market Supervision ("OMS"), Division of Market Regulation ("Division"), Commission, dated February 28, 1996 ("Amendment No. 1").

[5] This policy is set forth in Regulatory Circular RG 93–50, which is a reissuance of RG 91–68, File No. SR–CBOE–91–46, noticed in Securities Exchange Act Release No. 30334 (February 4, 1992), 57 FR 4900 (February 10, 1992).

[6] *See* Regulatory Circular RG 95–64, which is a reissuance of Regulatory Circular RG 91–57, approved in Securities Exchange Act Release No. 31174 (September 10, 1992), 57 FR 42789 (September 16 1992).

Market Performance Committee ("MPC") provides an exemption. However, because any joint account participant trading in-person would be entitled to participate in the same side of a trade with his fellow joint account participants in the same trading crowd as a result of the proposed regulatory circular,[7] the Exchange believes it is appropriate to no longer require an exemption from the MPC to have more than one participant use the joint account for trading on RAES. In any event, to participate on RAES, a member must be present in the trading crowd.

II. Discussion

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5)[8] in that it will help remove impediments to a free and open securities market and facilitate transactions in securities, while protecting investors and the public interest.

Specifically, the Commission believes that it is appropriate for the CBOE to modify certain joint account trading policies for equity options while keeping restrictions in place that are designed to ensure market integrity. First, the rule change will make the policy governing joint account trading in equity options more consistent with the current policy regarding index option trading. The Commission notes that the CBOE's policy regarding equity option trading will continue to be more restrictive than that governing index option trading in that only joint representation by participants trading in person will be permitted in equity option trading crowds. Multiple representation of orders for the same joint account in equity option trading crowds will not be permitted if one or more of the orders is represented by a floor broker.

Second, the change in policy will eliminate the disparity in treatment between member organizations that choose to employ a joint account for their exchange trading, and those member organizations which use individual market-maker accounts. Member organizations which choose to have their various market-makers trade in a joint account so that the member organization's positions can be more easily monitored and managed, would no longer be disadvantaged by only having a single joint account represented in a trading crowd at one time. Thus, by eliminating a distinction that currently exists between member organizations that manage their positions differently, the rule change furthers the objectives of Section 6(b)(5) of the Act by providing rules that perfect the mechanisms of a free and open market.

With respect to protecting investors and the public interest, the Commission notes that the CBOE's proposed regulatory circular contains provisions designed to ensure that joint account participants do not engage in abusive or illegal trading, thereby ensuring the maintenance of fair and orderly markets and market integrity. As mentioned above, the proposed circular provides that members are prohibited from entering orders in a particular crowd with floor brokers for their individual or joint account whenever they are trading in-person in that crowd; this applies even though the orders are for an account they are not then actively trading. Additionally, the regulatory circular states that "[i]t is a member's responsibility to ensure that they do not trade in-person or enter orders with floor brokers such that any of the following results: (1) A trade occurs between a joint account participant's individual account and the joint account of which he or she is a participant, (b) a trade occurs between two joint accounts that have common participants, or (c) a trade occurs in which the buyer and seller are representing the same joint account and are on opposite sides of the transaction."[9] Finally, the Commission notes that the CBOE has surveillance procedures designed to detect and deter abusive trading by joint account participants.[10]

Accordingly, the Commission believes that expanding the ability of joint account participants to trade in equity options classes in limited circumstances will not threaten the integrity of CBOE's market.

The Commission finds food cause for approving Amendment No. 1 to the proposal prior to the thirtieth day after the date of publication of the notice of filing thereof in the **Federal Register**. Specifically, Amendment No. 1 merely clarifies the regulatory circular to highlight that members must ensure that they do not trade in-person or enter orders with floor brokers such that a trade occurs in which the buyer and seller are representing the same joint account and are on opposite sides of the transaction. The Commission believes that emphasizing this requirement in the regulatory circular clarifies the responsibilities of joint account participants trading in equity options and strengthens the market integrity aspects of the proposal.

Based on the above, the Commission finds good cause for approving Amendment No. 1 to the proposed rule change on an accelerated basis and believes that the proposal, as amended, is consistent with Sections 6(b)(5) and 19(b)(2) of the Act.

III. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning Amendment No. 1. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the CBOE. All submissions should refer to the File No. SR–CBOE–95–65 and should be submitted by April 12, 1996.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[11] that the proposed rule change (SR–CBOE–95–65), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[12]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36982; File Nos. SR–MCC–96–03]

Self-Regulatory Organizations; Midwest Clearing Corporation; Notice of Filing of a Proposed Rule Change Relating to the Pass-Through of Certain Fees and Charges and the Elimination of All Other Charges

March 18, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on March 1, 1996, the Midwest Clearing Corporation ("MCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change (File No. SR–MCC–96–03) as described in Items I, II, and III below, which items have been prepared primarily by MCC. MCC amended the filing on March 7, 1996.[2] The Commission is publishing this notice to solicit comments from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

MCC proposes to add a provision to its Services and Schedule of Charges that will permit MCC to pass-through at cost to Sponsored Participants ("SPs") and Temporary Sponsored Participants ("TSPs")[3] fees and other charges assessed MCC by the National Securities Clearing Corporation ("NSCC"). MCC also proposes to eliminate the remainder of its existing fee schedule.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, MCC included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. MCC has prepared summaries, set forth in section (A), (B), and (C) below, of the most significant aspects of such statements.[4]

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

The purpose of the proposed rule change is to permit MCC to charge SPs and TSPs at cost the fees and charges assessed on MCC by NSCC in connection with SPs' and TSPs' use of NSCC's services. The proposed rule change also eliminates all other existing MCC fees.

MCC proposes to eliminate its existing fee schedule in its entirety and replace it with the following schedule.

Sponsored Participants and Temporary Sponsored Participants

Fees and charges assessed on MCC by the National Securities Clearing Corporation

Charge: Rebilled at Cost

MCC believes the proposed rule change is consistent with Section 17A of the Act and the rules and regulations thereunder because it provides for the equitable allocation of reasonable fees and other charges among participants using its facilities.

(B) Self-Regulatory Organization's Statement on Burden on Competition

MCC does not believe the proposed rule change will impose a burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

(C) Self-Regulatory Organization's Statement on Comments on the Purposed Rule Change Received From Members, Participants or Others

Written comments on the proposals have not been solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within thirty-five days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to ninety days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which MCC consents, the Commission will:

(A) By order approve such proposed rule change or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submission should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington D.C. 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communication relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552 will be available for inspection and copying in the Commission's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing also will be available for inspection and copying at the principal office of MCC. All submissions should refer to the file number SR–MCC–96–03 and should be submitted by April 12, 1996.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 96–6966 Filed 3–21–96; 8:45 am]

BILLING CODE 8010–01–M

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by National Association of Securities Dealers, Inc. Relating to Regulating the Conduct of Broker/Dealers Operating on the Premises of a Financial Institution

March 15, 1996.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("1934 Act"),[1] notice is hereby given that on December 28, 1995, the National Association of Securities Dealers, Inc. ("NASD" or "Association") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items

have been prepared by the NASD. The filing was subsequently amended on January 24, January 29 and March 7, 1996.[2] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The NASD is proposing to add a new section specifying requirements for broker/dealer conduct on the premises of a financial institution. Below is the text of the proposed rule change.

RULES OF FAIR PRACTICE

Broker/Dealer Conduct on the Premises of Financial Institutions

Sec. _____.

(a) Applicability

This section shall apply exclusively to those broker/dealer services conducted by members on the premises of a financial institution where retail deposits are taken. This section does not alter or abrogate members' obligations to comply with other applicable NASD rules, regulations, and requirements, nor those of other regulatory authorities that may govern members operating on the premises of financial institutions.

(b) Definitions

(1) For purposes of this section, the term "financial institution" shall mean federal and state-chartered banks, savings and loan associations, savings banks, credit unions, and the service corporations required by law of such institutions.

(2) "Networking arrangement" and "brokerage affiliate arrangement" shall mean a contractual arrangement between a member and a financial institution pursuant to which the member conducts broker/dealer services for customers of the financial institution and the general public on the premises of such financial institution where retail deposits are taken.

(3) "Affiliate" shall mean a company which controls, is controlled by or is under common control with a member as defined in Schedule E of the By-Laws.

(4) "Broker/dealer services" shall mean the investment banking or securities business as defined in Paragraph (l) of Article I of the By-Laws.

(5) "Confidential financial information" shall not include:

(A) customers' names, addresses, and telephone numbers, unless a customer specifies otherwise; or

(B) information that can be obtained from unaffiliated credit bureaus or similar companies in the ordinary course of business.

(c) Standards for Member Conduct

No member shall conduct broker/dealer services on the premises of a financial institution unless the member complies initially and continuously with the following requirements:

Setting

(1) Wherever possible, the member's broker/dealer services shall be conducted in a physical location distinct from the area where the financial institution's retail deposits are taken. In all situations, members shall identify the member's broker/dealer services in a manner that is clearly distinguished from the financial institution's retail deposit-taking activities. The member's name shall be clearly displayed in the area in which the member conducts its broker/dealer services.

Networking and Brokerage Affiliate Agreements

(2) Networking and brokerage affiliate arrangements between a member and a financial institution must be governed by a written agreement that sets forth the responsibilities of the parties and the compensation arrangements. The member must ensure the agreement stipulates that:

(A) supervisory personnel of the member and representatives of the Securities and Exchange Commission and the Association will be permitted access to the financial institution's premises where the member conducts broker/dealer services in order to inspect the books and records and other relevant information maintained by the member with respect to its broker/dealer services;

(B) unregistered employees of the financial institution will not receive any compensation, cash or non-cash, that is conditioned on whether a referral of a customer of the financial institution to the member results in a transaction; and

(C) the member will notify the financial institution if any associated person of the member who is employed by the financial institution is terminated for cause by the member.

Compensation of Registered/Unregistered Persons

(3) The member shall not provide cash or non-cash compensation to employees of the financial institution who are not registered with an NASD member in connection with, but not limited to, locating, introducing, or referring customers of the financial institution to the member.

Customer Disclosure and Written Acknowledgment

(4) (A) When a customer account is opened by a broker/dealer on the premises of a financial institution where retail deposits are taken, the member shall disclose, orally and in writing, that the securities products purchased or sold in a transaction with the member:

(i) are not insured by the Federal Deposit Insurance Corporation ("FDIC") or other applicable deposit insurance;

(ii) are not deposits or other obligations of the financial institution and are not guaranteed by the financial institution; and

(iii) are subject to investment risks, including possible loss of the principal invested.

(B) For all accounts opened by a broker/dealer on the premises of a financial institution where retail deposits are taken, the member shall make reasonable efforts to obtain from each customer during the account opening process a written acknowledgement of the disclosures required by Subsections (c)(4)(A) (i) through (iii).

Use of Confidential Financial Information

(5) The member shall not use confidential financial information provided by the financial institution regarding its customer unless prior written approval has been granted by the customer to release the information.

Communications With the Public

(6) (A) All member communications regarding customers' securities transactions and long and short positions, including confirmations and account statements, must indicate clearly that the broker/dealer services are provided by the member. Communications that include information regarding non-deposit-insured transactions and positions with the member and deposit-insured transactions and positions or accounts with the financial institution should distinguish clearly between the two. Securities transactions conducted by the member should be introduced with the member's identity and, at a minimum, the member must disclose that

[2] *See* Letters from Elliott R. Curzon, Associate General Counsel, NASD, to Mark P. Barracca, Branch Chief, Division of Market Regulation, SEC (January 24, 1996 and March 7, 1996) and Letter from Suzanne E. Rothwell, Associate General Counsel, NASD, to Mark P. Barracca, Branch Chief, Division of Market Regulation, SEC (January 29, 1996). This notice reflects those amendments. The text of the amendments may be examined in the Commission's Public Reference Room.

securities products: are not insured by the FDIC or other applicable deposit insurance; are not deposits or other obligations of the financial institution and are not guaranteed by the financial institution; are subject to investment risks, including possible loss of the principal invested.

(B) Advertisements, sales literature, and other similar materials issued by the member that relate exclusively to its broker/dealer services will be deemed to be the materials of the member and must indicate prominently the identity of the member providing the broker/dealer services. The financial institution may be referenced in a nonprominent manner in advertising or promotional materials for the purpose of identifying the location where broker/dealer services are available and, where appropriate, to disclose a material relationship between the member and the financial institution, for example, where the member is affiliated with a financial institution that serves as investment adviser to an open-end investment company ("mutual fund").

(C) Advertisements, sales literature, and other similar materials jointly issued by the member and a financial institution that discuss services or products offered by both entities must distinguish clearly the products and services offered by the financial institution from those offered by the member. The name of the member must be displayed prominently in the section of the materials that describes the broker/dealer services offered by the member, which section will be deemed materials of the member.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The NASD has prepared summaries, set forth in Sections (A), (B), and (C) below, of the most significant aspects of such statements.

(A) Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

(1) Background

In recent years, banks, savings and loan associations, credit unions and similar financial institutions not registered as a broker/dealer under the 1934 Act ("financial institutions") have expanded their business into retail securities sales. These institutions generally conduct such activities through affiliated broker/dealers or non-affiliated broker/dealers operating under a brokerage affiliate or networking arrangement. In addition, however, banks are exempt from the definitions of the terms "broker" and "dealer" in Sections 3(a)(4) and 3(a)(5), respectively, of the 1934 Act, and thus are not required to register as broker/dealers when selling securities.

As these securities activities have expanded and financial institutions have placed securities sales facilities in their retail deposit taking areas, customers of the financial institutions have become increasingly confused about the distinction between the insured deposit products of the financial institution and the uninsured securities products of the broker/dealer operating in the same location.

In order to address this customer confusion problem, the NASD has published several notices reminding members of their obligations under the federal securities laws and the NASD's rules when selling securities products to customers who may have little or no experience with unmsured, non-depository products. In Notice to Members 91–74 (November 1991) and Notice to Members 93–87 (December 1993), the NASD reminded members of their obligations to customers who were reinvesting maturing certificates of deposit. In addition, in Notice to Members 94–16 (March 1994) the NASD reminded members of their sales practice obligations in connection with mutual fund sales and noted that the growth of bank-affiliated and networking broker/dealers had focused attention on the issue. Finally, in Notice to Members 95–80 (September 26, 1995) the NASD addressed additional concerns regarding member obligations and responsibilities regarding mutual fund sales practices.

In Notice to Members 94–47 (June 1994) the NASD published the SEC's November 24, 1993 no-action letter to the Chubb Securities Corporation (the "Chubb Letter") concerning broker/dealer activity on the premises of a financial institution. The Chubb Letter set forth the requirements for networking broker/dealers as they related to customer disclosure, compensation of employees of the financial institution, promotional materials of the broker/dealer, location of the securities activities of the broker/dealer, and inspection of books and records with respect to financial institutions that are subject to broker/dealer registration under Section 15(a) of the 1934 Act.

In addition, on February 15, 1994, the various financial institution regulators[3] issued a joint statement titled the "Interagency Statement on Retail Sales of Nondeposit Investment Products" (the "Interagency Statement"). The Interagency Statement established guidelines for financial institutions that sell securities products to their customers, either directly or through networking or affiliated broker/dealers. It is the NASD's understanding that, to the extent securities are being sold by broker/dealers operating on financial institution premises, NASD members are observing the requirements of the Interagency Statement even though such broker/dealers are not directly subject to the jurisdiction of the financial institution regulators.

The NASD has been concerned that the activities of member firms operating on the premises of financial institutions and related customer protection issues are not adequately addressed by existing NASD rules and, because the Interagency Statement has no jurisdictional reach to broker/dealers, there is no basis for NASD disciplinary action against member firms that do not comply with the terms of the Interagency Statement. Accordingly, the NASD is proposing to add a new section to the Rules of Fair Practice to govern the conduct of broker/dealers on the premises of financial institutions.

(2) Description of Proposed Rule

Applicability. Subsection (a) of the proposed rule provides that the new section applies exclusively to broker/dealer services being conducted by NASD members on the premises of a financial institution where retail deposits are taken.

Subsection (a) specifies that the proposed rule covers financial institutions that have an area "where retail deposits are taken." The NASD intends that the phrase "where retail deposits are taken" will have its ordinary meaning; i.e., a financial institution with an area where, with minimal limitations, the public (or members, in the case of a credit union) can access the services of the institution. It would not include financial institutions that do not generally provide access to the public without an appointment, e.g., financial

[3] The Board of Governors of the Federal Reserve System ("FRB"), the Federal Deposit Insurance Corporation, the Office of the Comptroller of the Currency ("OCC"), and the Office of Thrift Supervision ("OTS") ("financial institution regulators").

institutions which solely provide trust services or private banking services.

Subsection (a) also provides that the section only applies to situations where broker/dealer services are conducted "*on the premises* of a financial institution where retail deposits are taken" (emphasis added). The proposed rule will apply to broker/dealer services provided (including all accounts opened) in person by broker/dealer personnel on the premises of the financial institution, as well as broker/dealer services provided by telephone or other means of communication (including computer terminals) by broker/dealer personnel on the premises of the financial institution. The proposed rule change will also apply to broker/dealer services provided by a broker/dealer via the telephone or other means of communication to customers who are on the premises of a financial institution even if the broker/dealer personnel themselves may not be on the premises of the financial institution.

If the broker/dealer is conducting business in a physically separate location from the retail facility of the financial institution and is not otherwise present on the premises of the financial institution via computer terminal or other electronic communication, the rule does not apply. For example, a broker/dealer operating in separate office space on another floor or in another part of the same building, even if the building is owned or primarily occupied by the financial institution, and where the entrance to the broker/dealer's office space is through the building lobby or an exterior entrance and not through the financial institution's retail facility, the broker/dealer will be considered to be conducting its services in a physically separate location.

Subsection (a) also expressly states that the proposed rule does not alter or abrogate the member's obligation to comply with other NASD rules or the rules of other financial institution regulatory authorities with respect to the member's operations on the premises of a financial institution.

(3) Definitions

Subsection (b) of the proposed rule defines several terms used in the proposed rule, such as, "financial institution," "networking arrangement" and "brokerage affiliate arrangement," "affiliate," "broker/dealer services," and "confidential financial information." Each of the definitions are discussed below in connection with the provisions of the proposed rule where they are used. The definition of "financial institution" applies only to the proposed rule change; not to other provisions of the NASD's rules.

(4) Standards for Member Conduct

Subsection (c) of the proposed rule sets forth the specific requirements for members doing business on the premises of a financial institution as they relate to:

1. Setting;
2. Networking and brokerage affiliate agreements;
3. Compensation of registered and unregistered persons;
4. Customer disclosure and written acknowledgement;
5. Use of confidential financial information; and
6. Communications with the public.

The introduction to subsection (c) provides that no member shall conduct broker/dealer services on the premises of a financial institution [4] unless the member complies initially and continuously with the requirements of the proposed rule.

Setting. Subsection (c)(1) states that, wherever possible, broker/dealer services [5] shall be conducted in an area physically distinct from the retail deposit taking area of the financial institution. In all situations, the broker/dealer services must be identified in a manner that clearly distinguishes them from the activities of the financial institution. Finally, a member must clearly display its name in the area where broker/dealer services are provided.

The NASD recognizes that physical limitations in the space occupied by some financial institutions may prevent ideal physical distinctions of broker/dealer activities from the retail deposit-taking area of the financial institution from being maintained. Accordingly, the NASD has qualified the physical distinction requirement in this provision by the phrase "wherever possible."

In addition, the provision requires members to identify and clearly distinguish their activities from those of the financial institution, and to clearly display the member's name in the area where broker/dealer services are provided. The NASD expects that the three requirements in this provision, working in combination, will achieve the desired result, that is, the elimination of confusion among customers of the financial institution over which entity they are doing business with. The NASD expects that members unable to achieve ideal physical distinction of their broker/dealer activities from the financial institution's retail deposit taking area will pay particular attention to the other provisions of subsection (c)(1) in order to eliminate customer confusion and misidentification.

Finally, the NASD is aware of circumstances where financial institutions conduct business from walkup windows, kiosks or desks in public places, such as supermarkets or similar locations, many of which are operated by a single person. While the NASD cannot anticipate how the proposed rule would apply in all possible scenarios, the NASD believes it may be particularly difficult to adequately distinguish between the activities of the financial institution and the member as required by subsection (c)(1) in a setting such as a walkup window, kiosk or desk operated by a single person. Some of the difficulties with such settings could be resolved if the member exercises exceptional caution and adopts specific operational controls designed to avoid customer confusion and adequately distinguish its operations from those of the financial institution. However, the NASD expects members to be aware that there may be certain business settings of financial institutions where the member will not be able to comply with the requirements of subsection (c)(1), and may, therefore, be prevented from conducting business in such a location.

Networking and Brokerage Affiliate Agreements. Subsection (c)(2) of the proposed rules specifies that networking [6] and brokerage affiliate [7] arrangements between a member and a financial institution must be governed by a written agreement that sets forth the responsibilities of the parties and the compensation arrangements, including: (1) Access by broker/dealer supervisory and regulatory persons to the financial institution's premises to inspect the member's books and records; (2) a prohibition on transaction-related cash or non-cash compensation to unregistered employees of the financial institution for referrals of financial institution customers to the member; and, (3) the member's obligations to notify the financial institution if any associated person of the member is terminated for cause. The proposed rule explicitly contemplates that members will not be able to conduct a securities business on the premises of a financial institution unless a written agreement that complies with subsection (c)(2) is in place.

The requirement that the agreement provide for access by the member's supervisory and NASD and SEC regulatory personnel to the financial institution's premises is intended to ensure that the existing right of such persons and entities to examine the books and records of the member, are not affected by the fact that the member is located on the premises of a financial institution.

Compensation of Registered/Unregistered Persons. Proposed subsection (c)(3) prohibits members from providing cash or non-cash compensation to employees of the financial institution who are not registered with an NASD member. Activities for which members may not compensate unregistered persons include, but are not limited to, those activities which, under the 1934 Act, may only be conducted by a registered broker/dealer or a person associated with a registered broker/dealer: the activities include, but are not limited to, locating, introducing, or referring customers of the financial institution to the member.

Customer Disclosure and Written Acknowledgment. Proposed subsection (c)(4) specifies the disclosures that a member must make to a customer when the customer opens an account with the member on the premises of a financial institution. Members must disclose, orally and in writing, that securities products sold in a transaction with the member: (1) Are not insured by the Federal Deposit Insurance Corporation ("FDIC") or other applicable deposit insurance; (2) are not deposits or obligations of, nor are they guaranteed by, the financial institution; and (3) are subject to investment risks, including loss of principal invested. The proposed disclosures are consistent with the disclosure provisions in the Interagency Statement.

The NASD is proposing these disclosure provisions to address and eliminate customer assumptions and confusion that the securities they are purchasing from broker/dealers operating on the premises of financial institutions are either insured or guaranteed against loss of principal. Such beliefs apparently arise because customers mistakenly assume that the same insurance and guarantees that cover the deposit-type products of the financial institution also cover the securities products of the broker/dealer.

Subsection (c)(4) also requires members to make reasonable efforts to obtain a written acknowledgement of the required disclosures during the account opening process. This provision is intended to complement the oral and written disclosures members are required to give to customers opening new accounts on the premises of a financial institution. At the time the account is opened the member will provide the disclosures, both orally and in writing, and then seek to have the customer acknowledge the disclosures in writing. Because some customers may be reluctant to provide the written acknowledgement at the time the account is opened (or, indeed, at any time), the NASD is not mandating that the acknowledgement be obtained, just that the member make reasonable efforts to obtain it.[8]

Use of Confidential Financial Information. Proposed subsection (c)(5) prohibits members conducting business on the premises of a financial institution from using confidential financial information provided by the financial institution unless prior written approval has been granted by the financial institution customer to release the information. Proposed subsection (b)(5) defines "confidential financial information" [9] in terms of what it is not: i.e., it is not lists of customer names, addresses and telephone numbers, unless the customer has specified otherwise; and it is not information that could be obtained from unaffiliated credit bureaus [10] or similar companies in the ordinary course of business. Therefore, information concerning a customer that a member obtains from a financial institution with which it has a networking or brokerage affiliate arrangement (other than the name, address, and telephone numbers of the customer, or that the member could obtain on its own from an unaffiliated credit bureau) may not be used unless the customer has granted prior written approval to the financial institution to release the information. Moreover, a member must satisfy itself that the customer has granted permission to release the information, either by obtaining copies of the written release from the financial institution, or by obtaining approval directly from the customer to release the information, before the member is permitted to use such information. In accordance with the intent of this provision, a member may not, for example, use a customer list sorted by the financial institution according to a field of information that would be confidential if released as individual customer information; e.g., lists of customers with expiring Certificates of Deposits or net worth in excess of $100,000.

Communications With the Public. Proposed subsection (c)(6) sets forth requirements for all communications with customers of members operating on the premises of a financial institution, including, account statements, confirmations, advertisements and sales literature. Paragraph (c)(6)(A) requires that all communications regarding the securities transactions of customers of members doing business on the premises of a financial institution clearly indicate that the broker/dealer services are provided by the member. Moreover, communications that include information about non-deposit-insured transactions and positions with the member and deposit-insured transactions and positions or accounts with the financial institution should be clearly distinguished from each other. The NASD also notes that if members issue account statements jointly with a financial institution, the member must

---

[4] The term "financial institution" is defined in proposed subsection (b)(1) as federal and state chartered banks, savings and loans, savings banks, credit unions and the service corporations required by law of such institutions.

[5] The term "broker/dealer services" is defined in proposed subsection (b)(4) as meaning investment banking or securities business as defined in paragraph (l) of Article I of the By-Laws. Paragraph (l) of Article I reads:

(l) "investment banking or securities business" means the business, carried on by a broker, dealer, or municipal securities dealer (other than a bank or department or division of a bank), or government securities broker or dealer of underwriting or distributing issues of securities, or of purchasing securities and offering the same for sale as a dealer, or of purchasing and selling securities upon the order and for the account of others.

[6] The terms "networking arrangement" and "brokerage affiliate arrangement" are defined in proposed subsection (b)(2) as a contractual arrangement between a member and a financial institution permitting the member to provide brokerage services on the premises of the financial institution.

[7] The term "affiliate" is defined in proposed subsection (b)(3) as a company which controls, is controlled by or is under common control with a member as defined in Schedule E of the NASD By-Laws. The formulation of this definition is consistent with definitions elsewhere in the securities laws, principally Section 20 of the 1934 Act. The NASD is also making express reference to the more detailed definition of affiliate in Schedule E, Section 2(a), in order to provide additional guidance to members about what constitutes an affiliate.

[8] The approach taken by the NASD in this provision is consistent with the approach adopted by the NASD in connection with obtaining suitability information under Article III, Sections 2(b) and 21 of the Rules of Fair Practice.

[9] The NASD states that the definition of "confidential information" is based on the language of HR 1062 pending in the U.S. House of Representatives and the "credit bureau" exception is intended to except from the provision information regarding a customer that the member can obtain in the ordinary course of its business.

[10] NASD staff believes that standard information maintained by a credit bureau relates to credit history events, such as liens, loans outstanding, lines of credit, and credit cards, as opposed to net worth information that would include the value of customer assets, such as property, depository accounts, certificates of deposit, securities, and other investments.

ensure that the account statement complies with Article III, Section 45 of the Rules of Fair Practice, which requires members to periodically send account statements to their customers, as well as with the proposed new provision.

Finally, communications about securities transactions conducted by the member should be introduced to the customer in such communications with the identity of the member, and disclose to the customer that securities products are not insured by the FDIC or other applicable deposit insurance, are not deposits or obligations of the financial institution, are not guaranteed by the financial institution, and are subject to investment risks, including possible loss of principal invested. This provision is intended to provide the same disclosures in all communications with the customer as are provided when the account is opened.

Proposed paragraph (c)(6)(B) provides that advertisements, sales literature and other similar materials issued by the member which relate exclusively to its broker/dealer services will be deemed the materials of the member and must indicate prominently the identity of the member providing the services. The material may include non-prominent references to the financial institution where the broker/dealer is conducting business in order to identify the location where broker/dealer services are available. In addition, such a non-prominent reference to the financial institution may be included to disclose a material relationship between the member and financial institution, such as that of an investment adviser to an investment company.

Proposed paragraph (c)(6)(C) provides that advertisements, sales literature and other similar materials jointly issued by the member and a financial institution that discuss services or products offered by both entities must clearly distinguish the products and services offered by the broker/dealer from those offered by the financial institution. The member's name must appear prominently in the portion of the materials that describes the broker/dealer services and products offered by the member. That section of the materials will be deemed to be the materials of the member. In addition, the NASD intends to review the entire contents of all joint advertisements, sales literature and similar material to determine if the context within which the member's material appears complies with the NASD's advertising rules. For example, if a member's joint advertising material with a financial institution, when read in the context of the joint advertisement, fails to comply with the NASD's rules, the NASD may ask the member to seek modification of any part of the joint advertisement or require that the member not participate in the joint advertisement. In the event the member is unable to or chooses not to modify the joint advertisement, the member may, nevertheless, publish its portion of the advertisement separately (provided the advertisement complies with the NASD's rules).

The intent of subsection (c)(6) in general, and of paragraphs (c)(6)(B) and (c)(6)(C) in particular, is to prevent investor confusion between the products and services offered by the broker/dealer and the products and services offered by the financial institution, as well as to establish that advertising and sales literature promoting the products and services of the member conducting business on the premises of a financial institution are subject to the regulatory oversight of the NASD. With respect to such materials, the member must comply with all provisions of the NASD's rules including, but not limited to, the NASD's advertising rules, Article III, Section 35 of the Rules of Fair Practice.

Effective Date

The NASD will announce the effective date of the proposed rule change in a Notice to Members to be published no later than 60 days following Commission approval. The effective date will be no more than 60 days following the publication of the Notice to Members announcing Commission approval.

The NASD believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act[11] in that regulating the conduct of broker/dealers on the premises of financial institutions will alleviate customer confusion in dealing with such entities and provide a regulatory framework for regulating such broker/dealer activities with the result that investors will be able to make more informed investment decisions with a better understanding of the distinctions between the securities industry and other segments of the financial services industry, in furtherance of the requirement that the Association's rules promote just and equitable principles of trade, prevent fraudulent and manipulative acts and practices, and protect investors and the public interest.

(B) Self-Regulatory Organization's Statement on Burden on Competition

In response to NASD Notice to Members 94–94, a number of commentators[12] noted that the proposed rule language in that Notice required members to disclose to customers that securities products purchased or sold by the member are not insured by the Securities Investor Protection Corporation ("SIPC").[13] The commentators noted that because such disclosures would apply only to broker/dealers operating on the premises of a financial institution, it would unnecessarily discriminate among broker/dealers when customers of all broker/dealers are subject to the same potential confusion about the nature of SIPC insurance.[14] The commentators argued that if there was going to be such a requirement at all, the disclosures should apply to all member firms whether they operate on the premises of a financial institution or not. Moreover, the commentators argued that limiting SIPC disclosure to financial institution broker/dealers is not only anti-competitive but misleading because customers who are already susceptible to confusion about the nature of SIPC insurance would have their attention drawn to SIPC without a requirement that SIPC insurance be explained to eliminate customer misperceptions.

In response to the commentators, the NASD has determined to eliminate the SIPC disclosure requirement from the proposed rule change, and rely instead on the disclosures that remain in the proposed rule change which are consistent with provisions contained in the Interagency Statement issued by the four bank regulators. The provisions that remain in the proposed rule change require members to disclose to customers that securities products sold by the member (1) Are not deposit insured, (2) are not deposits of or other obligations of the financial institution and are not guaranteed by the financial institution, and (3) are subject to investment risks, including possible loss of principal invested.

Some commentators have argued that the other disclosure requirements that were contained in the proposed rules that were published in Notice to Members 94–94 (that remain in the proposed rule change) are discriminatory and burdensome on the class of broker/dealers that conduct broker/dealer activities on the premises of a financial institution. The NASD believes that the provisions of the proposed rule change as revised are necessary to address a specific problem (customer confusion) that the NASD has identified in connection with the activities of members conducted on the premises of a financial institution and has, in general, narrowly tailored the proposed rule change to address the problem.

Therefore, the NASD does not believe that these provisions or any other provisions of the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

(C) Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The proposed rule change was published for comment in Notice to Members 94–94 (December 1994) (hereinafter referred to as "original proposed rule change" or "original proposed rules"). 284 comments were received in response thereto. Of the 284 comment letters received, 54 were in favor of the proposed rule change, 51 of which requested modifications, 209 were opposed, and 21 were neither in favor nor opposed.

I. General Comments

A. Jurisdiction of the NASD in the Proposed Rules. Several commentators, including the American Bankers Association ("ABA"), the Bank Securities Association ("BSA"), and the Consumer Bankers Association ("CBA"), expressed their belief that certain provisions of the original proposed rules would subject the activities of banks to NASD regulation.[15] The commentators stated that by subjecting banks to regulation as broker/dealers, the proposed rules fail to recognize the exemption from broker/dealer registration that is afforded to banks under Section 3(a)(6) of the 1934 Act. The commentators maintained that the proposed rules also ignore the well-settled authority of banks to provide securities brokerage services directly to their customers under the Glass-Steagall Act, and cited *American Bankers Association* v. *Securities and Exchange Commission*, 804 F.2d 739 (D.C. Cir. 1986) in support.

In considering the NASD's jurisdictional reach, the ABA, BSA, CBA, and several other commentators also argued that the NASD has incorrectly interpreted the Securities and Exchange Commission's no-action letter to Chubb Securities Corporation (the "Chubb Letter"). Because the Chubb Letter was intended to govern thrift institutions that are not exempt from broker/dealer registration under the 1934 Act, the commentators stated that it is inappropriate to extend the requirements of the Chubb Letter to banks which are otherwise exempt from broker/dealer registration by means of the device of the proposed rule change.[16] Because the Chubb Letter is neither legislation nor regulation, the commentators stated that it does not give the NASD the authority to disregard the bank exemption in the 1934 Act in order to regulate banks.

The NASD never intended to, and the proposed rule change does not, extend its jurisdictional reach to banks and other financial institutions that are not members of the Association, nor to their employees. Accordingly, the NASD has amended subsection (a) to clarify that the proposed rule change applies only to NASD members providing broker/dealer services on the premises of a financial institution.

Comments about the jurisdictional reach of specific provisions of the original proposed rules are addressed in more detail below.

B. Regulatory Duplication. Several commentators said that the proposed rule change duplicates existing regulations. One group of commentators argued that the Interagency Statement issued by the financial institution regulators on February 15, 1994, and other existing financial institution regulations adequately address the activity governed by the proposed rule change.[17] In general, these commentators maintained that the activity addressed by the original proposed rules should be governed by financial institution regulations, as opposed to rules promulgated by the SEC or the NASD. In addition, another group of commentators, which included the ABA, BSA, and CBA, argued that some of the provisions of the original proposed rules were redundant of existing NASD, SEC and financial institution regulations. With respect to NASD rules, the commentators referenced existing branch office registration requirements, supervisory requirements, and personnel registration/associated persons provisions of the NASD rules. While these commentators recognized that additional regulation of financial institution broker/dealer[18] activities are appropriate, they argued that additional regulations are already in place in the form of the Interagency Statement and financial institution regulations, the Chubb Letter and existing NASD rules. The commentators believed that these guidelines, interpretations and rules adequately address the activities that would be governed by the proposed rules.[19]

The NASD agrees that some of the provisions of the original proposed rules duplicated existing NASD rules. Accordingly, the NASD has amended the proposed rules to eliminate such duplication as described in more detail below. With respect to arguments that the proposed rules duplicate the rules of other regulatory entities (e.g., the Interagency Statement), the NASD notes that many of the rules, policies and guidelines of other agencies do not directly or indirectly apply to NASD members. The NASD believes it is imperative to adopt a set of rules that establishes clear standards of conduct governing the practices of member firms operating on the premises of financial institutions that are enforceable by the NASD.

C. Discriminatory Impact and Anti-Competitive Effects. The ABA, BSA, CBA and many other commentators believe that it is inappropriate to establish separate regulations to govern

[18] As used in this rule filing, the term "financial institution broker/dealer" refers to broker/dealers affiliated with financial institutions (as defined in the proposed rule the term "financial institution" means "federal and state-chartered banks, savings and loan associations, savings banks, credit unions, and the service corporations required by law of such institutions") or conducting business with financial institutions under networking arrangements. The term "non-financial institution broker/dealer" refers to broker/dealers not affiliated with, or conducting business under a networking arrangement with, financial institutions.

[19] *See*, comment letters 2, 7, 9, 10, 11, 17, 19, 23, 24, 25, 27, 28, 29, 30, 32, 33, 34, 35, 36, 37, 41, 42, 43, 44, 45, 48, 49, 52, 53, 55, 59, 60, 61, 63, 64, 66, 67, 68, 69, 71, 74, 76, 77, 82, 84, 87, 90, 92, 97, 102, 105, 114, 115, 116, 117, 118, 119, 120, 121, 122, 124, 128, 129, 131, 132, 148, 149, 153, 156, 157, 160, 161, 162, 163, 165, 166, 168, 169, 172, 173, 174, 175, 177, 178, 184, 189, 194, 195, 197, 201, 204, 207, 208, 209, 224, 225, 228, 231, 235, 242, 243, 246, 247, 248, 249, 250, 257, 258, 259, 261, 262, 263, 273, 279, 280, 281 and 283.

broker/dealers operating on financial institution premises than those in existence for other NASD members.[20] In general, these commentators believe that the proposed rules unfairly discriminate against a class of broker/dealers in violation of Section 15A(b)(6) of the 1934 Act. The commentators argued that the 1934 Act provides no basis for a classification of broker/dealers based on location.

The NASD has identified circumstances associated with conducting broker/dealer services on the premises of a financial institution that are unique to that location and that require rules which specifically address the conduct of members engaging in such business. The principal circumstance noted is the enhanced likelihood that customers of the financial institution may not be aware of the differences between the insured depository products of the financial institution and the uninsured securities products of the broker/dealer operating in the same location. Accordingly, the NASD has determined that it is in the public interest to propose rules to address these unique circumstances. The NASD believes, therefore, that it is acting in furtherance of the 1934 Act in proposing rules to regulate the activities of broker/dealers on the premises of financial institutions in order to address on-going problems of customer confusion and the adequacy of the disclosures made.

These commentators also asserted their view that the NASD has not provided statistical data to support its contention that financial institution broker/dealers should be subject to a "higher standard of regulation." These commentators believe that the proposed rules are anti-competitive because, in their view, they create an uneven regulatory scheme favoring non-financial institution broker/dealers over financial institution broker/dealers. The NASD does not believe that the proposed rule change is anti-competitive in that the revised rule filed herein is, in general, narrowly structured to address its concern of customer confusion and investor protection.

In addition, two commentators speculated that the proposed rules are a reflection of the NASD's on-going battle with the financial institution regulators.[21] One commentator expressed its belief that the proposed rules are a reflection of competitive pressures from NASD members who fear financial institution incursions into the securities industry.[22] Finally, one commentator expressed the opinion that the rules are punitive of members who are seeking to do business with financial institutions.[23]

The NASD regrets that any commentators believe that there is a non-regulatory motivation to the proposed rules, but there is no basis for such comments. The NASD has responded to commentators by modifying the rules to clarify their jurisdictional reach, provide for greater flexibility of compliance in certain cases, and narrow the provisions to those most clearly applicable to addressing the potential for customer confusion in connection with the conduct of broker/dealer services on the premises of a financial institution.

D. Conflicting Banking and NASD Regulations. The ICI, the OCC, the FRB, the ABA, BSA, CBA, and other commentators expressed concern about requiring financial institution broker/dealers to comply with potentially conflicting requirements of the NASD and financial institution regulators.[24] The ICI stated that in the absence of functional regulation of securities activities of various entities, the financial institution broker/dealer regulations of the various regulators must be coordinated and harmonized in order to reduce burdens on industry participants. These commentators cited inconsistencies between the proposed rule change and the Interagency Statement as an example. To the extent that the proposed rule change differs from the Interagency Statement, these commentators asserted that member firm compliance will be both challenging and expensive. In addition, a few commentators requested that the proposed rule change be amended to provide a regulatory conflict resolution process.[25]

To resolve these concerns, the NASD has amended the original proposed rules to eliminate, to the degree possible, inconsistencies and conflicts between the proposed rules and existing rules and guidelines of financial institution regulators, as discussed in more detail below. Unless regulatory conflicts arise, which the NASD is not currently aware of, it is unnecessary to institute a conflict resolution process. The NASD agrees that the regulations of various regulators must be consistent and intends to continue communications with the financial institution regulators in order to coordinate interpretations and application of common provisions to avoid such problems before they develop.

E. Rationale for the New Rules. Some commentators questioned the rationale for the proposed rule change: The need to address issues of investor confusion and to provide clear guidance through rules or regulations addressing the activities of financial institution-affiliated and networking broker/dealers operating on the premises of financial institutions.[26]

As discussed above, the NASD has business practice and investor protection concerns that it believes justify the adoption of the proposed rules. The NASD believes the proposed rule change is a measured response to the concerns that have been identified and the unique circumstances present with respect to broker/dealers operating on the premises of a financial institution.

F. Disparate Treatment of Investors. Some commentators argued that financial institution customers should not be treated as a separate class of investors for purposes of customer protection.[27] These commentators said that such disparate treatment suggests that financial institution customers are less sophisticated than those who deal with separate, full service, broker/dealers.

The NASD disagrees that the proposed rule change suggests that financial institution customers are less sophisticated than customers of full service broker/dealers. As discussed above, the NASD has identified circumstances associated with conducting broker/dealer services on the premises of a financial institution that appear to be unique to that location. The principal circumstance noted is the enhanced likelihood that customers of the financial institution may not be aware of the differences between the insured depository products of the financial institution and the uninsured securities products of the broker/dealer operating in the same location. Accordingly, the NASD has determined that it is the public interest to propose rules to address these unique circumstances.

II. Specific Comments

A. Applicability. Subsection (a) of the original proposed rules provided that the section would apply exclusively to the activities of members that conduct broker/dealer services on the premises of a financial institution where retail deposits are taken.

The ICI, BSA, CBA, and a number of other commentators asked that the NASD amend subsection (a) of the proposed rules to clarify that the rules apply only to financial institution sales activities that could confuse retail customers about the uninsured nature of the securities products that are being offered.[28] The commentators noted that the Interagency Statement only applies to retail sales of non-deposit investment products. The NASD believes that the proposed rules are generally consistent with the Interagency Statement in that they apply to all non-deposit investment products sold by a member that is conducting business on the premises of a retail deposit-taking institution.

The ICI, BSA, CBA, and several other commentators also requested that the NASD clarify the phrase "on the premises" in subsection (a) to enable members to determine the applicability of the rules under various scenarios, such as, where a member is located within a financial institution building but on a separate floor.[29] Commentators also asked whether the proposed rules apply where a member leases space in a building owned by a financial institution, but the member is not in a networking arrangement with the financial institution nor is the member a financial institution affiliate.

Subsection (a) has been clarified to specify that the provisions apply only to "those broker/dealer services being conducted by NASD members on the premises of a financial institution where retail deposits are taken." It is intended that, generally, broker/dealer services will be considered separate from the retail deposit taking area of a financial institution if the broker/dealer's facilities can be entered without going through the retail facility of the financial institution. Thus, the proposed rules would not apply where the member and the financial institution are located in physically separate and separately identified offices.

Finally, the BSA recommended that subsection (a) be amended to include within the coverage of the proposed rule non-financial institution broker/dealers that offer deposit-insured financial institution products directly. The BSA expressed the opinion that such an amendment was warranted because the investor protection concerns addressed by the proposed rule change are equally as relevant with respect to non-financial institution broker/dealers that sell financial institution products.

The NASD does not agree and has no evidence that similar investor protection concerns are present with respect to customers of non-financial institution broker/dealers that sell financial institution products. The NASD believes that if such broker/dealer customers are confused about the nature and risks of securities products they are likely to believe that none of the products they purchase are insured when, in fact, the customer may acquire an insured product. Thus, any customer confusion would appear to have benign results. The NASD will, however, continue to monitor this area.

B. Definitions. Subsection (b) of the original proposed rules included definitions of the terms "financial institution," "networking arrangement," "brokerage affiliate of a financial institution," "dual employees," and "broker/dealer services." The definitions of "financial institution" and "broker/dealer services" are retained in the revised rule and discussed below. The definitions of "networking arrangement" (which has been amended to add "brokerage affiliate arrangement") and "brokerage affiliate of a financial institution" (which has been amended to, simply, "affiliate") did not generate any comments and are, therefore, discussed later in connection with the provisions where the terms appear. The term "dual employees" was deleted from the proposed rule change in connection with the NASD's revision of the original proposed rules, but not in response to a particular comment. Therefore, it is not discussed here. Finally, a definition of the term "confidential financial information" was added to subsection (b). That term is discussed below in connection with the provision where it occurs.

1. "Financial Institution." The BSA, CBA, the FRB, and First Fidelity expressed the concern that the definition of the term "financial institution" set forth in paragraph (b)(1) of the original proposed rule change inappropriately combines financial institutions and non-financial institution entities such as savings associations and credit unions within the same defined term.[30] These commentators also expressed their view that it is inappropriate to include service corporations within the definition of financial institution because service corporations themselves may be registered as broker/dealers. The NASD notes that the language of this definition is drawn from the Chubb Letter and is necessary for the proper operation and application of the proposed rule. The NASD has, however, amended the definition to ensure that it applies only to the proposed rule and not to any other NASD rule.

The FRB also suggested that the NASD consider expanding the definition of financial institution to include foreign financial institutions given that a number of foreign financial institutions have established branches in the United States, and several of these institutions have broker/dealer affiliates. The NASD believes that it is not appropriate to include within the scope of the rule foreign financial institutions not required to register as a bank, savings and loan or credit union.

2. "Broker/dealer Services." The ABA, BSA, CBA , and several commentators expressed concerns about the scope of the term "broker/dealer services" as defined in paragraph (b)(4) of the original proposed rule change.[31] The commentators stated that the proposed definition improperly limits the activities of unregistered financial institution employees. Accordingly, the commentators have recommended that the definition be amended to state that nothing in the proposed rules is intended to limit the ability of financial institutions and their employees to engage in securities transactions pursuant to the exemption from broker/dealer registration that is granted to banks by Section 3(a)(6) of the 1934 Act.

Further, the ABA and BSA raised the concern that it was unclear whether or not the proposed rule is intended to reach investment banking services offered by bank trust departments where services are offered by individuals who hold NASD licenses. Because the term "investment banking and securities business" has a settled meaning within the broker/dealer industry, the BSA

[28] *See*, comment letters 11, 27, 29, 75, 84, 94, 121, 159, 167, 172, 186, 206, 210, 211 and 274.

[29] *See*, comment letters 17, 21, 27, 29, 52, 63, 84, 106, 110, 115, 121, 129, 148, 167, 172, 177, 186, 192, 207, 208, 242, 245 and 260.

[30] *See*, comment letters 27, 84, 103 and 199.

[31] *See*, comment letters 4, 8, 17, 19, 21, 25, 27, 28, 29, 54, 62, 63, 80, 84, 106, 115, 121, 131, 129, 192, 173, 186, 207, 208, 242, 257, 260, and 281.

recommends that the NASD adopt the "investment banking" definition in paragraph (h) of Article I of the NASD By-Laws to address the problems raised with regard to the proposed broker/dealer services definition.

In this regard, it was never the intent of the NASD to extend its jurisdictional reach to banks and other financial institutions. In response to these comments, the NASD sought to clarify its intent by amending the definition of "broker/dealer services," to reference the definition of "investment banking and securities business" contained in Article I, Paragraph (l) of the NASD By-Laws. The definition in Article I of the By-Laws excludes investment banking and securities activities carried on by banks, including bank trust departments. In addition, as discussed above, the NASD has amended subsection (a) to clarify that the proposed rule change applies only to broker/dealer services conducted on the premises of a retail-deposit-taking financial institution. The NASD believes that these changes clarify that the proposed rule change does not seek to regulate the securities activities of banks that are exempt from broker/dealer registration.

C. Specific Provisions Relating to Activities of Members Operating on the Premises of a Financial Institution. 1. Physical Location. Subsection (c)(1) of the original proposed rules provided that a member's broker/dealer services shall be conducted in a physical location distinct from the area where the financial institution's retail deposits are taken. Several commentators requested clarification about the definition of "where retail deposits are taken" in subsection (c)(i) and to the term "deposit-taking area" [32] used in other provisions (i.e., is it the teller area of a financial institution?)

Many commentators criticized subsection (c)(i) as not providing adequate flexibility for financial institution locations with severe physical constraints.[33] These commentators asked the NASD to address the problem by adopting the Interagency Statement standard which, in relevant part states, "in the limited situation where physical considerations prevent sales of non-deposit products from being conducted in a distinct area, the institution has a heightened responsibility to ensure appropriate measures are in place to minimize customer confusion." [34]

Finally, the BSA and four other commentators asked whether dual employees would be required to have two separate offices for conducting activities on behalf of the financial institution and the broker/dealer.[35] These commentators maintained that customers could be confused if a dual employee were required to lead customers back and forth between two locations within the financial institution. To address this potential for customer confusion, the BSA suggested that the proposed rule change be amended to permit the use of one desk for deposit and non-deposit activities. Indeed, the BSA expressed the view that appropriately qualified dual employees should be permitted to offer customers a "menu" of retail financial products, including insured deposits and uninsured investment products, from the same location.

In response to the commentators, subsection (c)(1) of the proposed rule change was revised to require the member to operate in a distinct area "wherever possible," consistent with the Interagency Statement. In addition, the proposed rule change has been amended to require that the member "distinguish" its broker/dealer services from the services of the financial institution as opposed to "segregating" its services as required by the original proposed rule change.

With regard to the commentators' concerns regarding consistency in regulation, the NASD has amended the physical location and signage requirements and the proposed risk disclosures to ensure consistency with the Interagency Statement's standards for these matters. (See, new paragraphs (c)(1) and (c)(4), respectively.) These amendments are also discussed in greater detail below.

2. Signage. Subsection (c)(2) of the original proposed rule change stated, "in no event shall signs regarding the broker/dealer services appear in the deposit-taking area." Many commentators, including the ABA, ICI, BSA, and CBA, asked whether the proposed rules would prohibit signage in the teller window or the lobby areas.[36] The commentators argued that this requirement could interfere with directional signage pointing toward the location of the broker/dealer, ordinary brochure stands, mounted lists of affiliated companies, and other signage relating to the general availability of products and services of the broker/dealer. Rather than create confusion, the BSA argued that directional signs can help avoid customer confusion by clarifying that a deposit-taking area, such as a teller window, is not the place to obtain securities products. These commentators asserted that broker/dealer signage with appropriate disclosures should be permitted to appear anywhere on the financial institution's premises.

Other commentators expressed concerns about the potential impact of the signage requirements in the case of small financial institutions.[37] These commentators noted that signage restrictions are particularly difficult for small financial institutions and small branch offices to deal with because practically all public areas could be regarded as deposit-taking areas. Further, the commentators noted that small branches may not reserve one desk solely for investment services thus preventing the segregation desired by the original proposed rules. The commentators also observed that signage restrictions, when combined with the physical location requirements, would prevent one-desk branch locations. Accordingly, these commentators recommended that the proposed rules be amended to permit signage that would facilitate dual usage of a service desk by broker/dealer and financial institution employees.

One commentator stated that, in its view, the proposed signage restrictions would interfere with the financial institution's commercial speech which is protected by the First Amendment of the U.S. Constitution.[38] This commentator also stated that this interference with the financial institution's rights resulted in the NASD's assertion of jurisdiction over the financial institution.

The NASD disagrees and does not believe that the proposed rule change infringes on the limited First Amendment protection on commercial speech because the U. S. Constitution acts as a restraint on governmental action and the First Amendment's free speech guarantee is a limitation on Congress' ability to enact laws abridging freedom of speech. The NASD's actions as a private, non-governmental, securities industry, self-regulatory organization (actions that include adopting rules or enforcing standards of business conduct) are not governmental actions subject to Constitutional restraint. Nevertheless, the NASD applies a standard of fundamental fairness in its dealings with its members and its rules, including the rule change proposed herein, are narrowly tailored to achieve legitimate regulatory purposes. The NASD also notes that even if the NASD's regulatory proposals were constrained by the Constitutional protection on commercial speech, those protections are limited to the extent that reasonable regulations of commercial speech are necessary to protect the public interest and the proposed rule change is a reasonable regulation of commercial speech.

Nevertheless, in response to the commentators, the NASD has amended the proposed rule change to delete the separate provision relating to signage, including the provisions prohibiting signs regarding broker/dealer services in the financial institution's deposit-taking area. The requirement in the deleted provision that a member clearly display its name in the area where brokerage services are being conducted has been consolidated with Subsection (c)(1) of the proposed rules. Thus, as long as signage meets the other requirements of the proposed rule change, as well as existing NASD rules requiring accurate information that is not misleading under the circumstances in which it is used, there are no other limitations.

3. Branch Office Registration Requirements. Subsection (c)(3) of the original proposed rules restated an already existing NASD rule requirement that the member must register as a branch office any of its offices which operates on the premises of a financial institution. Most commentators, including, among others, the ICI, ABA, BSA, and CBA, asked that the provision be amended to exempt from branch registration requirements locations where a broker/dealer meets a client in a financial institution office for purposes of customer convenience, but where the financial institution office is not permanently staffed by the NASD member, nor is the location held out as a branch of the NASD member.[39] These commentators expressed significant concerns regarding the cost of registering locations serviced by so-called "circuit riders" if the NASD does not amend the rule to provide an exception for meetings between a member's registered representative and financial institution customers that occur on an appointment basis at financial institutions.

In addition, the BSA expressed the opinion that, if the NASD has determined to publish an interpretation of what is a "branch office" under Section 27(g)(2) of the Rules of Fair Practice, it should be done in a uniform manner applicable to all NASD members and not as a formal NASD rule applicable only to financial institution broker/dealers. The ABA and the CBA also argued that there was no justification for treating financial institution branches any differently than other retail outlets for purposes of branch office registration.

Further, commentators observed that requiring registration of every location at which a representative meets with a customer could limit the ability of members to service customers where states do not permit a registered representative to work out of more than one registered location.[40]

Finally, the Independent Bankers Association of America ("IBAA") and two other commentators argued that the branch office registration requirements would result in compliance problems with respect to the books and records maintained at the financial institution location.[41] To address this concern, the IBAA asked that the rules be amended to provide limited relief to allow financial institution broker/dealers to maintain books and records at a more central location, for example, the main office of the financial institution.

The NASD appreciates the concerns expressed by these commentators and, accordingly, has amended the proposed rules to delete the branch office registration requirements and, instead, rely on the branch office registration requirements currently in effect under existing NASD rules. Therefore, members doing business on the premises of a financial institution will be expected to comply with the branch office requirements in the NASD's rules that currently apply to all other members.

4. Networking and Brokerage Affiliate Agreements. Subsection (c)(4) of the original proposed rules provided that relationships between financial institutions and members (whether network or affiliate) be governed by an agreement that sets forth the responsibilities of the parties.

Regulatory Access—Paragraph (c)(4)(A) provided that the written agreement between the broker/dealer and the financial institution, among other things, specify that the SEC and the NASD must be granted access to the financial institution premises to inspect the books and records of the broker/dealer and other relevant information maintained by the member with respect to its broker/dealer services. With respect to this requirement, the North American Securities Administrators Association Inc. ("NASAA") and the State of Iowa urged the NASD to amend the provision to grant such access to state regulators. [42] The NASD formulated this provision to be consistent with the Chubb Letter. It is believed that state regulators currently have appropriate authority to have access to the premises of financial institutions to inspect the books and records of broker/dealers. The BSA stated that the SEC will use this right of access provision to indirectly regulate any desired activity of a financial institution.[43] The NASD believes that the concerns of the BSA are more appropriately directed to the SEC.

Periodic Reviews—Paragraph (c)(2)(C) of the original proposed rules required that the financial institution agree to permit the member to conduct periodic reviews to assure that the financial institution and its unregistered employees comply with the limits on their activities with respect to securities transactions and non-deposit broker/dealer services. One commentator stated that the provision could be interpreted to require that an unaffiliated network member be granted access to the books and records of its partner financial institution for periodic reviews.[44] This commentator also stated that, if the financial institution and the networking member compete in several lines of business, the requirement would have had the net effect of discouraging a financial institution's participation in networking arrangements in order to avoid disclosing confidential business information.

Further, with regard to a member conducting periodic reviews to assure that the financial institution and its unregistered employees comply with the limits on their activities, the ICI, BSA, CBA, and several other commentators argued that it is inappropriate for an NASD member to serve in the role of an auditor. They

argued that this responsibility is more appropriately handled by the financial institution.[45] The commentators also asserted that the financial institution should be responsible for conducting its own supervision, training, investigations, and compliance as it relates to the activities of its own employees who are not registered with a broker/dealer. The commentators stated that it is impractical for a small number of broker/dealer employees to monitor the activities of all unregistered financial institution employees.

Additionally, one commentator asked what actions a member could take against a financial institution if it believes the financial institution has not complied with the limits on its activities with respect to securities transactions and non-deposit broker/dealer services.[46] Another commentator argued that the contractual obligations of proposed Paragraph (c)(4)(C) would create broker/dealer liability for financial institution employees over whom the broker/dealer has no control.[47]

The ICI urged the NASD to revise the paragraph to require that members only obtain a commitment from the financial institution such that the financial institution agrees that it will promulgate and implement procedures reasonably designed to ensure compliance with the limits on the activities of unregistered financial institution employees rendered in connection with the member's broker/dealer services.

In response to the foregoing comments, the NASD has amended the proposed rule change to delete paragraph (c)(4)(C).

Dual Employees—Paragraph (c)(4)(D) of the original proposed rules provided that the written networking or brokerage affiliate agreement must require that any dual employee who is suspended from association with the member, or who the SEC, the NASD, or any other regulatory or self-regulatory organization bars or suspends from association with the member or any other broker/dealer, will be terminated or suspended, respectively, from all securities activities conducted directly by the financial institution. Many commentators strongly objected to the jurisdictional reach of this provision.[48] The commentators stated that financial institutions must retain the discretion to determine what situations justify an employee's termination or suspension.

One commentator stated that there may be a multitude of NASD, SEC or other regulatory reasons for which an employee may be suspended. The commentator maintained that some of these reasons may by regulation require a financial institution to suspend or terminate the employee's activities. However, the financial institution may not in the exercise of its independent judgment consider certain other reasons as justification for barring the employee from engaging in securities activities conducted by the financial institution.[49]

Further, one commentator stated that requiring the financial institution to agree to terminate or suspend employees would result in the creation of a "black list" of employees that could potentially expose the financial institution to lawsuits by such black-listed employees.[50] Rather than adopting the proposed contractual agreement of the financial institution to terminate or suspend employees, one commentator proposed that financial institutions be provided access to the Form U–5 for terminated employees.[51]

In response to the foregoing comments, the NASD has amended the proposed rule change to delete paragraph (c)(4)(D).

Competition—Paragraph (C)(4)(E) of the original proposed rules required that a contractual agreement with the financial institution provide that "unregistered employees of the financial institution will not receive any compensation, cash or non-cash, that is based on the effectiveness or success of referrals * * *." Many commentators, including the ABA, BSA and OCC, urged the NASD to define the terms "success" and "effectiveness of referrals" arguing that a prohibition based on the effectiveness of sales rather than a transactional nexus is too ambiguous.[52] The commentators asked how the provision would apply where the financial institution provides payment for referrals that result in an appointment with a broker/dealer rather than a transaction.

The ABA also stated that a standard based on the success or effectiveness of referrals is stricter than existing NASD and financial institution standards that permit a referral payment where it is not tied to the success of a sale or opening of a broker/dealer account.[53]

Other commentators, including the ABA and the BSA, challenged the NASD's authority to regulate the compensation paid by a financial institution to its employees through contractual obligations of an NASD member.[54] These commentators stated that, as a general matter, financial institution regulations provide adequate investor protection safeguards with regard to the financial institution's payment of referral fees and, accordingly, NASD regulation of such payments was not required.

In response to the foregoing comments, the NASD has amended this provision to prohibit compensation that is conditioned on whether a referral results in a transaction, which is consistent with comparable provisions of the Interagency Statement. *See*, paragraph (c)(2)(B) of the proposed rule change.

Notification—Paragraph (c)(5) of the original proposed rules provided that the networking or brokerage affiliate agreement must require that the member notify the financial institution if any dual employee who is associated with the member is terminated for cause by the member. Three commentators asserted that the provision would lead to civil penalties because the disclosure of the reasons for a suspension and/or termination raises privacy issues which, absent permission from the associated person, may subject the broker/dealer to civil liabilities.[55] One commentator suggested that should the NASD determine to address the civil liability issues, it would be more appropriate to require the broker/dealer to notify the financial institution that it would no longer utilize the services of a financial institution employee and, thereafter, direct the financial institution to review the employee's Form U–5.[56]

The NASD has determined to retain this provision as paragraph (c)(2)(C) substantially unchanged. The NASD believes the financial institution should have this information in order for it to review and determine its own regulatory obligations with respect to the terminated individual.

5. Personnel Registration/Associated Person. Subsection (c)(6) of the original proposed rule change provided that broker/dealer services offered by the member could be provided only by persons associated with the member, except that unregistered dual employees of the member and financial institution could provide "clerical and ministerial assistance." Several commentators requested clarification of the phrase "clerical and ministerial assistance,"[57] and observed that limiting employees activities to "clerical and ministerial" duties could be viewed as ignoring the exemption from broker/dealer registration afforded banks under Section (3)(a)(6) of the 1934 Act. In addition, the commentators asked that subsection (c)(6) be clarified to focus on the participation of unregistered financial institution employees in a member's sales activities, rather than participation of unregistered financial institution employees in a financial institution's direct sales efforts.

In response to the comments, the NASD has determined that subsection (c)(6) is redundant of other provisions of the securities laws and, therefore, is unnecessary. Bank employees may engage in direct securities activities pursuant to the exemption from broker/dealer registration contained in Section 3(a)(6) of the 1934 Act, subject only to the restrictions on bank securities activities in federal banking law. To the extent the employees of all other types of financial institutions engage in securities activities, they must be registered as associated persons of a registered broker/dealer. Accordingly, the NASD has amended the proposed rule change to delete subsection (c)(6).

6. Compensation of Registered/Unregistered Personnel.

Paragraph (c)(7)(A) of the original proposed rules provided that transaction-related compensation of a member's registered representatives, including dual employees, must be determined solely by the member. In response, the BSA, CBA, and several other commentators have advised the NASD that this requirement conflicts with existing financial institution regulations that require the financial institution to ensure that compensation does not influence sales of unsuitable products.[58] In addition, commentators maintained that this provision would compromise the ability of a financial institution to meet its overall company goals.

Paragraph (c)(7)(B) of the original proposed rule provided that employees of the financial institution who are not registered with the NASD member may not receive any compensation from the member, cash or non-cash, in connection with, but not limited to, the referral of customers of the financial institution to the member. Many commentators, including the ICI, BSA, CBA, and the FRB, argued that the provision is inappropriate and unwarranted because referral fees provide an appropriate incentive to increase customer awareness of all types of deposit and non-deposit products that are available to financial institution customers.[59] Moreover, commentators argued that banning such referral payments would create a competitive disadvantage for financial institution broker/dealers because members who do not operate on the premises of a financial institution have more leeway under SEC no-action letters and enforcement decisions in providing compensation to unregistered persons.

The commentators also argued that the referral fees prohibition is inconsistent with the Interagency Statement and the Chubb No-action Letter, among others. Finally, the commentators stated that the prohibitions regarding referral fees are inconsistent with the NASD's long-standing position that "one-time fees not tied to the completion of a transaction or the opening of an account" are permitted.[60] Several commentators were also confused about whether the financial institution and the broker/dealer were both prohibited from paying referral fees to unregistered employees.[61]

Paragraph (c)(7)(B) previously published for comment referred only to compensation paid by an NASD member. It would not have regulated the compensation a financial institution may provide to its own employees. The NASD's longstanding position regarding referral fees has been that if one-time payments by a member to an unregistered individual occur on a regular, on-going basis, the recipient is required to register as an associated person.[62] In addition, an NASD member may not do indirectly what it is prohibited from doing directly, i.e., an NASD member may not compensate employees of the financial institution for referrals through payments made directly to the employee or by payments directed in the first instance to the financial institution.

The NASD also believes the commentators misunderstand the meaning of the "one-time payment exception" that has previously been the policy of the NASD and was reflected in the provision published for comment. As stated above, the exception does not permit a series of "one-time payments" because such a series of payments would become part of the employee's regular course of business, a circumstance that would require registration. To meet the requirements of the exception that has previously been the policy of the NASD, a payment must be a singularly unusual event; i.e., so infrequent that it cannot be regarded as part of the regular business or activity of the employee.

In response to the comments received, however, the NASD has substantively amended the provisions of the original proposed rule change by clarifying and consolidating them into a single provision, subsection (c)(3), that prohibits a member from providing compensation to the employees of a financial institution who are not registered as associated persons of a member in connection with, but not limited to, locating, introducing, or referring customers of the financial institution to the member.

7. Supervision and Responsibility. Paragraph (c)(8)(A) of the original proposed rules provided that a designated principal of the member shall supervise registered personnel at the member's location at the financial

[60] In support of its argument that paying referral fees is acceptable and consistent with the NASD's long-standing position, the ICI cites NASD Notice to Members 89–3 (January 1993), in which the NASD proposed, but never adopted, a rule to restrict the payment of referral fees. The rule change proposed in NTM 89–3 would have permitted the payment by a member of a small fixed fee for a referral where the payment is occasional, not part of a practice of such payments to the recipient, not determined by the outcome of the referral, and where the recipient does not regularly engage in activity that might reasonably be expected to result in continued referrals.

The NASD believes the ICI is incorrect in its assertion that paying referral fees is acceptable and consistent with the NASD's longstanding position. Quite to the contrary, the rule change proposed herein is consistent with that position. The rule proposed in NTM 89–3 was a codification of the NASD's position that the payment of referral fees is not permitted, except in very narrow circumstances. Permitting the payment of referral fees for activity described in this proposed rule change would not have met the exception proposed in NTM 89–3.

[61] *See*, comment letters 4, 9, 14, 15, 16, 18, 21, 27, 29, 30, 39, 50, 64, 77, 80, 83, 84, 85, 86, 92, 94, 107, 108, 109, 122, 125, 144, 145, 152, 154, 155, 187, 203, 204, 205, 207, 213, 215, 220, 221, 222, 223, 237, 242, 258, 267, 275 and 277.

[62] *See*, NASD Guide to Rule Interpretations, 1994 Net Capital and Customer Protections Rules, p. 108.

institution. Several commentators urged the NASD to amend this provision to clarify that the designated principal deemed to be responsible for supervising registered personnel at the member's location at the financial institution is not required to be physically present at the financial institution location.[63] Further, commentators argued that the provision duplicates existing supervisory requirements applicable to all NASD members, as set forth in Article III, Section 27 of the Rules of Fair Practice.

The ICI argued that the NASD should delete paragraph (c)(8)(C) of the original proposed rules which required a member to supply financial institutions with written procedures that specify the limits of the permissible activities of unregistered persons.[64]

In response to the commentators, the NASD has determined to delete paragraph (c)(8) of the original proposed rules in its entirety as generally redundant of the member's obligations under already existing NASD rules.

8. Customer Disclosure and Written Acknowledgment. Subsection (c)(9) of the original proposed rules required a member to obtain a separate written acknowledgment at the time an account is opened that the securities products purchased or sold by the member through offices located on the premises of a financial institution: (1) Are not insured by the FDIC; (2) are not deposits or other obligations of the financial institution and are not guaranteed by the financial institution; (3) are subject to investment risks, including possible loss of the principal invested; and, (4) are not insured by the Securities Investor Protection Corporation ("SIPC") as to the loss of principal amounts invested.

Several commentators argued that the disclosures required in the proposed separate written acknowledgment should be made by all broker/dealers because, as the BSA asserted, investors who purchase securities through non-financial institution broker/dealers would benefit equally from these required disclosures, especially non-financial institution broker/dealers offering insured products.[65]

Other commentators stated that a requirement to obtain written acknowledgment of the disclosures prior to conducting business with a customer who opens an account by telephone would have an adverse impact on members that service the financial institution's customers because many of these accounts are opened by telephone and written documentation is usually sent to the customer by the broker/dealer after the account is opened. These commentators proposed that the rule be amended to permit a member's registered representative to state the disclosure over the telephone and subsequently forward the written documentation for execution.[66]

Some commentators, including the CBA and BSA, opposed the concept of requiring a "separate" written acknowledgment of the required disclosures based on their belief that the Interagency Statement permits these disclosures to appear in the customer agreement or account application.[67] Accordingly, the BSA, the CBA, and other commentators proposed that the disclosures be a part of a new account form/account application.[68]

A number of the commentators, including the OCC, expressed concerns about competing disclosures of the NASD and financial institution regulators, especially when the expenses associated with printing disclosure documents are considered.[69] One commentator, Citicorp Investment Services, noted that compliance costs for the Interagency disclosures were in excess of one million dollars, yet the proposed rule change would require existing materials to be reprinted.[70] The commentators urged the NASD to coordinate with financial institution regulators to adopt one standard disclosure.

Many commentators, including the ICI, OCC, and the FRB, said that the proposed SIPC disclosure would cause greater confusion than existing disclosure requirements.[71] The commentators argued that the SIPC disclosure is confusing because it stands alone with no explanation of SIPC. The OCC and a number of other commentators recommended that, in the alternative, the NASD should amend the proposed rule change to require the SIPC disclosure only where sales activities include representations regarding SIPC. A number of commentators also expressed their view that the proposed SIPC disclosure is technically incorrect because the loss of principal amounts invested is protected where a broker/dealer becomes insolvent.[72] One commentator suggested that the SIPC disclosure be amended to state that "losses due to market fluctuation are not protected by SIPC."[73]

A large number of commentators also noted that the proposed SIPC disclosures discriminate among broker/dealers. They argued that if the SIPC disclosure requirement is to be adopted at all, the disclosures should apply to all member firms whether operating on financial institution premises or not; limiting SIPC disclosure to financial institution broker/ dealers is not only anti-competitive but misleading.[74]

In response to these comments, the NASD has determined to delete the proposed SIPC disclosure in paragraph (c)(9)(D). The required disclosure set forth in subsection (c)(4) of the proposed rule change is now substantively identical to that contained in the Interagency Statement.

9. Solicitation. Subsection (c)(10) of the original proposed rules prohibited members from using confidential financial information maintained by the financial institution to solicit customers for its broker/dealer services.[75] Many of the commentators argued that, to the extent there are special concerns when a financial institution provides confidential financial information, the concerns are properly the subject of financial institution regulation and existing federal privacy laws, not NASD rulemaking.

Some commentators who opposed the limitations advised the NASD that prohibitions on a member's use of confidential financial information should apply equally to all broker/dealers. The commentators argued that there is no public policy reason why customer information possessed by affiliates of non-financial institution broker/dealers on real estate holdings, consumer finance loans, insurance, or other financial matters should be treated differently than customer information provided by a financial institution.

The commentators asked, however, if the NASD determines to retain this aspect of the proposed rule change, that the provision be amended to allow a member's use of confidential financial information where a customer has approved of such use. In addition, the OCC recommended that the provision be amended to require members to establish policies and procedures regarding the use of confidential financial information instead of banning the use of such information. Many commentators asked that the term "confidential financial information" be defined, if the NASD retains the provision in the proposed rule change.[76]

Finally, some commentators asked how a member could restrict the use of confidential information where dual employees have access to the information.[77] Another commentator asked that the rule be amended to permit the financial institution to control abusive use of confidential financial information where a wholly-owned broker/dealer subsidiary is involved.[78] Another commentator also urged that sharing confidential information should be permitted where the financial institution and the broker/dealer are affiliates.[79]

In response to the comments, the proposed rule change has been amended in subsection (c)(5) under a new heading entitled "Use of Confidential Information" to allow the use of confidential financial information with the prior written approval of the customer. In addition, a definition of the term "confidential financial information" has been added to the proposed rule change which provides that information will not be regarded as confidential if it can be obtained from unaffiliated credit bureaus or similar companies in the ordinary course of business.[80] Further, a customer's name, address and telephone number are not confidential information unless the customer specifies otherwise.

10. Communications with the Public. Paragraph (c)(11)(B) of the original proposed rule change required that all communications regarding securities transactions and long and short positions, including confirmations and account statements, must clearly indicate that the broker/dealer services are provided by the member and not by the financial institution, and must be sent directly to the customer by the member. Commentators, including the ICI, ABA, BSA, CBA, FRB, and the OCC, asked that this provision be amended to permit combined account statements of a broker/dealer and a financial institution as a customer service.[81] These commentators argued that requiring a separate statement would increase costs, reduce efficiencies and frustrate consumers. These commentators also noted that the prohibition is particularly problematic with respect to "sweep accounts" and individual retirement accounts at financial institutions which allow for investments in securities products offered through an NASD member.

Paragraph (c)(11)(B) of the original proposed rule change also required that all communications sent by the member to a customer must clearly indicate that the broker/dealer services are provided by the member and not by the financial institution. Several commentators asserted that requiring the member to disclose that the financial institution is not the broker/dealer may lead to customer confusion.[82] These commentators also asked whether the requirement that the communication "clearly indicate that the broker/dealer services are provided by the member" requires an affirmative statement to that effect. Finally, one commentator argued that identifying a specific financial institution in the disclosure is burdensome where a member is networking with more than one financial institution.[83]

Finally, paragraph (c)(11)(B) of the original proposed rules also required the member to ensure that any documentation regarding securities transactions sent directly to a member's customer by an issuer, transfer agent, or principal underwriter is in compliance with the federal securities laws and NASD rules. Several commentators argued that the member should not be responsible for correspondence from the issuer, transfer agent, or underwriter, particularly in the absence of SEC rules requiring these entities to submit such communications to the NASD member firm for review prior to dissemination.[84]

One commentator also argued that smaller members may not have the economic clout to require the issuer, underwriter, and others to submit such documentation to the member in order to ensure that they comply with the rules.[85] Another commentator asserted that ensuring that documents sent by third parties comply with SEC and NASD rules would impose strict liability upon members for matters that are often beyond their knowledge or control.[86] Another commentator stated that the rule would make the member liable for misrepresentations appearing in prospectuses and offering circulars about which the member has no knowledge.[87]

In response to the comments received, the proposed rule change has been amended to permit a joint account statement where the member's securities products are clearly distinguished from FDIC-insured products of the financial institution, which is included as paragraph (c)(6)(A) of the proposed rule change. In addition, the provision has been amended to delete the requirement for members to ensure the accuracy of communications sent by third parties.

Paragraph (c)(11)(C) of the original proposed rules provided that any advertisement or sales literature, as defined in Article III, Section 35 of the NASD Rules of Fair Practice, used to describe or promote the availability of broker/dealer services of the member on the premises of a financial institution

[80] The NASD has indicated that credit bureaus obtain and report information concerning the creditworthiness of individuals such as loan payment histories, checking and savings account activity, available credit, and total debt information. Similarly, the NASD staff has stated its belief that credit bureaus do not maintain net worth information including the value of the customer assets such as property, depository accounts, certificates of deposits, securities and other investments. See Letters from Elliott R. Curzon and Suzanne E. Rothwell, Assistant General Counsel, NASD, to Mark Barracca, Branch Chief, SEC, note 2, *supra*.

must be approved by the member prior to distribution, in compliance with Article III, Section 35(b)(1) and, where required, filed with the NASD Advertising Regulation Department. Several commentators asserted that this provision would expand the filing requirements of members because it would require that all advertisements issued by a financial institution that mention the member be filed with the NASD.[88] The FRB asserted that the NASD does not need to review financial institution advertisements that describe products and services offered by an NASD member because such materials are reviewed by financial institution regulators to ensure that the materials are accurate and not misleading.[89]

In response to the comments received, the NASD has deleted this provision and substituted more general requirements in paragraphs (c)(6)(B) and (C) to require that the financial institution may only be referenced by a member in a non-prominent manner in advertisements, sales literature or similar materials, and that such material, if jointly issued by the member and the financial institution, must distinguish clearly between the products and services offered by the member and the financial institution.

Paragraph (c)(11)(D) of the original proposed rule provided that advertisements and sales materials issued by the member which relate exclusively to its broker/dealer services must indicate prominently that the broker/dealer services are being provided by the member and not the financial institution; that the financial institution is not a registered broker or dealer; and whether the member is or is not affiliated with the financial institution. The ICI and other commentators asserted that requiring a member to reference the financial institution for the sole purpose of complying with this provision, although the financial institution is not otherwise affirmatively mentioned, may lead to customer confusion.[90] The BSA and other commentators also argued that stating that the bank is not a broker/dealer ignores the fact that the bank may be operating as a broker/dealer exempt from registration under of the 1934 Act. Indeed, one commentator suggested that stating that the bank is not a broker/dealer connotes inferiority and misleads the public by implying that the bank is required to be registered.[91] Another commentator noted that stating that the bank is not a broker/dealer would be inaccurate with respect to its particular arrangement because the financial institution in its case operates a bond department which is in fact a registered broker/dealer.[92]

Some commentators, including the ABA and CBA, stated that no disclosures should be required beyond what is presently required by the Interagency Statement (i.e., deposits are not FDIC insured, obligations of the financial institution or guaranteed by the financial institution, and involve risks.)[93]

In response to the commentators, the NASD has amended this provision, now set forth in paragraph (c)(6)(B), to delete the requirements that members disclose that the financial institution is not a registered broker/dealer, and whether the member is or is not affiliated with the financial institution. The provision now requires disclosure of any material relationship between the member and the financial institution.

Paragraph (c)(11)(D) of the original proposed rules also permits advertisements and sales literature issued by the member which relate exclusively to its broker/dealer services to reference the financial institution in a non-prominent manner solely for the purpose of identifying the location where broker/dealer services are available. The ICI, BSA, CBA, and the FRB said that restrictions on references to the financial institution may be misleading where the financial institution acts as an investment adviser to proprietary funds.[94] These commentators believe that the restrictions on references to the financial institution may prevent truthful advertising of the affiliation between the financial institution and the broker/dealer. The NASD has modified this requirement, which is now set forth in paragraph (c)(6)(B) of the proposed rule change, consistent with the provisions of the Chubb Letter.

Other commentators stated that the limitations on references to the financial institution set forth in paragraph (c)(11)(D) are inconsistent with Article III, Section 35, which allows a member to use a "generic name," provided that the identity of the member firm and its relationship to the name are conspicuously set forth.[95] The NASD does not intend for the proposed rule change to modify the ability of members to rely on Article III, subsection 35(f)(3)(B) to use a generic name.

Paragraph (c)(11)(E) of the original proposed rule change permitted jointly issued material if the name of the member is displayed prominently in the section of the materials that describes the broker/dealer services offered by the member, which section will be deemed material of the member. This concept of segregated advertising, according to the ICI, the FRB, and other commentators, will prove to be problematic in practice because it is difficult to physically separate the discussion of broker/dealer services when the product offered includes services from both the depository institution and the broker/dealer.[96] In response to these comments, the NASD has amended the provision set forth in paragraph (c)(6)(C) of the proposed rule change to require that joint sales materials "distinguish" the products of the member from those of the financial institution.

Some commentators suggested that the NASD amend paragraph (c)(11)(E) to provide for introductory letters permitting the financial institution to introduce financial institution customers to the broker/dealer.[97] The NASD has determined not to amend the proposed rule change as requested, because it does not believe the proposed rules currently prohibit such letters.

Finally, paragraph (c)(11)(D) of the original proposed rules provided that the financial institution must appear in a non-prominent manner in advertising relating exclusively to broker/dealer services, while paragraph (c)(11)(E) of the original proposed rules states that the name of the member must be displayed prominently in the section of jointly issued material that describes broker/dealer services offered by the member. Some commentators asked that the term "prominently" be defined.[98] Further, some of these commentators maintained that the provisions are inherently inconsistent with one another in that they require the financial institution to appear in a non-prominent manner, while also requiring the member to disclose that the financial institution is not a broker/dealer and broker/dealer services are not offered by the financial institution.[99] The NASD has amended these provisions which are set forth in paragraph (c)(6)(B) and (C) by eliminating the provisions which create the apparent inconsistency.

Some commentators asserted that communications with the public should be uniform among all broker/dealers if eliminating customer confusion is truly the NASD's goal.[100] The NASD agrees and believes the proposed rule change advances that goal.

D. Financial Institution Logos. While the proposed rule change does not specifically address the issue of the use of financial institution logos in advertisements and sales literature, several commentators, including the FRB, asked the NASD to clarify its position on the use on financial institution logos by NASD members to dispel any confusion about the permissibility of using financial institution holding company family logos. The FRB urged the NASD to permit the broker/dealer to use an affiliated financial institution logo to advertise its services.[101] Subsequent to the publication of Notice to Members 94–94, the NASD issued Notice to Members 95–49 to clarify its previous statements on the use of logos of financial institutions in advertisements and sales literature of members in a manner consistent with the Chubb Letter. The Notice stated that the logo of a non-member (representative only of the non-member) may only be used in member communications to identify the non-member entity.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The NASD consents to an extension of the time for Commission action to 30 days from the end of the comment period specified in Item IV below. At such time, the Commission will:

A. By order approve such proposed rule change, or

B. Institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to the file number in the caption above and should be submitted by May 21, 1996.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[102]

Margaret H. McFarland,

Deputy Secretary.

[Release No. 34–36981; File No. SR–PSE–95–28]

Self-Regulatory Organizations; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment Nos. 1, 2, and 3 to the Proposed Rule Change by the Pacific Stock Exchange, Inc., Relating to Establishing a Hedge Exemption for Narrow-Based Index Options

March 15, 1996.

On November 1, 1995, the Pacific Stock Exchange, Inc. ("PSE" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] and Rule 19b–4 thereunder,[2] a proposed rule change to amend PSE Rule 7.6, "Position Limits for Index Options," to establish a hedge exemption from industry (narrow-based) index option position and exercise limits.[3]

The proposed rule change was published for comment in the **Federal Register** on December 6, 1995.[4] On January 31, 1996, on February 29, 1996, and on March 15, 1996, the PSE amended its proposal.[5] No comments were received on the proposed rule change.

The PSE proposes to amend its rules to provide that industry index option positions may be exempt from established position and exercise limits for each contract "hedged" by an equivalent dollar amount of the underlying component securities or securities convertible into such components, provided that each option position to be exempted is hedged by a position in at least 75% of the number of component securities underlying the index, and that the underlying value of the option position does not exceed the value of the underlying portfolio. The value of the portfolio is: (a) The total market value of the net stock position, less (b) the value of (1) any offsetting calls and puts in the respective index option; (2) any offsetting positions in related stock index futures or options; and (3) any economically equivalent positions.[6] The values of any such index option position or related futures position are determined by aggregating the notional value[7] of each option contract comprising the position. Under the proposed exemption, position and exercise limits for any hedged industry

[1] 15 U.S.C. § 78s(b)(1) (1988).

[2] 17 CFR 240.19b–4 (1995).

[3] Position limits impose a ceiling on the number of option contracts which an investor or group of investors acting in concert may hold or write in each class of options on the same side of the market (*i.e.*, aggregating long calls and short puts or long puts and short calls). Exercise limits prohibit an investor or group of investors acting in concert from exercising more than a specified number of puts or calls in a particular class within five consecutive business days.

[4] *See* Securities Exchange Act Release No. 36526 (November 29, 1995), 60 FR 62517.

[5] On January 31, 1996, the PSE amended its proposal to indicate that the requirements of subsections (a), (b), (c), (f), (g), (h), and (i) of Commentary .02, "Broad-Based Index Hedge Exemption," will apply to narrow-based index option hedge exemptions. In addition, the PSE clarified its rules by indicating that exercise limits will correspond to position limits under both the narrow-based and broad-based index hedge exemptions. Finally, the PSE stated that whenever the Exchange grants a narrow-based index option hedge exemption, it will monitor the equity position used as a hedge on a daily basis. *See* Letter from Michael D. Pierson, Senior Attorney, Market Regulation, PSE, to Yvonne Fraticelli, Attorney, Office of Market Supervision ("OMS"), Division of Market Regulation ("Division"), Commission, dated January 30, 1996 ("Amendment No. 1"). On February 29, 1996, the PSE amended its proposal to indicate that economically equivalent positions must be deducted from the market value of the net stock position in order to determine the value of the underlying portfolio. The amendment also provides examples of the number of contracts that a market participant may hold and exercise pursuant to the exemption. *See* Letter from Michael Pierson, Senior Attorney, Market Regulation, PSE, to Yvonne Fraticelli, Attorney, OMS, Division, Commission, dated February 29, 1996 ("Amendment No. 2"). On March 15, 1996, the PSE clarified the test of its rule by indicating that the position in a narrow-based index option may not exceed the total of: (a) the limit established under PSE Rule 7.6, plus (b) two times that limit (for hedged positions). *See* Letter from Michael D. Pierson, Senior Attorney, Market Regulation, PSE, to Yvonne Fraticelli, Attorney, OMS, Division, Commission, dated March 14, 1996 ("Amendment No. 3").

[6] *See* Amendment No. 2, *supra* note 5.

[7] Notional values are determined by adding the number of contracts and multiplying the total by the multiplier, expressing that number in dollar terms.

index option may not exceed two times the limits established under PSE Rule 7.6(a).[8]

Members, member organizations, and public customers seeking to use the proposed exemption must obtain prior Exchange approval. In addition, the exemption requires that both the option and stock positions be initiated and liquidated in an orderly manner. Specifically, a reduction of the option position must occur at or before the corresponding reduction in the stock portfolio position.

Under the proposal, exercise limits will correspond to position limits, so that investors may exercise the number of contracts set forth as the position limit, as well as those contracts exempted by the proposal, during five consecutive business days.[9]

The Exchange believes it is appropriate to expand the availability of the proposed narrow-based index option position limit exemption beyond public customers.[10] According to the PSE, because customers rely, for the most part, on a limited number of proprietary traders to facilitate large-sized orders, not including such traders in the exemption effectively reduces the benefit of the exemption to customers.

The Exchange believes that its proposed narrow-based index option hedge exemption should not increase the potential for disruption or manipulation in the markets for the stocks underlying each index. The PSE notes that the proposal incorporates several surveillance safeguards, which the Exchange will employ to monitor the use of the exemption. Specifically, the Exchange will require that member firms and their customers who seek exemptions file a form with the PSE, in lieu of granting an automatic exemption similar to that for equity options. The PSE's Options Surveillance Department will monitor trading activity in PSE-traded index options and the stocks underlying those indexes to detect potential frontrunning and manipulation abuses, as well as review to ensure that the closing of positions subject to an exemption is conducted in a fair and orderly manner. In addition, the PSE will monitor the equity position used as a hedge on a daily basis.[11]

And lastly, the PSE notes that the provision itself contains several built-in safeguards. First, the hedge must consist of a position in at least 75% of the stocks underlying the index, so that the "basket" of stocks constituting the hedge will resemble the underlying index.[12] Second, hedged positions may not exceed two times the limit established under PSE Rule 7.6(a).[13] This places a ceiling on the maximum size of the option position. Third, both the options and stock positions must be initiated and liquidated in an orderly manner, such that a reduction of the options position must occur at or before the corresponding reduction in the stock portfolio position. Lastly, the value of the industry index option position may not exceed the dollar value of the underlying portfolio. The purpose of this requirement is to ensure that stock transactions are not used to manipulate the market in a manner benefitting the option position. In addition, these safeguards prevent the increased positions from being used in a leveraged manner by ensuring that the options position subject to the increased hedge position limit is properly "covered" by the hedge.

For the above reasons, the Exchange believes that the proposed narrow-based index option hedge exemption should increase the depth and liquidity of narrow-based index option markets and allow more effective hedging with underlying stock portfolios, without increasing the potential for market manipulation or disruption, consistent with the purposes of position limits. For the same reasons, the Exchange believes that exercise limits should correspond to the position limit exemption granted by this proposal.

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Section 6(b)(5) thereunder.[14] The Commission concludes that providing for increased position and exercise limits for narrow-based index options in circumstances where those excess positions are fully hedged with offsetting stock positions will provide greater depth and liquidity to the market and will allow investors to hedge their stock portfolios more effectively, without significantly increasing concerns regarding intermarket manipulations or disruptions of either the options market or the underlying stock market.

Specifically, the PSE proposal contains safeguards that should make it difficult to use the exempted positions to disrupt or manipulate the market. First, requests for the exemption must be approved by the PSE, which should ensure that the hedges are appropriate for the position being taken and are in compliance with PSE rules. Second, the stock portfolio must consist of at least 75% of the number of component securities underlying the index, and must correspond in value to the value of the options position hedged, so that the increased positions are less likely to be used in a leveraged manner in any manipulative scheme. As noted above, the value of the hedging portfolio is equal to (a) the total market value of the net stock position, less (b) the value of (1) any offsetting calls and puts in the respective index option; (2) any offsetting positions in related stock index futures or options; and (3) any economically equivalent positions. Third, both the options and the stock positions must be initiated and liquidated in an orderly manner. Moreover, a reduction of the options position must occur at or before the corresponding reduction in the stock portfolio position, thereby helping to ensure that the stock transactions are not used to impact the market so as to benefit the options positions. Fourth, the PSE must be notified of any material change in the portfolio or futures positions which materially affects the unhedged value of the qualified portfolio. Fifth, the maximum hedge exemption position is two times the existing limit.[15] The "two times the limit" is not automatic and the PSE has the authority to approve a hedge limit for less than that amount.

The Commission notes that the PSE's surveillance procedures are designed to detect as well as deter manipulation and market disruptions. In particular, the PSE will monitor the equity position of a person utilizing the hedge exemption on a daily basis to ensure that each option contract is hedged by the equivalent dollar amount of component securities.[16] In addition, the PSE's Options Surveillance Department will monitor trading activity in PSE-traded index options and their underlying component stocks to detect potential frontrunning and manipulation, and to ensure that the closing of positions subject to the exemption is conducted in a fair and orderly manner. Violation of any of the provisions of the industry index hedge exemption, absent reasonable justification or excuse, will result in the withdrawal of the hedge exemption and subsequent denial of an application for a hedge exemption thereunder.

The Commission believes that it is reasonable for the PSE to allow firm and proprietary traders, as well as public customers, to utilize the proposed hedge exemption. The Commission believes that extending the narrow-based index option hedge exemption to firm and proprietary traders may help to increase the depth and liquidity of the market for industry index options and may help to ensure that public customers receive the full benefit of the exemption. Moreover, the PSE's monitoring procedures, as described above, should be able to detect any abuses and ensure that the options position, whether firm, proprietary trader, or customer, is properly hedged.

Finally, the commission believes that it is reasonable for the PSE to amend the text of its broad-based index hedge exemption, and to clarify its narrow-based hedged index hedge exemption, by indicating that exercise limits under the hedge exemptions will correspond to position limits. In this regard, the Commission notes that it has approved previously an identical amendment to the Chicago Board Options Exchange, Inc.'s ("CBOE") broad-based index Chicago Board Options Exchange, Inc.'s ("CBOE") broad-based index hedge exemption.[17] In addition, the equity and index hedge exemptions of other options exchanges provide for corresponding position and exercise limits.[18]

The Commission finds good cause for approving Amendment Nos. 1, 2, and 3 to the proposed rule change prior to the thirtieth day after the date of publication of the notice thereof in the **Federal Register**. Specifically, Amendment No. 1 is designed to protect investors and the public interest by providing additional requirements and surveillance procedures which the Exchange will use in monitoring the narrow-based index option hedge exemption. In addition, Amendment No. 1 indicates that, under the PSE's broad-based and narrow-based hedge exemptions, position limits will correspond to exercise limits. As noted above, position limits correspond to exercise limits under the hedge exemption rules of the other options exchanges.[19] Accordingly, the Commission does not believe that the PSE's proposal to provide corresponding position and exercise limits under its hedge exemptions raises new regulatory issues. Amendment No. 2 strengthens the Exchange's proposal providing that economically equivalent positions must be deducted when calculating the value of the hedging portfolio. Amendment No. 3 clarifies the text of the Exchange's proposal by indicating that the hedged position may not exceed two times the limit established under PSE Rule 7.6. Accordingly, the Commission believes that there is good cause, consistent with Sections 6(b)(5) and 19(b)(2) of the Act, to approve Amendment Nos. 1, 2, and 3 to the proposal on an accelerated basis.

Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment Nos. 1, 2, and 3. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number in the caption above and should be submitted by April 12, 1996.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[20] that the proposed rule change (SR–PSE–95–28), as amended is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[21]

Margaret H. McFarland,

Deputy Secretary.

SMALL BUSINESS ADMINISTRATION

[Declaration of Disaster Loan Area #2836]

Idaho; Declaration of Disaster Loan Area (Amendment #1)

The above-numbered Declaration is hereby amended to establish the incident period for this disaster as beginning on February 6, 1996 and continuing through February 23, 1996.

All other information remains the same; i.e., the termination date for filing applications for physical damage is April 11, 1996, and for loans for economic injury the deadline is November 12, 1996.

(Catalog of Federal Domestic Assistance Program Nos. 59002 and 59008)

---

[8] PSE Rule 7.6(a) provides that option contracts on an industry index are subject to the following position limits: 6,000 contracts if the Exchange determines, during its semi-annual review, that any single stock in the group accounted, on average, for 30% or more of the index value during the 30-day period immediately preceding the review; 9,000 contracts if the Exchange determines, at the time of its semi-annual review, that any single stock in the group accounted, on average, for 20% or more of the index value or that any five stocks in the group together accounted, on average, for more than 50% of the index value, but that no single stock in the group accounted, on average, for 30% or more of the index value during the 30-day period immediately preceding the review; or 12,000 contracts, if the Exchange determines that the conditions specified above have not occurred. *See* Securities Exchange Act Release No. 36537 (November 30, 1995), 60 FR 62916 (December 7, 1995) (order approving File Nos. SR–Amex–95–45 and SR–PSE–95–30) (increasing position and exercise limits for industry index options to 6,000, 9,000, or 12,000 contracts). Narrow-based index hedge exemption will allow a member organization to maintain an option position in that issue of up to 18,000 contracts on the same side of the market, provided that 12,000 of the contracts are "hedged," as provided in the proposal. *See* Amendment Nos. 2 and 3, *supra* note 5.

[9] *See* Amendment No. 1, *supra* note 5.

[10] The Exchange proposes to apply only the proposed narrow-based industry index option hedge exemption, and not the existing broad-based index option hedge exemption, to firms and proprietary traders as well as public customers. Telephone conversation between Michael Pierson, Senior Attorney, Market Regulation, PSE, and Yvonne Fraticelli, Attorney, OMS, Division, Commission, on November 14, 1995.

[11] *See* Amendment No. 1, *supra* note 5.

[12] To determine the share amount of each component required to hedge an index option position: index value x index multiplier x component's weighting = dollar amount of component. That amount divided by price = number of shares of component. Conversely, to determine how many options can be purchased based on a certain portfolio, divide the dollar amount of the basket by the index value x the index multiplier.

[13] *See* Amendment No. 3, *supra* note 5.

[14] 15 U.S.C. § 78f(b)(5) (1988 & Supp. V. 1993).

[15] *See* Amendment No. 3, *supra* note 5.

[16] *See* Amendment No. 1, *supra* note 5. Market participants granted a hedge exemption are also required to keep their application forms for the hedge exemption current and promptly provide the PSE with any information requested concerning the dollar value and composition of their stock portfolio or its equivalent, the current hedged and aggregate options positions, and any stock index futures positions.

[17] *See* Securities Exchange Act Release No. 30944 (July 21, 1992), 57 FR 33376 (July 28, 1992) (order approving File No. SR–CBOE–92–09) ("CBOE" Approval Order").

[18] *See* Securities Exchange Act Release No. 35738 (May 18, 1995), 60 FR 27573 (May 24, 1995) (order approving File Nos. SR-Amex-95–13, SR–CBOE–95–13, SR–NYSE–95–04, SR–PSE–95–05, and SR–PHLX–95–10) (order granting permanent approval to hedge exemption pilot programs) ("Hedge Exemption Order").

[19] *See* CBOE Approval Order, *supra* note 17 and Hedge Exemption Order, *supra* note 18.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[Docket No. 28420]

Airspace and Flight Operations Requirements for the 1996 Summer Olympic Games, Atlanta, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice.

SUMMARY: On February 12 1996, SFAR No. 74, Airspace and Flight Operations Requirements for the 1996 Summer Olympic Games, Atlanta, Georgia, was published as a final rule. The provisions of the Paperwork Reduction Act of 1995, and 5 CFR Part 1320, Reporting and Recordkeeping Requirements, provide for public comment of any reporting or recordkeeping burden associated with a rule. When the SFAR was published as a Notice of Proposed Rulemaking on December 29, 1995, it was incorrectly published as not having a burden covered under the Paperwork Reduction Act of 1995. There is a small reporting burden associated with this rule. This action notifies the public that the FAA will receive comments on the information collection burden association with SFAR No. 74.

DATES: Comments on this Notice must be received on or before May 21, 1996.

ADDRESSES: Comments on this collection may be mailed or delivered in duplicate to the FAA at the following address: Ms. Judith Street, Federal Aviation Administration, Corporate Information Division, ABC–100, 800 Independence Ave., SW., Washington, DC 20591.

FOR FURTHER INFORMATION CONTACT: Ms. Judith Street at the above address or on (202) 267–9895.

SUPPLEMENTARY INFORMATION: The information collection requirement of SFAR No. 74 requires operators to notify the FAA of their planned operations at the specified airports from July 17 through August 6, 1996 for two categories of operations (February 12, 1996; 61 FR 5492). The categories are: (1) Non-scheduled opertions—foreign and domestic charters and cargo operations not published in the Official Airline Guide (OAG) as of June 30, 1996, and/or not operated on a routine consistent basis during the same time, day and number of days per week, excluding helicopters; and (2) Other—all operations conducted by operators that do not hold either an air carrier certificate for common carriage issued under SFAR 38–2 or Part 119 of the Federal Aviation Regulations or any operations conducted under Part 129 of the Federal Aviation Regulations. These operations exclude helicopters and include, but are not limited to, general aviation and business operations conducted under Part 91.

Non-scheduled and Other operations must notify the FAA of: (1) Destination or arrival airport; (2) estimated time of arrival/departure; (3) call sign; (4) aircraft type; and (5) direction of arrival to the Atlanta area, or first fix after departure. The estimated number of respondents is 3832 at 3 minutes or less per response for a total burden of 192 hours.

Issued in Washington, DC., on March 13, 1996.
Steve Hopkins,
Acting Manager, Corporate Information Division, ABC–100.
[FR Doc. 96–6997 Filed 3–21–96; 8:45 am]
BILLING CODE 4910–13–M

Approval of the Noise Compatibility Program Revision; Charlotte/Douglas International Airport; Charlotte, NC

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation Administration (FAA) announces its finding on the revision to the noise compatibility program that was submitted for Charlotte/Douglas International Airport under the provisions of Title I of the Aviation Safety and Noise Act of 1979 (Pub. L. 96–193) (hereinafter referred to as "the Act") and 14 CFR Part 150 by the City of Charlotte. This revised program was submitted subsequent to a determination by the FAA that associated noise exposure maps submitted under 14 CFR Part 150 for Charlotte/Douglas International Airport were in compliance with applicable requirements effective July 11, 1989.

Upon acceptance of the Noise Exposure Maps, the FAA received the initial noise compatibility program on November 20, 1989. It was approved May 18, 1990.

EFFECTIVE DATE: The effective date of FAA's approval of the Charlotte/Douglas

International Airport revision to the noise compatibility program is February 16, 1996.

FOR FURTHER INFORMATION CONTACT: Thomas M. Roberts, Program Manager, Atlanta Airports District Office, Campus Building, 1701 Columbia Avenue, Suite 2–260, College Park, Georgia 30337–2747, Telephone (404) 305–7153. Documents reflecting this FAA action may be reviewed at this location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to the noise compatibility program revision for Charlotte/Douglas International Airport effective February 16, 1996.

The revision adds Churches within the definitions of "public buildings" under the approved noise compatibility program *Land-Use Corrective Measure No. 2* paragraph entitles "Soundproofing of Public Buildings."

Each airport noise compatibility program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgement for that of the airport proprietor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in part 150 and the Act and is limited to the following determinations:

a. The noise compatibility program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal Government; and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of the navigable airspace and air traffic control systems, or adversely affecting other powers and responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an airport noise compatibility program are delineated in FAR Part 150, section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, state or local law. Approval does not by itself constitute an FAA implementing action. A request for Federal action or approval to implement specific noise compatibility measures may be required, and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA. Where Federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Atlanta, Georgia.

Charlotte/Douglas International Airport submitted the noise exposure maps to the FAA on June 9, 1989. The Charlotte/Douglas International Airport noise exposure maps were determined by FAA to be in compliance with applicable requirements on July 11, 1989. Notice of this determination was published in the **Federal Register** on August 1, 1989.

The Charlotte/Douglas International Airport study contains a revised noise compatibility program comprised of actions designed for phased implementation by airport management. It was requested that the FAA evaluate and approve this material as revision to the noise compatibility as described in section 104(b) of the Act. The FAA began its review of the program on August 23, 1995, and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed to be an approval of such program.

The submitted revised program contained one proposed action for noise mitigation off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. The revised program, therefore, was approved by the Administrator effective February 16, 1996.

The determination is set forth in detail in a Record of Approval endorsed by the Administrator on February 16, 1996. The Record of Approval, as well as other evaluation materials and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the Charlotte/Douglas International Airport.

Issued in Southern Region, Atlanta, Georgia, March 4, 1996.

Dell T. Jernigan,

Manager, Atlanta Airports District Office.

BILLING CODE 4910–13–M

Maritime Administration

[Docket No. M–014]

Information Collection Available for Public Comments and Recommendations

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Maritime Administration's (MARAD's) intention to request extension of approval for three years of a currently approved information collection.

DATES: Comments should be submitted on or before May 21, 1996.

FOR FURTHER INFORMATION CONTACT: Edmond J. Fitzgerald, Director Office of Subsidy and Insurance, Maritime Administration, MAR–570, Room 8117, 400 Seventh Street, S.W., Washington, D.C. 20590. Telephone (202) 366–2400 or fax (202) 366–7901. Copies of this collection can also be obtained from that office.

SUPPLEMENTARY INFORMATION:

Title of Collection: War Risk Insurance, Applications and Related Information.

Type of Request: Extension of currently approved information collection.

OMB Control Number: 2133–0011.

Form Number: MA–355, MA–528, MA–828, MA–942.

Expiration Date of Approval: June 30, 1996.

Summary of Collection of Information: As authorized by Section 1202, Title XII, Merchant Marine Act, 1936, as amended, (46 U.S.C. App. 1282) (Act), the Secretary of U.S. Department of Transportation may provide war risk insurance for the needs of the waterborne commerce of the United States. This collection is required for participation in the program. It consists of forms MA–355, MA–528, MA–828, and MA–942 and related information.

Need and Use of the Information: To determine the eligibility of the applicant and the vessel for participation in the war risk insurance program.

Description of Respondents: Vessel's owner or charterer interested in participation in MARAD's war risk insurance program.

Annual Responses: 1,730.

Annual Burden: 930 hours.

Comments: Send all comments regarding this information collection to Joel C. Richard, Department of Transportation, Maritime Administration, MAR–120, Room 7210, 400 Seventh Street, S.W., Washington, D.C. 20590. Send comments regarding whether this information collection is necessary for proper performance of the function of the agency and will have practical utility, accuracy of the burden estimates, ways to minimize this burden, and ways to enhance quality, utility, and clarity of the information to be collected.

By Order of the Maritime Administrator.

Dated: March 19, 1996.

Joel C. Richard,

Secretary.

BILLING CODE 4910–81–P

Federal Aviation Administration

Notice of Extension of Draft Clean Air Act General Conformity Determination; Comment Period for Seattle-Tacoma International Airport Seattle, WA

ACTION: The Federal Aviation Administration, Airports Division, Northwest Mountain Region and the Port of Seattle, Seattle, Washington, announce a two week extension (to April 1, 1996) of the public and agency comment period associated with the Draft General Conformity Determination prepared as specified in Section 176(c) (42 U.S.C. 7506c) of the Clean Air Act Amendments of 1990. The Draft General Conformity Determination, and supporting documentation is contained in the February 1996, Final Environmental Impact Statement, Master Plan Update, Seattle-Tacoma International Airport.

This comment period extension applies only to comments pertaining exclusively to the Draft General Conformity Determination and no other issues. Comments on other issues will not be accepted or addressed.

PUBLIC REVIEW: The public is invited to review and comment on the Draft Conformity Determination. Copies of the FEIS are available for review at the following locations:

Federal Aviation Administration, Airports Regional Office, Room 540, 1601 Lind Avenue, SW., Renton, WA

Port of Seattle, Aviation Planning, 3rd floor—Room 301, Terminal Building, Sea-Tac Airport, and Pier 69 Bid Office, 2711 Alaskan Way, Seattle

Puget Sound Regional Council, Information Center, 1011 Western Avenue, Seattle

BILLING CODE 4910–13–M

Air Traffic Procedures Advisory Committee

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of meeting.

SUMMARY: The FAA is issuing this notice to advise the public that a meeting of the Federal Aviation Administration Air Traffic Procedures Advisory Committee (ATPAC) will be held to review present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures.

DATES: The meeting will be held from April 15 through April 18, 1996, from 9 a.m. to 5 p.m. each day.

ADDRESSES: The meeting will be held at the Helicopter Association International, 1635 Prince Street, Alexandria, VA.

FOR FURTHER INFORMATION CONTACT: Mr. W. Frank Price, Executive Director, ATPAC Air Traffic Rules and Procedures, 800 Independence Avenue, SW., Washington, DC 20591, telephone (202) 267–3725.

SUPPLEMENTARY INFORMATION: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. 2), notice is hereby given of a meeting of the ATPAC to be held April 15 through April 18, 1996, at the Helicopter Association International, 1635 Prince Street, Alexandria, VA.

The agenda for this meeting will cover: A continuation of the Committee's review of present air traffic control procedures and practices for standardization, clarification, and upgrading of terminology and procedures. It will also include:

1. Approval of Minutes.
2. Submission and Discussion of Areas of Concern.
3. Discussion of Potential Safety Items.
4. Report from Executive Director.
5. Items of Interest.
6. Discussion and agreement of location and dates for subsequent meetings.

Attendance is open to the interested public but limited to the space available. With the approval of the Chairperson, members of the public may present oral statements at the meeting. Persons desiring to attend and persons desiring to present oral statements should notify the person listed above not later than April 12, 1996. The next quarterly meeting of the FAA ATPAC is planned to be held from July 15–18, 1996, in New York.

Any member of the public may present a written statement to the Committee at any time at the address given above.

Issued in Washington, DC, on March 11, 1996.

W. Frank Price,

Executive Director, Air Traffic Procedures Advisory Committee.

[FR Doc. 96–6998 Filed 3–21–96; 8:45 am]

BILLING CODE 4910–13–M

RTCA, Inc.; Joint Special Committee 181/EUROCAE WG–13 Standards of Navigation Performance

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., Appendix 2), notice is hereby given for Joint Special Committee 181/EUROCAE WG–13 meeting to be held April 15–19, 1996, starting at 9 a.m. The meeting will be held at the Hyatt Regency Monterey, One Old Golf Course Road, Monterey, CA.

The agenda for Monday, April 15, will include the following: 9–10:30 a.m. Plenary (1) Introductions; (2) Review of Agenda; (3) Review and Approval of Minutes of Previous Meeting; (4) Chairman's Report; (5) Letter to ICAO re: RNP Terminology; (6) Working Group (WG) Reports: WG–1; Report on the February 19–20 Editorial Committee Meeting; WG–2; WG–3. 10:45 a.m.–5 p.m. WG–1 Final Review of the MASPS; WG–2 Review of DO–201A; WG–3 Review of DO–200A.

The agenda for Tuesday and Wednesday, April 16 and 17, will be a continuation of the working group sessions. On Thursday, April 18, the WG–1 Final Review of the MASPS is scheduled from 9 a.m. to 5 p.m.

On Friday, April 19, the Plenary agenda will include: (1) Final Review of MASPS; (2) Working Group Reports; (3) Future Meeting Schedule; (4) New Business; (5) Adjourn.

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the RTCA Secretariat, 1140 Connecticut Avenue, NW., Suite 1020, Washington, DC 20036; (202) 833–9339 (phone) or (202) 833–9434 (fax); or Rudy Kalafus, Trimble Navigation, Ltd., (408) 481–2087 (phone) or (408) 481–8600 (fax). For hotel reservations, phone 1–800–233–1234 (U.S.) or +1–408–372–1234 (International). Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on March 15, 1996.

Janice L. Peters,

Designated Official.

BILLING CODE 4910–13–M

Notice of Intent to Rule on Application to Impose and Use the Revenue From a Passenger Facility Charge (FCC) at Charlottesville-Albermarle Airport, Charlottesville, Virginia

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of intent to rule on application.

SUMMARY: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Charlottesville-Albermarle Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Pub. L. 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

DATES: Comments must be received on or before April 22, 1996.

ADDRESSES: Comments on this application may be mailed or delivered in triplicate to the FAA at the following address: Mr. Robert Mendez, Manager, Washington Airports District Office, 101 West Broad Street, Suite 300, Falls Church, Virginia 22046.

In addition, one copy of any comments submitted to the FAA must be mailed or delivered to Mr. Bryan O. Elliott, Airport Manager of the Charlottesville-Albermarle Airport at the following address: Charlottesville-Albermarle Airport, 201 Bowen Loop, Charlottesville, Virginia 22901.

Air carriers and foreign air carriers may submit copies of written comments previously provided to the Charlottesville-Albermarle Airport Authority under section 158.23 of Part 158.

FOR FURTHER INFORMATION CONTACT: Mr. Robert Mendez, Manager, Washington Airports District Office, 101 West Broad Street, Suite 300, Falls Church, Virginia, 22046 (703–285–2570). The application may be reviewed in person at this same location.

SUPPLEMENTARY INFORMATION: The FAA proposes to rule and invites public comment on the application to impose and use the revenue from a PFC at Charlottesville-Albermarle Airport under the provisions of the Aviation Safety and Capacity Expansion Act of 1990 (Title IX of the Omnibus Budget Reconciliation Act of 1990) (Public Law 101–508) and Part 158 of the Federal Aviation Regulations (14 CFR Part 158).

On February 14, 1996, the FAA determined that the application to impose and use the revenue from a PFC submitted by the Charlottesville-Albermarle Airport Authority was substantially complete within the requirements of section 158.25 of Part 158. The FAA will approve or disapprove the application, in whole or in part, no later than May 29, 1996.

The following is a brief overview of the application.

Level of the proposed PFC: $3.00.

Proposed charge effective date: February 1, 2002.

Proposed charge expiration date: October 1, 2004.

Total estimated PFC revenue: $1,347,359.

Brief description of proposed projects:

—Retire allowable project cost and associated debt services for the construction of the air carrier terminal building.

—PFC Administrative expenses.

Class or classes of air carriers which the public agency has requested not be required to collect PFCs: Air Taxi/Commercial Operator Filing FAA Form 1800–31.

Any person may inspect the application in person at the FAA office listed above under **FOR FURTHER INFORMATION CONTACT** and at the FAA Regional Airports office located at: Fitzgerald Federal Building, John F. Kennedy International Airport, Jamaica, New York 11430.

In addition, any person may, upon request, inspect the application, notice and other documents germane to the application in person at the Charlottesville-Albermarle Airport Authority.

Issued in Jamaica, New York on March 14, 1996.

Anthony P. Spera,

Manager, Airports Division, Eastern Region.

BILLING CODE 4910–13–M

Federal Railroad Administration

[Docket No. RSAC–96–2]

Railroad Safety Advisory Committee; Notice of First Meeting

AGENCY: Federal Railroad Administration (FRA), Department of Transportation (DOT).

ACTION: Notice of first meeting of the Railroad Safety Advisory Committee ("RSAC").

SUMMARY: As required by Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), and 41 CFR 101–6.1015(b), the Federal Railroad Administration (FRA) gives emergency notice of the first meeting of the Railroad Safety Advisory Committee ("RSAC"). The purpose of the meeting is to address prerequisite organizational issues necessary for full operational activity to commence. The RSAC will be briefed on FRA's current regulatory agenda, will discuss possible tasks to be assigned, and will estimate a timetable for the completion of any tasks accepted.

DATES: The first meeting of the RSAC is scheduled for 9:00 a.m. on both Monday, April 1, 1996 and Tuesday, April 2, 1996. Decisions with respect to future meetings will be made at the first meeting and from time to time thereafter. Notice of future meetings will be published in the **Federal Register.**

ADDRESSES: The first meeting of the RSAC will be held in Room 2230 of the Nassiff Building, U.S. DOT, 400 Seventh Street, S.W., Washington, D.C. 20590. The meeting is open to the public on a first-come, first-served basis and is accessible to individuals with disabilities. Sign language interpreters will be available for individuals with hearing impediments. Subsequent meetings will be held at locations to be announced.

FOR FURTHER INFORMATION CONTACT: Grady Cothen, Deputy Associate Administrator for Safety Standards Program Development, FRA, 400 7th Street, SW., Washington, D.C. 20590, (202)-366–0897, Lisa Levine, Office of Chief Counsel, FRA, 400 7th Street, SW., Washington, D.C. 20590, (202)-366–0621, or Vicky McCulley, FRA, 400 7th Street, SW., Washington, D.C. 20590, (202)-366–6569.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), FRA is giving emergency notice of the first meeting of the Railroad Safety Advisory Committee ("RSAC"). This notice is being published less than fifteen days prior to the date of the announced meetings due to recent railroad safety exigencies. The meeting is scheduled for 9:00 a.m. on both Monday April 1, 1996 and Tuesday, April 2, 1996 and will be held in Room 2230 of the Nassiff Building, U.S. Department of Transportation, 400 Seventh Street, S.W., Washington, D.C. 20590. All times noted are Eastern Time.

RSAC was established to provide advice and recommendations to the FRA on railroad safety matters. The Committee consists of 48 individual representatives, drawn from among 27 organizations representing various rail industry perspectives, and 2 associate non-voting representatives from the agencies with railroad safety regulatory responsibility in Canada and Mexico.

During this first meeting, the RSAC will primarily be concerned with the prerequisite organizational issues necessary for full operational activity to commence. The RSAC will be briefed on FRA's current regulatory agenda, will discuss possible tasks to be assigned, and will estimate a timetable for the completion of any tasks accepted. Please refer to the notice published in the **Federal Register** on March 11, 1996 (61 FR 9740) for more information about the RSAC.

Issued in Washington, D.C., on March 18, 1996.

Jolene M. Molitoris,

Administrator.

BILLING CODE 4910–06–P

Maritime Administration

[Docket No. M–015]

Information Collection Available for Public Comments and Recommendations

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the Maritime Administration's (MARAD's) intention to request extension of approval for three years of a currently approved information collection.

DATES: Comments should be submitted on or before May 21, 1996.

FOR FURTHER INFORMATION CONTACT: Robert J. Patton, Jr., Deputy Chief Counsel, Maritime Administration, MAR–220.1, Room 7232, 400 Seventh Street, S.W., Washington, D.C. 20590. Telephone (202) 366–5712 or fax (202) 366–7485. Copies of this collection can also be obtained from that office.

SUPPLEMENTARY INFORMATION:

Title of Collection: Requirements for Establishing U.S. Citizenship under 46 CFR Part 355.

Type of Request: Extension of currently approved information collection.

OMB Control Number: 2133–0012.

Form Number: Special Format.

Expiration Date of Approval: June 30, 1996.

Summary of Collection of Information: Applicants that receive benefits and continue to receive benefits under the Merchant Marine Act, 1936, as amended, must be citizens of the United States within the meaning of section 2 of the Shipping Act, 1916, as amended (46 App. U.S.C. 802). This collection gathers the information on citizenship of individuals, etc. covered by the requirements.

Need and Use of the Information: To determine compliance with the statutory requirements.

Description of Respondents: Participating financial institutions, ships owners, charterers, and equity owners within the United States.

Annual Responses: 300.

Annual Burden: 1,500 hours.

Comments: Send all comments regarding this information collection to Joel C. Richard, Department of Transportation, Maritime Administration, MAR–120, Room 7210, 400 Seventh Street, S.W., Washington, D.C. 20590. Send comments regarding whether this information collection is necessary for proper performance of the function of the agency and will have practical utility, accuracy of the burden estimates, ways to minimize this burden, and ways to enhance quality, utility, and clarity of the information to be collected.

By Order of the Maritime Administrator.

Dated: March 19, 1996.

Joel C. Richard,

Secretary.

BILLING CODE 4910–81–P

Federal Aviation Administration

Approval of Revision No. 1 to the Approved Noise Compatibility Program for Reno/Tahoe International Airport, Reno, NV

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice.

SUMMARY: The Federal Aviation (FAA) announces its findings on Revision No. 1 to the Approved Noise Compatibility Program for the Reno/Tahoe International Airport, submitted by the Airport Authority of Washoe County, Nevada, under the provisions of Title I of the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96–193) (hereinafter referred to as "the Act") and 14 CFR Part 150. These findings are made in recognition of the description of Federal and non-Federal responsibilities in Senate Report No. 96–52 (1980). On February 22, 1991, the FAA determined that the Noise Exposure Maps, submitted by the Airport Authority of Washoe County under 14 CFR Part 150, were in compliance with applicable requirements. On September 1, 1993, the Associate Administrator for Airports approved the Noise Compatibility

Program for Reno/Tahoe International Airport. On December 8, 1995, the Associate Administrator for Airports approved Revision Number 1 to the Approved Noise Compatibility Program for Reno/Tahoe International Airport. The two (2) modifications to existing approved measures and one additional measure to the approved program were approved.

EFFECTIVE DATE: The effective date of the FAA's approval of the Noise Compatibility Program for Reno/Tahoe International Airport is December 8, 1995.

FOR FURTHER INFORMATION CONTACT: Joseph R. Rodriguez, Planning/Programming Section Supervisor, Federal Aviation Administration, Airports District Office, 831 Mitten Road, Burlingame, California 94010–1303, Telephone (415) 876–2805. Documents reflecting this FAA action may be reviewed at this same location.

SUPPLEMENTARY INFORMATION: This notice announces that the FAA has given its overall approval to Revision No. 1 to the Approved Noise Compatibility Program for Reno/Tahoe International Airport, effective December 8, 1995. Under Section 104(a) of the Aviation Safety and Noise Abatement Act of 1979 (hereinafter referred to as the "Act"), an airport operator who has previously submitted a Noise Exposure Map may submit to the FAA a Noise Compatibility Program which sets forth the measures taken or proposed by the airport operator for the reduction of existing noncompatible land uses and prevention of additional noncompatible land uses within the area covered by the Noise Exposure Maps. The Act requires such programs to be developed in consultation with interested and affected parties including local communities, government agencies, airport users, and FAA personnel.

Each airport Noise Compatibility Program developed in accordance with Federal Aviation Regulations (FAR) Part 150 is a local program, not a Federal program. The FAA does not substitute its judgment for that of the airport sponsor with respect to which measures should be recommended for action. The FAA's approval or disapproval of FAR Part 150 program recommendations is measured according to the standards expressed in Part 150 and the Act, and is limited to the following determinations:

a. The Noise Compatibility Program was developed in accordance with the provisions and procedures of FAR Part 150;

b. Program measures are reasonably consistent with achieving the goals of reducing existing noncompatible land uses around the airport and preventing the introduction of additional noncompatible land uses;

c. Program measures would not create an undue burden on interstate or foreign commerce, unjustly discriminate against types or classes of aeronautical uses, violate the terms of airport grant agreements, or intrude into areas preempted by the Federal government and

d. Program measures relating to the use of flight procedures can be implemented within the period covered by the program without derogating safety, adversely affecting the efficient use and management of navigable airspace and air traffic control responsibilities of the Administrator prescribed by law.

Specific limitations with respect to FAA's approval of an Airport Noise Compatibility Program are delineated in FAR Part 150, Section 150.5. Approval is not a determination concerning the acceptability of land uses under Federal, State or local law. Approval does not, by itself, constitute an FAA implementation action. A request for Federal action or approval to implement specific Noise Compatibility Measures may be required and an FAA decision on the request may require an environmental assessment of the proposed action. Approval does not constitute a commitment by the FAA to financially assist in the implementation of the program nor a determination that all measures covered by the program are eligible for grant-in-aid funding from the FAA under the Airport and Airway Improvement Act of 1982, as amended. Where Federal funding is sought, requests for project grants must be submitted to the FAA Airports District Office in Burlingame, California.

The Airport Authority of Washoe County, Nevada submitted to the FAA on July 31, 1990, the Noise Exposure Maps, descriptions, and other documentation produced during the Noise Compatibility Planning study conducted from July 1983 through July 1990. The Reno/Tahoe International Airport Noise Exposure Maps were determined by FAA to be in compliance with applicable requirements on February 22, 1991. Notice of this determination was published in the **Federal Register** on March 11, 1991.

The Reno/Tahoe International Airport study contained a proposed Noise Compatibility Program comprised of actions designed for phased implementation by airport management and adjacent jurisdictions from the date of study completion to or beyond, the year 1996. It was requested that the FAA evaluated and approve this material as a Noise Compatibility Program as described in Section 104(b) of the Act. The FAA began its review of the program on March 5, 1993 and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). The Noise Compatibility Program was approved by the FAA on September 1, 1993. On June 13, 1995, the FAA began its review of Revision No. 1 to the approved program and was required by a provision of the Act to approve or disapprove the program within 180 days (other than the use of new flight procedures for noise control). Failure to approve or disapprove such program within the 180-day period shall be deemed an approval of such program.

The submitted revision to the approved program contained three (3) proposed actions for noise mitigation on and off the airport. The FAA completed its review and determined that the procedural and substantive requirements of the Act and FAR Part 150 have been satisfied. Revision Number 1 to the Approved Noise Compatibility Program, was therefore approved by the Associate Administrator for Airports effective December 8, 1995.

Outright approval was granted for the following three (3) specific revision measures: A. The approved measures included modification of approved NCP Measure No. 4 to encourage the Nevada Air National Guard to convert their existing fleet of F–4 aircraft to F–16 or any other quieter aircraft. B. Modification of approved NCP measure No. 14 to add to the designated areas the remainder of two neighborhoods and include the voluntary acquisition of property interests such as navigation easements, development rights and deed restrictions and purchase assurance for homeowners within the 65 DNL noise contour, and C. Addition of a new NCP Measure No. 17 to make eligible for voluntary acquisition three residential parcels north of the airport within the 65 DNL contour.

This determination is set forth in detail in a Record of Approval endorsed by the Associate Administrator for Airports on December 8, 1995. The Record of Approval, as well as other evaluation materials, and the documents comprising the submittal, are available for review at the FAA office listed above and at the administrative offices of the Airport Authority of Washoe County, Reno, Nevada.

Issued in Hawthorne, California on March 13, 1996.

Robert C. Bloom,

Acting Manager, Airports Division, AWP–600, Western-Pacific Region.

[FR Doc. 96–6994 Filed 3–21–96; 8:45 am]

BILLING CODE 4910–13–M

Surface Transportation Board [1]

[STB Finance Docket No. 32864]

Dakota, Minnesota & Eastern Railroad Corporation; Acquisition and Operation; Colony Segment of the Union Pacific Railroad Company, Inc.

AGENCY: Surface Transportation Board, DOT.

ACTION: Notice of extension of time for filing comments.

SUMMARY: Pursuant to 49 U.S.C. 10902 and section 327 of Public Law No. 104–88, the Dakota, Minnesota & Eastern Railroad Company (DME) has filed an application to acquire and operate an approximately 203-mile rail line currently owned by Union Pacific Railroad Company, Inc. (UP) located in Wyoming, South Dakota, and Nebraska, commonly referred to as the Colony Line. The Colony Line runs in a north-south direction from Colony, WY, to Crawford, NE, the majority of which is located in South Dakota. By notice served March 8, 1996, the Board invited written comments on this application by interested parties to be filed no later than March 18, 1996.

Senator Tom Daschle and Congressman Tim Johnson of South Dakota have jointly requested an extension of the comment period. We will grant a 10-day extension of the comment period so that all interested persons will have a sufficient opportunity to review DME's proposal and to comment. This brief time extension will still allow us to accommodate DME's request for expedited action. Written comments must be filed no later than March 28, 1996.

[1] The ICC Termination Act of 1995, Pub. L. No. 104–88, 109 Stat. 803 (ICCTA), which was enacted on December 29, 1995, and took effect on January 1, 1996, abolished the Interstate Commerce Commission and transferred certain functions to the Surface Transportation Board (Board). This notice relates to functions that are subject to the Board's jurisdiction pursuant to 49 U.S.C. 10902.

ADDRESSES: An original and 10 copies of all comments must refer to STB Finance Docket No. 32864 and must be sent to: Office of the Secretary, Case Control Branch, Surface Transportation Board, 1201 Constitution Avenue, N.W., Washington, DC 20423. In addition, one copy of all documents must be sent to applicant's representative: Kevin V. Schieffer, Schieffer, Cutler & Donahoe, P.C., Suite 300, Falls Center, 431 North Phillips Avenue, Sioux Falls, SD 57102.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar, (202) 927–5660. [TDD for the hearing impaired: (202) 927–5721.]

This action will not significantly affect either the quality of the human environment or the conservation of energy resources.

Decided: March 19, 1996.

By the Board, Vernon A. Williams, Secretary.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF THE TREASURY

Financial Management Service

Privacy Act of 1974; System of Records

AGENCY: Financial Management Service, Treasury.

ACTION: Notice of alteration of Privacy Act system of records.

SUMMARY: The Department of the Treasury, Financial Management Service (FMS), gives notice of a proposed alteration to the system of records entitled "Debt Collection Operations System—Treasury/FMS .014," which is subject to the Privacy Act of 1974, as amended (5 U.S.C. 552a). The system notice was last published in its entirety in the **Federal Register** Vol. 60, page 56776, November 9, 1995.

DATES: Comments must be received no later than April 22, 1996. The proposed system of records will be effective May 1, 1996, unless FMS receives comments which would result in a contrary determination.

ADDRESS: Comments must be submitted to the Debt Management Services, Financial Management Service, 401 14th Street, SW, Room 151, Washington, DC 20227. Comments received will be available for inspection at the same address between the hours of 9:00 a.m. and 4:00 p.m. Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Gerry Isenberg, Debt Management Services, (202) 874–6859.

SUPPLEMENTARY INFORMATION: FMS has been designated by the Office of Management and Budget as the lead agency in credit management and debt collection for the Federal Government. The original publication of this system of records concerned the collection of debts owed to the Federal Government where collection efforts were to be undertaken by FMS in accordance with agreements with Federal agencies which are initially responsible for collecting the debts. FMS is altering this system of records to clarify that records in the system include records involving the collection of delinquent Federal debts arising from FMS' own operations, where initial responsibility for collection rests with FMS.

For the reasons set forth in the preamble, FMS proposes to alter system of records Treasury/FMS .014, "Debt Collection Operations System—Treasury/Financial Management Service", as follows:

Treasury/FMS .014

SYSTEM NAME:

Debt Collection Operations System—Treasury/Financial Management Service.

* * * * *

PURPOSE(S):

Description of change: The first sentence is revised to read:"The purpose of this system is to maintain records of individuals and entities that are (1) indebted to the Financial Management Service (FMS), and (2) indebted to the various Federal Government departments and agencies and whose accounts are being serviced or collected by FMS, in accordance with written agreements reached between the relevant agency ("client") and FMS."

* * * * *

Dated: March 13, 1996.

Alex Rodriguez,

Deputy Assistant Secretary (Administration).

Part II

Department of Housing and Urban Development

Office of the Assistant Secretary for Policy Development and Research

Community Development Work Study Program; Notice of Funding Availability for FY 1996

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Assistant Secretary for Policy Development and Research

[Docket No. FR–4016–N–01]

Community Development Work Study Program; Notice of Funding Availability—FY 1996

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD.

ACTION: Notice of Funding Availability (NOFA) for Fiscal Year (FY) 1996.

SUMMARY: This notice invites applications from institutions of higher education, area-wide planning organizations, and States for grants under the Community Development Work Study Program (CDWSP). The CDWSP, authorized by the Housing and Community Development Act of 1974, as amended, assists economically disadvantaged and minority students participating in work study programs in such institutions. This notice announces HUD's intention to award up to $3 million from FY 1996 appropriations (plus any additional funds recaptured from prior appropriations) to fund work study programs to be carried out from August, 1996 to September, 1998.

Note: The Congress has not yet enacted FY 1996 appropriation for HUD. However, HUD is publishing this notice to give potential applicants adequate time to prepare applications. The amount of funds announced in this NOFA is an estimate of amounts that may be made available in FY 1996, and is based on the level of funding available for FY 1995. HUD is not bound by the estimate set forth in this notice. The estimated amount may be adjusted based on the enacted FY 1996 appropriation.

DATES: Applications may be requested beginning April 1, 1996. Applications must be physically received by the Office of University Partnerships, in care of the Division of Budget, Contracts, and Program Control, in Room 8230 by 4:30 p.m. Eastern Time on May 31, 1996. This deadline is firm as to date, hour, and place. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submissions of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery-related problems.

FOR FURTHER INFORMATION CONTACT: John Hartung, Office of University Partnerships, Department of Housing and Urban Development, 451 Seventh Street, SW, Washington, DC 20410, Telephone (202) 708–3061, extension 261 (Voice). The TTY number for the hearing impaired is (202) 708–1455. (These are not toll-free numbers.) Mr. Hartung can also be reached via the Internet at jhartung@hud.gov.

Application packages (requests for grant application) may be obtained by written request from the following address: HUD USER, ATTN: Community Development Work Study Program, P.O. Box 6091, Rockville, MD 20850. Requests for application kits may be faxed to: 301–251–5747 (this is not a toll-free number). Requests for application kits must include the applicant's name, mailing address (including zip code), telephone number (including area code), and must refer to "Document FR–4016." The application kit is also available on the Internet from the Office of University Partnerships Clearinghouse. The Clearinghouse can be accessed from the World Wide Web at: http://oup.aspensys.com:89; or from a Gopher Server at: gopher://oup.aspensys.com:77.

SUPPLEMENTARY INFORMATION:

A. Background

Section 107(c) of the Housing and Community Development Act of 1974, as amended, (the Act) authorizes the CDWSP. Under this section, HUD is authorized to provide grants to institutions of higher education, either directly or through area-wide planning organizations or States, for the purpose of providing assistance to economically disadvantaged and minority students, including students with disabilities, who participate in community development work study programs and are enrolled in full-time graduate or undergraduate programs in community or economic development, community planning, or community management. Two-year institutions are not eligible applicants for funding under this program. This notice announces HUD's intention to award up to $3 million from FY 1996 appropriations (plus any additional funds recaptured from prior appropriations). Awards will be made under the HUD implementing regulations at 24 CFR 570.400 and 570.415 and the provisions of this Notice.

Note: The Congress has not yet enacted FY 1996 appropriation for HUD. However, HUD is publishing this notice to give potential applicants adequate time to prepare applications. The amount of funds announced in this NOFA is an estimate of amounts that may be made available in FY 1996, and is based on the level of funding available for FY 1995. HUD is not bound by the estimate set forth in this notice. The estimated amount may be adjusted based on the enacted FY 1996 appropriation.

B. Eligible Applicants

The following are eligible to apply for assistance under the program subject to the conditions noted below:

1. Institutions of higher education offering graduate degrees in a community development academic program.

2. Institutions of higher education offering undergraduate degrees in a community development academic program if no institutions of higher education in the standard metropolitan statistical area (SMSA) or non-SMSA area in which they are located offer graduate degrees in a community development academic program.

Note: Two-year institutions of higher education are not eligible applicants for funding under this program.

3. Area-wide planning organizations (APOs) which apply on behalf of two or more institutions of higher education located in the same SMSA or non-SMSA area as the APO.

4. States which apply on behalf of two or more institutions of higher education located in the State. If a State is approved for funding, institutions of higher education located in the State are not eligible recipients. If an APO is approved for funding, institutions of higher education located in the SMSA or non-SMSA non-metropolitan area served by the APO are not eligible recipients.

C. Threshold Requirements

To be eligible for ranking, applications must meet each of the following threshold requirements:

1. The application must be filed in the application form prescribed by HUD, and within the required time prescribed by the Request For Grant Application (RFGA) released pursuant to this notice.

2. The application must demonstrate that the applicant is eligible to participate.

3. The applicant must demonstrate that each institution of higher education participating in the program as a recipient has the required academic programs and faculty to carry out its activities under CDWSP. Each work placement agency must have the required staff and community development work study program to carry out its activities under CDWSP.

4. Institutions of higher education, APOs, and States must maintain at least a 50 percent rate of graduation of students from the FY 1993 funding round which covered school years September 1993 to September 1995 in order to participate in the current round of CDWSP funding. Institutions of higher education, APOs, and States funded under the FY 1993 CDWSP funding round which did not maintain such a rate will be excluded from participating in the FY 1996 funding round. Such institutions, APOs, and States are eligible to participate in the 1997 round.

D. Selection Factors for Institutions of Higher Education (110 Points)

The following factors will be considered by the Department in evaluating applications received from institutions of higher education in response to the solicitation.

1. *Academic Program (53 points, as allocated below).*

Each application will be reviewed for evidence of the school's commitment to administering a CDWSP and the overall strength of its commitment to meeting the needs of minority and economically disadvantaged individuals, including students with disabilities. This commitment will be evaluated in the following areas:

a. Relative quality of the academic program offered by the institution of higher education.

(1) Quality of the academic program in terms of community and economic development course offerings and academic requirements for students. (8 points)

(2) Appropriateness of the curriculum to prepare students for careers in the community and economic development field. (8 points)

(3) Qualifications of the faculty and the percentage of time they will teach in the academic area. (6 points)

b. Quality of academic supervision - Qualifications of the academic supervisor and the percentage of time they will commit to the students. (7 points)

c. Amount of resources to be committed by the institution to the CDWSP.

(1) Appropriateness and adequacy of the applicant's plan for the use of its facilities, equipment and financial resources in support of the CDWSP. (2 points)

(2) The degree to which the applicant is able to contribute funds to support the total cost of the project. (5 points)

(3) The degree to which the applicant will utilize faculty and staff administrators on staff. (7 points)

d. Applicant's success rate in graduating students previously enrolled in the HUD CDWSP or similar work study program. (10 points)

2. *Student Work Placement Assignment* (9 points, as allocated below)

a. The extent to which the participating students will receive a sufficient number and variety of work placement assignments. (3 points)

b. The extent to which the assignments will provide practical and useful experience to students participating in the program. (3 points)

c. The extent to which the assignments will further the participating students' preparation for professional careers in community or economic development, community planning, or community management. (3 points)

3. *Seminars* (4 points)

The degree to which the proposed seminars will (a) relate the experience provided under the work placement assignments with the educational experience provided under the academic programs and (b) address career planning and permanent job placement. (4 points)

4. *Placement Opportunities* (13 points, as allocated below)

a. Extent to which the institution's educational program (based on past experience) leads directly and immediately to career opportunities in the community and economic development fields. (6 points)

b. The applicant's success in assisting graduates of the HUD CDWSP or similar work study program to find permanent employment in community development funded agencies. (7 points)

5. *Program Coordination and Administration* (16 points, as allocated below)

a. The degree to which the Program Director has clear responsibility, ample percentage of time, and sufficient institutional or academic authority to coordinate the overall administration of the program. (8 points)

b. The applicant's ability to track and monitor the progress of the students previously enrolled in the HUD or similar work study program, including the students who drop out of the program. (4 points)

c. The adequacy of the applicant's plan for placing students on rotating assignments in community development work placement assignments and keeping track of students during the two-year academic period and the internship. (4 points)

6. *Institution's Commitment* (15 points, as allocated below)

a. The extent to which the applicant has a recruitment program that demonstrates an active, aggressive, and imaginative effort to identify and attract qualified minorities and economically disadvantaged students, including students with disabilities. (2 points)

b. The success of past and current efforts in preparing these students for careers in community and economic development. (6 points)

c. The extent to which the CDWSP award will result in a net increase of these students in each academic area. (3 points)

d. The extent to which the CDWSP award will not result in a decrease in the amount of the institution's own financial support available for minority and economically disadvantaged students, including students with disabilities, in the academic areas or the institution as a whole. (2 points)

e. The extent to which the applicant has provided reasonable accommodations for students with disabilities to enable them to participate in the college/university's academic and work-study programs. (2 points)

E. Selection Factors for Area-Wide Planning Organizations and States (110 Points)

The following factors will be considered by the Department in evaluating applications received from area-wide planning organizations and States in response to this NOFA. Each application must contain sufficient technical information to be reviewed for its technical merit.

1. *Academic Program* (53 points, as allocated below)

a. Relative quality of the academic program offered by the institutions of higher education.

(1) Quality of the academic program in terms of community and economic development course offerings and academic requirements for students. (8 points)

(2) Appropriateness of the curriculum to prepare students for careers in the community and economic development field. (8 points)

(3) Qualifications of the faculty at each college/university listed in the submission and the percentage of time they will teach in the academic area. (6 points)

b. Qualifications of the academic area supervisor at each college/university listed in the submission and the percentage of time they will commit to the students. (7 points)

c. Amount of resources to be committed to the CDWSP.

(1) Appropriateness and adequacy of the applicant's and each institution's plan for the use of its facilities, equipment and financial resources in support of the CDWSP. (2 points)

(2) The degree to which each college/university listed in the application is

able to contribute funds to support the total cost of the project. (5 points)

(3) The degree to which each college/university listed in the application will utilize faculty and staff administrators on staff. (7 points)

d. The success rate of each institution of higher education applying under the applicant in graduating students previously enrolled in the HUD CDWSP or similar work study program. (10 points)

2. *Student Work Placement Assignment* (9 points, as allocated below)

a. The extent to which the participating students will receive a sufficient number and variety of work placement assignments. (3 points)

b. The extent to which the assignments will provide practical and useful experience to students participating in the program. (3 points)

c. The extent to which the assignments will further the participating students' preparation for professional careers in community or economic development, community planning, or community management. (3 points)

3. *Seminars.* (4 points)

The degree to which the proposed seminars will (a) relate to the experience provided under the work placement assignments with the educational experience provided under the academic program and (b) address career planning and permanent job placement. (4 points)

4. *Placement Opportunities* (13 points, as allocated below)

a. The extent to which the educational program for each college/university listed in the application (based on past experience) leads directly and immediately to career opportunities in the community and economic development fields. (6 points)

b. The applicant's success in assisting graduates of the HUD Community Development Work Study Program (CDWSP) or similar work study program to find permanent employment in community development funded agencies. (7 points)

5. *Program Coordination and Administration* (16 points, as allocated below)

a. The extent to which the applicant has established a committee to coordinate activities between program participants to advise the recipient on policy matters, to assist the recipient in ranking and selection of participating students, and to review disputes concerning compliance with program agreements and performance. (8 points)

b. The applicant's ability to track and monitor progress of students enrolled in the program and those who drop out. (4 points)

c. The adequacy of the applicant's plan for placing students in work placement assignments and keeping track of students during the two-year academic period and during the internship, respectively. (4 points)

6. *Institution's Commitment* (15 points, as allocated below)

a. The extent to which the applicant has a recruitment program that demonstrates an active, aggressive, and imaginative effort to identify and attract qualified minorities and economically disadvantaged students, including students with disabilities. (2 points)

b. The success of past and current efforts of colleges/universities listed in the application in preparing these students for careers in community and economic development. (6 points)

c. The extent to which the CDWSP award will result in a net increase of these students in each academic area. (3 points)

d. The extent to which the CDWSP award will not result in a decrease in the amount of the institutions's own financial support available for minority and economically disadvantaged students, including students with disabilities, in the academic areas or the institution as a whole. (2 points)

e. The extent to which the applicant has provided reasonable accommodations for students with disabilities to enable them to participate in the college/university academic and work-study program. (2 points)

F. Program Policy Factors

HUD may provide assistance to support a number of students that is less than the number requested under applications in order to provide assistance to as many highly rated applications as possible. In addition, HUD might award a lower funding level than the requested amount for tuition, work stipend, books and additional support.

In the event two or more applications have the same number of points, the application with the most points for selection factor (1) will be selected. If there is still a tie, the application with the most points for selection factor (5) will be selected.

G. Obtaining Application

For an application kit, contact HUD USER, ATTN: Community Development Work Study Program, P.O. Box 6091, Rockville, Maryland 20850. Applications may be requested beginning April 1, 1996.

Requests for application kits must be in writing, but may be faxed to 301–251–5747. (This is not a toll-free number.) Please refer to FR–4016, and provide your name, address (including zip code) and telephone number (including area code).

H. Submitting Applications and Deadline Date

Applications for funding under this NOFA must be complete and must be physically received in the place designated in the application kit for receipt, by 4:30 p.m. Eastern Time on May 31, 1996. The deadline date and time will be firm as to date and hour. In the interest of fairness to all competing applicants, the Department will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays or other delivery related problems.

Following the expiration of the application submission deadline, HUD will review and rank applications in a manner consistent with the procedures described in this Notice and the provisions of the program regulations at 24 CFR 570.425.

1. Application Content

Applicants must complete and submit applications in accordance with instructions contained in the application kit. The following is a checklist of the application content that will be specified in the RFGA:

(a) Transmittal letter, identifying the agency accrediting the institutions of higher education on whose behalf the application is filed and further stating that such accrediting agency(ies) are recognized by the U.S. Department of Education.

(b) A completed and signed Standard Form 424, Application For Federal Assistance.

(c) Abstract.

(d) Table of Contents.

(e) Proposal narrative statement addressing the factors for award.

(f) Sample copy of student/recipient binding agreement.

(g) Sample copy of recipient/student work placement agreement.

(h) Management/Workplan.

(i) Resumes of Key staff and faculty.

(j) Budget for resident and non-resident students.

(k) Tuition and fee Schedule.

(l) Audit/financial management system information.

(m) Certification by IPA or cognizant audit agency of applicant's financial management system.

(n) If applicable, document verifying a 50 per cent rate of graduation of students from the FY 1993 funding round.

2. Certifications and Exhibits

Applications must also include the following:

(a) Drug-Free Workplace Certification.

(b) Certification prohibiting excessive force against nonviolent civil rights demonstrators, pursuant to 42 U.S.C. 5304 (applies only to applicants that are units of general local government).

(c) Certification on HUD Form 2880, Applicant/Recipient Disclosure, Update Report, disclosing receipt of at least $200,000 in covered assistance during the fiscal year, pursuant to 24 CFR part 12, subpart C, Accountability in the Provision of HUD Assistance.

(d) Disclosure of Lobbying Activities on SF-LLL must be used to disclose lobbying with other than Federally appropriated funds at the time of application if the applicant deems it applicable.

J. Corrections to Deficient Applications

After the submission deadline date, HUD will screen each application to determine whether it is complete. If an application lacks certain technical items or contains a technical error, such as an incorrect signatory, HUD will notify the applicant in writing that it has 14 calendar days from the date of HUD's written notification to cure the technical deficiency. If the applicant fails to submit the missing material within the 14-day cure period, HUD may disqualify the application.

This 14-day cure period applies only to non-substantive deficiencies or errors. Any deficiency capable of cure will involve only items not necessary for HUD to assess the merits of an application against the factors specified in this NOFA.

K. Other Matters:

1. *Federalism Impact* The General Counsel, as the Designated Official under section 6(a) of Executive Order 12612, *Federalism*, has determined that the policies and procedures contained in this notice will not have substantial direct effects on States or their political subdivisions, or the relationship between the federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the notice is not subject to review under the Order.

2. *Impact on the Family* The General Counsel, as the Designated Official under Executive Order 12606, *The Family*, has determined that this notice will likely have a beneficial impact on family formation, maintenance, and general well-being. Accordingly, since the impact on the family is beneficial, no further review is considered necessary.

3. Accountability in the Provision of HUD Assistance

HUD has promulgated a final rule to implement section 102 of the Department of Housing and Urban Development Reform Act of 1989 (HUD Reform Act). The final rule is codified at 24 CFR part 12. Section 102 contains a number of provisions that are designed to ensure greater accountability and integrity in the provision of certain types of assistance administered by HUD.

On January 16, 1992, HUD published at 57 FR 1942, additional information that gave the public (including applicants for, and recipients of, HUD assistance) further information on the implementation, public access, and disclosure requirements of section 102. The documentation, public access, and disclosure requirements of section 102 are applicable to assistance awarded under this NOFA as follows:

a. *Documentation and Public Access.* HUD will ensure documentation and other information regarding each application submitted pursuant to this NOFA are sufficient to indicate the basis upon which assistance was provided or denied. This material, including any letters of support, will be made available for public inspection for a five-year period beginning not less than 30 days after the award of the assistance. Material will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. In addition, HUD will include the recipients of assistance pursuant to this NOFA in its **Federal Register** notice of all recipients of HUD assistance awarded on a competitive basis. (See 24 CFR 12.14(a) and 12.16(b), and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these requirements.)

b. *HUD responsibilities—disclosures.* HUD will make available to the public for five years all applicant disclosure reports (HUD Form 2880) submitted in connection with this NOFA. Update reports (also Form 2880) will be made available along with the applicant disclosure reports, but in no case for a period less than three years. All reports, both applicant disclosures and updates, will be made available in accordance with the Freedom of Information Act (5 U.S.C. 552) and HUD's implementing regulations at 24 CFR part 15. (See 24 CFR part 12, subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942), for further information on these disclosure requirements.)

c. *State and unit of general local government responsibilities—disclosures.* States and units of general government receiving assistance under this NOFA must make all applicant disclosure reports available to the public for three years. Required update reports must be made available along with the applicant disclosure reports, but in no case for a period less than three years. Each State and unit of general local government may use HUD Form 2880 to collect the disclosures, or may develop its own form. (See 24 CFR part 12, subpart C, and the notice published in the **Federal Register** on January 16, 1992 (57 FR 1942) for further information on these disclosure requirements.)

4. Prohibition Against Advance Information on Funding Decisions

HUD's regulation implementing section 103 of the HUD Reform Act, codified as 24 CFR part 4, applies to the funding competition announced today. The requirements of the rule continue to apply until the announcement of the selection of successful applicants.

HUD employees involved in the review of applications and in the making of funding decisions are restrained by part 4 from providing advance information to any person (other than an authorized employee of HUD) concerning funding decisions, or from otherwise giving any applicant an unfair competitive advantage. Persons who apply for assistance in this competition should confine their inquiries to the subject areas permitted under 24 CFR part 4.

Applicants or employees who have ethics related questions should contact the HUD Office of Ethics (202) 708–3815 (voice), (202) 708–1112 (TTY). (These are not toll-free numbers.) For HUD employees who have specific program questions, such as whether particular subject matter can be discussed with persons outside the Department, the employee should contact the appropriate Field Office Counsel or Headquarters Counsel for the program to which the question pertains.

5. Prohibition Against Lobbying Activities

The use of funds awarded under this NOFA is subject to the disclosure requirements and prohibitions of Section 319 of the Department of Interior and Related Agencies Appropriations Act for Fiscal Year 1990

(31 U.S.C. 1352) and the implementing regulations at 24 CFR part 87. These authorities prohibit recipients of federal contracts, grants, or loans from using appropriated funds for lobbying the Executive or Legislative Branches of the Federal Government in connection with a specific contract, grant, or loan. The prohibition also covers the awarding of contracts, grants, cooperative agreements, or loans unless the recipient has made an acceptable certification regarding lobbying. Under 24 CFR part 87, applicants, recipients, and subrecipients of assistance exceeding $100,000 must certify that no federal funds have been or will be spent on lobbying activities in connection with the assistance.

7. The information collection requirements contained in this NOFA have been approved by the Office of Management and Budget (OMB), under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520) and assigned OMB control number 2535–0084.

8. The assistance under this NOFA is categorically excluded from review under the National Environmental Policy Act, pursuant to 24 CFR 50.20(b).

L. The Catalog of Federal Domestic Assistance Program

The Catalog of Federal Domestic Assistance Number is 14.234.

Authority: 42 U.S.C. 5301–5320; 42 U.S.C. 3535(d); 24 CFR 570.402.

Dated: March 13, 1996.

Michael A. Stegman,

Assistant Secretary for Policy Development and Research.

24 CFR Part 885, et al.

Supportive Housing for the Elderly and Persons With Disabilities; Final Rule

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Parts 885, 889, 890, and 891

[Docket No. FR–3941–F–01]

RIN 2502–AG51

Office of the Assistant Secretary for Housing—Federal Housing Commissioner; Supportive Housing for the Elderly and Persons With Disabilities

AGENCY: Office of the Assistant Secretary for Housing—Federal Housing Commissioner, HUD.

ACTION: Final rule.

SUMMARY: This rule represents the final rulemaking for HUD's Section 202 Program of Supportive Housing for the Elderly and the Section 811 Program of Supportive Housing for Persons with Disabilities, both of which HUD has previously implemented through several interim rules. As part of President Clinton's regulatory reinvention initiative, this final rule also consolidates and streamlines the regulations for these two programs in order to make them easier to use and understand. This rule also eliminates obsolete regulations from 24 CFR part 885 regarding the Loans for Housing for the Elderly or Handicapped Program, and moves the remaining provisions to a subpart within the consolidated supportive housing regulations. Furthermore, information that is also in the statute or that should be more appropriately placed in the program handbook or in Notices of Funding Availability (NOFAs) has been deleted from the regulations.

EFFECTIVE DATE: April 22, 1996.

FOR FURTHER INFORMATION CONTACT: Linda Cheatham, Director, Office of Multifamily Housing Development, Department of Housing and Urban Development, 451 Seventh Street SW., Room 6134, Washington, DC 20410, telephone (202) 708–3000. (This number is not toll-free.) Hearing- or speech-impaired persons may access that number by calling toll-free the Federal Information Relay Service at (800) 877–8339.

SUPPLEMENTARY INFORMATION:

I. Background

A. Loans for Housing for the Elderly or Handicapped; Part 885

Under section 202 of the Housing Act of 1959 (12 U.S.C. 1701q) and the regulations at 24 CFR part 885, HUD provided direct Federal loans to assist private, nonprofit corporations and nonprofit consumer cooperatives in the development of housing projects serving elderly or handicapped families and individuals. Loans made under part 885 were used to finance the construction or substantial rehabilitation of projects for elderly or handicapped families, or to finance the acquisition with or without moderate rehabilitation of existing housing and related facilities for group homes for nonelderly handicapped individuals.

HUD published two interim rules in the **Federal Register** on June 12, 1991 (56 FR 27070, 27104) establishing the Section 811 Program of Supportive Housing for Persons with Disabilities (24 CFR part 890) and the Section 202 Program of Supportive Housing for the Elderly (24 CFR part 889). The interim rule for the Section 202 Program (56 FR 27104) also amended part 885 and provided that part 885 would continue to apply to projects for which Section 202 loan reservations were made in Fiscal Year (FY) 1990 and prior years. The rule further provided, however, that projects for the elderly selected for funding in FY 1991 and subsequent years would be covered by part 889. Since no new projects are being funded under the regulations in part 885, many of the provisions in that part that do not apply to the continued management of the projects are unnecessary, and HUD can remove them from the Code of Federal Regulations.

Therefore, this final rule removes several definitions from § 885.5. Second, this rule eliminates §§ 885.200 through 885.405 and § 885.415 regarding projects that received reservations under section 202 of the Housing Act of 1959 and housing assistance under section 8 of the United States Housing Act of 1937 (202/8 projects). No new 202/8 projects will be funded, and all of the projects have either closed or been converted to capital advances under either part 889 or part 890. Third, this rule eliminates many sections in subpart C of part 885 regarding projects for nonelderly handicapped families receiving reservations under section 202 and project assistance payments under section 202(h) of the Housing Act of 1959 (202/162 projects). No new 202/162 projects will be funded, and all existing 202/162 projects have closed or have been converted to capital advances under part 890. Fourth, this rule will also remove other definitions and provisions from part 885 that are merely explanatory or duplicative. Lastly, this rule moves the remaining provisions from part 885 to subpart E of the new streamlined regulations for the supportive housing programs.

B. June 12, 1991 Interim Rules

On June 12, 1991, HUD published in the **Federal Register** two interim rules, one for the Section 202 Program of Supportive Housing for the Elderly (56 FR 27104) and one for the Section 811 Program of Supportive Housing for Persons with Disabilities (56 FR 27070). The interim rule for the Section 202 Program (56 FR 27104) provided for the continued applicability of part 885 to projects for which Section 202 loan reservations had been made in fiscal year (FY) 1990 and prior years, and to add part 889 establishing the new Section 202 Program of Supportive Housing for the Elderly and enabling FY 1991 funding for the program. The interim rule for the Section 811 Program (56 FR 27070) added a new part 890 establishing the new program for persons with disabilities. These two interim rules contained very similar provisions. As stated in the preambles to both rules (56 FR 27070, 27104), HUD intended to establish additional requirements for the supportive housing programs in separate rules.

HUD received 19 comments on the interim rule for the Section 202 Program, and 24 comments on the interim rule for the Section 811 Program. HUD responded to some objections raised by commenters by changing the program requirements in the subsequent interim rules discussed below. The following discussion summarizes the other comments and provides HUD's responses to those comments.

1. Definition of "Acquisition"

One commenter objected to the definition of "acquisition" in the interim rule for the Section 811 Program (§ 890.105 of the interim rule; § 891.305 of this final rule). This definition provides that property other than from the Resolution Trust Corporation (RTC) is only eligible for acquisition if at least three years have elapsed from the completion of the project or the beginning of occupancy to the date of application. The commenter argued that HUD should eliminate this limitation, since it is beyond the intent of the statute and it denies the opportunity for acquisition of newer properties except through the RTC.

HUD Response: HUD agrees and is removing the three year requirement. Furthermore, HUD is removing the prohibition against acquiring property to use as independent living facilities. Previously, acquisition without rehabilitation was limited to group homes and property from the Resolution Trust Corporation.

2. Definition of "Independent Living Facility"

Three commenters objected to the definition of "independent living facility" in § 890.105 of the interim rule for the Section 811 Program. The definition limits projects for persons with chronic mental illness to occupancy by 20 such persons. The commenters argued that the statutory definition allows 24 persons, and makes no distinction between persons with chronic mental illness and other persons with disabilities. Some of the commenters argued that such a distinction by HUD is a violation of the Fair Housing Act and section 504 of the Rehabilitation Act of 1973. One of the commenters also objected to allowing projects up to 40 persons, arguing that this is an "inappropriately large upper limit" that will result in the segregation of persons with disabilities. However, the other commenter argued that the smaller number of persons permitted in facilities for persons with chronic mental illness will increase costs and make it more difficult to develop such facilities in large urban areas.

HUD Response: Congress originally set the project size limit for independent living facilities at 20 persons. Although an amendment to the statute increased the project size limit to 24 persons (Pub. L. 102–27; approved April 10, 1991) (42 U.S.C. 8013(k)(4)), HUD chose to retain the 20 person limit for independent living facilities for persons with chronic mental illness. In FYs 1993, 1994, and 1995, however, HUD decided that the project size limit for independent living facilities would be 24 persons regardless of the disabled population being served. HUD intends to retain this limit in future funding cycles. In response to the commenter who objected to allowing projects up to 40 persons, HUD intends to remove the upper limit on exceptions to the project size limits in the next Notice of Funding Availability to allow this determination to be made at the local level.

3. Definition of "Person With Disabilities"

One commenter objected to the definition of "person with disabilities" in the interim rule for the Section 811 Program (§ 890.105 of the interim rule; § 891.305 of this final rule), which excludes persons whose sole impairment is alcoholism or drug addiction. This commenter argued that this definition is contrary to the Fair Housing Act, which protects persons disabled by alcoholism or substance abuse (although not those who currently and illegally use or are addicted to controlled substances).

HUD Response: HUD has consistently used a definition of "person with disabilities" for the Section 811 Program and its predecessor, the Section 202 Program, that excludes persons whose sole impairment is alcoholism or drug addiction. In other words, drug or alcohol addiction alone is not a qualifying condition for occupancy in Section 811 housing. Alcohol or drug addiction would not disqualify a person, however, as long as the person meets the required three-pronged test for eligibility as a person with a disability (i.e., physical, mental, or emotional impairment is of long-continued and indefinite duration, the impairment substantially impedes the person's ability to live independently, and the person's ability to live independently could be improved by more suitable housing conditions).

4. Definition of "Sponsor"; Prohibited Relationships

One commenter suggested that the regulations for these programs be changed to allow management contracts between the Owner and the Sponsor or its nonprofit affiliate or wholly-owned for-profit subsidiary. This commenter, who sponsors Section 202 and Section 811 projects, asserts that the for-profit nature of its subsidiary has meant that the housing needs of more people are fulfilled, since the net profits of the subsidiary go back into the nonprofit Sponsor.

This commenter also objects to the provisions in the interim rules that no officer or director of the Sponsor is permitted to have any financial interest in any contract with the Owner in connection with the rendition of services. This commenter describes a situation in which the Owner's attorney is also an unpaid board member. This arrangement is desirable because it allows the organizations to take advantage of the attorney's unique expertise. However, under the definition of "Sponsor," the attorney's fees can no longer be paid from project funds.

Another commenter asserted that these regulations make it virtually impossible for Sponsors to pay for project management costs, eliminating the benefits of repeat participation by experienced nonprofit developers. Specifically, this commenter suggests that HUD allow Sponsors to receive consultant fees, so that qualified Sponsors that perform such services can be compensated accordingly.

HUD Response: The handbooks for the Section 202 and Section 811 Programs provide exceptions to these provisions by permitting the Sponsor or its nonprofit affiliate to contract for a fee with the Owner to provide management services and/or supportive services. Furthermore, attorney's fees can be paid from project funds, unless the attorney is an officer or board member of the Sponsor or Owner. The same restriction that applies to other development team members also applies to attorneys. As part of HUD's efforts to simplify the Section 202/811 development process, this rule eliminates the housing consultant's fee in lieu of a developer's fee from which the Owner can pay the Sponsor for consulting services.

5. Project Standards for Group Homes

With regard to § 890.210(b) of the interim rule for the Section 811 Program (§ 891.310(a) of this final rule), one commenter remarked that it may be impossible to meet the space per resident requirements within the development cost limits. Another commenter requested clarification on the provision requiring that a project involving acquisition comply with applicable State requirements. In the absence of such requirements, the project must comply with standards as described in the interim rule (§ 890.210(b) of the interim rule; § 891.310(a) of this final rule). This commenter asked whether HUD's standards apply if they are greater than the State's standards, and if so this commenter requested HUD to state this clearly in the regulations. The commenter also requested HUD to state clearly that in no case must a project comply with State standards in violation of the Fair Housing Act.

HUD Response: During the past five years of program operation, HUD is not aware of Sponsors having difficulty in meeting the space per resident requirements within the development cost limits. In the near future, HUD will be closely examining the development cost limits to ensure that they are reflective of their respective localities. Previously, if the fund reservation was not adequate to support the development of the project, an amendment to the fund reservation would be made for HUD-approved expenses up to the maximum amount allowable. Although there will still be amendments to the fund reservation, with this final rule, amendments will be available only after initial closing. In response to the commenter asking for clarification regarding whether HUD's standards apply to acquisition projects if they are greater than applicable State requirements, § 891.310 of this final rule requires that the project at least meet applicable State requirements if they

exist, and if they do not, the project must meet the HUD requirements. The purpose of this provision is to permit flexibility in the group home standards when complying with the HUD requirements may prove to be cost prohibitive. In regard to the request from the same commenter for a statement that in no case must a project comply with State standards in violation of the Fair Housing Act, HUD feels that such a statement is unnecessary since participation in the program requires a Sponsor to certify that it will comply with the requirements of the Fair Housing Act and implementing regulations.

6. Limits on Number of Units

Three commenters objected to the provision of the interim rule for the Section 202 Program limiting to 10 percent of the national allocation the number of units for which national organizations can apply (§ 889.215 of the interim rule; § 891.215 of this final rule). The commenters argued that this limitation is arbitrary, not required by statute, and contrary to the goal of producing the highest quality housing. Applications should be funded on merit and local need. One commenter suggested that if limits are absolutely necessary, this section should be revised so that the limit only applies if there are at least 10,000 units being allocated for the program that year. Furthermore, HUD should base the limits on the number of units awarded, rather than the number of units for which the Sponsor is applying. Finally, HUD should waive this requirement if there are no suitable competing applicants in a particular region.

HUD Response: The limit on the number of Section 202 units for which national organizations can apply was established to ensure that organizations that are not national in scope would have a more equitable opportunity to participate in the program. Contrary to the opinion of the commenter, applications are funded based on merit and local need. However, without a limit on the number of units that national organizations can apply for, these organizations have a competitive edge over qualified non-national organizations. This results in a possible tendency to dominate the program. Although HUD intends to continue placing a limit on the number of Section 202 units a national organization can apply for, the requirement will be in the Notice of Funding Availability published in the **Federal Register** once Congress appropriates Section 202 funds to HUD. Therefore, this final rule deletes the limit from the regulations.

7. Project Eligibility and Size Limits

Seven commenters requested additional guidance with regard to the interim rule for the Section 811 Program, under which eligible projects include dwelling units in multifamily housing developments, condominiums, and cooperatives (§ 890.215(a)(3) of the interim rule). These commenters argued that one of the core goals of the National Affordable Housing Act was to expand available housing options beyond group homes and independent living facilities. Therefore, HUD should provide guidance as to the applicability of the requirements of each section of the interim rule to the newly available options. One commenter specifically asked for guidance with regard to limits on the number of dwelling units within multifamily developments and limits on the number of persons who may reside in such units.

Another commenter suggested that, in order to encourage independent and integrated housing for persons with disabilities, the regulations should not require the Sponsor to notify the municipality in the case of acquisition of individual dwelling units in multifamily developments, condominiums, and cooperatives.

Three commenters suggested that HUD develop strict guidelines for waiving the project size limits of the Section 811 rule (§ 890.215(c) of the interim rule). Several commenters asserted that allowing the development of larger facilities through a waiver of the size limits is contrary to the goal of providing quality services and an integrated living environment. The other commenter suggested that HUD require Sponsors to demonstrate thoroughly the necessity for such an exception to the size limits. For instance, HUD should require the Sponsor to demonstrate that there is no other residential site within a reasonable distance that would make a smaller project feasible. However, one commenter argued that rather than making these waivers harder to obtain, HUD should make them easier to obtain by expediting its review and approval of such waivers.

HUD Response: In response to the seven commenters that requested guidance as to the applicability of each section of the interim rule to the newly available options of dwelling units in multifamily housing developments, condominiums, and cooperatives, HUD has determined that detailed information concerning these housing options would be more appropriate in a handbook and intends to issue a revised handbook in the near future.

In response to the commenter that suggested that the Sponsor not be required to notify the municipality when acquiring dwelling units in multifamily developments, condominiums, and cooperatives in order to encourage independent and integrated housing for persons with disabilities, HUD does not find that notifying the municipality will have any negative impact on integrating persons with disabilities. The units will be dispersed within the structure and thus will be difficult to identify as housing for disabled persons.

In response to the comments on exceptions to project size limits, HUD has decided to eliminate from the regulation the section on project size limits and exceptions. This information will appear in the annual Notice of Funding Availability (NOFA). However, since HUD published the last interim rule, HUD has expanded the criteria required for Sponsors to request a waiver of the project size limits by adding that the Sponsor must demonstrate why the site was selected, as well as how the size of the project is consistent with State and/or local policies governing similar facilities for the proposed population. Furthermore, HUD intends to remove the upper limits on the number of units that can be requested so that the size of the project can be determined more appropriately at the local level.

8. Design and Cost Standards

This provision of the interim rules (§ 891.120(c) of this final rule) provided that HUD would not fund certain amenities, such as washers and dryers in individual units. One commenter objected, arguing that easily accessible washers and dryers do not represent excessive costs, but rather are especially important for older and frailer persons. This commenter also noted that the failure to provide individual laundry facilities may increase service costs for those unable to carry their laundry to distant facilities. Several other commenters remarked that features such as washers and dryers are considered standard features in most new housing today, and many of the excluded amenities can materially contribute to the independence of a person with disabilities. These commenters argued that Sponsors should be allowed to provide these amenities if they can do so within the cost limits.

HUD Response: Section 202 and Section 811 projects must be modest in design. Therefore, there are certain amenities such as atriums, bowling alleys, and swimming pools, that are considered excessive and are not eligible to be paid for out of the capital advance (§ 891.120(c)). However, there is no prohibition against the Sponsor including certain excess amenities as long as they pay for them from other sources.

One commenter also objected to § 890.220(b) in the interim rule for the Section 811 Program, which provides that HUD will establish limits on unit sizes and number of bathrooms for independent living facilities. This commenter remarked that such specifications have caused costly delays in construction, and that HUD should be more flexible and result-oriented. HUD should focus on enforcing the development cost limits and the incentives for savings, as well as the minimum construction and space standards, rather than on design and cost standards.

HUD Response: If the project is to be newly constructed and designed from the beginning according to the maximum unit sizes and number of bathrooms, HUD disagrees with the commenter that this requirement could cause costly delays in construction. If the project is to be rehabilitated, there is flexibility in meeting this requirement when complying with the limitations would be too costly. Also, if the Sponsor can develop the project with larger sized units and more bathrooms within the appropriate development cost limit the Sponsor is permitted to do so. The Sponsor can also pay for the extra space and the associated operating cost with funds from other sources. The reference to unit size and number of bathrooms for independent living facilities will be in the handbook and not in the regulation.

9. Site and Neighborhood Standards

Two commenters objected to the provision of the interim rule for the Section 811 Program (§ 890.230(g) of the interim rule; § 891.320(b) of this final rule) that prohibits developing projects adjacent to certain types of facilities, such as schools or other housing primarily for persons with disabilities. One of these commenters argued that persons with disabilities might need to be close to such supportive services, and developing a project on a site near such services would decrease the cost of service delivery. This commenter noted that HUD considers the proximity or accessibility of such services as a selection criterion for funding (§ 890.300(c)(6)(i)(A) of the interim rule). The other commenter warned that this requirement contradicts the Fair Housing Amendments Act of 1988, and that it fuels potential community opposition by allowing opponents to protest that their area is "concentrated" with other facilities for persons with disabilities.

HUD Response: HUD has determined that the location of the project should be decided at the local level, and therefore has relaxed the requirement in § 891.320(b) of this final rule by indicating that projects "should" rather than "must" be located in neighborhoods where other family housing is located, and "should not" rather than "may not" be located adjacent to certain facilities. However, the statute still prohibits more than one group home from being located on one site, as well as a group home from being located on a site contiguous to another site containing such a home.

10. Development Cost Limits

HUD received many comments on this provision of both interim rules. One commenter remarked that the development cost limits are "woefully inadequate." Three commenters objected to the calculation of the development cost limits under the interim rules. These commenters asserted that HUD offices are instructed not to add an additional 10 percent for Costs Not Attributable, and this will result in lower maximum cost limits. They reminded HUD to ensure that the High Cost Factors are truly reflective of costs in the area, as is required by the conference report on the National Affordable Housing Act.

Three commenters objected to the development cost limits for the acquisition without rehabilitation of properties from the Resolution Trust Corporation (RTC). The interim rules provided that in the case of RTC properties that require no rehabilitation, the cost limits are reduced to 85 percent of the limits listed in the rule. These commenters asserted that there is no statutory basis for this reduction and that the reduction will effectively eliminate these properties as viable options.

Five commenters remarked that the interim rule for the Section 811 Program provides no guidance on development cost limits for dwelling units in multifamily housing, condominiums, or cooperatives.

HUD Response: HUD will review the development cost limits, which have been deleted from this final rule, to ensure that they adequately reflect the cost of developing similar housing in the locality. HUD will establish the development cost limits and all future changes to them through a notice in the **Federal Register**.

Although there is no statutory basis for the lower development cost limit for properties acquired from the RTC that will not need any rehabilitation, the 85 percent limit is justified since properties can be obtained less expensively from the RTC than they can from the private market.

The reason that the interim rule for the Section 811 Program did not provide guidance on development cost limits for dwelling units in multifamily housing, condominiums, or cooperatives is that these housing types are considered independent living units, and therefore would use the appropriate development cost limit based upon the number and size of the units and whether or not the structure has an elevator.

In this section (§ 891.140 of this final rule), HUD has provided incentives for savings by providing that Owners whose actual development costs are less than the initial fund reservation for the capital advance will retain 50 percent of this savings in their Replacement Reserve Account. The Owner will retain 75 percent of this savings by adding energy efficiency features. One commenter asked for further details concerning which energy efficiency features will satisfy this incentive.

Six commenters remarked on the retention of the savings in the Replacement Reserve Account, the funds in which may only be used for repairs or replacements in or capital improvements of the project. These commenters requested that HUD provide greater flexibility in the use of these savings. The commenters suggested HUD change the regulations in one of the following ways: relax the requirements for the use of at least a portion of the funds in the Replacement Reserve Account; retain the funds in the Residual Receipts Account; or split the funds between the two accounts, so that the funds can be used for resident services after all repair needs have been met. One commenter further recommended that HUD's share of the savings should be placed in a special account to provide needed repairs and modernization for those Section 202 projects with no reserves on which to draw.

HUD Response: HUD will give further details concerning which energy efficiency features will satisfy the incentive to retain 75 percent of the savings in the program handbook.

In response to the request that HUD allow more flexibility in the use of the savings, HUD believes that the appropriate account for any savings received is the Replacement Reserve Account since there are no other funds provided for needed repairs and maintenance. The Residual Receipts Account is used for other purposes. The

statute specifically states that if there are savings, HUD retains 50 percent; it does not permit HUD's share to be folded back into the project.

11. Term of Commitment

Two commenters expressed concern that although HUD requires that housing assisted under both programs remain available to very low-income elderly persons and persons with disabilities for 40 years (480 months), the initial contract for project rental assistance shall be for 240 months, with an extension of not less than 60 months. This commenter suggests that the regulations provide for contract extensions for not less than 240 months, since rental assistance will be required in order to ensure the housing is available.

HUD Response: HUD recognizes that project rental assistance funds will be necessary to keep the Section 202 and Section 811 projects viable for 40 years. However, in these times of uncertainty and extreme budget constraints, HUD is unable to extend contracts for project rental assistance for an additional 240 months. In fact, in the FY 1995 funding cycle, HUD was permitted to reserve project rental assistance contract (PRAC) funds for only 60 months as opposed to the usual 240 months. HUD will do all it can to assure that residents of Section 202 and Section 811 housing will continue to receive rental assistance as long as they remain eligible.

12. Other Financing Sources

Two commenters remarked on HUD's statement in the preamble to the interim rule for the Section 202 Program (56 FR 27105) that HUD would generally not accept borrowed funds from other sources. These commenters suggested that HUD remove this limitation and allow Owners to use such funds, since Congress intended to encourage mixed financing (17 U.S.C. 1701q(h)(6)). One commenter suggested that local HUD offices have the ability to approve such loans, especially "soft loans" or secured grants to ensure program compliance, and that the regulations should set general parameters on the loan terms.

HUD Response: Owners are permitted to use borrowed funds from other sources in the case of secondary financing. Field offices must review requests for approval of secondary financing, and provided the documents meet HUD requirements, they will be approved.

13. Owner Deposit (Minimum Capital Investment)

HUD received many comments on this provision of both interim rules (§ 891.145 of this final rule). These commenters remarked that this deposit requirement is a serious financial burden. The commenters further expressed concern that this provision penalizes Sponsors for delays that are often beyond the Sponsors' control or even HUD-related. Other delays are caused by having to obtain municipal approval, conduct archeological investigations, examine subsurface conditions for toxic leaks, conduct public hearings, and obtain a building permit.

The commenters offered several suggestions. One commenter suggested that HUD adopt an approval process that is more decentralized, more flexible, and result-oriented. Another commenter suggested that HUD should return the deposit once the project has closed and project viability is assured; such a provision would allow Sponsors to use the experience gained in previous projects in the development of subsequent projects. Another commenter suggested that HUD should treat the 18-month and 6-month time periods as targets, giving local offices the permission to extend the time periods based on determinations of individual circumstances. Two commenters suggested that any processing time by HUD offices in excess of the recommended times should be credited to the Sponsor as an extension. Another commenter suggested that if HUD is responsible for delaying the final closing beyond the 6-month time period (plus a 2-month extension), then HUD should return the full balance remaining in the Minimum Capital Investment. Finally, one commenter suggested that the funds that are returned should be placed in either the Replacement Reserve or Residual Receipts Accounts, at the Sponsor's option.

HUD Response: Although HUD appreciates the recommendations, HUD established the policies regarding the Minimum Capital Investment to provide an incentive for Owners to reach final closing early, and so far the policies are working. Therefore, HUD will not make any changes to these policies at this time.

14. Provision of Services

HUD received one comment requesting clarification on the provision in § 889.260(b)(3) of the interim rule for the Section 202 Program (§ 891.225 of this final rule) regarding the $15 per unit per month service cost allowance. This commenter inquired whether the funding for the service coordinator is different from or included in this $15 per unit per month service allowance. Three commenters expressed concern that $15 may be an insufficient service allowance for frail elderly persons. One of these commenters suggested that more money be allocated for service subsidies. The other commenter suggested that HUD revise the dollar amount if it should prove to be insufficient, and at least annually to reflect the changing cost of services. The third commenter recommended that a copayment by the tenant receiving the service should only be voluntary; since these tenants will have low incomes, they may not have sufficient funds for all their needs.

Two commenters encouraged HUD to allow a $15 per unit operating cost under the Section 811 Program as well as under the Section 202 Program, since operating costs for housing for persons with disabilities may often be equal to or greater than those for elderly persons.

HUD Response: The funding sources for service coordinators and the $15 per unit per month service allowance are separate. The amount of $15 per unit per month was determined based upon HUD's experience with the Congregate Housing Services Program. At this time HUD has not had sufficient experience with the service allowance in the Section 202 Program to determine whether the amount of $15 per unit per month is sufficient. The Section 811 statute does not provide for any HUD funding for supportive services.

15. Service Coordinator Funds in Housing for Frail Elderly Persons

Several commenters objected to HUD's decision that the only developments that can receive service coordinator funding under the Section 202 Program are those in which more than 50 percent of the residents are "frail." First, as one commenter asserted, the service coordinator is instrumental in assessing clients to determine frailty. Further, another commenter cited surveys indicating that approximately 25 percent of the residents in subsidized senior housing will require services. Requiring twice that number of frail elderly tenants will overwhelm management, even with a service coordinator. It will also lead to an undesirable balance of "well to frail" residents. The commenters argued that service coordinators are essential to every development, and therefore HUD should provide service coordinator funds for all developments regardless of the number of "frail" elderly tenants.

One commenter expressed concern regarding the assessment of the occupants' abilities (with regard to the "activities of daily living") at the time the Sponsor is developing its supportive services plan and the rest of its application. According to the nondiscrimination requirements, such as section 504 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act, this commenter asserts that it will be legally impossible to make such determinations in advance. The commenter suggested that HUD require a statement from the Sponsor certifying its intent to assess the physical characteristics and abilities of the tenants following initial rent-up. At that time the Sponsor would have a clear idea of the number of tenants needing services and how to deliver those services.

HUD Response: In response to the objection that only projects with at least 50 percent frail elderly persons are eligible for service coordinator funding, the actual requirement is that projects principally serving the frail elderly are eligible for service coordinator funding. Limited funds should be provided where there is the most need. In other projects that do not qualify for service coordinator funding, management assumes many of the same functions as a service coordinator.

The requirement to assess occupants' abilities with regard to the activities of daily living at the time the Sponsor is developing its supportive services plan and application does not violate section 504 or the Americans with Disabilities Act because the requirement is to assess in general the abilities of potential occupants from the general population.

16. Housing Only Independent Persons

With regard to the elderly program, one commenter objected that HUD has created a loophole by allowing Sponsors to provide no supportive services by housing all fully independent persons. This commenter cited a draft of HUD's training materials providing that "if the applicant is not going to provide services, it only needs to justify market demand for fully independent elderly." The commenter argued that this may violate section 504 of the Rehabilitation Act of 1973, and it is contrary to the purpose of the Section 202 Program. The commenter suggested that HUD require all Sponsors to anticipate housing some elderly persons requiring services and to plan for the delivery of such services.

HUD Response: At the outset, a Sponsor may serve all fully independent elderly people. However, eventually many occupants will require services as they get older. Sponsors proposing to serve all fully independent elderly people initially must describe in their applications how they will address the service needs of their residents as they "age in place."

17. Provision of Services to Nonresidents

With regard to the Section 202 Program, the statute provides that HUD may permit the provision of services to elderly persons who are not residents, as described in the preamble to that interim rule (56 FR 27106). However, one commenter urged HUD not to allow the provision of services to nonresidents unless these recipients are very low-income, there is available funding to assist these persons, and the needs of current residents are fully met.

HUD Response: The Section 202 statute allows the Secretary to permit the provision of services to elderly persons and persons with disabilities who are nonresidents only if doing so will not adversely affect the cost-effectiveness or operation of the program or add significantly to the need for assistance.

18. Application Contents

HUD received several comments on the application requirements in the interim rules. Several commenters on the elderly program suggested that since many Area Agencies on Aging will serve as the primary services liaisons with any new Section 202 housing development, the regulations should strongly encourage their coordinated efforts during the application process under the elderly program.

Another commenter objected to the requirement in the interim rule for the Section 811 Program that Sponsors submit a certification from the appropriate State or local agency that it has reviewed the supportive services plan (§ 890.265(c)(19) of the interim rule). One commenter asserted that some State and local agencies have a "bias" against nonprofit organizations operating housing for the populations they also serve. Therefore, this commenter suggested that HUD allow the waiver of this requirement upon sufficient documentation that the supportive services plan is adequate.

Several commenters remarked on the requirement that sponsors describe their "ties to the community" (§ 890.265(c) of the interim rule). While this requirement could include evidence that the sponsor is a viable part of the community and evidence of the sponsor's ability to carry out the project, its past experience, and its financial and programmatic capability, these commenters argued that HUD cannot require statements of support or approval of the application by members of the community. The commenters argued that this may be an unnecessary and illegal requirement in violation of the Fair Housing Amendments Act of 1988.

HUD Response: This final rule removes the application contents from the regulations. Instead, HUD will include them in the annual NOFAs published in the **Federal Register** for the programs, as well as in a self-contained application. The requirement that Sponsors submit a certification from the appropriate State or local agency with a determination as to whether the supportive services plan is well designed to meet the needs of persons with disabilities is statutory and cannot be waived.

In response to the commenters who argued that HUD cannot require statements of support or approval of the application by members of the community, HUD revised this requirement in the interim rule published in the **Federal Register** on May 5, 1993. Since the effective date of that rule, applicants have been required to include in their applications statements of support for the proposed project from nongovernmental organizations that are familiar with the needs of the population the project would serve. For example, an applicant proposing to develop housing for people with chronic mental illness could include in their application a letter of support for the project from a local service provider that offers mental health services. Such letters of support help HUD determine the Sponsor's ties to the community and the amount of local support for the project, both of which are indicators of the project's potential sucess.

19. Review of Applications for Fund Reservation

Four commenters objected to the ranking and selection process described in the interim rule for the Section 811 Program (§ 890.300 (d) and (e) of the interim rule). Using this selection process, HUD would fund all approvable applications that contain evidence of control of an approvable site before it would fund any applications in which the Sponsor had identified the site but did not yet have control of the site. The commenters argued that this process makes all other selection criteria subordinate to control of the site at the time of application. This unduly restricts Sponsors from developing innovative housing opportunities, and HUD should instead balance site control with the other criteria.

HUD Response: In this final rule, HUD has removed the provisions on the ranking and selection process from the

regulation. These provisions will appear in the annual NOFAs for the programs. The statute requires HUD to use, as a selection criterion for the Section 811 program, the extent to which the applicant has site control. In order to implement this requirement, HUD created two categories of applications; Category A for those applicants with satisfactory evidence of an approvable site, and Category B for applicants that had identified a site. Priority in selection was given to Category A applicants. For the FY 1995 program, HUD changed the procedures by eliminating the categories in favor of awarding bonus points to applicants with satisfactory evidence of an approvable site. HUD believes this procedure satisfies the statutory requirement without making all other selection criteria subordinate. It does not unduly restrict Sponsors from developing innovative housing opportunities, but rather provides an incentive for Sponsors to lock-in suitable sites that will result in much needed housing being available for persons with disabilities sooner.

20. Cancellation of Fund Reservation

Two commenters suggested that if a project is cancelled, HUD should reallocate the funds to another application in the same region in which HUD had originally allocated them. This will fulfill the goal of balancing housing opportunities across the country. Another commenter remarked that HUD should at least inform the public of how HUD will reallocate the funds by including this information in the regulations.

HUD Response: The appropriations act in effect for the year in which a project is cancelled governs HUD's ability to recapture and reuse Section 202 and Section 811 contract authority.

21. OMB Circular A–110

In the preamble to the interim rules (56 FR 27073, 27107), HUD specifically requested comments regarding the use of OMB Circular A–110 entitled "Grants and Agreements with Institutions of Higher Education, Hospitals, and other Nonprofit Organizations—Uniform Administrative Requirements." Three commenters responded that the use of this circular should not be required. These commenters explained that the development team concept is more appropriate for this program than the competitive procurement process. Two of the commenters explained that bidding would make it difficult for Sponsors to use professionals who are experienced in the program and who are willing to defer fees because of their relationship with Sponsors. The other commenter asserted that competitive procurement is more costly and time-consuming.

HUD Response: The Office of Management and Budget (OMB) has determined that OMB Circular A–110 does not apply to the section 202 and section 811 Programs.

C. August 12, 1992 Interim Rules

On August 12, 1993, HUD published in the **Federal Register** two more interim rules, one for the section 202 Program of Supportive Housing for the Elderly (57 FR 36338), and one for the section 811 Program of Supportive Housing for Persons with Disabilities (57 FR 36330). The August 12, 1992 interim rules provided guidance on the development of supportive housing, elements of which include requests for capital advance financing, approval of such requests, and repayment of a capital advance. These interim rules also provided guidance regarding project rental assistance contracts.

HUD received one request for information and one comment in response to the August 12, 1992 interim rules. The commenter requested that HUD allow for-profit corporations, as well as nonprofit organizations, to participate in the programs.

HUD Response: The section 202 and 811 statutes prohibit participation in the programs by for-profit corporations.

D. May 5, 1993 Interim Rules

On May 5, 1993, HUD again published in the **Federal Register** two interim rules, one for the section 202 Program of Supportive Housing for the Elderly (58 FR 26836) and one for the section 811 Program of Supportive Housing for Persons with Disabilities (58 FR 26816). As HUD described in the preambles to these interim rules, the rules incorporated amendments to the programs made by the Housing and Community Development Act of 1992. The interim rules also clarified and simplified many of the requirements in the regulations, including substantial improvements to the selection process.

HUD received eight comments in response to the May 5, 1993 interim rules. Several of the comments consisted of inquiries about specific aspects of the regulations. Many of the other commenters commended HUD on its efforts to clarify and simplify the application and selection process. However, two commenters objected to the change in the processes for Notices of Funding Availability (NOFAs). In the May 5, 1993 interim rules, HUD changed the NOFA process so that field offices would no longer publish Invitations for Applications in newspapers; the field offices must only notify media for minority persons, as well as media for elderly persons and persons with disabilities, as applicable. The commenters argued that this limits the availability of information about relatively new programs that will provide urgently needed housing opportunities.

HUD Response: HUD decided to eliminate the requirement that HUD field offices publish Invitations for Applications in newspapers because HUD could not afford to continue paying the advertising costs. However, each field office keeps a mailing list of organizations that are current customers, as well as those that have expressed an interest in the programs but that have not yet participated, and mails to each of them a copy of the NOFA as soon as it is published in the **Federal Register**.

E. March 2, 1995 Interim Rules

On March 2, 1995, HUD published in the **Federal Register** two more interim rules, one for each program (60 FR 11828, 11836). These rules provided guidance on managing supportive housing for the elderly or persons with disabilities. Specifically, these rules contained provisions regarding Owner responsibilities, tenant responsibilities, leases, security deposits, utility allowances, vacancy payments, and HUD reviews.

HUD received two comments on this set of interim rules. One commenter requested that HUD provide funds under other programs for elderly housing.

HUD Response: HUD does provide funds under other programs such as the Public Housing Program, the section 8 Rental Certificate and Housing Voucher Program and the section 232 Program for elderly housing.

The other commenter expressed two main concerns regarding civil rights issues. First, this commenter emphasized that the required receipt of supportive services may violate an individual's civil rights. Therefore, this commenter urged HUD to include language throughout the rule stressing that the available services are voluntary and are not a condition of admission or continued occupancy. Second, this commenter objected to the provision of "diagnosis-specific" housing, or housing for persons with similar disabilities or who require a similar set of supportive services, under the section 811 Program. The commenter argued that this type of housing is contrary to the goal of integration and general occupancy housing, and it fails to affirmatively further fair housing goals. The commenter urged HUD to limit the circumstances under which it will approve such housing.

HUD Response: HUD has been working with consumer advocacy organizations on revisions to the Section 811 program. One of the major issues of concern to consumers and organizations advocating on their behalf is the delinking of housing and supportive services. Although the acceptance of supportive services has never been required as a condition of occupancy in a Section 811 project, HUD has discovered that, in reality, just the opposite occurs. Therefore, in the NOFA for the FY 1995 Section 811 program, HUD stated that the acceptance of supportive services shall not be a condition of occupancy. This statement shall continue to appear in the NOFA for the Section 811 program and it will also be added to the handbook.

In regard to the commenter objecting to the provision of "diagnosis-specific" housing or housing for persons with similar disabilities or who require a similar set of supportive services, HUD's policy is that a Sponsor may design a supportive services package that is targeted to persons with similar disabilities such as persons with physical disabilities, developmental disabilities or chronic mental illness. With the Secretary's approval a Sponsor may design a supportive services package targeted at any subset within these three main categories (e.g., persons with mental retardation). This provision is in the Section 811 statute. In any Section 811 project, however, the Sponsor must permit occupancy by any qualified person with a disability who could benefit from the housing and/or services provided regardless of the person's disability.

F. The Fiscal Year 1995 Rescissions Act

The Fiscal Year 1995 Rescission Act (Pub. L. 104–19; approved July 27, 1995) provides in relevant part that in allocating the rescission of $1.115 billion of FY 1995 funds, the Secretary may reduce the appropriations needs of HUD by waiving any provision of section 202 of the Housing Act of 1959 and section 811 of the National Affordable Housing Act that the Secretary determines is not necessary to achieve the objectives of these programs. On January 30, 1996 (61 FR 3047), HUD published a notice in the **Federal Register** advising the public of the impact of the rescissions on the Section 202 and Section 811 Programs. As described in the notice, for projects funded in FY 1995, the Secretary reserved PRAC funds at 75 percent of the estimated project's total operating expenses to take into consideration estimated tenant contributions. The Secretary also extended eligibility to low-income households (in addition to very low-income households), waived the Federal preferences for admission, and reduced the term of the PRAC to 5 years. The PRAC funds reserved for projects funded in FYs 1993 and 1994 that had not gone to initial closing or had an Addendum to the Agreement to Enter into the Project Rental Assistance Contract (Forms HUD–90172–A-CA and HUD–90172–B-CA) alerting the Owner of HUD's right to reduce the PRAC reserved for the project at a later time were also reduced by 25 percent. However, the authority in the FY 1995 Rescissions Act to waive statutory provisions is limited to achieving the $1.115 billion rescission. Therefore, since the effects of the Rescissions Act are temporary, this final rule does not change the regulations to reflect the changes described in the January 30, 1996 notice.

II. Regulatory Reinvention

In response to Executive Order 12866 and President Clinton's memorandum of March 4, 1995 to all Federal departments and agencies on the subject of regulatory reinvention, HUD has reviewed all its regulations to determine whether certain regulations can be eliminated, streamlined, or consolidated with other regulations. As part of this review, HUD determined that since the substance of the regulations in 24 CFR parts 885, 889, and 890 was very duplicative, these parts could be consolidated and streamlined into one set of regulations. Therefore, this final rule creates a new part 891 in title 24 of the Code of Federal Regulations that will contain all the provisions for HUD's Supportive Housing Programs. Subpart A of part 891 will contain all the requirements that are similar in the programs. Subparts B and C of part 891 will contain requirements that are unique to the Section 202 and Section 811 programs, respectively. Subpart D will contain the project management provisions for the Section 202 and Section 811 programs. Finally, subpart E will contain the regulations necessary for the continued management of projects under the Loans for Housing for the Elderly or Handicapped Program.

In addition to consolidating similar provisions, this rule also removes provisions that are redundant of statutes or would more appropriately appear in program handbooks or annual Notices of Funding Availability (NOFAs). For example, many of the definitions in the regulations come directly from section 202 of the Housing Act of 1959 and section 811 of the National Affordable Housing Act. The provisions for the Elder Cottage Housing Demonstration Program are also redundant of the statute (section 806 of the Cranston-Gonzalez National Affordable Housing Act (Pub. L. 101–625; approved November 28, 1990). This final rule removes the redundant provisions and replaces them, as appropriate, with references to the statute. This final rule also removes the sections on application requirements, review and approval of applications, and the ranking and selection process. This information will instead appear in the NOFAs published in the **Federal Register** for these programs. As a result of this rule's consolidation and streamlining, HUD will eliminate approximately 92 pages of unnecessary regulations.

III. Lead-Based Paint

HUD is taking the opportunity, in this final rule, to update technical aspects of its lead-based paint requirements to conform with new recommendations of the Centers for Disease Control. For example, in §§ 891.155(g) and 891.325, HUD is changing the childhood age of concern from under 7 years of age to under 6 years. In § 891.325(b)(2), HUD is changing the definition of "elevated blood-lead level (EBL)," with respect to blood lead levels that require environmental intervention, from 25 ug/dl (micrograms per deciliter) to 20 ug/dl for a single test or 15–19 ug/dl for two consecutive tests several months apart. (See U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control, Preventing Lead Poisoning in Young Children, A Statement by the Centers for Disease Control, October 1991.)

Analysis of the need for additional changes to the lead-based paint requirements is being deferred until the publication of a separate proposed rule that would implement sections 1012 and 1013 of the Residential Lead-Based Paint Hazard Reduction Act of 1992 and revise the lead-based paint requirements for all HUD programs. This proposed rule is in its final stages of development.

IV. Other Matters

Environmental Impact

At the time of publication of the interim rules for these programs, Findings of No Significant Impact with respect to the environment were made in accordance with HUD regulations at 24 CFR part 50 implementing section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332). Those interim rules are being adopted

by this final rule without significant change in terms of environmental impact. Accordingly, the initial Findings of No Significant Impact remain applicable, and are available for public inspection and copying between 7:30 a.m. and 5:30 p.m. weekdays at the Office of the Rules Docket Clerk, 451 Seventh Street S.W., Room 10276, Washington, DC 20410–0500.

Regulatory Flexibility Act

Under the Regulatory Flexibility Act (5 U.S.C. 605(b)), the undersigned hereby certifies that this final rule does not have a significant economic impact on a substantial number of small entities. The program will provide capital advances to private nonprofit organizations and nonprofit consumer cooperatives to expand the supply of supportive housing for the elderly and to nonprofit organizations to expand the supply of supportive housing for persons with disabilities. Although small entities will participate in the program, the rule will not have a significant impact on them.

Executive Order 12606, The Family

The General Counsel, as the Designated Official for Executive Order 12606, *The Family*, has determined that the provisions of this final rule will not have a significant impact on family formation, maintenance, or general well-being, and thus is not subject to review under the Order. No significant change in existing HUD policies or programs will result from promulgation of this rule, as those policies or programs relate to family concerns.

Executive Order 12612, Federalism

The General Counsel, as the Designated Official under section 6(a) of Executive Order 12611, *Federalism*, has determined that the policies contained in this rule will not have substantial direct effects on States or their political subdivisions, or the relationship between the Federal government and the States, or on the distribution of power and responsibilities among the various levels of government. As a result, the rule is not subject to review under the Order.

List of Subjects

24 CFR Part 885

Aged, Individuals with disabilities, Loan programs—housing and community development, Low and moderate income housing, Reporting and recordkeeping requirements.

24 CFR Part 889

Aged, Capital advance programs, Grant programs—housing and community development, Loan programs—housing and community development, Low and moderate income housing, Rent subsidies, Reporting and recordkeeping requirements.

24 CFR Part 890

Capital advance programs, Civil rights, Grant programs—housing and community development, Individuals with disabilities, Loan programs—housing and community development, Low and moderate income housing, Mental health programs, Reporting and recordkeeping requirements.

24 CFR Part 891

Aged, Capital advance programs, Civil rights, Grant programs—housing and community development, Individuals with disabilities, Loan programs—housing and community development, Low and moderate income housing, Mental health programs, Rent subsidies, Reporting and recordkeeping requirements.

Accordingly, under the authority of 42 U.S.C. 3535(d), for the reasons stated in the preamble, 24 CFR chapter VIII is amended as set forth below:

PART 885—[REMOVED]

1. Part 885 is removed.

PART 889—[REMOVED]

2. Part 889 is removed.

PART 890—[REMOVED]

3. Part 890 is removed.

4. A new part 891 is added to read as follows:

PART 891—SUPPORTIVE HOUSING FOR THE ELDERLY AND PERSONS WITH DISABILITIES

Subpart A—General Program Requirements

Sec.
891.100 Purpose and policy.
891.105 Definitions.
891.110 Allocation of authority.
891.115 Notice of funding availability.
891.120 Project design and cost standards.
891.125 Site and neighborhood standards.
891.130 Prohibited relationships.
891.135 Amount and terms of capital advances.
891.140 Development cost limits.
891.145 Owner deposit (Minimum Capital Investment).
891.150 Operating cost standards.
891.155 Other Federal requirements.
891.160 Audit requirements.
891.165 Duration of capital advance.
891.170 Repayment of capital advance.
891.175 Technical assistance.

Subpart B—Section 202 Supportive Housing for the Elderly

891.200 Applicability.
891.205 Definitions.
891.210 Special project standards.
891.215 Limits on number of units.
891.220 Prohibited facilities.
891.225 Provision of services.
891.230 Selection preferences.

Subpart C—Section 811 Supportive Housing for Persons With Disabilities

891.300 Applicability.
891.305 Definitions.
891.310 Special project standards.
891.315 Prohibited facilities.
891.320 Site and neighborhood standards.
891.325 Lead-based paint requirements.

Subpart D—Project Management

891.400 Responsibilities of Owner.
891.405 Replacement reserve.
891.410 Selection and admission of tenants.
891.415 Obligations of the household or family.
891.420 Overcrowded and underoccupied units.
891.425 Lease requirements.
891.430 Termination of tenancy and modification of lease.
891.435 Security deposits.
891.440 Adjustment of utility allowances.
891.445 Conditions for receipt of vacancy payments for assisted units.
891.450 HUD review.

Subpart E—Loans for Housing for the Elderly and Handicapped

891.500 Purpose and policy.
891.505 Definitions
891.510 Displacement, relocation, and real property acquisition.
891.515 Audit requirements.

Section 202—Projects for the Elderly or Handicapped—Section 8 Assistance

891.520 Definitions applicable to 202/8 projects.
891.525 Amount and terms of financing.
891.530 Prepayment privileges.
891.535 Requirements for awarding construction contracts.
891.540 Loan disbursement procedures.
891.545 Completion of project, cost certification, and HUD approvals.
891.550 Selection preferences.
891.555 Smoke detectors.
891.560 HAP contract.
891.565 Term of HAP contract.
891.570 Maximum annual commitment and project account.
891.575 Leasing to eligible families.
891.580 HAP contract administration.
891.585 Default by Borrower.
891.590 Notice upon HAP contract expiration.
891.595 HAP contract extension or renewal.
891.600 Responsibilities of Borrower.
891.605 Replacement reserve.
891.610 Selection and admission of tenants.
891.615 Obligations of the family.
891.620 Overcrowded and underoccupied units.
891.625 Lease requirements.
891.630 Termination of tenancy and modification of lease.
891.635 Security deposits.
891.640 Adjustment of rents.
891.645 Adjustment of utility allowances.
891.650 Conditions for receipt of vacancy payments for assisted units.

Section 202—Projects for the Nonelderly Handicapped Families and Individuals—Section 162 Assistance

891.655 Definitions applicable to 202/162 projects.
891.660 Project standards.
891.665 Project size limitations.
891.670 Cost containment and modest design standards.
891.675 Prohibited facilities.
891.680 Site and neighborhood standards.
891.685 Prohibited relationships.
891.690 Other Federal requirements.
891.695 Operating cost standards.
891.700 Prepayment of loans.
891.705 Project assistance contract.
891.710 Term of PAC.
891.715 Maximum annual commitment and project account.
891.720 Leasing to eligible families.
891.725 PAC administration.
891.730 Default by Borrower.
891.735 Notice upon PAC expiration.
891.740 Responsibilities of Borrower.
891.745 Replacement reserve.
891.750 Selection and admission of tenants.
891.755 Obligations of the family.
891.760 Overcrowded and underoccupied units.
891.765 Lease requirements.
891.770 Termination of tenancy and modification of lease.
891.775 Security deposits.
891.780 Adjustment of rents.
891.785 Adjustment of utility allowances.
891.790 Conditions for receipt of vacancy payments for assisted units.

Authority: 12 U.S.C. 1701q; 42 U.S.C. 1437f, 3535(d), and 8013.

Subpart A—General Program Requirements

§ 891.100 Purpose and policy.

(a) *Purpose.* The Section 202 Program of Supportive Housing for the Elderly and the Section 811 Program of Supportive Housing for Persons with Disabilities provide Federal capital advances and project rental assistance under section 202 of the Housing Act of 1959 (12 U.S.C. 1701q) (section 202) and section 811 of the National Affordable Housing Act (42 U.S.C. 8013) (section 811), respectively, for housing projects serving elderly households and persons with disabilities. Section 202 projects shall provide a range of services that are tailored to the needs of the residents. Owners of Section 811 projects shall ensure that the residents are provided with any necessary supportive services that address their individual needs.

(b) *General policy.* (1) *Supportive Housing for the Elderly.* A capital advance and contract for project rental assistance provided under this program shall be used for the purposes described in Section 202 (12 U.S.C. 1701q(b)).

(2) *Supportive Housing for Persons with Disabilities.* A capital advance and contract for project rental assistance provided under this program shall be used for the purposes described in Section 811 (42 U.S.C. 8013(b)).

(c) *Use of capital advance funds.* No part of the funds reserved may be transferred by the Sponsor, except to the Owner caused to be formed by the Sponsor. This action must be accomplished prior to issuance of a commitment for capital advance funding.

(d) *Amendments.* Subject to the availability of funds, HUD may amend the amount of an approved capital advance only after initial closing has occurred.

§ 891.105 Definitions.

The following definitions apply, as appropriate, throughout this part. Other terms with definitions unique to the particular program are defined in §§ 891.205, 891.305, and 891.505, as applicable.

Affiliated entities means entities that the field office determines to be related to each other in such a manner that it is appropriate to treat them as a single entity. Such relationship shall include any identity of interest among such entities or their principals and the use by any otherwise unaffiliated entities of a single Sponsor or of Sponsors (or of a single Borrower or of Borrowers, as applicable) that have any identity of interest themselves or their principals.

Annual income is defined in part 813 of this chapter. In the case of an individual residing in an intermediate care facility for the developmentally disabled that is assisted under title XIX of the Social Security Act and this part, the annual income of the individual shall exclude protected personal income as provided under that Act. For the purposes of determining the total tenant payment, the income of such individuals shall be imputed to be the amount that the household would receive if assisted under title XVI of the Social Security Act.

Household (eligible household) means an elderly or disabled household (as defined in §§ 891.205 or 891.305, respectively), as applicable, that meets the project occupancy requirements approved by HUD and, if the household occupies an assisted unit, meets the very low-income requirements described in § 813.102 of this chapter, as modified by the definition of annual income in this section.

Housing and related facilities means rental housing structures constructed, rehabilitated, or acquired as permanent residences for use by elderly or disabled households, as applicable. The term includes necessary community space. Except for intermediate care facilities for individuals with developmental disabilities, this term does not include nursing homes, hospitals, intermediate care facilities, or transitional care facilities. For the Loans for the Elderly and Persons with Disabilities Program, see § 891.505.

Low-income families shall have the same meaning provided in section 3(b)(2) of the United States Housing Act of 1937 (42 U.S.C. 1437a).

National Sponsor means a Sponsor that has one or more Section 202 or one or more Section 811 project(s) under reservation, construction, or management in two or more different HUD geographical regions.

Operating costs means HUD-approved expenses related to the provision of housing and includes:

(1) Administrative expenses, including salary and management expenses related to the provision of shelter and, in the case of the Section 202 Program, the coordination of services;

(2) Maintenance expenses, including routine and minor repairs and groundskeeping;

(3) Security expenses;

(4) Utilities expenses, including gas, oil, electricity, water, sewer, trash removal, and extermination services. The term *"operating costs"* excludes telephone services for households;

(5) Taxes and insurance;

(6) Allowances for reserves; and

(7) Allowances for services (in the Section 202 Program only).

Project rental assistance contract (PRAC) means the contract entered into by the Owner and HUD setting forth the rights and duties of the parties with respect to the project and the payments under the PRAC.

Project rental assistance payment means the payment made by HUD to the Owner for assisted units as provided in the PRAC. The payment is the difference between the total tenant payment and the HUD approved per unit operating expenses except for expenses related to items not eligible under design and cost provisions. An additional payment is made to a household occupying an assisted unit when the utility allowance is greater than the total tenant payment. A project rental assistance payment, known as a "vacancy payment," may be made to the Owner when an assisted unit is vacant, in accordance with the terms of the PRAC.

Rehabilitation means the improvement of the condition of a property from deteriorated or substandard to good condition. Rehabilitation may vary in degree from the gutting and extensive reconstruction to the cure of substantial accumulation of deferred maintenance. Cosmetic improvements alone do not qualify as rehabilitation under this definition. Rehabilitation may also include renovation, alteration, or remodeling for the conversion or adaptation of structurally sound property to the design and condition required for use under this part, or the repair or replacement of major building systems or components in danger of failure. Improvement of an existing structure must require 15 percent or more of the estimated development cost to rehabilitate the project to a useful life of 55 years.

Replacement Reserve Account means a project account into which specified funds are deposited. Such funds may be used only with the approval of the Secretary for repairs, replacement, and capital improvements to the project.

Section 202 means section 202 of the Housing Act of 1959 (12 U.S.C. 1701q), as amended, or the Supportive Housing for the Elderly Program authorized by that section.

Section 811 means section 811 of the National Affordable Housing Act (42 U.S.C. 8013), as amended, or the Supportive Housing for Persons with Disabilities Program authorized by that section.

Start-up expenses mean necessary costs (to plan a Section 202 or Section 811 project, as applicable) incurred by the Sponsor or Owner prior to initial closing.

Tenant payment to Owner equals total tenant payment less utility allowance, if any.

Total tenant payment means the monthly amount defined in, and determined in accordance with part 813 of this chapter.

Utility allowance is defined in part 813 of this chapter and is determined or approved by HUD.

Very low-income families shall have the same meaning provided in section 3(b)(2) of the United States Housing Act of 1937 (42 U.S.C. 1437a).

§ 891.110 Allocation of authority.

In accordance with 24 CFR part 791, the Assistant Secretary will separately allocate the amounts available for capital advances for the development of housing for elderly households and for disabled households, less amounts set aside by Congress for specific types of projects, and for amendments of fund reservations made in prior years, for technical assistance, and for other contracted services.

§ 891.115 Notice of funding availability.

Following an allocation of authority under § 891.110, HUD shall publish a separate Notice of Funding Availability (NOFA) for the Section 202 Program of Supportive Housing for the Elderly and for the Section 811 Program of Supportive Housing for Persons with Disabilities in the **Federal Register**. The NOFAs will contain specific information on how and when to apply for the available capital advance authority, the contents of the application, and the selection process.

§ 891.120 Project design and cost standards.

In addition to the special project standards described in §§ 891.210 and 891.310, as applicable, the following standards apply:

(a) *Property standards.* Projects under this part must comply with HUD Minimum Property Standards, unless otherwise indicated in this part.

(b) *Accessibility requirements.* Projects under this part must comply with the Uniform Federal Accessibility Standards (See 24 CFR 40.7 for availability), section 504 of the Rehabilitation Act of 1973 and HUD's implementing regulations (24 CFR part 8), and for new construction multifamily housing projects, the design and construction requirements of the Fair Housing Act and HUD's implementing regulations at 24 CFR part 100. For the Section 811 Program of Supportive Housing for Persons with Disabilities, see additional accessibility requirements in § 891.310(b).

(c) *Restrictions on amenities.* Projects must be modest in design. Amenities not eligible for HUD funding include individual unit balconies and decks, atriums, bowling alleys, swimming pools, saunas, jacuzzis, and dishwashers, trash compactors, and washers and dryers in individual units in supportive housing for the elderly or in independent living facilities for persons with disabilities. Sponsors may include certain excess amenities but they must pay for them from sources other than the section 202 or 811 capital advance. They must also pay for the continuing operating costs associated with any excess amenities from sources other than the Section 202 or 811 project rental assistance contract.

(d) *Smoke detectors.* After October 30, 1992, each dwelling unit must include at least one battery-operated or hard-wired smoke detector, in proper working condition, on each level of the unit.

§ 891.125 Site and neighborhood standards.

All sites must meet the following site and neighborhood requirements:

(a) The site must be adequate in size, exposure, and contour to accommodate the number and type of units proposed, and adequate utilities (water, sewer, gas, and electricity) and streets must be available to service the site.

(b) The site and neighborhood must be suitable from the standpoint of facilitating and furthering full compliance with the applicable provisions of Title VI of the Civil Rights Act of 1964, the Fair Housing Act, Executive Order 11063 (27 FR 11527, 3 CFR, 1958–1963 Comp., p. 652); as amended by Executive Order 12259, (46 FR 1253, 3 CFR, 1980 Comp., p. 307)); section 504 of the Rehabilitation Act of 1973, and implementing HUD regulations.

(c) New construction sites must meet the following site and neighborhood requirements:

(1) The site must not be located in an area of minority concentration (or minority elderly concentration under the Section 202 Program) except as permitted under paragraph (c)(2) of this section, and must not be located in a racially mixed area if the project will cause a significant increase in the proportion of minority to nonminority residents (or minority elderly to nonminority elderly residents, under the Section 202 Program) in the area.

(2) A project may be located in an area of minority concentration (or minority elderly concentration, under the Section 202 Program) only if:

(i) Sufficient, comparable opportunities exist for housing for minority elderly households or minority disabled households, as applicable (or minority families, for projects funded under §§ 891.655 through 891.790), in the income range to be served by the proposed project, outside areas of minority concentration (see paragraph (c)(3) of this section for further guidance on this criterion); or

(ii) The project is necessary to meet overriding housing needs that cannot be met in that housing market area (see paragraph (c)(4) of this section for further guidance on this criterion).

(3) (i) *Sufficient* does not require that in every locality there be an equal number of assisted units within and outside of areas of minority concentration. Rather, application of this standard should produce a reasonable distribution of assisted units each year which over a period of several years will approach an appropriate balance of housing opportunities within and outside areas of minority concentration. An appropriate balance in any jurisdiction must be determined in light of local conditions affecting the range of housing choices available for very low-income minority elderly or disabled households, as applicable (or low-income minority families, for projects funded under §§ 891 655 through 891.790), and in relation to the racial mix of the locality's population.

(ii) Units may be considered to be *comparable opportunities* if they have the same household type (elderly or disabled, as applicable) and tenure type (owner/renter); require approximately the same total tenant payment; serve the same income group; are located in the same housing market; and are in standard condition.

(iii) Application of this sufficient, comparable opportunities standard involves assessing the overall impact of HUD-assisted housing on the availability of housing choices for very low-income minority elderly or disabled households, as applicable (or low-income minority families, for projects funded under §§ 891.655 through 891.790), in and outside areas of minority concentration, and must take into account the extent to which the following factors are present, along with any other factor relevant to housing choice:

(A) A significant number of assisted housing units are available outside areas of minority concentration.

(B) There is significant integration of assisted housing projects constructed or rehabilitated in the past ten years, relative to the racial mix of the eligible population.

(C) There are racially integrated neighborhoods in the locality.

(D) Programs are operated by the locality to assist minority elderly or disabled households, as applicable (or minority families, for projects funded under §§ 891.655 through 891.790), that wish to find housing outside areas of minority concentration.

(E) Minority elderly or disabled households, as applicable (or minority families, for projects funded under §§ 891.655 through 891.790), have benefitted from local activities (e.g., acquisition and write-down of sites, tax relief programs for homeowners, acquisitions of units for use as assisted housing units) undertaken to expand choice for minority households (or families) outside of areas of minority concentration.

(F) A significant proportion of minority elderly or disabled households, as applicable (or minority households, for projects funded under §§ 891.655 through 891.790), have been successful in finding units in nonminority areas under the Section 8 Certificate and Housing Voucher programs.

(G) Comparable housing opportunities have been made available outside areas of minority concentration through other programs.

(4) Application of the *overriding housing needs* criterion, for example, permits approval of sites that are an integral part of an overall local strategy for the preservation or restoration of the immediate neighborhood and of sites in a neighborhood experiencing significant private investment that is demonstrably changing the economic character of the area (a "revitalizing area"). An *overriding housing need*, however, may not serve as the basis for determining that a site is acceptable if the only reason the need cannot otherwise be feasibly met is that discrimination on the basis of race, color, creed, sex, or national origin renders sites outside areas of minority concentration unavailable, or if the use of this standard in recent years has had the effect of circumventing the obligation to provide housing choice.

(d) The neighborhood must not be one that is seriously detrimental to family life or in which substandard dwellings or other undesirable conditions predominate, unless there is actively in progress a concerted program to remedy the undesirable conditions.

(e) The housing must be accessible to social, recreational, educational, commercial, and health facilities and services, and other municipal facilities and services that are at least equivalent to those typically found in neighborhoods consisting largely of unassisted, standard housing of similar market rents.

(f) For the Section 811 Program of Supportive Housing for Persons with Disabilities, the additional site and neighborhood requirements in § 891.320 apply.

§ 891.130 Prohibited relationships.

This section shall apply to capital advances under the Section 202 Program and the Section 811 Program, as well as to loans financed under §§ 891.655 through 891.790.

(a) *Conflicts of interest.* (1) Officers and Board members of either the Sponsor or the Owner (or Borrower, as applicable) may not have any financial interest in any contract with the Owner or in any firm which has a contract with the Owner. This restriction applies so long as the individual is serving on the Board and for a period of three years following resignation or final closing, whichever occurs later.

(2) The following contracts between the Owner (or Borrower, as applicable) and the Sponsor or the Sponsor's nonprofit affiliate will not constitute a conflict of interest if no more than two persons salaried by the Sponsor or management affiliate serve as nonvoting directors on the Owner's board of directors:

(i) Management contracts (including associated management fees);

(ii) Supportive services contracts (including service fees) under the Supportive Housing for the Elderly Program; and

(iii) Developer (consultant) contracts.

(b) *Identity of interest.* An identity of interest between the Sponsor or Owner (or Borrower, as applicable) and any development team member or between development team members is prohibited until two years after final closing.

§ 891.135 Amount and terms of capital advances.

(a) *Amount of capital advances.* The amount of capital advances approved shall be the amount stated in the notification of fund reservation, including any adjustment required by HUD before the final closing. The amount of the capital advance may not exceed the appropriate development cost limit.

(b) *Estimated development cost.* The amount of the capital advance may not exceed the total estimated development cost of the project (as determined by HUD), less the incremental development cost associated with excess amenities and design features to be paid for by the Sponsor under § 891.120.

§ 891.140 Development cost limits.

(a) HUD shall use the development cost limits, established by Notice in the **Federal Register** and adjusted by locality, to calculate the fund reservation amount of the capital advance to be made available to individual Owners. Owners that incur actual development costs that are less than the amount of the initial fund reservation shall be entitled to retain 50 percent of the savings in a Replacement Reserve Account. Such percentage shall be increased to 75 percent for Owners that add energy efficiency features.

(b) The Replacement Reserve Account established under paragraph (a) of this section may only be used for repairs, replacements, and capital improvements to the project.

§ 891.145 Owner deposit (Minimum Capital Investment).

As a Minimum Capital Investment, the Owner must deposit in a special escrow account one-half of one percent (0.5%) of the HUD-approved capital advance, not to exceed $10,000, to assure the Owner's commitment to the housing. Under the Section 202 Program, if an Owner has a National Sponsor or a National Co-Sponsor, the Minimum Capital Investment shall be one-half of one percent (0.5%) of the HUD-approved capital advance, not to exceed $25,000.

§ 891.150 Operating cost standards.

HUD shall establish operating cost standards based on the average annual operating cost of comparable housing for the elderly or for persons with disabilities in each field office, and shall adjust the standard annually based on appropriate indices of increases in housing costs such as the Consumer Price Index. The operating cost standards shall be developed based on the number of units. However, under the Section 811 Program and for projects funded under §§ 891.655 through 891.790, the operating cost standard for group homes shall be based on the number of residents. HUD may adjust the operating cost standard applicable to an approved project to reflect such factors as differences in costs based on location within the field office jurisdiction. The operating cost standard will be used to determine the amount of the project assistance initially reserved for a project.

§ 891.155 Other Federal requirements.

In addition to the requirements set forth in 24 CFR part 5, the following requirements in this § 891.155 apply to the Section 202 and Section 811 Programs, as well as projects funded under §§ 891.655 through 891.790. Other requirements unique to a particular program are described in subparts B and C of this part, as applicable.

(a) *Affirmative fair housing marketing.* (1) The affirmative fair housing marketing requirements of 24 CFR part 200, subpart M and the implementing regulations at 24 CFR part 108; and

(2) The fair housing advertising and poster guidelines at 24 CFR parts 109 and 110.

(b) *Environmental.* The National Environmental Policy Act of 1969, HUD's implementing regulations at 24 CFR part 50, including the related authorities described in 24 CFR 50.4. For the purposes of Executive Order No. 11988, Floodplain Management (42 FR 26951, 3 CFR, 1977 Comp., p. 117); as amended by Executive Order 12148 (44 FR 43239, 3 CFR, 1979 Comp., p. 412)), and implementing regulations in 24 CFR part 55, all applications for intermediate care facilities for persons with developmental disabilities shall be treated as critical actions requiring consideration of the 500-year floodplain.

(c) *Flood insurance.* The Flood Disaster Protection Act of 1973 (42 U.S.C. 4001).

(d) *Labor standards.* (1) All laborers and mechanics (other than volunteers under the conditions set out in 24 CFR part 70) employed by contractors and subcontractors in the construction (including rehabilitation) of housing with 12 or more units assisted under this part shall be paid wages at rates not less than those prevailing in the locality, as determined by the Secretary of Labor in accordance with the Davis-Bacon Act (40 U.S.C. 276a–276a–5). A group home for persons with disabilities is not covered by the labor standards.

(2) Contracts involving employment of laborers and mechanics shall be subject to the provisions of the Contract Work Hours and Safety Standards Act (40 U.S.C. 327–333).

(3) Sponsors, Owners, contractors, and subcontractors must comply with all related rules, regulations, and requirements.

(e) *Displacement, relocation, and real property acquisition.* (1) *Minimizing displacement.* Consistent with the other goals and objectives of this part, Sponsors and Owners (or Borrowers, if applicable) shall assure that they have taken all reasonable steps to minimize the displacement of persons (families, individuals, businesses, nonprofit organizations, and farms) as a result of a project assisted under this part.

(2) *Relocation assistance for displaced persons.* A displaced person must be provided relocation assistance at the levels described in, and in accordance with the requirements of, the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (URA) (42 U.S.C. 4201–4655), as implemented by 49 CFR part 24.

(3) *Real property acquisition requirements.* The acquisition of real property for a project is subject to the URA and the requirements described in 49 CFR part 24, subpart B.

(f) *Intergovernmental review.* The requirements for intergovernmental review in Executive Order No. 12372 (47 FR 30959, 3 CFR, 1982 Comp., p. 197; as amended by Executive Order No. 12416 (48 FR 15587, 3 CFR, 1983 Comp., p. 186)) and the implementing regulations at 24 CFR part 52 are applicable to this program.

(g) *Lead-based paint.* (1) The requirements of the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821–4846) and implementing regulations at 24 CFR part 35 apply to any dwellings (except zero-bedroom dwelling units) in section 811 housing that were:

(i) Constructed or substantially rehabilitated before 1978; and

(ii) In which any child under 6 years of age resides or is expected to reside.

(2) Under the Section 811 Program and projects funded under §§ 891.655 through 891.790, the lead-based paint requirements described in § 891.325 also apply.

§ 891.160 Audit requirements.

Nonprofits receiving assistance under this part are subject to the audit requirements in 24 CFR part 45.

§ 891.165 Duration of capital advance.

The duration of the fund reservation for the capital advance is 18 months from the date of issuance with limited exceptions up to 24 months, as approved by HUD on a case-by-case basis.

§ 891.170 Repayment of capital advance.

(a) *Interest prohibition and repayment.* A capital advance provided under this part shall bear no interest and its repayment shall not be required so long as the housing project remains available for very low-income elderly families or persons with disabilities, as applicable, in accordance with this part. The capital advance may not be repaid to extinguish the requirements of this part. To ensure its interest in the capital advance, HUD shall require a note and mortgage, use agreement, capital advance agreement and regulatory agreement from the Owner in a form to be prescribed by HUD.

(b) The transfer of physical and financial assets of any project under this part is prohibited, unless HUD gives prior written approval. Approval for transfer will not be granted unless HUD determines that the transfer to a private nonprofit corporation or consumer cooperative (under the Section 202 Program) or a nonprofit organization (under the Section 811 Program) is part of a transaction that will ensure the continued operation of the project for not less than 40 years (from the date of original closing) in a manner that will provide rental housing for very low-income elderly persons or persons with disabilities, as applicable, on terms at least as advantageous to existing and future tenants as the terms required by the original capital advance.

§ 891.175 Technical assistance.

For purposes of the Section 202 Program and the Section 811 Program, the Secretary shall make available appropriate technical assistance to assure that applicants having limited resources, particularly minority applicants, are able to participate more fully in the programs.

Subpart B—Section 202 Supportive Housing for the Elderly

§ 891.200 Applicability.

The requirements set forth in this subpart B apply to the Section 202 Program of Supportive Housing for the Elderly only, and to applicants, Sponsors, and Owners under that program.

§ 891.205 Definitions.

As used in this part in reference to the Section 202 Program, and in addition to the applicable definitions in § 891.105:

Acquisition means the purchase of (or otherwise obtaining title to) existing housing and related facilities from the Resolution Trust Corporation.

Activities of daily living (ADL) means eating, dressing, bathing, grooming, and household management activities, as further described below:

(1) *Eating*—May need assistance with cooking, preparing, or serving food, but must be able to feed self;

(2) *Bathing*—May need assistance in getting in and out of the shower or tub, but must be able to wash self;

(3) *Grooming*—May need assistance in washing hair, but must be able to take care of personal appearance;

(4) *Dressing*—Must be able to dress self, but may need occasional assistance; and

(5) *Home management activities*—May need assistance in doing housework, grocery shopping, laundry, or getting to and from activities such as going to the doctor and shopping, but must be mobile. The mobility requirement does not exclude persons in wheelchairs or those requiring mobility devices.

Congregate space (hereinafter referred to as community space) shall have the meaning provided in section 202 (12 U.S.C. 1701q(h)(1)). The term "*community spaces*" excludes offices, halls, mechanical rooms, laundry rooms, parking areas, dwelling units, and lobbies. Community space does not include commercial areas.

Elderly person means a household composed of one or more persons at least one of whom is 62 years of age or more at the time of initial occupancy.

Frail elderly means an elderly person who is unable to perform at least three activities of daily living as defined in this section. Owners may establish additional eligibility requirements acceptable to HUD based on the standards in local supportive services programs.

Owner means a single-purpose private nonprofit organization that may be established by the Sponsor that will receive a capital advance and project rental assistance payments to develop and operate supportive housing for the elderly as its legal owner. Owner does not mean a public body or the instrumentality of any public body. The purposes of the Owner must include the promotion of the welfare of the elderly. The Owner may not be controlled by or under the direction of persons or firms seeking to derive profit or gain therefrom.

Private nonprofit organization means any incorporated private institution or foundation:

(1) That has tax-exempt status under section 501(c)(3) or (c)(4) of the Internal Revenue Code of 1986 (26 U.S.C. 1 *et seq.*);

(2) No part of the net earnings of which inures to the benefit of any member, founder, contributor, or individual;

(3) That has a governing board:

(i) The membership of which is selected in a manner to assure that there is significant representation of the views of the community in which such housing is located; and

(ii) That is responsible for the operation of the housing assisted under this part; and

(4) That is approved by HUD as to administrative and financial responsibility.

Services expenses means those costs needed to provide the necessary services for the elderly tenants, which may include, but are not limited to: health related activities, continuing education, welfare, informational, recreational, homemaking, meal and nutritional services, counseling, and referral services as well as transportation as necessary to facilitate access to these services.

Sponsor means any private nonprofit entity, including a consumer cooperative:

(1) No part of the net earnings of which inures to the benefit of any private shareholder, member, founder, contributor, or individual;

(2) That is not controlled by, or under the direction of, persons or firms seeking to derive profit or gain therefrom; and

(3) That is approved by the Secretary as to administrative and financial capacity and responsibility. The term "*Sponsor*" does not mean a public body or the instrumentality of a public body.

§ 891.210 Special project standards.

In addition to the applicable project standards in § 891.120, resident units in Section 202 projects are limited to efficiencies or one-bedroom units. If a resident manager is proposed for a project, up to two bedrooms could be provided for the resident manager unit.

§ 891.215 Limits on number of units.

(a) HUD may establish, through publication of a notice in the **Federal Register**, limits on the number of units that can be applied for by a Sponsor or Co-sponsor in a single geographical region and/or nationwide.

(b) Affiliated entities that submit separate applications shall be deemed to be a single entity for purposes of these limits.

(c) HUD may also establish, through publication of a notice in the **Federal Register**, the minimum size of a single project.

§ 891.220 Prohibited facilities.

Projects may not include facilities for infirmaries, nursing stations, or spaces for overnight care.

§ 891.225 Provision of services.

(a) In carrying out the provisions of this part, HUD shall ensure that housing assisted under this part provides services as described in section 202 (12 U.S.C. 1701q(g)(1)).

(b) (1) HUD shall ensure that Owners have the managerial capacity to perform the coordination of services described in 12 U.S.C. 1701q(g)(2).

(2) Any cost associated with this paragraph shall be an eligible cost under the contract for project rental assistance. Any cost associated with the employment of a service coordinator shall also be an eligible cost, except if the project is receiving congregate housing services assistance under section 802 of the National Affordable Housing Act. The HUD-approved service costs will be an eligible expense to be paid from project rental assistance, not to exceed $15 per unit per month. The balance of service costs shall be provided from other sources, which may include co-payment by the tenant receiving the service. Such co-payment shall not be included in the Total Tenant Payment.

§ 891.230 Selection preferences.

For purposes of the Section 202 Program, the selection preferences in 24 CFR part 5, subpart D apply.

Subpart C—Section 811 Supportive Housing for Persons With Disabilities

§ 891.300 Applicability.

The requirements set forth in this subpart C apply to the Section 811 Program of Supportive Housing for Persons with Disabilities only, and to applicants, Sponsors, and Owners under that program.

§ 891.305 Definitions.

As used in this part in reference to the Section 811 Program, and in addition to the applicable definitions in § 891.105:

Acquisition means the purchase of (or otherwise obtaining title to) existing structures to be used as housing for persons with disabilities, including housing and related facilities from the Resolution Trust Corporation. Capital advances are not available in connection with facilities owned and operated by the Sponsor as housing for persons with disabilities.

Congregate space (hereinafter referred to as community space) means space for multipurpose rooms, common areas, and other space necessary for the provision of supportive services. Community space does not include commercial areas.

Disabled household means a household composed of:

(1) One or more persons at least one of whom is an adult (18 years or older) who has a disability;

(2) Two or more persons with disabilities living together, or one or more such persons living with another person who is determined by HUD, based upon a certification from an appropriate professional (e.g., a rehabilitation counselor, social worker, or licensed physician) to be important to their care or well being; or

(3) The surviving member or members of any household described in paragraph (1) of this definition who were living in a unit assisted under this part, with the deceased member of the household at the time of his or her death.

Nonprofit organization means any institution or foundation:

(1) That has tax-exempt status under section 501(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 1 *et seq.*);

(2) No part of the net earnings of which inures to the benefit of any Board member, founder, contributor, or individual;

(3) That has a governing board;

(i) The membership of which is selected in a manner to assure that there is significant representation of the views of the community in which such housing is located (including persons with disabilities); and

(ii) That is responsible for the operation of the housing assisted under this part; and

(4) That is approved by HUD as to financial responsibility.

Owner means a single-purpose nonprofit organization established by the Sponsor that will receive a capital advance and project rental assistance payments to develop and operate, as its legal owner, supportive housing for persons with disabilities under this part. The purposes of the Owner must include the promotion of the welfare of persons with disabilities. The Owner may not be controlled by or under the direction of persons or firms seeking to derive profit or gain therefrom.

Person with disabilities shall have the meaning provided in Section 811 (42 U.S.C. 8013(k)(2)). The term "*person with disabilities*" shall also include the following:

(1) A person who has a developmental disability, as defined in section 102(7) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6001(5)), i.e., if he or she has a severe chronic disability which:

(i) Is attributable to a mental or physical impairment or combination of mental and physical impairments;

(ii) Is manifested before the person attains age twenty-two;

(iii) Is likely to continue indefinitely;

(iv) Results in substantial functional limitation in three or more of the following areas of major life activity:

(A) Self-care;

(B) Receptive and expressive language;

(C) Learning;

(D) Mobility;

(E) Self-direction;

(F) Capacity for independent living;

(G) Economic self-sufficiency; and

(v) Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.

(2) A person with a chronic mental illness, i.e., a severe and persistent mental or emotional impairment that seriously limits his or her ability to live independently, and which impairment could be improved by more suitable housing conditions.

(3) A person infected with the human acquired immunodeficiency virus (HIV) and a person who suffers from alcoholism or drug addiction, provided they meet the definition of "*person with disabilities*" in Section 811 (42 U.S.C. 8013(k)(2)). A person whose sole impairment is a diagnosis of HIV positive or alcoholism or drug addiction (i.e., does not meet the qualifying criteria in section 811 (42 U.S.C. 8013(k)(2)) will not be eligible for occupancy in a section 811 project.

Sponsor means any nonprofit entity:

(1) That has tax-exempt status under section 501(c)(3) of the Internal Revenue Code of 1986 (26 U.S.C. 1 *et seq.*);

(2) No part of the net earnings of which inures to the benefit of any private shareholder, member, founder, contributor or individual;

(3) That is not controlled by or under the direction of persons or firms seeking to derive profit or gain therefrom;

(4) That has a governing board the membership of which is selected in a manner to assure that there is significant representation of the views of persons with disabilities; and

(5) That is approved by HUD as to administrative and financial capacity and responsibility.

§ 891.310 Special project standards.

In addition to the applicable project standards in § 891.120, the following special standards apply to the Section 811 Program and to projects funded under §§ 891.655 through 891.790:

(a) *Minimum group home standards.* Each group home must provide a minimum of 290 square feet of prorated space for each resident, including a minimum area of 80 square feet for each resident in a shared bedroom (with no more than two residents occupying a shared bedroom) and a minimum area of 100 square feet for a single occupant bedroom; at least one full bathroom for every four residents; space for recreation at indoor and outdoor locations on the project site; and sufficient storage for each resident in the bedroom and other storage space necessary for the operation of the home. If the project involves acquisition (with or without rehabilitation), the structure must at least be in compliance with applicable State requirements. In the absence of such requirements, the above standards shall apply.

(b) *Additional accessibility requirements.* In addition to the accessibility requirements in § 891.120(b), the following requirements apply to the Section 811 Program and to projects funded under §§ 891.655 through 891.790:

(1) All entrances, common areas, units to be occupied by resident staff, and amenities must be readily accessible to and usable by persons with disabilities.

(2) In projects for chronically mentally ill individuals, a minimum of 10 percent of all dwelling units in an independent living facility (or 10 percent of all bedrooms and bathrooms in a group home, but at least one of each such space), must be designed to be accessible or adaptable for persons with disabilities.

(3) In projects for developmentally disabled or physically disabled persons, all dwelling units in an independent living facility (or all bedrooms and bathrooms in a group home) must be designed to be accessible or adaptable for persons with physical disabilities. A project involving acquisition and/or rehabilitation may provide a lesser number if:

(i) The cost of providing full accessibility makes the project financially infeasible;

(ii) Fewer than one-half of the intended occupants have mobility impairments; and

(iii) The project complies with the requirements of 24 CFR 8.23.

(4) For the purposes of paragraph (b) of this section, the following definitions apply:

(i) *Accessible* describes a site, building, facility, or portion thereof that complies with the Uniform Federal Accessibility Standards and that can be approached, entered, and used by physically disabled people;

(ii) *Adaptability* means the ability of certain building spaces and elements, such as kitchen counters, sinks, and grab bars, to be added or altered so as to accommodate the needs of either disabled or nondisabled persons, or to accommodate the needs of either disabled or nondisabled persons, or to accommodate the needs of persons with different types or degrees of disability.

§ 891.315 Prohibited facilities.

This section shall apply to capital advances under the Section 811 Program, as well as loans financed under subpart E of this part. Project facilities may not include infirmaries, nursing stations, spaces dedicated to the delivery of medical treatment or physical therapy, padded rooms, or space for respite care or sheltered workshops, even if paid for from sources other than the HUD capital advance or loan. Except for office space used by the Owner (or Borrower, if applicable) exclusively for the administration of the project, project facilities may not include office space.

§ 891.320 Site and neighborhood standards.

In addition to the requirements in § 891.125 and § 891.680, if applicable, the following site and neighborhood requirements apply to the Section 811 Program:

(a) Travel time and cost via public transportation or private automobile, from the neighborhood to places of employment providing a range of jobs for very low-income workers (or low-income workers, as applicable), must not be excessive.

(b) Projects should be located in neighborhoods where other family housing is located. Projects should not be located adjacent to the following facilities, or in areas where such facilities are concentrated: schools or day-care centers for persons with disabilities, workshops, medical facilities, or other housing primarily serving persons with disabilities. Not more than one group home may be located on any one site and no such home may be located on a site contiguous to another site containing such a home.

§ 891.325 Lead-based paint requirements.

In addition to the other Federal requirements described in § 891.155, the following lead-based paint requirements apply to the Section 811 Program and to projects funded under §§ 891.655 through 891.790:

(a) The requirements of the Lead-Based Paint Poisoning Prevention Act (42 U.S.C. 4821–4846) and implementing regulations at 24 CFR part 35 (except as superseded in paragraph (b) of this section) apply to the dwellings (except zero-bedroom dwelling units or units that are certified by a qualified inspector to be free of lead-based paint or the lead-based paint hazards have been eliminated) in housing assisted under this subpart and to projects funded under §§ 891.655 through 891.790 that:

(1) Were constructed before 1978; and

(2) In which any child under 6 years of age resides or is expected to reside.

(b) (1) This paragraph (b) implements the provisions of the Lead-Based Paint Poisoning Prevention Act, 42 U.S.C. 4821 et seq., by establishing procedures to eliminate, as far as practicable, the hazards of lead-based paint poisoning with respect to covered structures for which assistance is provided under the Section 811 Program and under §§ 891.655 through 891.790. This paragraph (b) is promulgated under 24 CFR 35.24(b)(4) and supersedes, with respect to these programs, the requirements prescribed in subpart C of 24 CFR part 35.

(2) The following definitions apply to this section:

Applicable surface means all intact and nonintact painted interior and exterior surfaces of a residential structure.

Chewable surface means all protruding painted surfaces up to five feet from the floor or ground, that are readily accessible to children under 6 years of age, e.g., protruding corners, windowsills and frames, doors and frames, and other protruding woodwork.

Defective paint surfaces means a surface on which the paint is cracking, scaling, chipping, peeling, or loose.

Elevated blood lead level or EBL means excessive absorption of lead: that is, a confirmed concentration of lead in whole blood of 20 ug/dl (micrograms of lead per deciliter) for a single test or of 15–19 ug/dl in two consecutive tests 3–4 months apart.

Lead-based paint means a paint surface, whether or not defective, identified as having a lead content greater than or equal to 1 mg/cm2 (milligram per square centimeter) or .5 percent by weight or 5000 parts per million (PPM).

(3) In the case of a structure constructed before 1978, the Sponsor must inspect the structure for defective paint surfaces before it submits site information. If defective paint surfaces are found, treatment in accordance with paragraph (a)(5) of this section is required. Correction of defective surfaces found during the initial inspection must be completed before initial occupancy of the project. Correction of defective paint conditions discovered at periodic inspection must be completed within 30 calendar days of their discovery. When weather conditions prevent completion of repainting of exterior surfaces within the 30-day period, repainting may be delayed, but covering or removal of the defective paint must be completed within the prescribed period.

(4) In the case of a structure constructed before 1978, if the Owner (or Borrower, if applicable) is presented with test results that indicate that a child under the age of 6 years occupies the structure and has an elevated blood lead level (EBL), the Owner (or Borrower, if applicable) must cause the unit to be tested for lead-based paint on chewable surfaces. Testing must be conducted by a State or local health or housing agency, by an inspector certified or regulated by a State or local health or housing agency, or an organization recognized by HUD. Lead content shall be tested by using an X-ray fluorescence analysis (XRF) or by laboratory analysis of paint samples. Where lead-based paint on chewable surfaces is identified, covering or removal of the paint surface in accordance with paragraph (a)(5) of this section is required and treatment shall be completed within the time limits in paragraph (b)(3) of this section.

(5) Treatment of defective paint surfaces and chewable surfaces must consist of covering or removal of the

paint in accordance with the following requirements:

(i) A defective paint surface shall be treated if the total area of defective paint on a component is:

(A) More than 10 square feet on an exterior wall;

(B) More than 2 square feet on an interior or exterior component with a large surface area, excluding exterior walls and including, but not limited to, ceilings, floors, doors, and interior walls; or

(C) More than 10 percent of the total surface area on an interior or exterior component with a small surface area, including, but not limited to, window sills, baseboards and trim.

(ii) Acceptable methods of treatment are: removal by wet scraping, wet sanding, chemical stripping on or off site, replacing painted components, scraping with infra-red or coil type heat gun with temperatures below 1100 degrees, HEPA vacuum sanding, HEPA vacuum needle gun, contained hydroblasting or high pressure wash with HEPA vacuum, and abrasive sandblasting with HEPA vacuum. Surfaces must be covered with durable materials with joints and edges sealed and caulked as needed to prevent the escape of lead contaminated dust.

(iii) Prohibited methods of removal are: open flame burning or torching; machine sanding or grinding without a HEPA exhaust; uncontained hydroblasting or high pressure wash; and dry scraping except around electrical outlets or except when treating defective paint spots no more than two square feet in any one interior room or space (hallway, pantry, etc.) or totalling no more than twenty square feet on exterior surfaces.

(iv) During exterior treatment, soil and playground equipment must be protected from contamination.

(v) All treatment procedures must be concluded with a thorough cleaning of all surfaces in the room or area of treatment to remove fine dust particles. Cleanup must be accomplished by wet washing surfaces with a lead solubilizing detergent such as trisodium phosphate or an equivalent solution.

(vi) Waste and debris must be disposed of in accordance with all applicable Federal, State and local laws.

(6) In lieu of the procedures set forth in the preceding clause, the Owner (or Borrower, if applicable) may, at its discretion, abate all interior and exterior chewable surfaces in accordance with the methods set out paragraph (a)(5) of this section.

(7) The Owner (or Borrower, if applicable) must take appropriate action to protect tenants from hazards associated with abatement procedures.

(8) The Owner (or Borrower, if applicable) must keep a copy of each inspection report for at least three years. If a unit requires testing, or treatment of chewable surfaces based on the testing, the Owner must keep the test results, and, if applicable, the certification of treatment indefinitely. The records must indicate which chewable surfaces in the units have been tested or treated. If records establish that certain chewable surfaces were tested, or tested and treated, in accordance with the standards prescribed in this section, these surfaces do not have to be tested or treated at any subsequent time.

Subpart D—Project Management

§ 891.400 Responsibilities of Owner.

(a) *Marketing.* (1) The Owner must commence and continue diligent marketing activities not later than 90 days before the anticipated date of availability of the first unit or occupancy of the group home. Market activities shall include the provision of notices of the availability of housing under the program to operators of temporary housing for the homeless in the same housing market.

(2) Marketing must be done in accordance with a HUD-approved affirmative fair housing marketing plan and all Federal, State or local fair housing and equal opportunity requirements. The purpose of the plan and requirements is to achieve a condition in which eligible households of similar income levels in the same housing market area have a like range of housing choices available to them regardless of discriminatory considerations such as their race, color, creed, religion, familial status, disability, sex or national origin.

(3) At the time of PRAC execution, the Owner must submit to HUD a list of leased and unleased assisted units (or in the case of a group home, leased and unleased residential spaces) with a justification for the unleased units or residential spaces, in order to qualify for vacancy payments for the unleased units or residential spaces.

(b) *Management and maintenance.* The Owner is responsible for all management functions. These functions include selection and admission of tenants, required reexaminations of incomes for households occupying assisted units or residential spaces, collection of tenant payments, termination of tenancy and eviction, and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All functions must be performed in compliance with equal opportunity requirements.

(c) *Contracting for services.* (1) With HUD approval, the Owner may contract with a private or public entity for performance of the services or duties required in paragraphs (a) and (b) of this section. However, such an arrangement does not relieve the Owner of responsibility for these services and duties. All such contracts are subject to the restrictions governing prohibited contractual relationships described in § 891.130. (These prohibitions do not extend to management contracts entered into by the Owner with the Sponsor or its nonprofit affiliate.)

(2) Consistent with the objectives of Executive Order No. 11625 (36 FR 19967, 3 CFR, 1971–1975 Comp., p. 616; as amended by Executive Order No. 12007 (42 FR 42839, 3 CFR, 1977 Comp., p. 139)); Executive Order No. 12432 (48 FR 32551, 3 CFR, 1983 Comp., p. 198); and Executive Order No. 12138 (44 FR 29637, 3 CFR, 1979 Comp., p. 393; as amended by Executive Order No. 12608 (52 FR 34617, 3 CFR, 1987 Comp., p. 245)), the Owner will promote awareness and participation of minority and women's business enterprises in contracting and procurement activities.

(d) *Submission of financial and operating statements.* The Owner must submit to HUD:

(1) Within 60 days after the end of each fiscal year of project operations, financial statements for the project audited by an independent public accountant and in the form required by HUD; and

(2) Other statements regarding project operation, financial conditions and occupancy as HUD may require to administer the PRAC and to monitor project operations.

(e) *Use of project funds.* The Owner shall maintain a separate interest bearing project fund account in a depository or depositories which are members of the Federal Deposit Insurance Corporation or National Credit Union Share Insurance Fund and shall deposit all tenant payments, charges, income and revenues arising from project operation or ownership to this account. All project funds are to be deposited in Federally insured accounts. All balances shall be fully insured at all times, to the maximum extent possible. Project funds must be used for the operation of the project (including required insurance coverage), and to make required deposits to the replacement reserve under § 891.405, in accordance with HUD-approved budget.

Any remaining project funds in the project funds account (including earned interest) following the expiration of the fiscal year shall be deposited in a Federally-insured residual receipts account within 60 days following the end of the fiscal year. Withdrawals from this account may be made only for project purposes and with the approval of HUD. If there are funds remaining in the residual receipts account when the mortgage is satisfied, such funds shall be returned to HUD.

(f) *Reports.* The Owner shall submit such reports as HUD may prescribe to demonstrate compliance with applicable civil rights and equal opportunity requirements. See § 891.410(a).

(Approved by the Office of Management and Budget under control number 2502–0470)

§ 891.405 Replacement reserve.

(a) *Establishment of reserve.* The Owner shall establish and maintain a replacement reserve to aid in funding extraordinary maintenance and repair and replacement of capital items.

(b) *Deposits to reserve.* The Owner shall make monthly deposits to the replacement reserve in an amount determined by HUD.

(c) *Level of reserve.* The reserve must be built up to and maintained at a level determined by HUD to be sufficient to meet projected requirements. Should the reserve reach that level, the amount of the deposit to the reserve may be reduced with the approval of HUD.

(d) *Administration of reserve.* Replacement reserve funds must be deposited with HUD or in a Federally-insured depository in an interest-bearing account(s) whose balances(s) are fully insured at all times. All earnings including interest on the reserve must be added to the reserve. Funds may be drawn from the reserve and used only in accordance with HUD guidelines and with the approval of, or as directed by, HUD.

§ 891.410 Selection and admission of tenants.

(a) *Written procedures.* The Owner shall adopt written tenant selection procedures that ensure nondiscrimination in the selection of tenants and that are consistent with the purpose of improving housing opportunities for very low-income elderly persons and persons with disabilities (as applicable); and reasonably related to program eligibility and an applicant's ability to perform the obligations of the lease. Owners shall promptly inform in writing any rejected applicant of the grounds for any rejection. Additionally, Owners shall maintain a written, chronological waiting list showing the name, race, gender, ethnicity, and date of each person applying for the program.

(b) *Application for admission.* The Owner must accept applications for admission to the project in the form prescribed by HUD, and (under the Section 202 Program only) is obligated to confirm all information provided by applicant families on the application. Applicant households applying for assisted units (or residential spaces in a group home) must complete a certification of eligibility as part of the application for admission. Applicant households must meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, subpart B. Applicant families must sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B. Both the Owner and the applicant household must complete and sign the application for admission. On request, the Owner must furnish copies of all applications for admission to HUD.

(c) *Determination of eligibility and selection of tenants.* (1) The Owner is responsible for determining whether applicants are eligible for admission and for the selection of households. To be eligible for admission, an applicant must be an elderly person or a person with disabilities, as applicable (as defined in §§ 891.205 and 891.305, respectively); must meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, subpart B; must sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B; and must be a very low-income family, as defined in § 891.105.

(2) Under the Section 811 Program:

(i) In order to be eligible for admission, the applicant must also meet any project occupancy requirements approved by HUD.

(ii) Owners shall make selections in a nondiscriminatory manner without regard to considerations such as race, religion, color, sex, national origin, familial status, or disability. An Owner may, with the approval of the Secretary, limit occupancy within housing developed under this part 891 to persons with disabilities who have similar disabilities and require a similar set of supportive services in a supportive housing environment. However, the Owner must permit occupancy by any qualified person with a disability who could benefit from the housing and/or services provided regardless of the person's disability.

(d) *Unit assignment.* If the Owner determines that the household is eligible and is otherwise acceptable and units (or residential spaces in a group home) are available, the Owner will assign the household a unit or residential space in a group home. If the household will occupy an assisted unit, the Owner will assign the household a unit of the appropriate size in accordance with HUD's general occupancy guidelines. If no suitable unit (or residential space in a group home) is available, the Owner will place the household on a waiting list for the project and notify the household when a suitable unit or residential space may become available. If the waiting list is so long that the applicant would not be likely to be admitted for the next 12 months, the Owner may advise the applicant that no additional applications for admission are being considered for that reason.

(e) *Ineligibility determination.* If the Owner determines that an applicant is ineligible for admission or the Owner is not selecting the applicant for other reasons, the Owner will promptly notify the applicant in writing of the determination, the reasons for the determination, and the applicant's right to request a meeting to review the rejection, in accordance with HUD requirements. The review, if requested, may not be conducted by a member of the Owner's staff who made the initial decision to reject the applicant. The applicant may also exercise other rights (e.g., rights granted under Federal, State or local civil rights laws) if the applicant believes he or she is being discriminated against on a prohibited basis.

(f) *Records.* Records on applicants and approved eligible households, which provide racial, ethnic, gender and place of previous residency data required by HUD, must be retained for three years. See § 891.410(a).

(g) *Reexamination of household family income and composition.* (1) *Regular reexaminations.* The Owner must reexamine the income and composition of the household at least every 12 months. Upon verification of the information, the Owner must make appropriate adjustments in the total tenant payment in accordance with part 813 of this chapter, as modified by § 891.105, and must determine whether the household's unit size is still appropriate. The Owner must adjust tenant payment and the project rental assistance payment, and must carry out any unit transfer in accordance with HUD standards. At the time of reexamination under paragraph (g)(1) of

this section, the Owner must require the household to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, subpart B. For requirements regarding the signing and submitting of consent forms by families for obtaining of wage and claim information from State Wage Information Collection Agencies, see 24 CFR part 5, subpart B.

(2) *Interim reexaminations.* The household must comply with the provisions in its lease regarding interim reporting of changes in income. If the Owner receives information concerning a change in the household's income or other circumstances between regularly scheduled reexaminations, the Owner must consult with the household and make any adjustments determined to be appropriate. See 24 CFR part 5, subpart B for the requirements for the disclosure and verification of Social Security Number at interim reexaminations involving new household members. For requirements regarding the signing and submitting of consent forms by families for the obtaining of wage and claim information from State Wage Information Collection Agencies, see 24 CFR part 5, subpart B. Any change in the household's income or other circumstances that result in an adjustment in the total tenant payment, tenant payment, and project rental assistance payment must be verified.

(3) *Continuation of project rental assistance payment.* (i) A household shall remain eligible for project rental assistance payment until the total tenant payment equals or exceeds the gross rent (or a pro rata share of the gross rent in a group home). The termination of subsidy eligibility will not affect the household's other rights under its lease. Project rental assistance payment may be resumed if, as a result of changes in income, rent or other relevant circumstances during the term of the PRAC, the household meets the income eligibility requirements of 24 CFR part 813 (as modified in § 891.105) and project rental assistance is available for the unit or residential space under the terms of the PRAC. The household will not be required to establish its eligibility for admission to the project under the remaining requirements of paragraph (c) of this section.

(ii) A household's eligibility for project rental assistance payment may be terminated in accordance with HUD requirements for such reasons as failure to submit requested verification information, including information related to disclosure and verification of Social Security Numbers, as provided by 24 CFR part 5, subpart B or failure to sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies (as provided by 24 CFR part 5, subpart B).

(h) *Selection preferences.* Under the Section 202 Program, the selection preferences in 24 CFR part 5, subpart D apply.

§ 891.415 Obligations of the household or family.

This section shall apply to capital advances under the Section 202 Program and the Section 811 Program, as well as loans financed under subpart E of this part.

(a) *Requirements.* The household (or family, as applicable) shall:

(1) Pay amounts due under the lease directly to the Owner (or Borrower, as applicable);

(2) Supply such certification, release of information, consent, completed forms or documentation as the Owner (or Borrower, as applicable) or HUD determines necessary, including information and documentation relating to the disclosure and verification of Social Security Numbers, as provided by 24 CFR part 5, subpart B, and the signing and submission of consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B;

(3) Allow the Owner (or Borrower, as applicable) to inspect the dwelling unit or residential space at reasonable times and after reasonable notice;

(4) Notify the Owner (or Borrower, as applicable) before vacating the dwelling unit or residential space; and

(5) Use the dwelling unit or residential space solely for residence by the household (or family, as applicable) and as the household's (or family's) principal place of residence.

(b) *Prohibitions.* The household (or family, as applicable) shall not:

(1) Assign the lease or transfer the unit or residential space; or

(2) Occupy, or receive assistance for the occupancy of, a unit or residential space governed under this part 891 while occupying, or receiving assistance for the occupancy of, another unit assisted under any Federal housing assistance program, including any section 8 program.

(Approved by the Office of Management and Budget under control number 2502–0470)

§ 891.420 Overcrowded and underoccupied units.

If the Owner determines that because of change in household size, an assisted unit is smaller than appropriate for the eligible household to which it is leased, or that the assisted unit is larger than appropriate, project rental assistance payment with respect to the unit will not be reduced or terminated until the eligible household has been relocated to an appropriate alternate unit. If possible, the Owner will, as promptly as possible, offer the household an appropriate alternate unit. The Owner may receive vacancy payments for the vacated unit if the Owner complies with the requirements of § 891.445.

§ 891.425 Lease requirements.

This section shall apply to capital advances under the Section 202 Program and the Section 811 Program, as well as loans financed under subpart E of this part.

(a) *Term of lease.* The term of the lease may not be less than one year. Unless the lease has been terminated by appropriate action, upon expiration of the lease term, the household and Owner (or family and Borrower, as applicable) may execute a new lease for a term not less than one year, or may take no action. If no action is taken, the lease will automatically be renewed for successive terms of one month.

(b) *Termination by the household (or family, as applicable).* All leases may contain a provision that permits the household (or family) to terminate the lease upon 30 days advance notice. A lease for a term that exceeds one year must contain such provision.

(c) *Form.* The Owner (or Borrower, as applicable) shall use the lease form prescribed by HUD. In addition to required provisions of the lease form, the Owner (or Borrower) may include a provision in the lease permitting the Owner (or Borrower) to enter the leased premises at any time without advance notice when there is reasonable cause to believe that an emergency exists or that health or safety of a family member is endangered.

§ 891.430 Termination of tenancy and modification of lease.

The provisions of part 247 of this title apply to all decisions by an Owner to terminate the tenancy or modify the lease of a household residing in a unit (or residential space in a group home).

§ 891.435 Security deposits.

This section shall apply to capital advances under the Section 202 Program and the Section 811 Program, as well as loans financed under subpart E of this part. For loans financed under subpart E of this part, the requirements in § 891.635 also apply.

(a) *Collection of security deposits.* At the time of the initial execution of the lease, the Owner (or Borrower, as applicable) will require each household (or family, as applicable) occupying an assisted unit or residential space in a group home to pay a security deposit in an amount equal to one month's tenant payment or $50, whichever is greater. The household (or family) is expected to pay the security deposit from its own resources and other available public or private resources. The Owner (or Borrower) may collect the security deposit on an installment basis.

(b) *Security deposit provisions applicable to units.* (1) *Administration of security deposit.* The Owner (or Borrower, as applicable) must place the security deposits in a segregated interest-bearing account. The amount of the segregated, interest-bearing account maintained by the Owner (or Borrower) must at all times equal the total amount collected from the households (or families, as applicable) then in occupancy plus any accrued interest and less allowable administrative cost adjustments. The Owner (or Borrower) must comply with any applicable State and local laws concerning interest payments on security deposits.

(2) *Household (or family, as applicable) notification requirement.* In order to be considered for the refund of the security deposit, a household (or family) must provide the Owner (or Borrower, as applicable) with a forwarding address or arrange to pick up the refund.

(3) *Use of security deposit.* The Owner (or Borrower, as applicable), subject to State and local law and the requirements of paragraphs (b)(1) and (b)(3) of this section, may use the household's (or family's, as applicable) security deposit balance as reimbursement for any unpaid amounts that the household (or family) owes under the lease. Within 30 days (or shorter time if required by State or local law) after receiving notification under paragraph (b)(2) of this section, the Owner (or Borrower) must:

(i) Refund to a household (or family) that does not owe any amount under the lease the full amount of the household's (or family's) security deposit balance;

(ii) Provide to a household (or family) owing amounts under the lease a list itemizing each amount, along with a statement of the household's (or family's) rights under State and local law. If the amount that the Owner (or Borrower) claims is owed by the household (or family) is less than the amount of the household's (or family's) security deposit balance, the Owner (or Borrower) must refund the excess balance to the household (or family). If the Owner (or Borrower) fails to provide the list, the household (or family) will be entitled to the refund of the full amount of the household's (or family's) security deposit balance.

(4) *Disagreements.* If a disagreement arises concerning reimbursement of the security deposit, the household (or family, if applicable) will have the right to present objections to the Owner (or Borrower, if applicable) in an informal meeting. The Owner (or Borrower) must keep a record of any disagreements and meetings in a tenant file for inspection by HUD. The procedures of this paragraph do not preclude the household (or family) from exercising its rights under State or local law.

(5) *Decedent's interest in security deposit.* Upon the death of a member of a household (or family, as applicable), the decedent's interest, if any, in the security deposit will be governed by State or local law.

(c) *Reimbursement by HUD for assisted units.* If the household's (or family's, if applicable) security deposit balance is insufficient to reimburse the Owner (or Borrower, if applicable) for any amount that the household (or family) owes under the lease for an assisted unit or residential space, and the Owner (or Borrower) has provided the household (or family) with the list required by paragraph (b)(3)(ii) of this section, the Owner (or Borrower) may claim reimbursement from HUD for an amount not to exceed the lesser of:

(1) The amount owed the Owner (or Borrower); or

(2) One month's per unit operating cost (or contract rent, if applicable), minus the amount of the household's (or family's) security deposit balance. Any reimbursement under this section will be applied first toward any unpaid tenant payment (or rent, if applicable) due under the lease. No reimbursement may be claimed for any unpaid tenant payment (or rent) for the period after termination of the tenancy. The Owner (or Borrower) may be eligible for vacancy payments following a vacancy in accordance with the requirements of § 891.445 (or §§ 891.650 or 891.790, as applicable).

§ 891.440 Adjustment of utility allowances.

This section shall apply to projects funded under the Section 202 Program, to independent living complexes funded under Section 811 Program, and to projects financed with loans under subpart E of this part. The Owner (or Borrower, as applicable) must submit an analysis of any utility allowances applicable. Such data as changes in utility rates and other facts affecting utility consumption should be provided as part of this analysis to permit appropriate adjustments in the utility allowances for assisted units. In addition, when utility rate changes would result in a cumulative increase of 10 percent or more in the most recently approved utility allowances, the Owner (or Borrower) must advise HUD and request approval of new utility allowances. Whenever a utility allowance for an assisted unit is adjusted, the Owner (or Borrower) will promptly notify affected households (or families, as applicable) and make a corresponding adjustment of the tenant payment (or rent, as applicable) and the amount of the project rental assistance payment (or housing or project assistance payment, as applicable).

(Approved by the Office of Management and Budget under control number 2502–0470)

§ 891.445 Conditions for receipt of vacancy payments for assisted units.

(a) *General.* Vacancy payments under the PRAC will not be made unless the conditions for receipt of these project rental assistance payments set forth in this section are fulfilled.

(b) *Vacancies during rent-up.* For each unit (or residential space in a group home) that is not leased as of the effective date of the PRAC, the Owner is entitled to vacancy payments in the amount of 50 percent of the per unit operating cost (or pro rata share of the group home operating cost) for the first 60 days of vacancy, if the Owner:

(1) Conducted marketing in accordance with § 891.400(a) and otherwise complied with § 891.400;

(2) Has taken and continues to take all feasible actions to fill the vacancy; and

(3) Has not rejected any eligible applicant except for good cause acceptable to HUD.

(c) *Vacancies after rent-up.* If an eligible household vacates an assisted unit (or residential space in a group home) the Owner is entitled to vacancy payments in the amount of 50 percent of the approved per unit operating cost (or pro rata share of the group home operating cost) for the first 60 days of vacancy if the Owner:

(1) Certifies that it did not cause the vacancy by violating the lease, the PRAC, or any applicable law;

(2) Notified HUD of the vacancy or prospective vacancy and the reasons for the vacancy upon learning of the vacancy or prospective vacancy;

(3) Has fulfilled and continues to fulfill the requirements specified in § 891.400(a) (2) and (3) and § 891.445(b) (2) and (3); and

(4) For any vacancy resulting from the Owner's eviction of an eligible household, certifies that it has complied with § 891.430.

(d) *Prohibition of double compensation for vacancies.* If the

Owner collects payments for vacancies from other sources (tenant payment, security deposits, payments under § 891.435(c), or governmental payments under other programs), the Owner shall not be entitled to collect vacancy payments to the extent these collections from other sources plus the vacancy payment exceed the approved per unit operating cost.

§ 891.450 HUD review.

HUD shall conduct periodic on-site management reviews of the Owner's compliance with the requirements of this part.

Subpart E—Loans for Housing for the Elderly and Handicapped

§ 891.500 Purpose and policy.

(a) *Purpose.* The program under subpart E of this part provides direct Federal loans under section 202 of the Housing Act of 1959 (42 U.S.C. 1701q) for housing projects serving elderly or handicapped families and individuals. The housing projects shall provide the necessary services for the occupants which may include, but are not limited to: Health, continuing education, welfare, informational, recreational, homemaking, meal and nutritional services, counseling, and referral services, as well as transportation where necessary to facilitate access to these services.

(b) *General policy.* A loan made under subpart E of this part shall be used to finance the construction or the substantial rehabilitation of projects for elderly or handicapped families, or for the acquisition with or without moderate rehabilitation of existing housing and related facilities for group homes for nonelderly handicapped individuals.

(c) *Applicability.* Subpart E of this part applies to all fund reservations made before October 1, 1990, except for loans not initially closed that were converted to capital advances. Specifically, § 891.520 through 891.650 of subpart E apply to projects for elderly or handicapped families that received reservations under section 202 of the Housing Act of 1959 (12 U.S.C. 1701q) and housing assistance under section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437 *et seq*). Sections 891.655 through 891.790 of subpart E apply to projects for nonelderly handicapped families receiving reservations under section 202 and project assistance payments under section 202(h) of the Housing Act of 1959.

§ 891.505 Definitions.

For the purposes of this subpart E:

Act means section 202 of the Housing Act of 1959, as amended (12 U.S.C. 1701q).

Borrower means a private nonprofit corporation or a nonprofit consumer cooperative that may be established by the Sponsor, which will obtain a Section 202 loan and execute a mortgage in connection therewith as the legal owner of the project. "*Borrower*" does not mean a public body or the instrumentality of any public body. The purposes of the Borrower must include the promotion of the welfare of elderly and/or handicapped families. No part of the net earnings of the Borrower may inure to the benefit of any private shareholder, contributor, or individual, and the Borrower may not be controlled by or under the direction of persons or firms seeking to derive profit or gain therefrom. Because of the nonprofit nature of the Section 202 program, no officer or director, or trustee, member, stockholder or authorized representative of the Borrower is permitted to have any financial interest in any contract in connection with the rendition of services, the provision of goods or supplies, project management, procurement of furnishings and equipment, construction of the project, procurement of the site or other matters whatsoever.

Elderly family means:

(1) Families of two or more persons the head of which (or his or her spouse) is 62 years of age or older;

(2) The surviving member or members of any family described in paragraph (1) of this definition living in a unit assisted under subpart E of this part with the deceased member of the family at the time of his or her death;

(3) A single person who is 62 years of age or older; or

(4) Two or more elderly persons living together, or one or more such persons living with another person who is determined by HUD, based upon a licensed physician's certificate provided by the family, to be essential to their care or well being.

Handicapped family means:

(1) Families of two or more persons the head of which (or his or her spouse) is handicapped;

(2) The surviving member or members of any family described in paragraph (1) of this definition living in a unit assisted under subpart E of this part with the deceased member of the family at the time of his or her death;

(3) A single handicapped person over the age of 18; or

(4) Two or more handicapped persons living together, or one or more such persons living with another person who is determined by HUD, based upon a licensed physician's certificate provided by the family, to be essential to their care or well being.

Handicapped person or individual means:

(1) Any adult having a physical, mental, or emotional impairment that is expected to be of long-continued and indefinite duration, substantially impedes his or her ability to live independently, and is of a nature that such ability could be improved by more suitable housing conditions.

(2) A person with a developmental disability, as defined in section 102(7) of the Developmental Disabilities Assistance and Bill of Rights Act (42 U.S.C. 6001(5), i.e., a person with a severe chronic disability that:

(i) Is attributable to a mental or physical impairment or combination of mental and physical impairments;

(ii) Is manifested before the person attains age twenty-two;

(iii) Is likely to continue indefinitely;

(iv) Results in substantial functional limitation in three or more of the following areas of major life activity:

(A) Self-care;

(B) Receptive and expressive language;

(C) Learning;

(D) Mobility;

(E) Self-direction;

(F) Capacity for independent living;

(G) Economic self-sufficiency; and

(v) Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services that are of lifelong or extended duration and are individually planned and coordinated.

(3) A person with a chronic mental illness, i.e., if he or she has a severe and persistent mental or emotional impairment that seriously limits his or her ability to live independently, and whose impairment could be improved by more suitable housing conditions.

(4) Persons infected with the human acquired immunodeficiency virus (HIV) who are disabled as a result of infection with the HIV are eligible for occupancy in section 202 projects designed for the physically disabled, developmentally disabled, or chronically mentally ill depending upon the nature of the person's disability. A person whose sole impairment is alcoholism or drug addition (i.e., who does not have a developmental disability, chronic mental illness, or physical disability that is the disabling condition required for eligibility in a particular project) will not be considered to be disabled for the purposes of the section 202 program.

Housing and related facilities means rental or cooperative housing structures constructed or substantially rehabilitated as permanent residences for use by elderly or handicapped families, or acquired with or without moderate rehabilitation for use by nonelderly handicapped families as group homes. The term includes structures suitable for use by families residing in the project or in the area, such as cafeterias or dining halls, community rooms, or buildings, or other essential service facilities. In the case of acquisition with or without moderate rehabilitation, at least three years must have elapsed from the later of the date of completion of the project or the beginning of occupancy to the date of the application for a Section 202 fund reservation. Except for intermediate care facilities for the mentally retarded and individuals with related conditions, this term does not include nursing homes, hospitals, intermediate care facilities, or transitional care facilities.

Nonelderly handicapped family means a handicapped family in which the head of the family (and spouse, if any) is less than 62 years of age at the time of the family's initial occupancy of a project.

Section 8 Program means the housing assistance payments program that implements section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f note).

§ 891.510 Displacement, relocation, and real property acquisition.

(a) *Minimizing displacement.* Consistent with the other goals and objectives of subpart E of this part, Sponsors and Borrowers shall assure that they have taken all reasonable steps to minimize the displacement of persons (families, individuals, businesses, nonprofit organizations, and farms) as a result of a project assisted under subpart E of this part.

(b) *Relocation assistance for displaced persons.* A displaced person (defined in paragraph (f) of this section) must be provided relocation assistance at the levels described in, and in accordance with the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, as amended (URA) (42 U.S.C. 4201–4655), as implemented by 49 CFR part 24. A displaced person shall be advised of his or her rights under the Fair Housing Act (42 U.S.C. 3601–3619). If the comparable replacement dwellings are located in areas of minority concentration, minority persons also must be given, if possible, referrals to suitable, decent, safe, and sanitary replacement dwellings not located in such areas.

(c) *Real property acquisition requirements.* The acquisition of real property for a project is subject to the URA and the requirements described in 49 CFR part 24, subpart B.

(d) *Appeals.* A person who disagrees with the Sponsor's/Borrower's determination concerning whether the person qualifies as a "*displaced person,*" or with the amount of relocation assistance for which the person is eligible, may file a written appeal of that determination with the Sponsor/Borrower. A low-income person who is dissatisfied with the Sponsor's/Borrower's determination on his or her appeal may submit a written request for review of that determination to the HUD field office.

(e) *Responsibility of Sponsor/Borrower.* The Sponsor/Borrower shall certify that it will comply (i.e., provide assurance of compliance, as required by 49 CFR part 24) with the URA, the regulations at 49 CFR part 24, and the requirements of this section, and shall ensure such compliance notwithstanding any third party's contractual obligation to comply with these provisions. The Sponsor/Borrower shall maintain records in sufficient detail to demonstrate compliance with the provisions of this section. The Sponsor/Borrower shall maintain data on the race, ethnic, gender, and handicap status of displaced persons.

(f) *Definition of a displaced person.*

(1) For purposes of this section, the term "*displaced person*" means a person (family, individual, business, nonprofit organization, or farm) that moves from real property, or moves personal property from real property, permanently, as a direct result of acquisition, rehabilitation, or demolition for a project assisted under this part. This includes any permanent, involuntary move for an assisted project including any permanent move from the real property that is made:

(i) After notice by the Sponsor/Borrower to move permanently from the property if the move occurs on or after:

(A) The date of the submission of an application to HUD that is later approved, if the Sponsor has control of an appropriate site; or

(B) The date that the Sponsor obtains control of an approvable site, if such control is obtained after the submission of an application to HUD:

(ii) Before the date described in paragraph (f)(1)(i) of this section, if the Sponsor, Borrower or HUD determines that the displacement resulted directly from acquisition, rehabilitation, or demolition for the project;

(iii) By a tenant-occupant of a dwelling unit, if any one of the following three situations occurs:

(A) The tenant moves after execution of the Agreement between the Sponsor/Borrower and HUD, and the move occurs before the tenant is provided written notice offering him or her the opportunity to lease and occupy a suitable, decent, safe, and sanitary dwelling in the same building/complex upon completion of the project under reasonable terms and conditions. Such reasonable terms and conditions include a monthly rent and estimated average monthly utility costs that do not exceed the greater of:

(*1*) The tenant's monthly rent and estimated average monthly utility costs before the Agreement; or

(*2*) The total tenant payment, as determined under 24 CFR 813.107, if the tenant is low-income, or 30 percent of gross household income, if the tenant is not low-income; or

(B) The tenant is required to relocate temporarily, does not return to the building/complex, and either:

(*1*) The tenant is not offered payment for all reasonable out-of-pocket expenses incurred in connection with the temporary relocation; or

(*2*) Other conditions of the temporary relocation are not reasonable; or

(C) The tenant is required to move to another dwelling in the same building/complex but is not offered reimbursement for all reasonable out-of-pocket expenses incurred in connection with the move, or other conditions of the move are not reasonable.

(2) Notwithstanding the provisions of paragraph (f)(1) of this section, however, a person does not qualify as a "*displaced person*" (and is not eligible for relocation assistance at URA levels), if:

(i) The person has been evicted for cause based upon a serious or repeated violation of the terms and conditions of the lease or occupancy agreement, violation of applicable Federal, State, or local law, or other good cause, and HUD determines that the eviction was not undertaken for the purpose of evading the obligation to provide relocation assistance.

(ii) The person moved into the property after the submission of the application and, before signing a lease and commencing occupancy, was provided written notice of the project, its possible impact on the person (e.g., displacement, temporary relocation or a rent increase) and the fact that he or she will not qualify as a displaced person as a result of the project;

(iii) The person is ineligible under 49 CFR 24.2(g)(2); or

(iv) HUD determines that the person was not displaced as a direct result of

acquisition, rehabilitation, or demolition for the project;

(3) The Sponsor/Borrower may request, at any time, a HUD determination of whether a displacement is or would be covered by this section.

§ 891.515 Audit requirements.

Nonprofits receiving assistance under this part are subject to the audit requirements in 24 CFR part 45.

Section 202 Projects for the Elderly or Handicapped—Section 8 Assistance

§ 891.520 Definitions applicable to 202/8 projects.

The following definitions apply to projects for eligible families receiving assistance under section 8 of the United States Housing Act of 1937 in addition to reservations under section 202 of the Housing Act of 1959 (202/8 projects):

Assisted unit means a dwelling unit eligible for assistance under a HAP contract.

Contract rent means the total amount of rent specified in the HAP contract as payable by HUD and the tenant to the Borrower for an assisted unit.

Family (eligible family) means an elderly or handicapped family that meets the project occupancy requirements approved by HUD and, if the family occupies an assisted unit, meets the requirements described in part 813 of this chapter.

Gross rent is defined in part 813 of this chapter.

HAP contract (housing assistance payments contract) means the contract entered into by the Borrower and HUD setting forth the rights and duties of the parties with respect to the project and the payments under the HAP contract.

Housing assistance payment means the payment made by HUD to the Borrower for assisted units as provided in the HAP contract. The payment is the difference between the contract rent and the tenant rent. An additional payment is made to a family occupying an assisted unit when the utility allowance is greater than the total tenant payment. A housing assistance payment, known as a "vacancy payment," may be made to the Borrower when an assisted unit is vacant, in accordance with the terms of the HAP contract.

Project account means a specifically identified and segregated account for each project that is established in accordance with § 891.570(b) out of the amounts by which the maximum annual commitment exceeds the amount actually paid out under the HAP contract each year.

Project occupancy requirements means that eligible populations to be served under the Section 202 program are qualified individuals or families whose head of household or spouse is elderly, physically handicapped, developmentally disabled, or chronically mentally ill. Projects are designed to meet the special needs of the particular tenant population that the Borrower was selected to serve. Individuals from one eligible group may not be accepted for occupancy in a project designed for a different tenant group. However, a Sponsor can propose to house eligible tenant groups other than the one it was selected to serve, but must apply to the HUD field office for permission to do so, based on a plan that demonstrates that it can adequately serve the proposed tenant group. Upon review and recommendation by the field office, HUD Headquarters will approve or disapprove the request.

Rent, in the case of a unit in a cooperative project, means the carrying charges payable to the cooperative with respect to occupancy of the unit.

Tenant rent means the monthly amount defined in, and determined in accordance with part 813 of this chapter.

Total tenant payment means the monthly amount defined in, and determined in accordance with part 813 of this chapter.

Utility allowance is defined in part 813 of this chapter and is determined or approved by HUD.

Utility reimbursement is defined in part 813 of this chapter.

Vacancy payment means the housing assistance payment made to the Borrower by HUD for a vacant assisted unit if certain conditions are fulfilled, as provided in the HAP contract. The amount of the vacancy payment varies with the length of the vacancy period and is less after the first 60 days of any vacancy.

§ 891.525 Amount and terms of financing.

(a) The amount of financing approved shall be the amount stated in the Notice of Section 202 Fund Reservation, including any increase approved by the field office prior to the final closing of a loan; provided, however, that the amount of financing provided shall not exceed the lesser of:

(1) The dollar amounts stated in paragraphs (b) through (f) of this section; or

(2) The total development cost of the project as determined by the field office.

(b) For such part of the property or project attributable to dwelling use (excluding exterior land improvements, as defined by the Assistant Secretary) the maximum loan amount, depending on the number of bedrooms, may not exceed:

(1) $28,032 per family unit without a bedroom.

(2) $32,321 per family unit with one bedroom.

(3) $38,979 per family unit with two bedrooms.

(c) In order to compensate for the higher costs incident to construction of elevator type structures of sound standards of construction and design, the field office may increase the dollar limitations per family unit, as provided in paragraph (b) of this section, to not to exceed:

(1) $29,500 per family unit without a bedroom.

(2) $33,816 per family unit with one bedroom.

(3) $41,120 per family unit with two bedrooms.

(d) *Reduced loan amount—leaseholds.* In the event the loan is secured by a leasehold estate rather than a fee simple estate, the allowable cost of the property upon which the loan amount is based shall be reduced by the value of the leased fee.

(e) *Adjusted loan amount—rehabilitation projects.* A loan amount that involves a project to be rehabilitated shall be subject to the following additional limitations:

(1) *Property held in fee.* If the Borrower is the fee simple owner of the project not encumbered by a mortgage, the maximum loan amount shall not exceed 100 percent of the cost of the proposed rehabilitation.

(2) *Property subject to existing mortgage.* If the Borrower owns the project subject to an outstanding indebtedness, which is to be refinanced with part of the Section 202 loan, the maximum loan amount shall not exceed the cost of rehabilitation plus such portion of the outstanding indebtedness as does not exceed the fair market value of such land and improvements prior to the rehabilitation, as determined by the field office.

(3) *Property to be acquired.* If the project is to be acquired by the Borrower and the purchase price is to be financed with a part of the Section 202 loan, the maximum loan amount shall not exceed the cost of the rehabilitation plus such portion of the purchase price as does not exceed the fair market value of such land and improvements prior to the rehabilitation, as determined by the field office.

(f) *Increased Mortgage Limits—High Cost Areas.* (1)(i) The Assistant Secretary may increase the dollar amount limitations in paragraphs (b) and (c) of this section:

(A) By not to exceed 110 percent in any geographical area in which the Assistant Secretary finds that cost levels so require; and

(B) By not to exceed 140 percent where the Assistant Secretary determines it necessary on a project-by-project basis.

(ii) In no case, however, may any such increase exceed 90 percent, where the Assistant Secretary determines that there is involved a mortgage purchased or to be purchased by the Government National Mortgage Association (GNMA) in implementing its Special Assistance Functions under section 305 of the National Housing Act (as section 305 existed immediately before its repeal on November 30, 1983).

(2) If the Assistant Secretary finds that because of high costs in Alaska, Guam, or Hawaii it is not feasible to construct dwellings without the sacrifice of sound standards of construction, design, and livability within the limitations of maximum loan amounts provided in this section, the principal amount of mortgages may be increased by such amounts as may be necessary to compensate for such costs, but not to exceed in any event the maximum, including high cost area increases, if any, otherwise applicable by more than one-half thereof.

(g) *Loan interest rate.* Loans shall bear interest at a rate determined by HUD in accordance with this section.

(1) *Annual interest rate.* Except as provided under paragraph (g)(2), loans shall bear interest at the rate in effect at the time the loan is made. The loan interest rate shall not exceed:

(i) The average yield on the most recently issued 30-year marketable obligations of the United States during the 3-month period immediately preceding the fiscal year in which the loan is made (adjusted to the nearest one-eighth of one percent), plus an allowance to cover administrative costs and probable losses under the program; and

(ii) Any applicable statutory ceiling on the loan interest rate including the allowance to cover administrative costs and probable losses.

(2) *Optional interest rate.* The Borrower may elect an optional loan interest rate. To elect the optional rate, the Borrower must request that HUD determine the loan interest rate at the time of the Borrower's request for conditional or firm commitment for direct loan financing.

(i) If the Borrower elects the optional loan interest rate, the loan interest rate shall not exceed:

(A) The average yield on the most recently issued 30-year marketable obligations of the United States during the 3-month period immediately preceding the fiscal year in which the request for commitment is submitted (adjusted to the nearest one-eighth of one percent), plus an allowance to cover administrative costs and probable losses under the program;

(B) The average yield on the most recently issued 30-year marketable obligations of the United States during the 1-month period immediately preceding the month in which the request for commitment is submitted (adjusted to the nearest one-eighth of one percent), plus an allowance to cover the administrative costs and probable losses under the program; and (C) Any applicable statutory ceiling on the loan interest rate including an allowance to cover administrative costs and probable losses under the program.

(ii) The date of submission of a request for conditional or firm commitment is the date that the Borrower submits the complete and acceptable request to HUD. The date of the submission of a request for commitment will not be affected by any subsequent resubmission of the request by the Borrower or by any reprocessing of the request by HUD.

(iii) The Borrower may withdraw its election of the optional interest rate at any time before initial loan closing. If the Borrower elected the optional interest rate with its request for conditional commitment and withdraws its election, the loan will bear interest at the rate determined under paragraph (g)(1) of this section, unless the Borrower elects an optional interest rate with its request for firm commitment. If the Borrower withdraws its election after the date of submission of its request for firm commitment, the loan will bear interest at the rate determined under paragraph (g)(1) of this section.

(iv) If initial loan closing has not occurred within 18 months after the Notice of Section 202 Fund Reservation is issued, the Borrower's election of the optional rate will be cancelled and the loan will bear interest at the rate determined under paragraph (g)(1) of this section.

(3) *Allowance for administrative costs and probable losses.* For the purpose of computing the loan interest rate under paragraphs (g) (1) and (2) of this section, the allowance to cover administrative costs and probable losses under the program is one-fourth of one percent (.25%) per annum for both the construction and permanent loan periods.

(h) *Announcement of interest rates.* (1) HUD will annually announce the loan interest rate determination under paragraph (g)(1) of this section by publishing notice of the rate in the **Federal Register**. The **Federal Register** notice will include a statement explaining the basis for the interest rate determination.

(2) Upon the Borrower's request, HUD will provide available current information concerning the determination of the interest rate under paragraph (g)(2) of this section.

(i) The loan shall be secured by a first mortgage on real estate in fee simple or long term leasehold. The mortgage shall be repayable during a term not to exceed 40 years and shall be subject to such terms and conditions as shall be determined by the Assistant Secretary.

(j) In order to assure HUD of the Borrower's continued commitment to the development, management, and operation of the project, a minimum capital investment is required of Section 202 Borrowers of one-half of one percent (0.5%) of the mortgage amount committed to be disbursed, not to exceed the amount of $10,000. Section 106(b) loans made pursuant to section 106 of the Housing Act of 1968 may not be utilized to meet the minimum capital investment requirement. Such minimum capital investment shall be placed in escrow at the initial closing of the Section 202 loan and shall be held by HUD or other escrow agent acceptable to the field office for not less than a 3-year period from the date of initial occupancy and may be used for operating expenses or deficits as may be directed by the field office. Any unexpended balance remaining in the minimum capital investment account at the end of the escrow period shall be returned to the Borrower.

§ 891.530 Prepayment privileges.

(a) The prepayment (whether in whole or in part) or the assignment or transfer of physical and financial assets of any Section 202 project is prohibited, unless the Secretary gives prior written approval.

(b) The Secretary may not grant approval unless he or she has determined that the prepayment or transfer of the loan is part of a transaction that will ensure the continued operation of the project, until the original maturity date of the loan, in a manner that will provide rental housing for the elderly and handicapped on terms at least as advantageous to existing and future tenants as the terms required by the original Section 202 loan agreement and any other loan agreements entered into under other provisions of law.

§ 891.535 Requirements for awarding construction contracts.

(a) Awards shall be made only to responsible contractors that possess the potential ability to perform successfully under the terms and conditions of a proposed construction contract. Consideration shall be given to such matters as contractor integrity, compliance with public policy, record of past performance, and financial and technical resources.

(b) Each Borrower is permitted to use either competitive bidding (formal advertising) in selecting a construction contractor or the negotiated noncompetitive method of contract award under paragraph (c) of this section. In competitive bidding, sealed bids are publicly solicited and a firm, fixed-price contract is awarded (in accordance with the requirements of this paragraph (b)) to the responsible bidder whose bid, conforming with all the material terms and conditions of the invitation for bids, is lowest in price. Regardless of which method a Borrower uses, there should be an opportunity for minority owned and women owned businesses to be awarded a contract.

(1) Bids shall be solicited from an adequate number of known contractors a reasonable time prior to the date set forth for opening of bids. In addition, the invitation shall be publicly advertised.

(2) The invitation for bids shall specify:

(i) The name of the Borrower;

(ii) A brief description of the proposed project and the proposed construction contract;

(iii) A preliminary estimate of cost;

(iv) That bids will be received at a specified place until a specified time at which time and place all bids will be publicly opened;

(v) The location where the proposed forms of contract and bid documents, including plans and specifications, are on file and may be obtained on payment of a specified returnable deposit;

(vi) That a certified check or bank draft or satisfactory bid bond in the amount of 5 percent of the bid shall be submitted with the bid;

(vii) That the successful bidder will be required to provide assurance of completion in the form of a performance and payment bond or cash escrow; and

(viii) That the Borrower reserves the right to reject any or all bids and to waive any informality.

(3) The bid form, which must be submitted by all bidders, must specify:

(i) The name of the project;

(ii) The name and address of the bidder;

(iii) That the bidder proposes to furnish all labor, materials, equipment and services required to construct and complete the project, as described in the invitation for bids (including the contents of all documents on file), for a specified lump-sum price;

(iv) That the security specified in paragraph (b)(2)(vi) of this section accompanies the bid;

(v) The period after the bid opening during which the bid shall not be withdrawn without the consent of the Borrower;

(vi) That the bidder will, if notified of acceptance of such bid within a specified period after the opening, execute and deliver a contract in the prescribed form and furnish the required bond within ten days thereafter;

(vii) That the bidder acknowledges any amendments to the invitation for bids; and

(viii) That the bidder certifies that the bid is in strict accordance with all terms of the invitation for bids (including the contents of all documents on file) and that the bid is signed by a person authorized to bind the bidder.

(4) Bidding shall be open to all general contractors who furnish the security guaranteeing their bid, as described in paragraph (b)(2)(vi) of this section.

(5) All bids shall be opened publicly at the time and place stated in the invitation for bids, in the presence of the HUD Regional Administrator or his designee.

(6) A firm, fixed-price contract award shall be made by written notice to the responsible bidder whose bid, conforming to the invitation for bids, is lowest. The contract may provide for an incentive payment to the contractor for an early completion.

(c) A Sponsor or Borrower may award a negotiated, noncompetitive construction contract.

§ 891.540 Loan disbursement procedures.

(a) Disbursements of loan proceeds shall be made directly by HUD to or for the account of the Borrower and may be made through an approved lender, mortgage servicer, title insurance company, or other agent satisfactory to the Borrower and HUD.

(b) All disbursements to the Borrower shall be made on a periodic basis in an amount not to exceed the HUD-approved cost of portions of construction or rehabilitation work completed and in place (except as modified in paragraph (d) of this section), minus the appropriate holdback, as determined by the field office.

(c) Requisitions for loan disbursements shall be submitted by the Borrower on forms to be prescribed by the Assistant Secretary and shall be accompanied by such additional information as the field office may require in order to approve loan disbursements under subpart E of this part, including but not limited to evidence of compliance with the Davis-Bacon Act, Department of Labor regulations, all applicable zoning, building, and other governmental requirements, and such evidence of continued priority of the mortgage of the Borrower as the Assistant Secretary may prescribe.

(d) In loan disbursements for building components stored off-site, the term "*building component*" shall mean any manufactured or preassembled part of a structure as defined by HUD and that the Assistant Secretary has designated for off-site storage because it is of such size or weight that storage of the components required for timely construction progress at the construction site is impractical, or weather damage or other adverse conditions prevailing at the construction site would make storage at the site impractical or unduly costly. Each building component must be specifically identified for incorporation into the property as provided under paragraph (d)(1)(ii) of this section.

(1) *Storage.* (i) A loan disbursement may be made for up to 90 percent of the invoice value (to exclude costs of transportation and storage) of the building components stored off-site if the components are stored at a location approved by HUD.

(ii) Each building component shall be adequately marked so as to be readily identifiable in the inventory of the off-site location. It shall be kept together with all other building components of the same manufacturer intended for use in the same project for which loan disbursements have been made and separate and apart from similar units not for use in the project.

(iii) Storage costs, if any, shall be borne the general contractor.

(2) *Responsibility for transportation, storage and insurance of off-site building components.* The general contractor of the project shall have the responsibility for:

(i) Insuring the components in the name of the Borrower while in transit and storage; and

(ii) Delivering or contracting for the delivery of the components to the storage area and to the construction site, including payment of freight.

(3) *Loan disbursements.* (i) Before a loan disbursement for a building component stored off-site is made, the Borrower shall:

(A) Obtain a bill of sale for the component;

(B) Provide HUD with a security agreement pledged by a first lien on the building components with the exception of such other liens or encumbrances as may be approved by HUD; and

(C) File a financing statement in accordance with the Uniform Commercial Code.

(ii) Before each loan disbursement for building components stored off-site is made the manufacturer and the general contractor shall certify to HUD that the components, in their intended use, comply with HUD-approved contract plan and specifications.

(iii) Loan disbursements may be made only for components stored off-site in a quantity required to permit uninterrupted installation at the site.

(iv) At no time shall the invoice value of building components being stored off-site, for which advances have been insured, represent more than 25 percent of the total estimated construction costs for the insured mortgaged project as specified in the construction contract. Notwithstanding the preceding sentence and other regulatory requirements that set bonding requirements, the percentage of total estimated construction costs insured by advances under this section may exceed 25 percent but not 50 percent if the mortgagor furnishes assurance of completion in the form of a corporate surety bond for the payment and performance each in the amount of 100 percent of the amount of the construction contract. In no event will insurance of components stored off-site be made in the absence of a payment and performance bond.

(v) No single loan disbursement which is to be made shall be in an amount less than ten thousand ($10,000) dollars.

§ 891.545 Completion of project, cost certification, and HUD approvals.

(a) The Borrower must satisfy the requirements for completion of construction and substantial rehabilitation and approvals by HUD before submission of a final requisition for disbursement of loan proceeds.

(b) The Borrower shall submit to the field office all documentation required for final disbursement of the loan, including:

(1) A Borrower's/Mortgagor's Certificate of Actual Cost, showing the actual cost to the mortgagor of the construction contract, architectural, legal, organizational, offsite costs, and all other items of eligible expense. The certificate shall not include as actual cost any kickbacks, rebates, trade discounts, or other similar payments to the mortgagor or to any of its officers, directors, or members.

(2) A verification of the Certificate of Actual Cost by an independent Certified Public Accountant or independent public accountant acceptable to the field office.

(3) In the case of projects not subject to competitive bidding, a certification of the general contractor (and of such subcontractors, material suppliers, and equipment lessors as the Assistant Secretary or field office may require), on a form prescribed by the Assistant Secretary, as to all actual costs paid for labor, materials, and subcontract work under the general contract exclusive of the builder's fee and kickbacks, rebates, trade discounts, or other similar payments to the general contractor, the mortgagor, or any of its officers, directors, stockholders, partners, or members.

(c) In lieu of the requirements set forth in paragraphs (c)(1) and (3) of this section, a simplified form of cost certification prescribed by the Secretary may be completed and submitted by the Borrower for projects with mortgages of $500,000 or less. The simplified cost certification shall be verified by an independent Certified Public Accountant or an independent public accountant in a manner acceptable to the Secretary.

(d) If the Borrower's certified costs provided in accordance with paragraph (c) or (d) of this section and as approved by HUD are less than the loan amount, the contract rents will be reduced accordingly.

(e) If the contract rents are reduced pursuant to paragraph (e) of this section, the maximum annual HAP Contract commitment will be reduced. If contract rents are reduced based on cost certification after HAP Contract execution, any overpayment after the effective date of the Contract will be recovered from the Borrower by HUD.

(Approved by the Office of Management and Budget under control number 2502–0044.)

§ 891.550 Selection preferences.

For purposes of projects assisted under §§ 891.520 through 891.650, the selection preferences in 24 CFR part 5, subpart D apply.

§ 891.555 Smoke detectors.

(a) *Performance requirement.* After October 30, 1992, each dwelling unit must include at least one battery-operated or hard-wired smoke detector, in proper working condition, on each level of the unit. If the unit is occupied by hearing-impaired persons, smoke detectors must have an alarm system designed for hearing-impaired persons in each bedroom occupied by a hearing-impaired person.

(b) *Acceptability criteria.* The smoke detector must be located, to the extent practicable, in a hallway adjacent to a bedroom, unless the unit is occupied by a hearing-impaired person, in which case each bedroom occupied by a hearing-impaired person must have an alarm system connected to the smoke detector installed in the hallway.

§ 891.560 HAP contract.

(a) *HAP contract.* The housing assistance payments contract sets forth rights and duties of the Borrower and HUD with respect to the project and the housing assistance payments.

(b) *HAP contract execution.* (1) Upon satisfactory completion of the project, the Borrower and HUD shall execute the HAP contract on the form prescribed by HUD.

(2) The effective date of the HAP contract may be earlier than the date of execution, but no earlier than the date of HUD's issuance of the permission to occupy.

(3) If the project is completed in stages, the procedures of paragraph (b) of this section shall apply to each stage.

(c) *Housing assistance payments to owners under the HAP contract.* The housing assistance payments made under the HAP contract are:

(1) *Payments to the Borrower to assist eligible families leasing assisted units.* The amount of the housing assistance payment made to the Borrower for an assisted unit leased to an eligible family is equal to the difference between the contract rent for the unit and the tenant rent payable by the family.

(2) *Payments to the Borrower for vacant assisted units (vacancy payments).* The amount of and conditions for vacancy payments are described in § 891.650. The housing assistance payments are made monthly by HUD upon proper requisition by the Borrower, except payments for vacancies of more than 60 days, which are made semiannually by HUD upon requisition by the Borrower.

(d) *Payment of utility reimbursement.* As applicable, a utility reimbursement will be paid to a family occupying an assisted unit as an additional housing assistance payment. The HAP contract will provide that the Borrower will make this payment on behalf of HUD. Funds will be paid to the Borrower in trust solely for the purpose of making the additional payment. The Borrower may pay the utility reimbursement jointly to the family and the utility company, or, if the family and utility

company consent, directly to the utility company.

§ 891.565 Term of HAP contract.

The term of the HAP contract for assisted units shall be 20 years. If the project is completed in stages, the term of the HAP contract for assisted units in each stage shall be 20 years. The term of the HAP contract for all assisted units in all stages of a project shall not exceed 22 years.

§ 891.570 Maximum annual commitment and project account.

(a) *Maximum annual commitment.* The maximum annual amount that may be committed under the HAP contract is the total of the contract rents and utility allowances for all assisted units in the project.

(b) *Project account.* (1) HUD will establish and maintain a specifically identified and segregated project account for each project. The project account will be established out of the amounts by which the maximum annual commitment exceeds the amount actually paid out under the HAP contract each year. HUD will make payments from this account for housing assistance payments as needed to cover increases in contract rents or decreases in tenant income and other payments for costs specifically approved by the Secretary.

(2) If the HUD-approved estimate of required annual payments under the HAP contract for a fiscal year exceeds the maximum annual commitment for that fiscal year plus the current balance in the project account, HUD will, within a reasonable time, take such steps authorized by section 8(c)(6) of the United States Housing Act of 1937 (42 U.S.C. 1437f note), as may be necessary, to assure that payments under the HAP contract will be adequate to cover increases in contract rents and decreases in tenant income.

§ 891.575 Leasing to eligible families.

(a) *Availability of assisted units for occupancy by eligible families.* (1) During the term of the HAP contract, a Borrower shall make available for occupancy by eligible families the total number of units for which assistance is committed under the HAP contract. For purposes of this section, making units available for occupancy by eligible families means that the Borrower:

(i) Is conducting marketing in accordance with § 891.600(a);

(ii) Has leased or is making good faith efforts to lease the units to eligible and otherwise acceptable families, including taking all feasible actions to fill vacancies by renting to such families;

(iii) Has not rejected any such applicant family except for reasons acceptable to HUD.

(2) If the Borrower is temporarily unable to lease all units for which assistance is committed under the HAP contract to eligible families, one or more units may, with the prior approval of HUD, be leased to otherwise eligible families that do not meet the income eligibility requirements of part 813 of this chapter. Failure on the part of the Borrower to comply with these requirements is a violation of the HAP contract and grounds for all available legal remedies, including an action for specific performance of the HAP contract, suspension or debarment from HUD programs, and reduction of the number of units under the HAP contract as set forth in paragraph (b) of this section.

(b) *Reduction of number of units covered by the HAP contract.* HUD may reduce the number of units covered by the HAP contract to the number of units available for occupancy by eligible families if:

(1) The Borrower fails to comply with the requirements of paragraph (a) of this section; or

(2) Notwithstanding any prior approval by HUD, HUD determines that the inability to lease units to eligible families is not a temporary problem.

(c) *Restoration.* HUD will agree to an amendment of the HAP contract to provide for subsequent restoration of any reduction made under paragraph (b) of this section if:

(1) HUD determines that the restoration is justified by demand;

(2) The Borrower otherwise has a record of compliance with the Borrower's obligations under the HAP contract; and

(3) Contract and budget authority is available.

(d) *Applicability.* In accordance with section 555 of the Cranston-Gonzalez National Affordable Housing Act of 1990, paragraphs (a) and (b) of this section apply to all contracts. An owner who had leased an assisted unit to an ineligible family consistent with the regulations in effect at the time will continue to lease the unit to that family. However, the owner must make the unit available for occupancy by an eligible family when the ineligible family vacates the unit.

(e) *Occupancy by families that are not elderly or handicapped.* HUD may permit units in the project to be leased to other than elderly or handicapped families if:

(1) The Borrower has made reasonable efforts to lease assisted and unassisted units to eligible families;

(2) The Borrower has been granted HUD approval under paragraph (a) of this section; and

(3) The Borrower is temporarily unable to achieve or maintain a level of occupancy sufficient to prevent financial default and foreclosure under the Section 202 loan documents. HUD approval under paragraph (e)(3) of this section will be of limited duration. HUD may impose terms and conditions to this approval that are consistent with program objectives and necessary to protect its interest in the Section 202 loan.

§ 891.580 HAP contract administration.

HUD is responsible for the administration of the HAP contract.

§ 891.585 Default by Borrower.

(a) *HAP contract provisions.* The HAP contract will provide:

(1) That if HUD determines that the Borrower is in default under the HAP contract, HUD will notify the Borrower of the actions required to be taken to cure the default and of the remedies to be applied by HUD including an action for specific performance under the HAP contract, reduction or suspension of housing assistance payments and recovery of overpayments, where appropriate; and

(2) That if the Borrower fails to cure the default, HUD has the right to terminate the HAP contract or to take other corrective action.

(b) *Loan provisions.* Additional provisions governing default under the section 202 loan are included in the regulatory agreement and other loan documents.

§ 891.590 Notice upon HAP contract expiration.

(a) *Notice required.* The HAP contract will provide that the Borrower will, at least one year before the end of the HAP contract term, notify each family leasing an assisted unit of any increase in the amount the family will be required to pay as rent as a result of the expiration.

(b) *Service requirements.* The notice under paragraph (a) of this section shall be accomplished by sending a letter by first class mail, properly stamped and addressed, to the family at its address at the project, with a proper return address; and serving a copy of the notice on any adult person answering the door at the leased dwelling unit, or if no adult responds, by placing the notice under or through the door, if possible, or else by affixing the notice to the door. Service shall not be considered to be effective until both required notices have been accomplished. The date on which the notice shall be considered to be received by the family shall be the date on which the Borrower mails the first class letter provided for in paragraph (b) of this section, or the date on which the notice provided for in paragraph (b) of this section is properly given, whichever is later.

(c) *Contents of notice.* The notice shall advise each affected family that, after the expiration date of the HAP contract, the family will be required to bear the entire cost of the rent and that the Borrower may, subject to requirements and restrictions contained in the regulatory agreement, the lease, and State or local law, change the rent. The notice also shall state:

(1) The actual (if known) or the estimated rent that will be charged following the expiration of the HAP contract;

(2) The difference between the new rent and the total tenant payment toward rent under the HAP contract; and

(3) The date the HAP contract will expire.

(d) *Certification to HUD.* The Borrower shall give HUD a certification that families have been notified in accordance with this section and shall attach to the certification an example of the text of the notice.

(e) *Applicability.* This section applies to all HAP contracts entered into under an agreement to enter into a housing assistance payments contract executed on or after October 1, 1981, or entered into under such an agreement executed before October 1, 1981 but renewed or amended after February 9, 1995.

(Approved by the Office of Management and Budget under control number 2502–0371.)

§ 891.595 HAP contract extension or renewal.

Upon expiration of the term of the HAP contract, HUD and the Borrower may agree (subject to available funds) to extend the term of the HAP contract or to renew the HAP contract. The number of assisted units under the extended or renewed HAP contract shall equal the number of assisted units under the original HAP contract, except that:

(a) HUD and the Borrower may agree to reduce the number of assisted units by the number of assisted units that are not occupied by eligible families at the time of the extension or renewal; and

(b) HUD and the Borrower may agree to permit reductions in the number of assisted units during the term of the extended or renewed HAP contract as assisted units are vacated by eligible families. Nothing in this section shall prohibit HUD from reducing the number of units covered under the extended or renewed HAP contract in accordance with § 891.575(b).

§ 891.600 Responsibilities of Borrower.

(a) *Marketing.* (1) The Borrower must commence and continue diligent marketing activities not later than 90 days before the anticipated date of availability for occupancy of the first unit of the project. Market activities shall include the provision of notices of availability of housing under the program to operators of temporary housing for the homeless in the same housing market.

(2) Marketing must be done in accordance with the HUD-approved affirmative fair housing marketing plan and all Federal, State, or local fair housing and equal opportunity requirements. The purpose of the plan and requirements is to achieve a condition in which eligible families of similar income levels in the same housing market have a like range of housing choices available to them regardless of discriminatory considerations, such as their race, color, creed, religion, familial status, disability, sex or national origin. Marketing must also be done in accordance with the communication and notice requirements of Section 504 at 24 CFR 8.6 and 24 CFR 8.54.

(3) At the time of HAP contract execution, the Borrower must submit to HUD a list of leased and unleased assisted units, with a justification for the unleased units, in order to qualify for vacancy payments for the unleased units.

(b) *Management and maintenance.* The Borrower is responsible for all management functions. These functions include selection and admission of tenants, required reexaminations of incomes for families occupying assisted units (or residential spaces, as applicable), collection of rents, termination of tenancy and eviction, and all repair and maintenance functions (including ordinary and extraordinary maintenance and replacement of capital items). All functions must be performed in compliance with equal opportunity requirements.

(c) *Contracting for services.* (1) With HUD approval, the Borrower may contract with a private or public entity for performance of the services or duties required in paragraphs (a) and (b) of this section. However, such an arrangement does not relieve the Borrower of responsibility for these services and duties. All such contracts are subject to the restrictions governing prohibited contractual relationships described in §§ 891.130 and 891.505, if applicable. (These prohibitions do not extend to management contracts entered into by the Borrower with the Sponsor or its nonprofit affiliate).

(2) Consistent with the objectives of Executive Order No. 11625 (36 FR 19967, 3 CFR, 1971–1975 Comp., p. 616; as amended by Executive Order No. 12007 (42 FR 42839, 3 CFR, 1977 Comp., p. 139; unless otherwise noted); Executive Order No. 12432 (48 FR 32551, 3 CFR, 1983 Comp., p. 198; unless otherwise noted); and Executive Order No. 12138 (44 FR 29637, 3 CFR, 1979 Comp., p. 393; unless otherwise noted), the Borrower will promote awareness and participation of minority and women's business enterprises in contracting and procurement activities.

(d) *Submission of financial and operating statements.* The Borrower must submit to HUD:

(1) Within 60 days after the end of each fiscal year of project operations, financial statements for the project audited by an independent public accountant and in the form required by HUD; and

(2) Other statements regarding project operation, financial conditions and occupancy as HUD may require to administer the housing assistance payments contract (HAP contract) or the project assistance contract (PAC), as applicable, and to monitor project operations.

(e) *Use of project funds.* The Borrower shall maintain a separate project fund account in a depository or depositories that are members of the Federal Deposit Insurance Corporation or National Credit Union Share Insurance Fund and shall deposit all rents, charges, income and revenues arising from project operation or ownership to this account. All project funds are to be deposited in Federally-insured accounts. All balances shall be fully insured at all times, to the maximum extent possible. Project funds must be used for the operation of the project (including required insurance coverage), to make required principal and interest payments on the Section 202 loan, and to make required deposits to the replacement reserve under §§ 891.605 and 891.745 (as applicable), in accordance with a HUD-approved budget. Any project funds in the project funds account (including earned interest) following the expiration of the fiscal year shall be deposited in a Federally-insured residual receipts account within 60 days following the end of the fiscal year. Withdrawals from this account may be made only for project purposes and with the approval of HUD. If there are funds remaining in the residual receipts account when the

mortgage is satisfied, such funds shall be returned to HUD.

(f) *Reports.* The Borrower shall submit such reports as HUD may prescribe to demonstrate compliance with applicable civil rights and equal opportunity requirements.

(Approved by the Office of Management and Budget under control number 2502–0371.)

§ 891.605 Replacement reserve.

(a) *Establishment of reserve.* The Borrower shall establish and maintain a replacement reserve to aid in funding extraordinary maintenance, and repair and replacement of capital items.

(b) *Deposits to reserve.* The Borrower shall make monthly deposits to the replacement reserve in an amount determined by HUD. Further requirements regarding the amount of the deposits for projects funded under §§ 891.655 through 891.790 are provided in § 891.745.

(c) *Level of reserve.* The reserve must be built up to and maintained at a level determined by HUD to be sufficient to meet projected requirements. Should the reserve reach that level, the amount of the deposit to the reserve may be reduced with the approval of HUD.

(d) *Administration of reserve.* Replacement reserve funds must be deposited with HUD or in a Federally-insured depository in an interest-bearing account(s) whose balances are fully insured at all times. All earnings including interest on the reserve must be added to the reserve. Funds may be drawn from the reserve and used only in accordance with HUD guidelines and with the approval of, or as directed by, HUD.

§ 891.610 Selection and admission of tenants.

(a) *Written procedures.* The Owner shall adopt written tenant selection procedures that ensure nondiscrimination in the selection of tenants and that are consistent with the purpose of improving housing opportunities for very low-income elderly or handicapped persons; and reasonably related to program eligibility and an applicant's ability to perform the obligations of the lease. Owners shall promptly notify in writing any rejected applicant of the grounds for any rejection. Additionally, owners shall maintain a written, chronological waiting list showing the name, race, gender, ethnicity and date of each person applying for the program.

(b) *Application for admission.* The Borrower must accept applications for admission to the project in the form prescribed by HUD and is obligated to confirm all information provided by the applicant families on the application. Applicant families must be requested to complete a release of information consent for verification of information. Applicants applying for assisted units must complete a certification of eligibility as part of the application for admission. Applicant families must meet the disclosure and verification requirements for Social Security Numbers, and sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B. Both the Borrower and the applicant must complete and sign the application for admission. On request, the Borrower must furnish copies of all applications for admission to HUD.

(c) *Determination of eligibility and selection of tenants.* The Borrower is responsible for determining whether applicants are eligible for admission and for the selection of families. To be eligible for admission, an applicant must be an elderly or handicapped family as defined in § 891.505; meet any project occupancy requirements approved by HUD; meet the disclosure and verification requirements for Social Security Numbers and sign and submit consent forms for obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B; and, if applying for an assisted unit, be eligible for admission under part 813 of thia chapter.

(d) *Unit assignment.* If the Borrower determines that the family is eligible and is otherwise acceptable and units are available, the Borrower will assign the family a unit. The Borrower will assign the family a unit of the appropriate size in accordance with HUD's general occupancy guidelines. If no suitable unit is available, the Borrower will place the family on a waiting list for the project and notify the family of when a suitable unit may become available. If the waiting list is so long that the applicant would not be likely to be admitted within the next 12 months, the Borrower may advise the applicant that no additional applications for admission are being considered for that reason, except that the Borrower may not refuse to place an applicant on the waiting list if the applicant is otherwise eligible for assistance and claims that he or she qualifies for a Federal preference as provided in 24 CFR part 5, subpart D.

(e) *Ineligibility determination.* If the Borrower determines that an applicant is ineligible for admission or the Borrower is not selecting the applicant for other reasons, the Borrower will promptly notify the applicant in writing of the determination, the reasons for the determination, and that the applicant has a right to request a meeting with the Borrower or managing agent to review the rejection, in accordance with HUD requirements. The review, if requested, may not be conducted by a member of the Borrower's staff who made the initial decision to reject the applicant. The applicant may also exercise other rights (e.g., rights granted under Federal, State, or local civil rights laws) if the applicant believes he or she is being discriminated against on a prohibited basis. The informal review provisions for the denial of a Federal preference are provided in § 5.410(g) of this title.

(f) *Records.* Records on applicants and approved eligible families, which provide racial, ethnic, gender, handicap status, and place of previous residency data required by HUD, must be retained for three years.

(g) *Reexamination of family income and composition.* (1) *Regular reexaminations.* The Borrower must reexamine the income and compgsition of the family at least every 12 months. Upon verification of the information, the Borrower shall make appropriate adjustments in the total tenant payment in accordance with part 813 of this chapter and determine whether the family's unit size is still appropriate. The Borrower must adjust tenant rent and the housing assistance payment and must carry out any unit transfer in accordance with the administrative instructions issued by HUD. At the time of reexamination under paragraph (g)(1) of this section, the Borrower must require the family to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, subpart B.

(2) *Interim reexaminations.* The family must comply with the provisions in its lease regarding interim reporting of changes in income. If the Borrower receives information concerning a change in the family's income or other circumstances between regularly scheduled reexaminations, the Borrower must consult with the family and make any adjustments determined to be appropriate. Any change in the family's income or other circumstances that results in an adjustment in the total tenant payment, tenant rent and housing assistance payment must be verified.

(3) *Continuation of housing assistance payments.* (i) A family shall remain eligible for housing assistance payments until the total tenant payment equals or exceeds the gross rent. The termination of subsidy eligibility will not affect the family's other rights under its lease. Housing assistance payments may be resumed if, as a result of changes in income, rent or other relevant circumstances during the term of the HAP contract, the family meets the income eligibility requirements of part 813 of this chapter and housing assistance is available for the unit under the terms of the HAP contract. The family will not be required to establish its eligibility for admission to the project under the remaining requirements of paragraph (c) of this section.

(ii) A family's eligibility for housing assistance payments may be terminated in accordance with HUD requirements for such reasons as failure to submit requested verification information, including information related to disclosure and verification of Social Security Numbers, or failure to sign and submit consent forms for the obtaining of wage and claim information from State wage information collection agencies, as provided by 24 CFR part 5, subpart B.

(Approved by the Office of Management and Budget under control number 2502–0371.)

§ 891.615 Obligations of the family.

The obligations of the family are provided in § 891.415.

§ 891.620 Overcrowded and underoccupied units.

If the Borrower determines that because of change in family size, an assisted unit is smaller than appropriate for the eligible family to which it is leased, or that the assisted unit is larger than appropriate, housing assistance payments or project assistance payments (as applicable) with respect to the unit will not be reduced or terminated until the eligible family has been relocated to an appropriate alternate unit. If possible, the Borrower will, as promptly as possible, offer the family an appropriate alternate unit. The Borrower may receive vacancy payments for the vacated unit if the Borrower complies with the requirements of § 891.650.

§ 891.625 Lease requirements.

The lease requirements are provided in § 891.425.

§ 891.630 Termination of tenancy and modification of lease.

The provisions of part 247 of this title apply to all decisions by a Borrower to terminate the tenancy or modify the lease of a family residing in a unit.

§ 891.635 Security deposits.

The general requirements for security deposits on assisted units are provided in § 891.435. For purposes of subpart E of this part, the additional requirements apply:

(a) The Borrower may require each family occupying an unassisted unit (or residential space in a group home) to pay a security deposit equal to one month's rent payable by the family.

(b) The Borrower shall maintain a record of the amount in the segregated interest-bearing account that is attributable to each family in residence in the project. Annually for all families, and when computing the amount available for disbursement under § 891.435(b)(3), the Borrower shall allocate to the family's balance the interest accrued on the balance during the year. Unless prohibited by State or local law, the Borrower may deduct for the family, from the accrued interest for the year, the administrative cost of computing the allocation to the family's balance. The amount of the administrative cost adjustment shall not exceed the accrued interest allocated to the family's balance for the year.

§ 891.640 Adjustment of rents.

(a) *Contract rents.* (1) *Adjustment based on approved budget.* If the HAP contract provides, or has been amended to provide, that contract rents will be adjusted based upon a HUD-approved budget, HUD will calculate contract rent adjustments based on the sum of the project's operating costs and debt service (as calculated by HUD), with adjustments for vacancies, the project's nonrental income, and other factors that HUD deems appropriate. The calculation will be made on the basis of information provided by the Borrower on a form acceptable to the Secretary. The automatic adjustment factor described in part 888 of this chapter is not used to adjust contract rents under paragraph (a)(1) of this section, except to the extent that the amount of the replacement reserve deposit is adjusted under § 880.602 of this chapter.

(2) *Annual and special adjustments.* If the HAP contract provides that contract rents will be adjusted based on the application of an automatic adjustment factor and by special additional adjustments:

(i) Consistent with the HAP contract, contract rents may be adjusted in accordance with part 888 of this chapter;

(ii) Special additional adjustments will be granted, to the extent determined necessary by HUD, to reflect increases in the actual and necessary expenses of owning and maintaining the assisted units that have resulted from substantial general increases in real property taxes, assessments, utility rates or similar costs (i.e., assessments and utilities not covered by regulated rates), and that are not adequately compensated for by an annual adjustment. The Borrower must submit to HUD required supporting data, financial statements, and certifications for the special additional adjustment.

(b) *Rent for unassisted units.* The rent payable by families occupying units that are not assisted under the HAP contract shall be equal to the contract rent computed under paragraph (a) of this section.

(Approved by the Office of Management and Budget under control number 2502–0371.)

§ 891.645 Adjustment of utility allowances.

In connection with adjustments of contract rents as provided in § 891.640(a), the requirements for the adjustment of utility allowances provided in § 891.440 apply.

§ 891.650 Conditions for receipt of vacancy payments for assisted units.

(a) *General.* Vacancy payments under the HAP contract will not be made unless the conditions for receipt of these housing assistance payments set forth in this section are fulfilled.

(b) *Vacancies during rent-up.* For each unit that is not leased as of the effective date of the HAP contract, the Borrower is entitled to vacancy payments in the amount of 80 percent of the contract rent for the first 60 days of vacancy, if the Borrower:

(1) Complied with § 891.600;

(2) Has taken and continues to take all feasible actions to fill the vacancy; and

(3) Has not rejected any eligible applicant except for good cause acceptable to HUD.

(c) *Vacancies after rent-up.* If an eligible family vacates a unit, the Borrower is entitled to vacancy payments in the amount of 80 percent of the contract rent for the first 60 days of vacancy if the Borrower:

(1) Certifies that it did not cause the vacancy by violating the lease, the HAP contract, or any applicable law;

(2) Notified HUD of the vacancy or prospective vacancy and the reasons for the vacancy immediately upon learning of the vacancy or prospective vacancy;

(3) Has fulfilled and continues to fulfill the requirements specified in § 891.600(a)(2) and (3), and in paragraphs (b)(2) and (3) of this section; and

(4) For any vacancy resulting from the Borrower's eviction of an eligible family, certifies that it has complied with § 891.630.

(d) *Vacancies for longer than 60 days.* If a unit continues to be vacant after the 60-day period specified in paragraph (b) or (c) of this section, the Borrower may

apply to receive additional vacancy payments in an amount equal to the principal and interest payments required to amortize that portion of the debt service attributable to the vacant unit for up to 12 additional months for the unit if:

(1) The unit was in decent, safe, and sanitary condition during the vacancy period for which payment is claimed;

(2) The Borrower has fulfilled and continues to fulfill the requirements specified in paragraph (b) or (c) of this section, as appropriate; and

(3) The Borrower has demonstrated to the satisfaction of HUD that:

(i) For the period of vacancy, the project is not providing the Borrower with revenues at least equal to project expenses (exclusive of depreciation) and the amount of payments requested is not more than the portion of the deficiency attributable to the vacant unit; and

(ii) The project can achieve financial soundness within a reasonable time.

(e) *Prohibition of double compensation for vacancies.* If the Borrower collects payments for vacancies from other sources (tenant rent, security deposits, payments under § 891.435(c), or governmental payments under other programs), the Borrower shall not be entitled to collect vacancy payments to the extent these collections from other sources plus the vacancy payment exceed contract rent.

(Approved by the Office of Management and Budget under control number 2502–0371.)

Section 202 Projects for the Nonelderly Handicapped Families and Individuals—Section 162 Assistance

§ 891.655 Definitions applicable to 202/162 projects.

The following definitions apply to projects for eligible families receiving project assistance payments under section 202(h) of the Housing Act of 1959 in addition to reservations under section 202 (202/162 projects):

Annual income is defined in part 813 of this chapter. In the case of an individual residing in an intermediate care facility for the mentally retarded that is assisted under Title XIX of the Social Security Act and subpart E of this part, the annual income of the individual shall exclude protected personal income as provided under that Act. For the purposes of determining the total tenant payment, the income of such individuals shall be imputed to be the amount that the family would receive if assisted under Title XVI of the Social Security Act.

Assisted unit means a dwelling unit that is eligible for assistance under a project assistance contract (PAC).

Contract rent means the total amount of rent specified in the PAC as payable by HUD and the family to the Borrower for an assisted unit or residential space.

Family (eligible family) means a handicapped family (as defined in § 891.505) that meets the project occupancy requirements approved by HUD and, if the family occupies an assisted unit, meets the low-income requirements described in § 813.102 of this chapter, as modified by the definition of "*annual income*" in this section.

Gross rent is defined in part 813 of this chapter.

Group home means a single family residential structure designed or adapted for occupancy by nonelderly handicapped individuals.

Housing for handicapped families means housing and related facilities occupied by handicapped families that are primarily nonelderly handicapped families.

Independent living complex means a project designed for occupancy by nonelderly handicapped families in separate dwelling units where each dwelling unit includes a kitchen and a bath.

Operating costs means expenses related to the provision of housing and excludes expenses related to administering, or managing the provision of, supportive services. Operating costs include:

(1) Administrative expenses, including salary and management expenses related to the provision of shelter;

(2) Maintenance expenses, including routine and minor repairs and groundskeeping;

(3) Security expenses;

(4) Utilities expenses, including gas, oil, electricity, water, sewer, trash removal, and extermination services. Operating costs exclude telephone services for families;

(5) Taxes and insurance; and

(6) Allowances for reserves.

PAC (project assistance contract) means the contract entered into by the Borrowor and HUD setting forth the rights and duties of the parties with respect to the project and the payments under the PAC.

Project account means a specifically identified and segregated account for each project which is established in accordance with § 891.715(b) out of the amounts by which the maximum annual commitment exceeds the amount actually paid out under the PAC each year.

Project assistance payment means the payment made by HUD to the Borrower for assisted units as provided in the PAC. The payment is the difference between the contract rent and the tenant rent. An additional payment is made to a family occupying an assisted unit in an independent living complex when the utility allowance is greater than the total tenant payment. A project assistance payment, known as a "vacancy payment," may be made to the Borrower when an assisted unit (or residential space in a group home) is vacant, in accordance with the terms of the PAC.

Rent is defined in § 891.505.

Tenant rent means the monthly amount defined in, and determined in accordance with part 813 of this chapter.

Total tenant payment means the monthly amount defined in, and determined in accordance with part 813 of this chapter.

Utility allowance is defined in part 813 of this chapter and is determined or approved by HUD.

Utility reimbursement is defined in part 813 of this chapter.

Vacancy payment means the project assistance payment made to the Borrower by HUD for a vacant assisted unit (or residential space in a group home) if certain conditions are fulfilled, as provided in the PAC. The amount of the vacancy payment varies with the length of the vacancy period and is less after the first 60 days of any vacancy.

§ 891.660 Project standards.

(a) *Property standards.* The property standards for 202/162 projects are provided in § 891.120(a).

(b) *Minimum group home standards.* The minimum group home standards for 202/162 projects are provided in § 891.310(a).

(c) *Accessibility requirements.* The accessibility requirements for 202/162 projects are provided in §§ 891.120(b) and 891.310(b).

(d) *Smoke detectors.* The requirements for smoke detectors for 202/162 projects are provided in § 891.120(d).

§ 891.665 Project size limitations.

(a) *Maximum project size.* Projects funded under §§ 891.655 through 891.790 are subject to the following project size limitations:

(1) Group homes may not be designed to serve more than 15 persons on one site;

(2) Independent living complexes for chronically mentally ill individuals may not be designed to serve more than 20 persons on one site; and

(3) Independent living complexes for handicapped families in the developmental disability or physically handicapped occupancy categories may not have more than 24 units nor more than 24 households on one site. For the purposes of this section, "*household*" has the same meaning as "*handicapped family,*" except that unrelated handicapped individuals sharing a unit (other than a handicapped person living with another person who is essential to the handicapped person's well-being) are counted as separate households. For independent living complexes for handicapped families in the developmental disability or physically handicapped occupancy categories, units with three or more bedrooms may only be developed to serve handicapped families of one or two parents with children.

(b) *Additional limitations.* Based on the amount of loan authority appropriated for a fiscal year, HUD may have imposed additional limitations on the number of units or residents that may be proposed under an application for Section 202 loan fund reservation, as published in the annual notice of funding availability or the invitation for Section 202 fund reservation.

(c) *Exemptions.* On a case-by-case basis, HUD may approve independent living complexes that do not comply with the project size limitations prescribed in paragraphs (a)(2), (a)(3), or (b) of this section. HUD may approve such projects if the Sponsor demonstrates:

(1) The increased number of units is necessary for the economic feasibility of the project;

(2) A project of the size proposed is compatible with other residential development and the population density of the area in which the project is to be located;

(3) A project of the size proposed can be successfully integrated into the community; and

(4) A project of the size proposed is marketable in the community.

§ 891.670 Cost containment and modest design standards.

(a) *Restrictions on amenities.* Projects must be modest in design. Except as provided in paragraph (d) of this section, amenities must be limited to those amenities, as determined by HUD, that are generally provided in unassisted decent, safe, and sanitary housing for low-income families in the market area. Amenities not eligible for HUD funding include balconies, atriums, decks, bowling alleys, swimming pools, saunas, and jacuzzis. Dishwashers, trash compactors, and washers and dryers in individual units will not be funded in independent living complexes. The use of durable materials to control or reduce maintenance, repair, and replacement costs is not an excess amenity.

(b) *Unit sizes.* For independent living complexes, HUD will establish limitations on the size of units and number of bathrooms, based on the number of bedrooms that are in the unit.

(c) *Special spaces and accommodations.* (1) The costs of construction of special spaces and accommodations may not exceed 10 percent of the total cost of construction, except as provided in paragraph (d) of this section. Special spaces and accommodations include multipurpose rooms, game rooms, libraries, lounges, and, in independent living complexes, central kitchens and dining rooms.

(2) Special spaces and accommodations exclude offices, halls, mechanical rooms, laundry rooms, and parking areas; dwelling units and lobbies in independent living complexes; and bedrooms, living rooms, dining and kitchen areas, shared bathrooms, and resident staff dwelling units in group homes.

(d) *Exceptions.* HUD may approve a project that does not comply with the cost containment and modest design standards of paragraphs (a) through (c) of this section if:

(1) The Sponsor demonstrates a willingness and ability to contribute the incremental development cost and continuing operating costs associated with the additional amenities or design features; or

(2) The proposed project involves substantial rehabilitation or acquisition with or without moderate rehabilitation, the additional amenities or design features were incorporated into the existing structure before the submission of the application, and the total development cost of the project with the additional amenities or design features does not exceed the cost limits.

§ 891.675 Prohibited facilities.

The requirements for prohibited facilities for 202/162 projects are provided in § 891.315, except that Section 202/162 projects may not include commercial spaces.

§ 891.680 Site and neighborhood standards.

The general requirements for site and neighborhood standards for 202/162 projects are provided in §§ 891.125 and 891.320. In addition to the requirements in §§ 891.125 and 891.320, the following requirements apply to 202/162 projects:

(a) The site must promote greater choice of housing opportunities and avoid undue concentration of assisted persons in areas containing a high proportion of low-income persons.

(b) Projects must be located in neighborhoods where other family housing is located. Except as provided below, projects may not be located adjacent to the following facilities, or in areas where such facilities are concentrated: schools or day care centers for handicapped persons, workshops, medical facilities, or other housing primarily serving handicapped persons. Projects may be located adjacent to other housing primarily serving handicapped persons if the projects together do not exceed the project size limitations under § 891.665(a).

§ 891.685 Prohibited relationships.

The requirements for prohibited relationships for 202/162 projects are provided in § 891.130.

§ 891.690 Other Federal requirements.

In addition to the Federal requirements set forth in 24 CFR part 5, other Federal requirements for the 202/162 projects are provided in §§ 891.155 and 891.325.

§ 891.695 Operating cost standards.

The requirements for the operating cost standards are provided in § 891.150.

§ 891.700 Prepayment of loans.

(a) *Prepayment prohibition.* The prepayment (whether in whole or in part) or the assignment or transfer of physical and financial assets of any Section 202 project is prohibited, unless the Assistant Secretary gives prior written approval.

(b) *HUD-approved prepayment.* Approval for prepayment or transfer will not be granted unless HUD determines that the prepayment or transfer of the loan is a part of a transaction that will ensure the continued operation of the project until the original maturity date of the loan in a manner that will provide rental housing for the handicapped families on terms at least as advantageous to existing and future tenants as the terms required by the original Section 202 loan agreement and any other loan agreements entered into under other provisions of law.

§ 891.705 Project assistance contract.

(a) *Project assistance contract (PAC).* The PAC sets forth rights and duties of the Borrower and HUD with respect to the project and the project assistance payments.

(b) *PAC execution.* (1) Upon satisfactory completion of the project, the Borrower and HUD shall execute the PAC on the form prescribed by HUD.

(2) The effective date of the PAC may be earlier than the date of execution, but no earlier than the date of HUD's issuance of the permission to occupy.

(3) If the project is completed in stages, the procedures of paragraph (b) of this section shall apply to each stage.

(c) *Project assistance payments to owners under the PAC.* The project assistance payments made under the PAC are:

(1) Payments to the Borrower to assist eligible families leasing assisted units. The amount of the project assistance payment made to the Borrower for an assisted unit (or residential space in a group home) that is leased to an eligible family is equal to the difference between the contract rent for the unit (or pro rata share of the contract rent in a group home) and the tenant rent payable by the family.

(2) Payments to the Borrower for vacant assisted units ("vacancy payments"). The amount of and conditions for vacancy payments are described in § 891.790. HUD makes the project assistance payments monthly upon proper requisition by the Borrower, except payments for vacancies of more than 60 days, which HUD makes semiannually upon requisition by the Borrower.

(d) *Payment of utility reimbursement.* If applicable, a utility reimbursement will be paid to a family occupying an assisted unit in an independent living complex as an additional project assistance payment. The PAC will provide that the Borrower will make this payment on behalf of HUD. Funds will be paid to the Borrower in trust solely for the purpose of making the additional payment. The Borrower may pay the utility reimbursement jointly to the family and the utility company, or, if the family and utility company consent, directly to the utility company.

§ 891.710 Term of PAC.

The term of the PAC shall be 20 years. If the project is completed in stages, the term of the PAC for each stage shall be 20 years. The term of the PAC for stages of a project shall not exceed 22 years.

§ 891.715 Maximum annual commitment and project account.

(a) *Maximum annual commitment.* The maximum annual amount that may be committed under the PAC is the total of the initial contract rents and utility allowances for all assisted units in the project.

(b) *Project account.* (1) HUD will establish and maintain a specifically identified and segregated project account for each project. The project account will be established out of the amounts by which the maximum annual commitment exceeds the amount actually paid out under the PAC each year. HUD will make payments from this account for project assistance payments as needed to cover increases in contract rents or decreases in tenant income and other payments for costs specifically approved by the Secretary.

(2) If the HUD-approved estimate of required annual payments under the PAC for a fiscal year exceeds the maximum annual commitment for that fiscal year plus the current balance in the project account, HUD will, within a reasonable time, take such steps authorized by section 202(h)(4)(A) of the Housing Act of 1959, as may be necessary, to assure that payments under the PAC will be adequate to cover increases in contract rents and decreases in tenant income.

§ 891.720 Leasing to eligible families.

(a) *Availability of assisted units for occupancy by eligible families.* During the term of the PAC, a Borrower shall make all units (or residential spaces in a group home) available for eligible families. For purposes of this section, making units or residential spaces available for occupancy by eligible families means that the Borrower:

(1) Is conducting marketing in accordance with § 891.740(a);

(2) Has leased or is making good faith efforts to lease the units or residential spaces to eligible and otherwise acceptable families, including taking all feasible actions to fill vacancies by renting to such families; and (3) Has not rejected any such applicant family except for reasons acceptable to HUD. If the Borrower is temporarily unable to lease all units or residential spaces to eligible families, one or more units or residential spaces may, with the prior approval of HUD, be leased to otherwise eligible families that do not meet the income requirements of part 813 of this chapter, as modified by § 891.505. Failure on the part of the Borrower to comply with these requirements is a violation of the PAC and grounds for all available legal remedies, including an action for specific performance of the PAC, suspension or debarment from HUD programs, and reduction of the number of units (or in the case of group homes, reduction of the number of residential spaces) under the PAC as set forth in paragraph (b) of this section.

(b) *Reduction of number of units covered by the PAC.* HUD may reduce the number of units (or in the case of group homes, the number of residential spaces) covered by the PAC to the number of units or residential spaces available for occupancy by eligible families if:

(1) The Borrower fails to comply with the requirements of paragraph (a) of this section; or

(2) Notwithstanding any prior approval by HUD, HUD determines that the inability to lease units or residential spaces to eligible families is not a temporary problem.

(c) *Restoration.* HUD will agree to an amendment of the PAC to provide for subsequent restoration of any reduction made under paragraph (b) of this section if:

(1) HUD determines that the restoration is justified by demand;

(2) The Borrower otherwise has a record of compliance with the Borrower's obligations under the PAC; and

(3) Contract and budget authority is available.

(d) *Occupancy by families that are not handicapped.* HUD may relieve the Borrower of the requirement that all units in the project (or residential spaces in a group home) must be leased to handicapped families if:

(1) The Borrower has made reasonable efforts to lease to eligible families;

(2) The Borrower has been granted HUD approval under paragraph (a) of this section; and

(3) The Borrower is temporarily unable to achieve or maintain a level of occupancy sufficient to prevent financial default and foreclosure under the Section 202 loan documents. HUD approval under this paragraph will be of limited duration. HUD may impose terms and conditions to this approval that are consistent with program objectives and necessary to protect its interest in the Section 202 loan.

§ 891.725 PAC administration.

HUD is responsible for the administration of the PAC.

§ 891.730 Default by Borrower.

(a) *PAC provisions.* The PAC will provide:

(1) That if HUD determines that the Borrower is in default under the PAC, HUD will notify the Borrower of the actions required to be taken to cure the default and of the remedies to be applied by HUD, including an action for specific performance under the PAC, reduction or suspension of project assistance payment and recovery of overpayments, as appropriate; and

(2) That if the Borrower fails to cure the default, HUD has the right to terminate the PAC or to take other corrective action.

(b) *Loan provisions.* Additional provisions governing default under the Section 202 loan are included in the regulatory agreement and other loan documents.

§ 891.735 Notice upon PAC expiration.

The PAC will provide that the Borrower will, at least 90 days before the end of the PAC contract term, notify each family occupying an assisted unit (or residential space in a group home) of any increase in the amount the family will be required to pay as rent as a result of the expiration. The notice of expiration will contain such information and will be served in such manner as HUD may prescribe.

§ 891.740 Responsibilities of Borrower.

(a) *Marketing.* (1) The Borrower must commence and continue diligent marketing activities not later than 90 days before the anticipated date of availability for occupancy of the group home or the anticipated date of availability of the first unit in an independent living complex. Market activities shall include the provision of notices of the availability of housing under the program to operators of temporary housing for the homeless in the same housing market.

(2) Marketing must be done in accordance with the HUD-approved affirmative fair housing marketing plan and all fair housing and equal opportunity requirements. The purpose of the plan and requirements is to achieve a condition in which eligible families of similar income levels in the same housing market have a like range of housing choices available to them regardless of their race, color, creed, religion, sex, or national origin.

(3) At the time of PAC execution, the Borrower must submit to HUD a list of leased and unleased assisted units (or in the case of a group home, leased and unleased residential spaces) with a justification for the unleased units or residential spaces, in order to qualify for vacancy payments for the unleased units or residential spaces.

(b) *Management and maintenance.* The responsibilities of the Borrower with regard to management and maintenance are provided in § 891.600(b).

(c) *Contracting for services.* The responsibilities of the Borrower with regard to contracting for services are provided in § 891.600(c).

(d) *Submission of financial and operating statements.* The responsibilities of the Borrower with regard to the submission of financial and operating statements are provided in § 891.600(d).

(e) *Use of project funds.* The responsibilities of the Borrower with regard to the use of project funds are provided in § 891.600(e).

(f) *Reports.* The responsibilities of the Borrower with regard to reports are provided in § 891.600(f).

§ 891.745 Replacement reserve.

The general requirements for the replacement reserve are provided in § 891.605. For projects funded under §§ 891.655 through 891.790, the amount of the deposits for the initial year of operation shall be an amount equal to 0.6 percent of the cost of the total structures (for new construction projects), 0.4 percent of the cost of the initial mortgage amount (for all other projects), or such higher rate as required by HUD. For the purposes of this section, total structures include main buildings, accessory buildings, garages, and other buildings. The amount of the deposits will be adjusted each year by the amount of the annual adjustment factor as described in part 888 of this chapter.

§ 891.750 Selection and admission of tenants.

(a) *Application for admission.* The Borrower must accept applications for admission to the project in the form prescribed by HUD. Applicant families applying for assisted units (or residential spaces in a group home) must complete a certification of eligibility as part of the application for admission. Applicant families must meet the disclosure and verification requirements for Social Security Numbers, and sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B. Both the Borrower and the applicant family must complete and sign the application for admission. On request, the Borrower must furnish copies of all applications for admission to HUD.

(b) *Determination of eligibility and selection of tenants.* The Borrower is responsible for determining whether applicants are eligible for admission and for the selection of families. To be eligible for admission, an applicant family must be a handicapped family (as defined in § 891.505); meet any project occupancy requirements approved by HUD; meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, subpart B; and be a low-income family, as defined in § 813.102 of this chapter (as modified by § 891.505). Under certain circumstances, HUD may permit the leasing of units (or residential space in a group home) to ineligible families under § 891.720.

(1) *Local residency requirements are prohibited.* Local residency preferences may be applied in selecting tenants only to the extent that they are not inconsistent with affirmative fair housing marketing objectives and the Borrower's HUD-approved affirmative fair housing marketing plan. Preferences may not be based on the length of time the applicant has resided in the jurisdiction. With respect to any residency preference, persons expected to reside in the community as a result of current or planned employment will be treated as residents.

(2) If the Borrower determines that the family is eligible and is otherwise acceptable and units (or residential spaces in a group home) are available, the Borrower will assign the family a unit or residential space in a group home. If the family will occupy an assisted unit the Borrower will assign the family a unit of the appropriate size in accordance with HUD standards. If no suitable unit (or residential space in a group home) is available, the Borrower will place the family on a waiting list for the project and notify the family when a suitable unit or residential space may become available. If the waiting list is so long that the applicant would not be likely to be admitted within the next 12 months, the Borrower may advise the applicant that no additional applications for admission are being considered for that reason.

(3) If the Borrower determines that an applicant is ineligible for admission or the Borrower is not selecting the applicant for other reasons, the Borrower will promptly notify the applicant in writing of the determination, the reasons for the determination, and that the applicant has a right to request a meeting to review the rejection, in accordance with HUD requirements. The review, if requested, may not be conducted by the member of the Borrower's staff who made the initial decision to reject the applicant. The applicant may also exercise other rights if the applicant believes the applicant is being discriminated against on the basis of race, color, creed, religion, sex, handicap, or national origin.

(4) Records on applicants and approved eligible families, which provide racial, ethnic, gender and place of previous residency data required by HUD, must be maintained and retained for three years.

(c) *Reexamination of family income and composition* (1) *Regular reexaminations.* If the family occupies an assisted unit (or residential space in a group home), the Borrower must reexamine the income and composition

of the family at least every 12 months. Upon verification of the information, the Borrower shall make appropriate adjustments in the total tenant payment in accordance with part 813 of this chapter, as modified by § 891.505, and determine whether the family's unit size is still appropriate. The Borrower must adjust tenant rent and the project assistance payment and must carry out any unit transfer in accordance with HUD standards. At the time of the annual reexamination of family income and composition, the Borrower must require the family to meet the disclosure and verification requirements for Social Security Numbers, as provided by 24 CFR part 5, subpart B.

(2) *Interim reexamination.* If the family occupies an assisted unit (or residential space in a group home) the family must comply with provisions in the lease regarding interim reporting of changes in income. If the Borrower receives information concerning a change in the family's income or other circumstances between regularly scheduled reexaminations, the Borrower must consult with the family and make any adjustments determined to be appropriate. Any change in the family's income or other circumstances that results in an adjustment in the total tenant payment, tenant rent, and project assistance payment must be verified.

(3) *Continuation of project assistance payment.* (i) A family occupying an assisted unit (or residential space in a group home) shall remain eligible for project assistance payment until the total tenant payment equals or exceeds the gross rent (or a pro rata share of the gross rent in a group home). The termination of subsidy eligibility will not affect the family's other rights under its lease. Project assistance payment may be resumed if, as a result of changes in income, rent, or other relevant circumstances during the term of the PAC, the family meets the income eligibility requirements of part 813 of this chapter (as modified in § 891.505) and project assistance is available for the unit or residential space under the terms of the PAC. The family will not be required to establish its eligibility for admission to the project under the remaining requirements of paragraph (b) of this section.

(ii) A family's eligibility for project assistance payment may also be terminated in accordance with HUD requirements for such reasons as failure to submit requested verification information, including failure to meet the disclosure and verification requirements for Social Security Numbers, or failure to sign and submit consent forms for the obtaining of wage and claim information from State Wage Information Collection Agencies, as provided by 24 CFR part 5, subpart B.

(Approved by the Office of Management and Budget under control number 2502–0204 and 2505–0267.)

§ 891.755 Obligations of the family.

The obligations of the family are provided in § 891.415.

§ 891.760 Overcrowded and underoccupied units.

The requirements for overcrowded and underoccupied units are provided in § 891.620.

§ 891.765 Lease requirements.

The lease requirements are provided in § 891.425.

§ 891.770 Termination of tenancy and modification of lease.

The provisions of part 247 of this title apply to all decisions by a Borrower to terminate the tenancy or modify the lease of a family residing in a unit (or residential space in a group home).

§ 891.775 Security deposits.

The general requirements for security deposits on assisted units are provided in § 891.435. For purposes of subpart E of this part, the additional requirements in § 891.635 apply.

§ 891.780 Adjustment of rents.

(a) *Contract rents.* HUD will calculate contract rent adjustments based on the sum of the project's operating costs and debt service (as calculated by HUD), with adjustments for vacancies, the project's nonrental income, and other factors that HUD deems appropriate. The calculation will be made on the basis of information provided by the Borrower on a form prescribed by HUD.

(b) *Rent for unassisted units.* The rent payable by families occupying units or residential spaces that are not assisted under the PAC shall be equal to the contract rent computed under paragraph (a) of this section.

§ 891.785 Adjustment of utility allowances.

In connection with adjustments of contract rents as provided in § 891.780(a), the requirements for the adjustment of utility allowances provided in § 891.440 apply.

§ 891.790 Conditions for receipt of vacancy payments for assisted units.

(a) *General.* Vacancy payments under the PAC will not be made unless the conditions for receipt of these project assistance payments set forth in this section are fulfilled.

(b) *Vacancies during rent-up.* For each unit (or residential space in a group home) that is not leased as of the effective date of the PAC, the Borrower is entitled to vacancy payments in the amount of 80 percent of the contract rent (or pro rata share of the contract rent for a group home) for the first 60 days of vacancy, if the Borrower:

(1) Complied with § 891.740;

(2) Has taken and continues to take all feasible actions to fill the vacancy; and

(3) Has not rejected any eligible applicant except for good cause acceptable to HUD.

(c) *Vacancies after rent-up.* If an eligible family vacates an assisted unit (or residential space in a group home) the Borrower is entitled to vacancy payments in the amount of 80 percent of the contract rent (or pro rata share of the contract rent in a group home) for the first 60 days of vacancy if the Borrower:

(1) Certifies that it did not cause the vacancy by violating the lease, the PAC, or any applicable law;

(2) Notified HUD of the vacancy or prospective vacancy and the reasons for the vacancy immediately upon learning of the vacancy or prospective vacancy;

(3) Has fulfilled and continues to fulfill the requirements specified in § 891.740(a)(2) and (3), and in paragraphs (b)(2) and (3) of this section; and

(4) For any vacancy resulting from the Borrower's eviction of an eligible family, certifies that it has complied with § 891.770.

(d) *Vacancies for longer than 60 days.* If an assisted unit (or residential space in a group home) continues to be vacant after the 60-day period specified in paragraph (b) or (c) of this section, HUD may approve additional vacancy payments for 60-day periods up to a total of 12 months in an amount equal to the principal and interest payments required to amortize that portion of the debt service attributable to the vacant unit (or, in the case of group homes, the residential space). Such payments may be approved if:

(1) The unit was in decent, safe, and sanitary condition during the vacancy period for which payment is claimed;

(2) The Borrower has fulfilled and continues to fulfill the requirements specified in paragraph (b) or (c) of this section, as appropriate; and

(3) The Borrower has demonstrated to the satisfaction of HUD that:

(i) For the period of vacancy, the project is not providing the Borrower with revenues at least equal to project expenses (exclusive of depreciation) and the amount of payments requested is not more than the portion of the deficiency attributable to the vacant unit (or residential space in a group home); and

(ii) The project can achieve financial soundness within a reasonable time.

(e) *Prohibition of double compensation for vacancies.* If the Borrower collects payments for vacancies from other sources (tenant rent, security deposits, payments under § 891.435(c), or governmental payments under other programs), the Borrower shall not be entitled to collect vacancy payments to the extent these collections from other sources plus the vacancy payment exceed contract rent.

Dated: March 7, 1996.

Nicolas P. Retsinas,

Assistant Secretary for Housing Federal Housing Commissioner.

50 CFR Part 20

Migratory Bird Hunting; Proposed 1996–1997 Migratory Game Bird Hunting Regulations (Preliminary) With Requests for Indian Tribal Proposals; Proposed Rule

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

RIN 1018-AD89

Migratory Bird Hunting; Proposed 1996–1997 Migratory Game Bird Hunting Regulations (Preliminary) With Requests for Indian Tribal Proposals

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rulemaking.

SUMMARY: The U.S. Fish and Wildlife Service (hereinafter the Service) proposes to establish annual hunting regulations for certain migratory game birds. The Service also requests proposals from Indian tribes that wish to establish special migratory bird hunting regulations. These regulations will permit the taking of the designated species during the 1996–97 season. The Service annually prescribes outside limits (frameworks) within which States may select hunting seasons. The Service has also employed guidelines to establish special migratory bird hunting regulations on Federal Indian reservations and ceded lands. These seasons provide hunting opportunities for recreation and sustenance; aid Federal, State, and tribal governments in the management of migratory game birds; and are designed to permit harvests at levels compatible with migratory bird population status and habitat conditions.

DATES: Tribal proposals and related comments should be submitted by June 3, 1996. The comment period for proposed early-season frameworks will end on July 25, 1996; and for proposed late-season frameworks on September 3, 1996. The public hearing for early-season frameworks will be held on June 27, 1996, at 9 a.m. The public hearing for late-season frameworks will be held on August 2, 1996, at 9 a.m.

ADDRESSES: Both public hearings will be held in the Auditorium, Department of the Interior Building, 1849 C Street NW., Washington, DC. Written comments on the proposals and notice of intention to testify at either hearing may be mailed to the Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, ms 634—ARLSQ, 1849 C Street, NW., Washington, DC 20240. Comments received will be available for public inspection during normal business hours in room 634, Arlington Square Building, 4401 N. Fairfax Drive, Arlington, Virginia.

FOR FURTHER INFORMATION CONTACT: For further information contact Ron W. Kokel at: Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, ms 634—ARLSQ, 1849 C Street, NW., Washington, DC 20240 (703) 358–1714.

SUPPLEMENTARY INFORMATION: For administrative purposes, this document consolidates the notice of intent and request for tribal proposals with the preliminary proposals for the annual regulations-development process. The remaining proposed and final rulemaking documents will be published separately. For inquiries on tribal guidelines and proposals, please contact the following personnel.

—Region 1 - Brad Bortner, U.S. Fish and Wildlife Service, 911 N.E. 11th Avenue, Portland, Oregon 97232–4181; (503) 231–6164.

—Region 2 - Jeff Haskins, U.S. Fish and Wildlife Service, P.O. Box 1306, Albuquerque, New Mexico 87103; (505) 248–7885.

—Region 3 - Steve Wilds, U.S. Fish and Wildlife Service, Federal Building, One Federal Drive, Fort Snelling, Minnesota 55111–4056; (612) 725–3313.

Notice of Intent to Establish Open Seasons

This notice announces the intention of the Director, U.S. Fish and Wildlife Service, to establish open hunting seasons and daily bag and possession limits for certain designated groups or species of migratory game birds for 1996–1997 in the contiguous United States, Alaska, Hawaii, Puerto Rico, and the Virgin Islands, under §§ 20.101 through 20.107, 20.109, and 20.110 of subpart K of 50 CFR part 20.

"Migratory game birds" are those bird species so designated in conventions between the United States and several foreign nations for the protection and management of these birds. All other birds designated as migratory (under 10.13 of Subpart B of 50 CFR Part 10) in the aforementioned conventions may not be hunted. For the 1996–97 hunting season, regulations will be proposed for certain designated members of the avian families Anatidae (ducks, geese, and swans); Columbidae (doves and pigeons); Gruidae (cranes); Rallidae (rails, coots, moorhens, and gallinules); and Scolopacidae (woodcock and snipe). These proposals are described under Proposed 1996–97 Migratory Game Bird Hunting Regulations (Preliminary) in this document. Definitions of waterfowl flyways and mourning dove management units, as well as a description of the data used in and the factors affecting the regulatory process, were published in the March 14, 1990, **Federal Register** (55 FR 9618).

Regulatory Schedule for 1996–1997

This is the first in a series of proposed and final rulemaking documents for migratory game bird hunting regulations. Proposals relating to the harvest of migratory game birds that may be initiated after publication of this proposed rulemaking will be made available for public review in supplemental proposed rulemakings to be published in the **Federal Register**. Also, additional supplemental proposals will be published for public comment in the **Federal Register** as population, habitat, harvest, and other information become available.

Because of the late dates when certain portions of these data become available, it is anticipated that comment periods on some proposals will necessarily be abbreviated. Special circumstances that limit the amount of time which the Service can allow for public comment are involved in the establishment of these regulations. Specifically, two considerations compress the time in which the rulemaking process must operate: the need, on one hand, to establish final rules at a time early enough in the summer to allow resource agencies to select and publish season dates and bag limits prior to the hunting seasons and, on the other hand, the lack of current data on the status of most migratory game birds until later in the summer.

Because the process is strongly influenced by the times when information is available for consideration, the overall regulations process is divided into two segments. Early seasons are those seasons that generally open prior to October 1, and include seasons in Alaska, Hawaii, Puerto Rico, and the Virgin Islands. Late seasons are those seasons opening in the remainder of the United States about October 1 and later, and include most of the waterfowl seasons.

Major steps in the 1996–1997 regulatory cycle relating to public hearings and **Federal Register** notifications are illustrated in the accompanying diagram. Dates shown relative to publication of **Federal Register** documents are target dates.

Sections of this and subsequent documents which outline hunting frameworks and guidelines are organized under numbered headings. These headings are:

1. Ducks
2. Sea Ducks
3. Mergansers
4. Canada Geese
5. White-fronted Geese
6. Brant
7. Snow and Ross's (Light) Geese
8. Swans
9. Sandhill Cranes
10. Coots
11. Moorhens and Gallinules
12. Rails
13. Snipe
14. Woodcock
15. Band-tailed Pigeons
16. Mourning Doves
17. White-winged and White-tipped Doves
18. Alaska
19. Hawaii
20. Puerto Rico
21. Virgin Islands
22. Falconry
23. Other

Later sections of this and subsequent documents will refer only to numbered items requiring attention. Therefore, items requiring no attention will be omitted and the remaining numbered items will be discontinuous and appear incomplete.

Public Hearings

Two public hearings pertaining to 1996–1997 migratory game bird hunting regulations are scheduled. Both hearings will be conducted in accordance with 455 DM 1 of the Departmental Manual. On June 27, a public hearing will be held at 9 a.m. in the Auditorium of the Department of the Interior Building, 1849 C Street NW., Washington, DC. This hearing is for the purpose of reviewing the status of migratory shore and upland game birds. Proposed hunting regulations will be discussed for these species plus regulations for migratory game birds in Alaska, Hawaii, Puerto Rico, and the Virgin Islands; special September waterfowl seasons in designated States; special sea duck seasons in the Atlantic Flyway; and extended falconry seasons. On August 2, a public hearing will be held at 9 a.m. in the Auditorium of the Department of the Interior Building, address above. This hearing is for the purpose of reviewing the status and proposed regulations for waterfowl not previously discussed at the June 27 public hearing. The public is invited to participate in both hearings. Persons wishing to make a statement at these hearings should write to the address indicated under the caption **ADDRESSES**.

Requests for Tribal Proposals

Background

Beginning with the 1985-86 hunting season, the Service has employed guidelines described in the June 4, 1985, **Federal Register** (50 FR 23467) to establish special migratory bird hunting regulations on Federal Indian reservations (including off-reservation trust lands) and ceded lands. The guidelines were developed in response to tribal requests for Service recognition of their reserved hunting rights, and for some tribes, recognition of their authority to regulate hunting by both tribal and nontribal members throughout their reservations. The guidelines include possibilities for: (1) on-reservation hunting by both tribal and nontribal members, with hunting by nontribal members on some reservations to take place within Federal frameworks, but on dates different from those selected by the surrounding State(s); (2) on-reservation hunting by tribal members only, outside of usual Federal frameworks for season dates and length, and for daily bag and possession limits; and (3) off-reservation hunting by tribal members on ceded lands, outside of usual framework dates and season length, with some added flexibility in daily bag and possession limits. In all cases, the regulations established under the guidelines would have to be consistent with the annual March 10 to September 1 closed season mandated by the 1916 Convention Between the United States and Great Britain (for Canada) for the Protection of Migratory Birds (Convention). The guidelines are capable of application to those tribes that have reserved hunting rights on Federal Indian reservations (including off-reservation trust lands) and ceded lands. They also apply to the establishment of migratory bird hunting regulations for nontribal members on all lands within the exterior boundaries of reservations where tribes have full wildlife management authority over such hunting, or where the tribes and affected States otherwise have reached agreement over hunting by nontribal members on non-Indian lands.

Tribes usually have the authority to regulate migratory bird hunting by nonmembers on Indian-owned reservation lands, subject to Service approval. The question of jurisdiction is more complex on reservations that include lands owned by non-Indians, especially when the surrounding States have established or intend to establish regulations governing hunting by non-Indians on these lands. In such cases, the Service encourages the tribes and States to reach agreement on regulations that would apply throughout the reservations. When appropriate, the Service will consult with a tribe and State with the aim of facilitating an accord. The Service also will consult jointly with tribal and State officials in the affected States where tribes may wish to establish special hunting regulations for tribal members on ceded lands. As explained in previous rulemaking documents, it is incumbent upon the tribe and/or the State to put forward a request for consultation as a result of the proposal being published in the **Federal Register**. The Service will not presume to make a determination, without being advised by a tribe or a State, that any issue is/is not worthy of formal consultation.

One of the guidelines provides for the continuation of harvest of migratory game birds by tribal members on reservations where it is a customary practice. The Service does not oppose this harvest, provided it does not take place during the closed season required by the Convention, and it is not so large as to adversely affect the status of the migratory bird resource. For several years, the Service has reached annual agreement with tribes (for example, in Minnesota, the Mille Lacs Band of Chippewa Indians) for hunting by tribal members on their lands or on lands where they have reserved hunting rights. The Service will continue to consult with tribes that wish to reach a mutual agreement on hunting regulations for on-reservation hunting by tribal members.

The guidelines should not be viewed as inflexible. Nevertheless, the Service believes that they provide appropriate opportunity to accommodate the reserved hunting rights and management authority of Indian tribes while ensuring that the migratory bird resource receives necessary protection. The conservation of this important international resource is paramount. Use of the guidelines is not required if a tribe wishes to observe the hunting regulations established by the State(s) in which the reservation is located.

Details Needed in Tribal Proposals

Tribes that wish to use the guidelines to establish special hunting regulations for the 1996-97 hunting season must submit a proposal that includes: (1) the requested hunting season dates and other details regarding regulations to be observed; (2) harvest anticipated under

the requested regulations; (3) methods that will be employed to measure or monitor harvest (mail-questionnaire survey, bag checks, etc.); (4) steps that will be taken to limit level of harvest, where it could be shown that failure to limit such harvest would seriously impact the migratory bird resource; and (5) tribal capabilities to establish and enforce migratory bird hunting regulations.

A tribe that desires the earliest possible opening of the waterfowl season should specify this in the proposal, rather than request a date that might not be within the final Federal frameworks. Similarly, unless a tribe wishes to set more restrictive regulations than Federal regulations will permit, the proposal should request the same daily bag and possession limits and season length for ducks and geese that Federal regulations are likely to permit the States in the Flyway in which the reservation is located.

Tribal Proposal Procedures

Pertinent details in proposals received from tribes will be published for public review in later **Federal Register** documents. Because of the time required for Service and public review, Indian tribes that desire special migratory bird hunting regulations for the 1996–97 hunting season should submit their proposals as soon as possible, but no later than June 3, 1996. Tribal inquiries regarding the guidelines and proposals should be directed to the appropriate Service Regional Office listed under the caption **SUPPLEMENTARY INFORMATION**. Tribes that request special hunting regulations for tribal members on ceded lands should send a courtesy copy of the proposal to officials in the affected State(s).

Public Comments Solicited

The policy of the Department of the Interior is, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons are invited to submit written comments, suggestions, or recommendations regarding the proposed regulations. Promulgation of final migratory game bird hunting regulations will take into consideration all comments received by the Service. Such comments, and any additional information received, may lead to final regulations that differ from these proposals. Interested persons are invited to participate in this rulemaking by submitting written comments to the address indicated under the caption **ADDRESSES**.

Comments received on the proposed annual regulations will be available for public inspection during normal business hours at the Service's office in room 634, 4401 North Fairfax Drive, Arlington, Virginia. Specific comment periods will be established for each series of proposed rulemakings. All relevant comments will be accepted through the closing date of the comment period on the particular proposal under consideration. The Service will consider, but possibly may not respond in detail to, each comment. As in the past, the Service will summarize all comments received during the comment period and respond to them after the closing date.

Flyway Council Meetings

Departmental representatives will be present at the following winter meetings of the various Flyway Councils:

DATE: March 23, 1996

—National Waterfowl Council, 3:30 p.m.

DATE: March 24, 1996

—Atlantic Flyway Council, 8:00 a.m.

—Mississippi Flyway Council, 8:30 a.m.

—Central Flyway Council, 8:00 a.m.

—Pacific Flyway Council, 1:00 p.m.

The Council meetings will be held at the Adams Mark Hotel, Tulsa, Oklahoma.

NEPA Consideration

NEPA considerations are covered by the programmatic document, "Final Supplemental Environmental Impact Statement: Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FSES 88-14)," filed with the Environmental Protection Agency on June 9, 1988. Notice of Availability was published in the **Federal Register** on June 16, 1988 (53 FR 22582). The Service's Record of Decision was published on August 18, 1988 (53 FR 31341).

In addition, an August 1985 environmental assessment entitled "Guidelines for Migratory Bird Hunting Regulations on Federal Indian Reservations and Ceded Lands" is available from the Service at the address indicated under the caption **ADDRESSES**.

Endangered Species Act Consideration

Prior to issuance of the 1996–97 migratory game bird hunting regulations, consideration will be given to provisions of the Endangered Species Act of 1973, as amended, (16 U.S.C. 1531-1543; hereinafter the Act) to ensure that hunting is not likely to jeopardize the continued existence of any species designated as endangered or threatened or modify or destroy its critical habitat and is consistent with conservation programs for those species. Consultations under Section 7 of this Act may cause changes to be made to proposals in this and future supplemental proposed rulemaking documents.

Regulatory Flexibility Act and the Paperwork Reduction Act

This document has been reviewed by the Office of Management and Budget under Executive Order 12866.

These regulations have a significant economic impact on substantial numbers of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). The economic impacts of the annual hunting regulations on small business entities were analyzed in detail and a Small Entity Flexibility Analysis (Analysis) was issued by the Service in 1995. The Analysis documented the significant beneficial economic effect on a substantial number of small entities. The primary source of information about hunter expenditures for migratory game bird hunting is the National Hunting and Fishing Survey, which is conducted at 5-year intervals. The Analysis utilized the 1991 National Hunting and Fishing Survey and the U.S. Department of Commerce's County Business Patterns from which it was estimated that migratory bird hunters would spend between $258 and $586 million at small businesses in 1995.

Copies of the Analysis are available upon request from the Office of Migratory Bird Management. The address is indicated under the caption **ADDRESSES**.

These regulations have been examined under the Paperwork Reduction Act of 1995 and have been found to contain no information collection requirements.

Authorship

The primary author of this proposed rule is Ron W. Kokel, Office of Migratory Bird Management, (703) 358–1714.

List of Subjects in 50 CFR Part 20

Exports, Hunting, Imports, Reporting and recordkeeping requirements, Transportation, Wildlife.

The rules that eventually will be promulgated for the 1996-97 hunting season are authorized under 16 U.S.C. 703–711, 16 U.S.C. 712, and 16 U.S.C. 742 a-j.

Dated: May 13, 1996

George T. Frampton, Jr.

Assistant Secretary for Fish and Wildlife and Parks

Proposed 1996–1997 Migratory Game Bird Hunting Regulations (Preliminary)

Pending current information on populations, harvest, and habitat conditions, and receipt of recommendations from the four Flyway Councils; specific framework proposals (including opening and closing dates, seasons lengths, and bag limits) may be deferred. Unless otherwise specified, no change from the final 1995–96 frameworks of August 29 and September 27, 1995, (60 FR 45020 and 50042) is proposed. Specific preliminary proposals that vary from the 1995–96 frameworks and issues requiring early discussion, action, or the attention of the States or tribes are contained below:

1. Ducks

A. Harvest Strategy Considerations

In 1992, a technical working group comprised of representatives from the Service and the four Flyway Councils was established to develop recommendations for improving the regulation of duck harvests. In 1993, the group embraced the concept of Adaptive Harvest Management (AHM), which subsequently received strong support from a broad array of conservation interests. In general terms, AHM involves: (1) choices of harvest regulation based on resource status and expected harvest impacts; (2) follow-up monitoring and assessment of population dynamics; and (3) use of the monitoring and assessment information to improve future decision-making abilities. Benefits of AHM include: (1) maximum hunting opportunity consistent with long-term waterfowl conservation and North American Waterfowl Management Plan (NAWMP) goals; (2) less contentiousness in the annual regulation-setting process; (3) more objective, data-based decisions; and (4) more efficient use of data collected from large-scale monitoring programs. Perhaps the greatest benefit of AHM, however, is its potential to resolve questions about how much hunting opportunity can be provided while maintaining healthy waterfowl populations.

Implementation of AHM began in 1995 with a focus on mid-continent mallards. Based on favorable comments by the Flyway Councils, State wildlife agencies, non-governmental organizations, and the public, the Service is seeking to continue its application of AHM for regulating the harvest of ducks. The technical working group continues to play an important role in this effort by developing AHM procedures, stimulating dialogue among stakeholders, conducting technical assessments to inform decision makers, formulating information and education strategies, and recommending timetables for implementation. The working group's function is, however, strictly technical in nature.

Application of AHM continues to highlight many complex issues in duck harvest management. Issues identified as high priorities for further assessment include: (1) hunter dynamics and how regulations affect hunter activity and success; (2) factors affecting duck reproduction on a continental scale; (3) relative costs and benefits of species, population, and sex-specific harvest management; (4) allocation of harvest opportunities among countries, Flyways, and States; and (5) public information and education needs.

The technical working group has recognized that additional time will be necessary to address these issues in a more comprehensive and coherent manner. Schedules for clarifying issues, receiving input from stakeholders, and conducting the necessary assessments are currently being developed by the working group so that expectations for progress are realistic. Implementation of AHM will require periodic review of all technical specifications, including management objectives, hunting-season options, and theories (or models) of population dynamics.

Based on a review of public comments received about AHM in 1995, the technical working group has made the following recommendations for the 1996 regulatory process:

(1) Population goals of the NAWMP should continue to be recognized to reflect broad resource values; this should be accomplished by a proportional decrease in the value of harvest opportunity if the mallard population were expected to fall below the NAWMP goal of 8.1 million;

(2) Pending further review, use of the restrictive, moderate, and liberal regulatory options considered in 1995 should be continued; the only exception might be the addition of one bird to the daily bag limit under the liberal option for the Pacific Flyway;

(3) Pending further assessment, use of the mallard population models from 1995, which incorporate the competing hypotheses of additive and compensatory harvest mortality and strongly and weakly density-dependent reproduction should be continued;

(4) Pending development of AHM strategies for individual species and populations, existing technical and administrative procedures for regulating the harvests of stocks other than mallards should be used, with the recognition that: (a) potential regulatory changes should be considered early in the annual process; and (b) proposals should include potential effects of various regulatory options and criteria for future regulatory changes;

(5) Outreach efforts should be continued.

One of the distinguishing features of AHM is a formal recognition that technical experts have legitimate disagreements about the particular population model that should be used to guide harvest management. Perhaps the greatest strength of AHM is its method for determining which model best describes the impacts of harvest and habitat conditions on mallard abundance. Once a regulatory decision is made, each model predicts whether population size will go up or down, and by how much. Then, after data from the spring population survey are available, AHM allows managers to see how well each model predicted the change in population size that actually occurred. In subsequent years, those models that prove to be good predictors will have greater influence on regulatory decisions.

Survey data providing current population and habitat status, and for evaluating performance of last year's mallard models, should be available in June 1996. Specific regulatory alternatives for the 1996 duck hunting season will be considered at that time.

F. Zones and Splits

In 1990, the Service established guidelines for the use of zones and split seasons for duck hunting (**Federal Register** 55 FR 38901). These guidelines were based upon a cooperative review and evaluation of the historical use of zone/split options. The Service reiterated the 1977 criteria that the primary purpose of these options shall be to provide more equitable distribution of harvest opportunity for hunters throughout a State. In 1977, the Service also stated that these regulations should not substantially change the pattern of harvest distribution among States within a Flyway, nor should these options detrimentally change the harvest distribution pattern among species or populations at either the State or Flyway level. The 1990 review did not show that the proliferation of these options had increased harvest pressure; however, the ability to detect the impact of zones/split configurations was poor

because of poorly chosen response variables, the lack of statistical tests to differentiate between real and perceived changes, and the absence of adequate experimental controls. Therefore, the existing policy was intended to provide a framework for controlling the proliferation of changes in zone/split options and limited changes to 5-year intervals. The first open season for changes was in 1991 and the second will occur this year when zone/split configurations will be established for the 1996–2000 period.

As required by existing guidelines, States that made changes during the last open season (except going to the basic option) should provide the Service a review of pertinent data by the 1995–96 Winter/Spring Technical Committee Meetings. At a minimum, State reports should contain a summary of zone harvest estimates compared to previous configurations. The Service reiterates that this review does not have to be the result of a rigorous experimental design, but nonetheless should assist the Service in ascertaining whether major changes in harvest or hunter activity occurred as a result of zone/split regulations.

For the 1996 open season, the Service will use the existing 1990 guidelines, with an exception for the handling of special management units. The Service proposes to delete the following provision from the 1990 guidelines:

Special Management Unit Limitation: Within existing Flyway boundaries, States may not zone and/or use a 3-way split season simultaneously within a special management unit and the remainder of the State.

The zone/split season guidelines apply only for the *regular* duck season. The Service is proposing this change with the understanding that the additional days for a management unit must be consecutive and, for the Central Flyway, be held both after the Saturday nearest December 10 and after the regular duck season.

The proposed guidelines include several definitions and interpretations developed in response to questions during and following the first open season in 1991. For clarification, these are reiterated:

1. A zone is defined as a geographic area or portion of a State, with a contiguous boundary, for which independent dates (at least 1 day difference) can be selected for the regular duck season.

2. Consideration of changes for management-unit boundaries are not subject to the guidelines and provisions governing the use of zones and split seasons for ducks.

3. Only minor (less than a county in size) boundary changes will be allowed for any grandfather arrangement and changes are limited to the open season.

4. Any State may change its zone/split arrangement to the Basic Option at any time during the 5 years between open seasons. If such a change is made, the Basic Option must be continued for the remainder of the 5-year period.

For the 1996-2000 period, any State may continue the configuration used in 1991–1995. If changes are made, the zone/split configuration must conform to one of the following options:

1. *Basic Option:* The Basic Option, available at any time to any State, would allow the regular duck season to be split into two segments with no zones.

2. *Alternative Options:* Where the Basic Option is deemed undesirable, States may choose one of the following:

a. No more than three zones with no splits,

b. A 3-way split with no zones, or

c. Two zones with the option for 2-way split seasons in one or both zones.

At the end of 5 years after any changes in splits or zones (except conversions to the Basic Option), States will be required to provide the Service with a review of pertinent data (e.g., estimates of harvest, hunter numbers, hunter success, etc.). This review does not have to be the result of a rigorous experimental design, but nonetheless should assist the Service in ascertaining whether major undesirable changes in harvest or hunter activity occurred as a result of split and zone regulations. The next open season for changes in zone/split configurations will be 2001.

G. Special seasons/species management

i. Canvasback Management

Since 1994, the Service has followed a harvest-management strategy for canvasbacks which considers population levels, potential for recruitment, and expected harvest by hunters. The plan permits an open season on canvasbacks with a 1-bird daily bag limit nationwide when the above factors are sufficient to maintain a spring population size of 500,000 birds. Each year the Service reviews harvest and production information to evaluate the effectiveness of the harvest strategy. Thus, the Service will defer a decision on canvasback hunting until the 1995–96 harvest and 1996 spring population-status information are available. The Service proposes no change in the process employed for deciding on regulations governing the harvest of canvasbacks.

ii. September Teal Seasons

In 1990, the Service established a strategy for the use of shooting hours which stated that shooting hours would begin at sunrise unless States could demonstrate that the impact of presunrise shooting hours on nontarget duck species was negligible. During the 1993–94 teal seasons, several Mississippi and Central Flyway States conducted evaluations of shooting hours for teal seasons. The Central Flyway has completed a final report of its evaluation, which indicated that the attempted harvest of non-target species was no different between pre- and post-sunrise periods in those States. Therefore, the Service proposes that those Central Flyway States be allowed to continue pre-sunrise shooting hours during their teal seasons. The Service notes that it has not received a final report from the Mississippi Flyway, but is aware that the report will be discussed at the February Technical Committee Meeting. The Service believes that completion of this report is critical to evaluating the appropriateness of presunrise shooting hours during teal seasons within the Mississippi Flyway.

iii. September Teal/Wood Duck Seasons

In general, the Service continues to stress the importance of improving wood duck population monitoring programs. Such programs are necessary to ensure maintenance of our regular season approach to managing this species. The Wood Duck Population Monitoring Initiative, scheduled to be completed in July 1996, will provide managers with an assessment of the geographic scale at which we can adequately monitor population levels or trends, productivity, and survival and recovery rates.

Regarding the appropriateness of September teal/wood duck seasons, a decision will be made in cooperation with the the Flyway Councils after the assessment of wood duck monitoring programs is completed. Until such time, the Service does not propose to discontinue these seasons in Kentucky, Tennessee, and Florida or expand such seasons elsewhere. The Service has received draft updates of reports that summarize wood duck survival and recovery rates, harvest estimates, and derivations of banded birds harvested during these seasons.

iv. Special Management Units

High Plains Mallard Management Unit

The Service reminds the Central Flyway Council that the report on the High Plains Mallard Management Unit should be completed. Prompt completion of the report is encouraged and the Service requests an update on the status of the report including a projected completion date.

4. Canada Geese

A. Special Seasons

In response to the Atlantic Flyway Council's request to increase harvests of resident Canada geese in light of the closed regular season during 1995–96, the Service is considering extensions to the special early- and late-seasons criteria in the Atlantic Flyway. The Service believes that some changes in the existing season frameworks, particularly during the early seasons, may be possible in designated areas without causing undue harvest impacts on migrant Canada geese. However, less flexibility is expected in expanding late-season harvest opportunities in the Flyway without a comprehensive look at the existing neck-collar data. The Service does not propose to increase the composition of migrants in the harvest beyond that which is currently identified in the criteria for these seasons.

B. Regular Seasons

The Service acknowledges the interest expressed by several Flyway Councils to permit 3-way splits in regular goose seasons. The Service will work with the Flyway Councils during the coming year to develop an experimental protocol to evaluate the impact of such an option on a Flyway-specific basis. Any experimental designs resulting from this effort must insure adequate protection for goose populations of management concern.

In the Atlantic Flyway, the Service continues to be concerned about the status of the Atlantic Population (AP) of Canada geese. During this year, the Service will work closely with Canada and the Atlantic Flyway Council to monitor the 1996 spring breeding-pair estimates and reevaluate its status. The Service encourages the Atlantic Flyway Council to begin updating the AP Management Plan and consider revising population objectives and establishing appropriate harvest strategies. Key population parameters will be reviewed during the annual regulations-development process, but the recovery period for this population is expected to take several years.

The Service also remains concerned about the status of the Southern James Bay and Dusky Canada goose populations, and will carefully review all harvest regulations to ensure that these populations are not impacted.

7. Snow and Ross' Geese

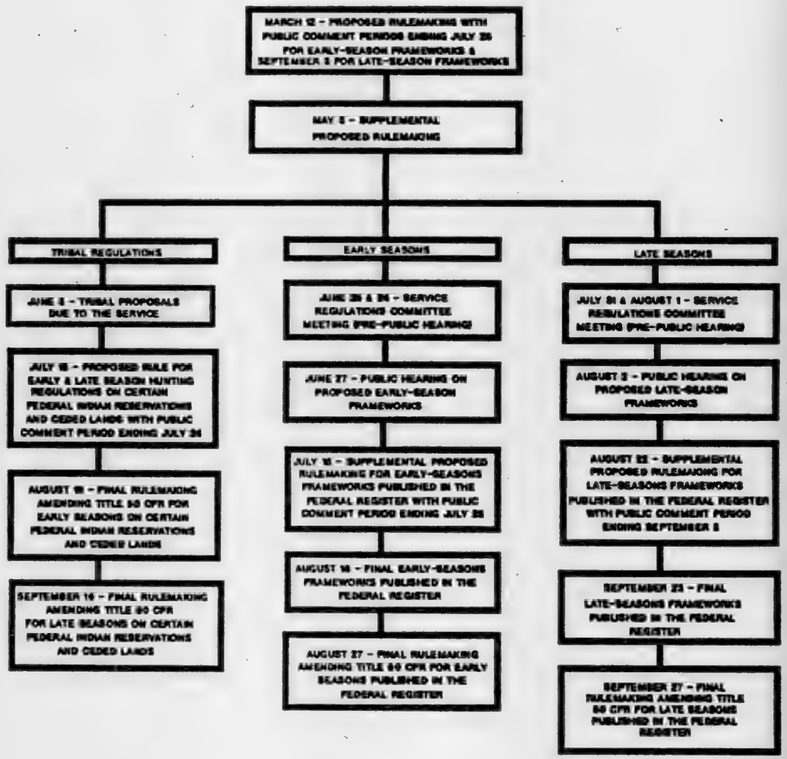
The Service requests that the Atlantic, Mississippi, and the Central Flyway Councils work with the Service to examine criteria established for those areas with a framework closing date of March 10. If there is a need to refine the northern boundary established for the 1995–96 seasons, the Service recommends the development of biological criteria to guide the boundary refinement. Further, it is suggested that these criteria should include an assessment of the frequency, timing and magnitude of goose use in areas proposed to be designated as wintering areas. Finally, the Service reminds States that proposed boundary adjustments should be approved by their respective Flyway Councils.

The Service is also concerned about the growing evidence of serious habitat degredation caused by high white goose population levels at several major breeding areas in the central and eastern Canadian Arctic. The Service proposes to work with the Arctic Goose Joint Venture, the Flyway Councils and other concerned agencies and organizations to investigate possible management alternatives to address this problem.

9. Sandhill Cranes

The Service requests the assistance of the Central and Pacific Flyway Councils in the development and implementation of improved techniques to monitor the annual population status of the Rocky Mountain Population of Greater Sandhill Cranes. In the interim, the Service recommends that the Flyway Councils continue to use the population, recruitment, and permit-allocation procedures in the cooperative management plan to set crane seasons in 1996–97.

14. Woodcock



The Service remains concerned about the gradual long-term declines in woodcock populations in both the Eastern and Central Management Regions. The primary causes of the declines appear to be degradation and loss of suitable habitat on both the breeding and wintering grounds. Available data suggest that woodcock are harvested at a relatively low rate and that hunting mortality comprises a relatively small proportion of overall annual mortality. The Service will continue to work with the Atlantic and Mississippi Flyway Councils to review the status of woodcock and cooperatively develop a harvest-management strategy.

15. Band-tailed Pigeons

The Service supports the continuation of hunting seasons on both the Coastal and Interior Populations. The Service remains concerned, however, about the long-term decline in the Coastal Population and supports the continuation of restrictive harvest regulations. As in 1995, all States having band-tailed pigeon hunting seasons must again require either participation in the nationwide Migratory Bird Harvest Information Program or require band-tailed pigeon hunters to obtain mandatory State permits to provide sampling frames for obtaining more precise estimates of band-tailed pigeon harvest. Those States not participating in the Harvest Information Program will be required to conduct a harvest survey and provide the results to the Service by June 1 of each year. The Service will continue to closely monitor population and harvest information from both populations and will evaluate this information in June prior to making any decisions regarding the 1996–97 seasons. Indian tribes also should consider this situation when proposing harvest regulations for this species.

BILLING CODE 4310–31–F

1996 SCHEDULE OF REGULATIONS MEETINGS AND FEDERAL REGISTER PUBLICATIONS

[FR Doc. 96–6981 Filed 3–21–96; 8:45 am]
BILLING CODE 4310–31–C

Friday
March 22, 1996

Part V

Environmental Protection Agency

40 CFR Part 185
Revocation of Pesticide Food Additive Regulations; Final Rule

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 185

[OPP–300335A; FRL–5357–7]

Revocation of Pesticide Food Additive Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: EPA has made a final determination regarding 26 food additive regulations (FARs) for 7 pesticides that were previously proposed for revocation on the grounds that the FARs violated the Delaney clause in section 409 of the Federal Food, Drug and Cosmetic Act (FFDCA). Today, EPA is revoking 13 FARs because they violate the Delaney clause and the remaining 13 FARs because they are not needed to prevent adulterated food.

EFFECTIVE DATE: This final rule is effective May 21, 1996.

ADDRESSES: Written objections, requests for a hearing, and/or requests for stays identified by the document control number OPP–300335A (FRL–5357–7), must be submitted by April 22, 1996, to the Hearing Clerk, EPA, 401 M Street, SW., Washington, DC 20460, with a copy to the OPP docket. Comments on objections, requests for a hearing, and/or requests for stays must be submitted by May 6, 1996 to the OPP docket: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW., Washington, DC 20460. Hand deliver to: Rm. 1132, CM 2, 1921 Jefferson Davis Hwy., Arlington, VA.

Information submitted as a filing concerning this document may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI). Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the filings that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written (non-CBI) filings will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m., Monday through Friday, excluding legal holidays.

FOR FURTHER INFORMATION CONTACT: By mail: Niloufar Nazmi, Special Review Branch (7508W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Crystal Mall #2, Room 1113, 1921 Jefferson Davis Highway, Arlington, VA (703) 308–8028; e-mail: nazmi.niloufar@epamail.epa.gov.

I. Introduction

A. Statutory Background

The Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 301 *et seq.*, authorizes the establishment by regulation of maximum permissible levels of pesticides in foods. Such regulations are commonly referred to as "tolerances." Without such a tolerance or an exemption from the requirement of a tolerance, a food containing a pesticide residue is "adulterated" under section 402 of the FFDCA and may not be legally moved in interstate commerce. 21 U.S.C. 331, 342. EPA was authorized to establish pesticide tolerances under Reorganization Plan No. 3 of 1970. 5 U.S.C. App. at 1343 (1988). Monitoring and enforcement of pesticide tolerances are carried out by the U.S. Food and Drug Administration (FDA) and the U.S. Department of Agriculture (USDA). EPA can establish a tolerance in response to a petition (FFDCA section 408(d)(1), 409(b)(1)), or on its own initiative (FFDCA sections 408(e), 409(d)).

The FFDCA has separate provisions for tolerances for pesticide residues on raw agricultural commodities (RACs) and tolerances on processed food. For pesticide residues in or on RACs, EPA establishes tolerances, or exemptions from tolerances when appropriate, under section 408. 21 U.S.C. 346a. EPA regulates pesticide residues in processed foods under section 409, which pertains to "food additives." 21 U.S.C. 348. Maximum residue regulations established under section 409 are commonly referred to as food additive regulations (hereafter referred to as "FARs"). Section 409 FARs are needed, however, only for certain pesticide residues in processed food. Under section 402(a)(2) of the FFDCA, a pesticide residue in processed food generally will not render the food adulterated if the residue results from application of the pesticide to a RAC and the residue in the processed food when ready to eat is below the RAC tolerance. This exemption in section 402(a)(2) is commonly referred to as the "flow-through" provision because it allows the section 408 raw food tolerance to flow through to the processed food forms. Thus, a section 409 FAR is only necessary to prevent foods from being deemed adulterated when the level of the pesticide residue in a processed food when ready to eat is greater than the tolerance prescribed for the RAC, or if the processed food itself is treated or comes in contact with a pesticide.

If a food additive regulation must be established, section 409 of the FFDCA requires that the use of the pesticide will be "safe" (21 U.S.C. 348(c)(3)). Relevant factors in this safety determination include (1) the probable consumption of the pesticide or its metabolites; (2) the cumulative effect of the pesticide in the diet of man or animals, taking into account any related substances in the diet; and (3) appropriate safety factors to relate the animal data to the human risk evaluation. Section 409 also contains the Delaney clause, which specifically provides that "no additive shall be deemed safe if it has been found, after tests which are appropriate for the evaluation of the safety of food additives, to induce cancer when ingested by man or animal."

B. Regulatory Background

1. *Les* v. *Reilly*

On May 25, 1989, the State of California, the Natural Resources Defense Council, Public Citizen, the AFL-CIO, and several individuals filed a petition requesting that EPA revoke several FARs. The petitioners argued that these FARs should be revoked because they violated the Delaney clause.

EPA responded to the petition by revoking certain FARs, but retained several others on the grounds that the Delaney clause provides an exception for pesticide residues posing *de minimis* risk; EPA denied the petition with respect to the FARs determined to fall under this exception. EPA's response was challenged by the petitioners in the U.S. Court of Appeals, Ninth Circuit. On July 8, 1992, the court ruled in *Les* v. *Reilly*, 968 F.2d 985 (9th Cir.), *cert. denied*, 113 S.Ct. 1361 (1993), that the Delaney clause barred the establishment of a FAR for pesticides which "induce cancer" no matter how infinitesimal the risk.

In response to the court's decision in *Les* v. *Reilly*, EPA has taken steps to identify and revoke all section 409 FARs for pesticides which "induce cancer." On March 30, 1994, EPA issued a list of pesticide uses which potentially could be affected by the court's decision (59 FR 14980). (Note that, for the purpose of today's document, this list has been superseded by appendices to the court-approved settlement in *California* v. *Browner*, discussed below.)

After revoking certain FARs of six pesticides that were the subject of the original NRDC petition, EPA decided to evaluate the remaining pesticide uses in phases. The first phase of proposed revocations was announced on July 1, 1994, and involved 26 FARs for seven pesticides (59 FR 33941; July 1, 1994). In today's notice, EPA is making final determinations regarding these 26 FARs.

2. *California* v. *Browner*

In a court-approved settlement, entered on February 9, 1995, in the case of *California* v. *Browner*, EPA agreed to make decisions regarding pesticides that may be affected by the Delaney clause. This settlement agreement includes a timetable for making the decisions. This document is consistent with the timeframes in that settlement.

C. Actions Since Proposed Rule

The National Food Processors' Association (NFPA) filed a petition with the EPA in September 1993. This petition challenged a number of policies under which EPA administers its tolerance-setting program. In the **Federal Register** of June 14, 1995 (60 FR 31300), EPA issued a partial response to the NFPA petition. In that document, EPA concluded that some changes were warranted to its policies concerning application of the Delaney clause, in particular the concentration and "ready-to-eat" (RTE) policies. On January 25, 1996, EPA completed its response to the NFPA petition by announcing its coordination policy and its interpretation of what constitutes a RAC (61 FR 2378). Section II of this preamble contains a summary of these policy changes.

D. Today's Action

The FAR revocations being made final in this notice were proposed on July 1, 1994 (59 FR 33941), before EPA had responded to the NFPA petition and adopted its new policies. In addition, EPA has received many petitions from the registrants of these pesticides requesting revocation of many of the FARs, on the basis that they are not needed. For each of these petitions, EPA has published a "Notice of Availability and Request for Comments", in the **Federal Register**. Today's final rule is consistent with EPA's new policies and, where appropriate, the decisions are based on the petitions rather than the proposed rule of July 1, 1994.

II. EPA's Policy Changes Since the Proposal

A. Concentration and Ready-to-Eat Policies

To determine whether the use of a pesticide on a growing crop needs a section 409 FAR in addition to a section 408 tolerance, EPA looks at the likelihood that the residue levels in the processed food when ready to eat will exceed the section 408 tolerance level. In the past, EPA applied this policy focusing almost exclusively on the results of processing studies using treated crops. In response to the NFPA petition, EPA announced new policies on how it would determine whether a pesticide needs a section 409 FAR (60 FR 31300, July 1, 1994). EPA stated that it would consider a greater range of information in determining the likelihood of residues in processed food exceeding the section 408 tolerance. EPA also adopted a definition of RTE as it applies to human food and animal feed. Whether a food is RTE or not is critical to application of the concentration policy. If a food is not RTE, EPA considers the degree of dilution that occurs in producing a RTE food from the not-RTE food in determining the likelihood that residues in RTE food will exceed the section 408 tolerance.

Perhaps the most significant new information that EPA stated it would consider is information bearing on the average residue value from crop field trials. The data from field residue trials show that it is possible to obtain significantly different residue values from multiple field trials. EPA's old policy was to use the highest field trial sample value to calculate expected residues in the processed food. However, in response to the NFPA petition, EPA concluded that where a crop is mixed or blended during processing, it is appropriate to use an average of the residue levels from field trials, rather than the highest sample value in estimating the potential level of residue in processed food. As EPA noted, EPA believes that generally the most appropriate average value to use is the "highest average field trial" (HAFT) value, or the average of the highest values found in each of the field trials. Consequently, EPA revised its procedures and is now using the HAFT as the basis for determining whether a section 409 FAR is needed. Use of the HAFT for food commodities that are likely to be mixed or blended decreases the likelihood that residues in processed food will exceed the section 408 tolerance.

In addition EPA has revised its policies for the use of multiple processing studies. EPA may receive several processing studies for a crop, with each showing a different concentration factor. When different concentration factors result from multiple processing studies, EPA will now use the average concentration factor to determine the expected level of concentration. In addition, EPA is examining processing studies to ensure that they reflect typical commercial practices. If a study does not include a step (e.g., washing) that is considered typical practice in processing a RAC, EPA may decide not to include that study in the calculation of the average concentration factor.

In response to the NFPA petition, EPA stated it would interpret the phrase RTE food as meaning food ready for consumption "as is" without further preparation. For instance, EPA has determined that cottonseed oil is not RTE, while oat bran is.

B. Updated Residue Chemistry Guidelines

In a notice issued September 21, 1995 (60 FR 49150), EPA announced the availability of its updated table II of the Pesticide Assessment Guidelines, Subdivision O, Residue Chemistry. This table, commonly referred to "Residue Chemistry Table II" provides a listing of all significant food and feed commodities, both raw and processed, for which residue data are collected and tolerances or FARs are established. In the latest update of this table, criteria were established for inclusion of feed items, and, based on those criteria, a number of feed items were eliminated as significant animal feeds. If a commodity is not listed in table II as a significant

food or feed, a tolerance is not necessary for pesticide residues in that commodity.

C. RAC Interpretation

On January 25, 1996 (61 FR 2386), EPA published its interpretation of the term RAC as applied to dried commodities under the FFDCA. This notice explained EPA's interpretation of which dried commodities qualify as RACs. EPA based its interpretation on the purpose of drying, such that commodities dried for the purpose of creating a new marketable commodity are treated as processed food, while those dried for storage or transportation needs are treated as raw foods. This interpretation is consistent with EPA's current practice and therefore no commodities were reclassified as either RAC or processed as a result of the interpretation.

III. Decision Framework

In analyzing whether the 26 FARs addressed in this document should be revoked, EPA has used the following decision framework. First, EPA determined whether a section 409 FAR was necessary to prevent adulteration, given the revisions to the concentration, RTE, and RAC policies as well as to table II. If application of new policies showed no FAR was needed, this document revokes the FAR on that ground. However, if the analysis showed that a FAR is still needed, then the FAR's consistency with the Delaney clause was analyzed. Contrary to the opinion expressed in some comments on the proposed rule (see comments of American Crop Protection Association, and EPA's response in Unit VI of this preamble), EPA does not believe that this approach is legally required under the FFDCA. EPA has chosen this approach in its discretion.

In examining whether a FAR was needed, EPA followed a stepwise process involving a series of questions. In brief, the questions are:

1. Do processing data show that there is actual concentration of residues during processing? If processing studies demonstrate that the level of residues in the processed food is less than or equal to the level of residues in the precursor crop (i.e., no "concentration in fact"), residues in the processed food would not be expected to exceed the section 408 tolerance.

2. Does use of the average of concentration factors from multiple processing studies show that there is concentration of residues during processing?

3. Is the commodity mixed or blended during processing, such that use of the HAFT value is appropriate?

4. Using the HAFT, do residues in processed food exceed the section 408 tolerance?

5. If a processed food item is not eaten "as is," is the dilution that occurs during preparation of RTE food sufficient to reduce pesticide residues below the section 408 tolerance? EPA will evaluate the expected residue level in RTE food containing the processed food item. If the dilution of residues resulting from RTE food preparation is greater than the concentration of residues resulting from processing (the dilution factor is greater than the concentration factor), it is likely that the residues in the finished RTE food will be less than the section 408 tolerance. In this case, no FAR would be necessary for the RTE food.

If, after consideration of the above factors, a FAR was determined to be necessary, EPA then examined whether the existing FAR for the pesticide chemical violates the Delaney clause.

IV. Analysis of the FARs

EPA originally proposed to revoke all 26 FARs on the basis that they violate the Delaney clause. EPA has since determined that under its revised concentration and RTE policies, 13 FARs are not needed to prevent adulterated food. For the 13 FARs that are needed, EPA next examined their consistency with the "induce cancer" standard of the Delaney clause in section IV.B. of this preamble.

A. Is a FAR needed?

Under current policy, a FAR is needed when the appropriate field trial residue value multiplied by the appropriate concentration factor significantly exceeds the section 408 tolerance in the ready to eat commodity. The extent to which EPA will allow residues in the processed food to exceed the section 408 tolerance is determined on a case by case basis, taking into account the sensitivity of the analytical method used to detect the residues. In analyzing the need for section 409 FARs, EPA has taken into account not only existing section 408 tolerances but also available residue data bearing on whether the current section 408 tolerance should be revised under existing tolerance-setting policies. EPA has received large amounts of residue data as part of the pesticide reregistration program of section 4 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). Review of these data in several instances shows that the existing section 408 tolerance is set either too high or too low. Tolerance adjustments would normally be accomplished through the reregistration program.

EPA, however, sees no reason to wait until these tolerances are formally revised to determine whether the pesticide concentrates for the purpose of applying the coordination policy. EPA has decided that it should base its concentration decision upon the most recent data on residues in raw crops. If those data indicate that section 408 tolerances should be adjusted, EPA has used the adjusted section 408 tolerance level as the basis for its determination of whether a section 409 FAR is needed because the pesticide concentrates. The basis for EPA's determination that a section 408 tolerance should be adjusted is in the docket for this rulemaking.

Captan on raisins. EPA proposed to revoke FARs for captan both from pre-harvest use on grapes and direct treatment to raisins.

On January 31, 1996, EPA published notice in the **Federal Register** (61 FR 3401) of a petition filed by the Captan Task Force requesting revocation of the section 409 FAR for raisins. The petition claims that good manufacturing practice for producing raisins requires that the raisins are washed before they are ready-to-eat and that washing raisins substantially eliminates remaining captan residues. The petition claims that because captan residues do not concentrate in washed raisins above the established residue levels on treated grapes, the FAR should be revoked.

EPA has reviewed the public comments and reconsidered the available grape/raisin processing studies. EPA agrees that washing is standard practice in raisin production, Accordingly, EPA has determined that only those studies which involve washing the raisins reflect current processing practices. When only those data which include a washing step are used to evaluate the need for a section 409 FAR for raisins, the average concentration factor for residues of captan per se on washed raisins is less than one. Therefore, no section 409 FAR is needed for residues from pre-harvest treatment.

In regard to direct post-harvest application to grapes (drying raisins), the petition claims that the section 409 FAR is not needed because there are no registered products containing captan which include label directions for post-harvest use on raisins. EPA has reviewed all labels of products containing captan, and agrees with the petitioner that there are no labels which allow postharvest use of captan on drying grapes/raisins. Therefore, the section 409 FAR is not needed for residues resulting from post-harvest treatment of the fruit.

Ethylene oxide on ground spices. Since ethylene oxide is directly applied to processed ground spices, the existing section 409 FAR is necessary to prevent adulterated food. EPA policies on concentration and dilution in RTE foods are not relevant to a processed commodity treated directly with a pesticide.

Mancozeb on brans of oats, barley and rye; flours of oats, barley, rye and wheat. On May 19, 1993, EPA published notice in the **Federal Register** (58 FR 29318) of a petition filed by the Mancozeb Task Force. This petition sought the revocation of the section 409 FAR for the flours and brans of barley, oats, rye and wheat. The petitioner argued that residues do not concentrate in the brans and flours of these grains over the section 408 RAC tolerances. EPA has reviewed the available data in accordance with the new Agency policies and made the following determinations in regard to the residues of Mancozeb on brans of oats, barley and rye, and flours of oats, barley, rye and wheat.

Oat bran. The current section 408 tolerance for mancozeb on oat grain is 5 ppm (40 CFR 180.176). Evaluation of new residue data indicates that the tolerance should be reduced to 1 ppm. Based on the HAFT of 0.98 ppm for oat grain and an average concentration factor of 2.0 in oat bran, the expected residue in oat bran is calculated as 2.0 ppm. The HAFT multiplied by the concentration factor is 0.98 X 2.0=2.0 ppm. (This calculation is used throughout the document to calculate expected residue levels.) EPA believes that it is likely that some oat bran will contain residues exceeding the adjusted RAC tolerance level of 1 ppm. Oat bran is a RTE processed food and needs a section 409 FAR.

Barley and rye bran. The current section 408 tolerance for mancozeb on barley and rye grains are 5 ppm (40 CFR 180.176). Evaluation of new residue data indicate that this tolerance should be reduced to 1 ppm. Based on the HAFT of 0.98 ppm for barley and rye grain and an average concentration factor of 2.0 in the brans, the expected residues in barley and rye brans are calculated as 2.0 ppm. EPA has determined that both rye and barley bran are not RTE foods and that once they are prepared to their RTE forms, mancozeb residues are unlikely to exceed the adjusted section 408 tolerances of 1 ppm for rye and barley grains. Therefore, the section 409 FARs for mancozeb on brans of barley and rye are not needed and will be revoked on these grounds. EPA will propose to establish a Maximum Residue Limit (MRL) under section 701 of FFDCA in or on barley bran. Moreover, EPA has determined that rye bran is not a significant human food and does not require pesticide residue tolerances. A memo to this effect is in OPP docket 300415.

Flours of oat, barley, rye and wheat. The current FAR for flours of oat, barley, rye and wheat is 1 ppm (40 CFR 185.6300). EPA has determined that the average concentration factor for wheat flour is less than one, and has used it for other grains. Residues in processed flours are not expected to exceed the adjusted RAC tolerance of 1 ppm for the grains. Therefore, no section 409 FAR is needed for the flours of oat, barely, rye and wheat.

Oxyfluorfen on spearmint, peppermint, soybean and cottonseed oils. On December 14, 1994, EPA published notice in the **Federal Register** (59 FR 64405) of a petition filed by the Rohm and Haas Company which sought to revoke these section 409 FARs because they are not needed. The petitioner claimed that all processed oil data from processing studies show that residue levels in oils are below the section 408 tolerance levels. The petitioner also argued that these oils are not RTE commodities.

Spearmint and peppermint oils. The current section 408 tolerance for oxyfluorfen on mint hay is 0.1 ppm (40 CFR 180.381). Evaluation of new residue data indicates that the tolerance should be reduced to 0.05 ppm. Based on the HAFT of 0.03 ppm for mint hay, and an average concentration factor of 2.4, the expected residues in mint oils are calculated as 0.072 ppm. The residue level for mint oils is not appreciably higher than the adjusted mint RAC tolerance of 0.05 ppm, taking into account the sensitivity of the analytical method used to detect oxyfluorfen residues. In addition, peppermint and spearmint oils are not RTE commodities, and the Agency has determined that they are diluted by a factor of 120 and 160 respectively in RTE foods. Therefore, a section 409 FAR is not needed. EPA will propose to establish Maximum Residue Limits under section 701 of FFDCA for oxyfluorfen in or on mint oils.

Soybean oil. Dry soybean seeds treated at 5 times the maximum application rate did not have quantifiable oxyfluorfen residues, thus processing data are not able to show the degree of concentration in soybean oil. The maximum theoretical concentration factor for soybean oil is 5. Since this is the same as the application exaggeration in the residue study, oxyfluorfen residues in soybean oil, are not expected to exceed the section 408 tolerance of .05 ppm. Therefore, a section 409 FAR is not needed.

Cottonseed oil. The current section 408 tolerance for oxyfluorfen on cottonseed is 0.05 ppm (40 CFR 180.381). Evaluation of new residue data indicates that the tolerance should be reduced to .02 ppm. Based on the HAFT of 0.01 ppm for cottonseed and a concentration factor of 3.3, the expected residue in cottonseed oil is .04 ppm. Cottonseed oil is not a RTE processed food and once diluted by a factor of 11, which accounts for the minimum level of dilution of cottonseed oil in preparing RTE food, the residues in the RTE food items are not expected to exceed the adjusted section 408 RAC tolerance of .02 ppm. Therefore a section 409 FAR is not needed. EPA will propose to establish Maximum Residue Limits under section 701 of FFDCA for oxyfluorfen in or on cottonseed oil.

Propargite on raisins, dried figs, and tea. On September 7, 1994, EPA published a notice in the **Federal Register** (59 FR 46250) of a petition filed by Uniroyal Chemical Company which sought to revoke the section 409 FAR on raisins because it is not needed. The petitioner claimed that propargite residues are susceptible to release through mechanical or washing processes and therefore do not concentrate in raisins.

Raisins. Based on the HAFT of 4.7 ppm for grapes and an average concentration factor of 1.7, the expected residue in raisins is calculated at 8.0 ppm, which is less than the established section 408 RAC tolerance of 10 ppm for grapes. Therefore, a section 409 FAR is not needed for raisins.

Dried figs. Based on a HAFT of 1.8 ppm for figs and an average concentration factor of 2.7 for dried figs, the expected residue level in dried figs is 4.9 ppm. EPA believes that it is likely that some dried figs will contain propargite residues exceeding the established RAC tolerance level of 3 ppm. Since dried figs are RTE, a section 409 FAR is needed.

Dried tea. Tea is a processed food item even though it is not considered a RTE food. EPA has determined that the degree of dilution from dried tea to brewed RTE tea will exceed any concentration from fresh green tea to dried tea.

Under the circumstances where: (1) There is a section 408 tolerance for the RAC; and (2) residues in the RTE food are below the section 408 tolerance, EPA normally would determine that the

section 409 FAR is not necessary. Residues would be covered by the section 408 tolerance under the flow-through provision of section 402, and EPA would revoke the FAR on that ground.

Tea presents a unique situation, because the FAR is established primarily for import purposes. However, because only the dried tea is imported into the United States, there is no section 408 tolerance for fresh tea. Without a section 408 tolerance, the flow-through provision does not apply. Revocation of the section 409 FAR would leave no tolerance to cover residues in tea, potentially resulting in adulterated tea. Therefore, the section 409 FAR for dried tea is necessary.

Propylene oxide on glace fruit, cocoa, gums, dried prunes, processed nutmeats (except peanuts), starch and processed spices. Since propylene oxide is directly applied to these commodities, the "flow through" provision of section 402 does not apply and the existing section 409 FAR is necessary to prevent adulterated food.

Simazine on Sugarcane molasses and syrup. Molasses is a RTE food item. The average concentration factor in the processing of molasses is 10. A determination of the HAFT has not been made since the concentration factor is so large that the HAFT multiplied by that number is certain to appreciably exceed the section 408 tolerance (.25 ppm). EPA expects that in most cases the HAFT will not be lower than the tolerance by a factor of two. This conclusion is based on EPA's experience with setting 408 tolerances (i.e., how they are derived based on the highest residue values) and with the relationships between average residues in field trials and either tolerances or maximum field trial residues, which are usually close to the tolerance. In most cases average residues across all field trials for a given crop are 2–6 times less than a tolerance or maximum field trial value. The highest average field trial (HAFT) will be higher than the average residue across all trials. Therefore, in this particular case the Agency is confident that ten times the HAFT will be appreciably higher than the 408 tolerance. Examples of the relationships between average residues and tolerances or maximum field trial residues are available in the docket for this notice. EPA's conclusion regarding the level of simazine residues in sugarcane molasses is confirmed by a processing study in which sugarcane treated at the maximum application rate showed total residues of 0.63 ppm in molasses, well above the 0.25 ppm sugarcane tolerance. Therefore, EPA believes that it is likely that some molasses will contain residues exceeding the tolerance.

According to Residue Chemistry Table II, sugarcane syrup is not considered a significant human food item. The Agency has determined that no section 409 FAR is required.

Simazine in potable water. Even though EPA no longer sets section 409 FARs under the FFDCA for residues in potable water, this FAR for simazine exists. Therefore, EPA will apply the same analysis to it as to the other section 409 FARs addressed in this notice.

B. Induce Cancer Determination

If a FAR is necessary to prevent adulterated food, as in the case of the 13 FARs of the five chemicals discussed above, EPA must determine whether the pesticide induces cancer within the meaning of the Delaney clause. In the proposal for this final rule (59 FR 33941; July 1, 1994), EPA determined that all of the following five chemicals "induce cancer" within the meaning of the Delaney clause: Ethylene oxide, mancozeb, propargite, propylene oxide and simazine. (OPP docket 300335.)

In construing the "induce cancer" standard as to animals, EPA follows a weight-of-the-evidence approach. In regard to animal carcinogenicity, EPA, in general, interprets "induces cancer" to mean:

The carcinogenicity of a substance in animals is established when administration in an adequately designed and conducted study or studies results in an increase in the incidence of one or more types of malignant (or, where appropriate, benign or a combination of benign and malignant) neoplasms in treated animals compared to untreated animals maintained under identical conditions except for exposure to the test compound. Determination that the incidence of neoplasms increases as the result of exposure to the test compound requires a full biological, pathological, and statistical evaluation. Statistics assist in evaluating the biological significance of the observed responses, but a conclusion on carcinogenicity is not determined on the basis of statistics alone. Under this approach, a substance may be found to "induce cancer" in animals despite the fact that increased tumor incidence occurs only at high doses, or that only benign tumors occur, and despite negative results in other animal feeding studies. (See 58 FR 37863, July 14, 1993; 53 FR 41108, October 19, 1988; and 52 FR 49577, December 31, 1987.)

EPA has considered the comments submitted on the proposed rule, and has applied this interpretation to the 5 chemicals addressed above. Based on this analysis, EPA concludes that ethylene oxide, mancozeb, propargite, propylene oxide and simazine induce cancer within the meaning of the Delaney clause. Because EPA has determined that the section 409 FARs for captan and oxyfluorfen should be revoked on grounds other than the Delaney clause, the Agency is not issuing a final finding in this action that these chemicals induce cancer within the meaning of the Delaney clause. Full copies of EPA's reviews of each chemical and other references in this document are available in the OPP docket 300335, the location of which is given in the "ADDRESSES" section of this preamble.

V. EPA's Decisions

A. FARs That Are Not Needed

Captan. EPA is revoking the FAR for the fungicide captan in or on raisins (50 ppm). This FAR is codified at 40 CFR 185.500. EPA is revoking this regulation because the Agency has determined that this FAR is not needed to prevent adulterated food. This final rule is based on the grounds discussed in the petition of January 31, 1996, discussed in Unit IV of this preamble.

Mancozeb. EPA is revoking the FARs for mancozeb (expressed as the zinc ion and maneb coordination product) for residues in the brans of barley and rye (20 ppm) and in the flours of barley, oats, rye and wheat (1 ppm). These FARs are codified at 40 CFR 185.6300. EPA is revoking these FARs because they are not needed to prevent adulterated food. This final rule is based on the grounds discussed in the petition of May 19, 1993, discussed in Unit IV of this preamble.

Oxyfluorfen. EPA is revoking the FARs for residues of oxyfluorfen on cottonseed oil, peppermint oil, spearmint oil and soybean oil (.25 ppm). These FARs are codified at 40 CFR 185.4600. EPA is revoking these FARs because the Agency has determined that these FARs are not needed to prevent adulterated foods. This final rule is based on the grounds discussed in the petition of December 14, 1994, discussed in Unit IV of this preamble.

Propargite. EPA is revoking the FAR for residues of propargite on raisins (25 ppm). This FAR is codified at 40 CFR 185.5000. EPA is revoking this FAR because the Agency has determined that it is not needed to prevent adulterated food. This final rule is based on the grounds discussed in the petition of September 7, 1994, discussed in Unit IV of this preamble.

Simazine. EPA is revoking the FAR for residues of simazine in sugarcane syrup (1 ppm). This FAR is codified at 40 CFR 185.5350. EPA is revoking this FAR because EPA has determined that it is not needed to prevent adulterated food. This final rule is based on updated Agency guidelines which dictate when a FAR is needed.

TABLE 1.—13 FARS THAT ARE NOT NEEDED

Pesticide	CFR citation	Commodity	Food additive regulation level
Captan	185.500	raisins	50.0 ppm
Mancozeb	185.6300	bran of barley, rye	20 ppm
		flours of oats, barley, rye, wheat	1 ppm
Oxyfluorfen	185.4600	peppermint, spearmint, soybean, and cottonseed oils	0.25 ppm
Propargite	185.5000	raisins	25 ppm
Simazine	185.5350	sugarcane syrup	1 ppm

B. Food Additive Regulations That Violate the Delaney Clause

Ethylene oxide. EPA is revoking the FAR for residues resulting from the direct application of ethylene oxide to ground spices (50 ppm). This FAR is codified at 40 CFR 185.2850. Ethylene oxide has been found to induce cancer in animals based on tests which are appropriate for the evaluation of the safety of food additives. Thus, this regulation violates the Delaney clause in section 409 of the FFDCA.

Mancozeb. EPA is revoking the FAR for mancozeb (expressed as the zinc ion and maneb coordination product) for residues in oat bran (20 ppm). This FAR is codified at 40 CFR 185.6300. Since mancozeb induces cancer when ingested by animals, this regulation violates the Delaney clause in section 409 of the FFDCA.

Propargite. EPA is revoking the FARs for residues of propargite on dried figs (9 ppm) and dried tea (10 ppm). These FARs are codified at 40 CFR 185.5000. Since propargite induces cancer when ingested by animals, these regulations violate the Delaney clause in section 409 of the FFDCA.

Propylene oxide. EPA is revoking the FARs for residues of propylene oxide on cocoa (300 ppm), glace fruit (700 ppm), gums (300 ppm), processed nutmeats (except peanuts) (300 ppm), dried prunes (700 ppm), processed spices (300 ppm), and starch (300 ppm). These FARs are codified at 40 CFR 185.5150. Since propylene oxide induces cancer in animals in tests appropriate for the evaluation of the safety of food additives, these regulations violate the Delaney clause in section 409 of the FFDCA.

Simazine. EPA is revoking the FARs for residues of simazine on sugarcane molasses (1 ppm) and in potable water (.01 ppm). These FARs are codified at 40 CFR 185.5350. Since simazine induces cancer when ingested by animals, these FARs violate the Delaney clause in section 409 of the FFDCA.

TABLE 2.—13 FARS THAT VIOLATE THE DELANEY CLAUSE

Pesticide	CFR citation	Commodity	Food additive regulation level
Ethylene oxide	185.2850	ground spices	50 ppm
Mancozeb	185.6300	bran of oats	20 ppm
Propargite	185.5000	dried figs	9 ppm
		dried tea	10 ppm
Propylene oxide	185.5150	glace fruit	700 ppm
		cocoa	300 ppm
		gums	300 ppm
		processed nutmeats (except peanuts)	300 ppm
		dried prunes	700 ppm
		starch	300 ppm
		processed spices	300 ppm
Simazine	185.5350	sugarcane molasses	1 ppm
		potable water	.01 ppm

VI. Consideration of Comments

EPA's proposed revocation of these FARs was published prior to EPA's response to the NFPA petition. Many comments that were submitted in response to the proposed rule urged EPA to reconsider many of its tolerance setting policies, including the coordination, concentration, RTE and RAC policies. As explained in the earlier units of this notice, EPA has adopted new policies and used them in making the determinations for this final rule. Because of these new policies, only 13 of the 26 FARs which EPA proposed to revoke on July 1, 1994, are being revoked because they violate the Delaney clause. In addition, most commenters also raised chemical specific issues, primarily concerning whether the chemical induces cancer within the meaning of the Delaney clause. EPA's response to chemical specific comments is summarized below. Full responses to comments are in the docket.

American Crop Protection Association (ACPA)

Comments: ACPA submitted extensive comments on the proposal.

Many of ACPA's comments seem to suggest that EPA has incorrectly applied the legal standard "induce cancer" because EPA failed to duplicate prior FDA practice. ACPA admits that EPA announced it would use FDA's "induce cancer" standard and would follow the weight of the evidence approach used by FDA but ACPA contends that EPA's application of the standard was not sufficiently thorough and that EPA has failed to consider various categories of relevant evidence. ACPA alleges that one particular type of evidence ignored by EPA is biologic and mechanistic data. Further, ACPA argues that EPA has wrongly interpreted the Delaney clause because EPA has failed to take into account the relevance of the results of animal studies to humans. ACPA also asserts that EPA failed to take account of the fact that an "induce cancer" finding is appropriate only where the evidence is "conclusive." Finally, ACPA argues that EPA is legally required to determine whether a section 409 FAR is legally necessary to prevent the adulteration of food before revoking it on Delaney clause grounds.

EPA's response: EPA believes its application of the "induce cancer" standard and the weight of the evidence approach has sufficiently addressed all relevant evidence. Where ACPA or other commenters have raised questions concerning how specific data were considered for specific chemicals, EPA has in this notice or in the docket responded to those comments. ACPA's comments regarding the role of the relevance of animal studies to humans under the Delaney clause, the relevance of biologic and mechanistic data, the degree of certainty required for a Delaney clause finding, and the need for a determination as to the necessity of a FAR are addressed below.

Relevance to humans. ACPA asserts that a substance does not induce cancer within the meaning of the Delaney clause even if it produces cancer when fed to experimental animals if the results of the experiment are not relevant to human carcinogenicity. To support this conclusion, ACPA first notes that the Delaney clause contains two clauses separated by the conjunction "or."

> [N]o additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal or if it is found, after tests which are appropriate for the evaluation of the safety of food additives, to induce cancer in man or animal * * *.

21 U.S.C. 348(c)(3)(A) (emphasis added). According to ACPA, the first clause is limited to evidence gathered through epidemiological studies on humans or animals and the second clause addresses evidence gathered from experiments. ACPA bases this conclusion on the inclusion of the word "tests" in the second clause but not in the first. Further, ACPA argues that the requirement that the tests be "appropriate for the evaluation of the safety of food additives" mandates that EPA must consider the relevance of both the test design and the test results to human carcinogenicity. For example, ACPA asserts that if the test produces cancer in the animals but that cancer would not be produced in humans then the substance does not induce cancer in animals under the Delaney clause because the test was inappropriate for an evaluation of human carcinogenicity. A failure to consider the relevance of test results to humans, ACPA contends, would make the focus of the Delaney clause protection of the health of experimental animals, not humans.

EPA disagrees with each step of ACPA's analysis. First, EPA believes that the feeding studies with experimental animals fall within the first clause of the Delaney clause. It is a difficult stretch to suggest that a substance that has produced cancer in an animal feeding study has not been "found to induce cancer when ingested by * * * animal[s]." This is especially the case when the alternative interpretation is that this phrase refers to a type of study—an epidemiological study of animals—which is rarely if ever used to evaluate carcinogenicity.

Moreover, the legislative history refutes ACPA's proposed interpretation. The second half of the Delaney clause concerning appropriate tests was included in the anti-cancer provision because of a concern that tests other than feeding studies might be deemed controlling under the Delaney clause. At the same time the "appropriate" tests clause was added, the original clause was amended to add a reference to ingestion, thus signaling a special status for ingestion studies.

Congressman Delaney's anti-cancer clause as initially drafted stated: "The Secretary shall not approve for use in food any chemical additive found to induce cancer in man, or, after tests, found to induce cancer in animals." H.R. 7798, 85th Cong., 1st Sess., section 409 (d), reprinted in XIV A Legislative History of the Federal Food, Drug, and Cosmetic Act at 97 [hereinafter cited as Leg. Hist.]. At first, the Department of Health, Education and Welfare (HEW) objected to a specific mention of cancer in the Food Additive Amendments but relented and proposed the anti-cancer language which was enacted. HEW explained in detail the reason for revising the initial anti-cancer clause:

> It would be important, also to use language that would provide the intended safeguards without creating unintended and unnecessary complications. For example, the language suggested by some to bar carcinogenic additives would, if read literally, forbid the approval for use in food of any substance that causes any type of cancer in any test animal by any route of administration. This could lead to undesirable results which obviously were not intended by those who suggested the language. Concentrated sugar solution, lard, certain edible vegetable oils, and even cold water have been reported to cause a type of cancer at the site of injection when injected repeatedly by hypodermic needle into the same spot in a test animal. But scientists have not suggested that these same substances cause cancer when swallowed by mouth.
>
> The enactment of a law which would seem to bar such common materials from the diet would place the agency that administered it in an untenable position. The agency would either have to try to enforce the law literally so as to keep these items out of the diet—evidently an impossible task—or it would have to read between the lines of the law an intent which would make the law workable, without a clear guide from Congress as to what was meant.
>
> This difficulty could readily be avoided, if there is still a desire to make specific mention of cancer in the bill, by providing that "no additive shall be deemed to be safe if it is found to induce cancer when ingested by man or animal, or if it is found, after tests which are appropriate to the evaluation of the safety of food additives, to induce cancer in animals."

104 Cong. Rec. 17415 (1958), XIV Leg. Hist. at 869 (reprinting a letter from Elliot L. Richardson, Assistant Secretary, Department of HEW). If HEW had intended that HEW be granted discretion to decide whether any test was appropriate for evaluating the safety of food additives, even ingestion studies, the word "appropriate" could have simply been inserted before "tests" in Congressman Delaney's draft. However, the proposed revision not only added language modifying the word "test" but rewrote the opening language of the anticancer provision by inserting a reference to ingestion and animals. This creates the clear inference that the appropriateness of ingestion studies was not open to question.

This was certainly the contemporaneous interpretation of the Delaney clause. In 1960, when the addition of a Delaney clause to the Color Additive Amendments was fully debated in Congress, the House Report on the Amendments described the Delaney clause as follows:

> This clause provides that a color additive shall be deemed unsafe and shall not be listed for any use which will or may result in ingestion of any part of such additive, if the additive is found to induce cancer when ingested by man or animal, or if it is found to induce cancer in man or animal by other tests, *not involving ingestion*, which are considered to be appropriate for the evaluation of the safety of additives for use in food.

H. Rep. No. 1761, 86th Cong., 2d Sess. 11 (1960), XVI Leg. Hist. at 680. Similarly, the Secretary of HEW indicated at hearings on the Color Additive Amendments that HEW interpreted the "ingestion" part of the Delaney clause as requiring the use of scientific tests:

> The conclusion that an additive "is found to induce cancer when ingested by man or animal" is a scientific one. The conclusion is reached by competent scientists using widely accepted scientific testing methods and critical judgment.

Color Additives: Hearings on H.R. 7624 and S. 2197 Before the Comm. on Interstate and Foreign Commerce, 86th Cong., 2d Sess. 62 (1960), XVI Leg. Hist. at 67 (statement of HEW Secretary Flemming). Finally, that the "ingestion" half of the Delaney clause was interpreted as covering feeding studies and thus as being the principal operative phrase in the Delaney clause is confirmed by HEW's reaction to a proposal to delete the first half of the Delaney clause. HEW objected arguing that this change "is obviously designed to weaken the anticancer clause and to allow room for the contention that our Department should establish tolerances to permit chemicals in food even though they had been found to induce cancer *when fed*." H. Rep. No. 1761, 86th Cong., 2d Sess. 83 (1960), XVI Leg. Hist. at 752 (reprinting letter to the Committee from HEW Secretary Flemming) (emphasis added). Following HEW's objections, this amendment was not further pursued.[1]

Second, even assuming for the sake of argument that feeding studies only fall within the second half of the Delaney clause, EPA still does not accept ACPA's suggestion that the "appropriate" tests language allows or requires EPA to consider the relevance to humans of the results of an animal study in determining whether a pesticide induces cancer in animals. Just as in the first half of the Delaney clause, the second half requires a finding of whether a substance induces cancer "in man *or* animal." The appropriate tests language does not override the clear intent of the statutory "or" but merely insures that the tests relate to the safety of food additives. As the legislative history quoted above shows, the appropriate tests language was designed to give the government the discretion to take into account the "route of administration" in determining whether the substance would cause cancer when "swallowed by mouth." Accordingly, EPA believes an "appropriate" test for the evaluation of the safety of food additives is one that yields information bearing on whether the substance will induce cancer in humans or animals when ingested. Clearly, an animal feeding study meets this criterion in all regards as to animals. Indeed, it would be strange to suggest otherwise. The very stimulus for the Delaney clause was that "[l]aboratory experiments have shown that a number of substances when added to the diet of test animals have produced cancer." H. Rep. No. 1761, 86th Cong., 2d Sess. 11 (1960), XVI Leg. Hist. at 680.

Contrary to ACPA's contention, a focus on the potential of a substance to cause cancer in animals without considering the relevance of this cancer to humans does not make the goal of the Delaney clause the protection of laboratory animals. The underlying rationale of the Delaney clause is that science cannot establish for humans a safe dose of a substance that induces cancer in animals. As explained by HEW:

> [The Delaney clause] allows the Department and its scientific people full discretion and judgment in deciding whether a substance has been shown to produce cancer when added to the diet of test animals. But once this decision is made, the limits of judgment have been reached and there is no reliable basis on which discretion could be exercised in determining a safe threshold dose for the established carcinogen.

H. Rep. No. 1761, 86th Cong., 2d Sess. 14 (1960), XVI Leg. Hist. at 683 (the Committee report adopted the statement of HEW Secretary Flemming). Thus, by enacting the Delaney clause, Congress concluded that barring substances based on findings in animals alone was the most practicable way to protect humans. ACPA may find this approach misguided but that does not make it not the law.

At bottom, ACPA's argument seeks to give EPA the discretion to set safe doses for substances found to induce cancer when fed to animals. That discretion, however, was removed by the Delaney clause. *Les* v. *Reilly*, 968 F.2d 985, 988 (9th Cir. 1992), cert. denied, 113 S.Ct. 1361 (1993). Once a finding of animal carcinogenicity is made, the operation of the Delaney clause is "automatic." *Public Citizen* v. *Young*, 831 F.2d 1108, 1121 (D.C. Cir. 1987), *cert. denied*, 485 U.S. 1006 (1988). The D.C. Circuit has previously concluded that the Delaney clause indicates that "Congress did not intend the FDA to be able to take a finding that a substance causes only trivial risk in humans and work back from that to a finding that the substance does not 'induce cancer in * * * animals.'" Id. Similarly, EPA may not work back from a conclusion that the results of an animal study are irrelevant to humans to a finding that the substance does not induce cancer in animals. "[T]he agency may not, once a color [or food] additive is found to induce cancer in test animals in the conventional sense of the term, undercut the statutory consequence." Id. at 1122.

Mechanistic and biologic information. EPA believes that mechanistic and biologic information is relevant to the Delaney clause determination on animal carcinogenicity to the extent such information bears on the question of whether a substance induces cancer in the test animal. Mechanistic and biologic information may have particular relevance to the issue of causation. However, having said that, EPA recognizes that proper evaluation under the Delaney clause of mechanistic and biologic information poses difficult questions. For example, ACPA contends that if a substance induces cancer through a secondary mechanism (e.g., the substance causes the growth of urinary tract stones and the stones irritate the urinary tract causing cancer), then the substance does not induce cancer within the meaning of the Delaney clause.

EPA does not believe that EPA or FDA has ever squarely decided this legal question in taking final action on a substance under the Delaney clause. Nor does EPA believe that question needs to be addressed in this notice. Although secondary mechanism arguments have been raised as to several of the pesticides at issue in this notice, as discussed elsewhere in this notice, EPA has decided either as a factual matter that those arguments are not adequately supported or that there exists other evidence showing cancer induction independent from any cancer produced through a secondary mechanism.

"Conclusive" evidence of carcinogenicity. Citing a prior FDA decision involving cyclamates and the Delaney clause, ACPA has contended that findings of carcinogenicity under

[1] To the extent any statement in the notice published at 58 FR 37802 (July 14, 1993) implies that ingestion studies fall within the "appropriate tests" half of the Delaney clause, that implication was inadvertent and is inconsistent with the statute and with prior EPA precedent (50 FR 20373, May 15, 1985).

the Delaney clause must meet some unusually high level of certainty. Other commenters also made this argument. EPA disagrees. Neither the statute, nor FDA precedent for that matter, support using any other than the general administrative standard of proof which is generally described as a preponderance of the evidence. The relevant words of the statute bar the establishment of a regulation for a food additive "found to induce cancer when ingested by man or animal * * *." The straightforward requirement to make a finding certainly does not impose some extraordinary level of proof.

Further, EPA does not believe the FDA decision on cyclamates requires a higher standard of proof. That decision does use the word "conclusive" in connection with the Delaney clause, but that is a factor of FDA having classified the studies involved in that case into one of three categories: (1) Conclusive or positive; (2) inconclusive but suggestive; or (3) negative (45 FR 61474, 61481–61482, September 16, 1980). This breakdown was made so as to explicate whether the proper showing of safety could be made under the section 409 safety standard excluding the requirements of the Delaney clause. FDA concluded that inconclusive but suggestive studies would have to be addressed by a petitioner attempting to show a compound was "safe" (45 FR 61477). FDA described a positive study as a study which "contains results that establish that a test substance causes cancer" (45 FR 61481). EPA has found nothing in this precedent to suggest that any standard other than a preponderance of the evidence applies to the Delaney clause finding.

Determination on the need for section 409 FARs. ACPA as well as several other commenters argued that EPA is legally required to determine if a section 409 FAR is necessary to prevent the adulteration of food prior to revoking such a FAR on Delaney clause grounds. Where there are grounds for revocation of a section 409 FAR unconnected to safety, EPA generally would, as a policy matter, rely on those grounds to revoke the FAR prior to revoking finally under the Delaney clause. However, as EPA has recently explained in the Coordination Policy statement (61 FR 2377, January 31, 1996), EPA is under no legal obligation to subordinate the Delaney clause to other grounds in a revocation proceeding.

EtO

Comment: The American Spice Trade Association (ASTA) submitted a panel report which concluded that EtO is not likely to induce cancer in animals or humans when ingested as a residue on spices. The panel contends that it is inappropriate to conclude that EtO causes cancer through ingestion based on inhalation data. Therefore the revocation of the section 409 FAR because of the Delaney clause is inappropriate.

EPA's response: EPA has concluded that it is appropriate to use inhalation data to evaluate the safety of EtO as a food additive. This conclusion is based on the finding of multiple benign and malignant tumors distant from the site of exposure, which suggests that EtO has tumor inducing potential independent of route of administration. Inhalation exposure to EtO was associated with multiple benign and malignant tumors in F344 rats and B6C3F1 mice. EtO was also associated with tumor formation following oral gavage administration to Fischer rats and subcutaneous administration to NMRI mice. In addition, EtO is a genotoxic agent *in vivo* and *in vitro*. The large *in vivo* genetic toxicity database shows that EtO produces effects distant from the site of exposure. Genetic effects noted *in vivo* include micronuclei, sister chromatid exchange, germ cell effects (dominant lethal), and heritable translocations; these effects were associated with intravenous or intraperitoneal injection and inhalation exposure (Dellarco et al. 1990). These genetic toxicity data provide further support for the conclusion that EtO induces cancer.

Comment: ASTA had a number of comments regarding exposure. These comments claim that:

(1) EtO is unstable in the acid pH of the stomach based on *in vitro* hydrolysis data.

(2) Ingested EtO is likely to be detoxified by glutathione present in the gastric mucosa and epithelial cells.

(3) EtO exposure via ingestion of treated spices is expected to be significantly lower than levels associated with tumors in rodents.

(4) Consumers are unlikely to be exposed to EtO via consumption of treated spices based on residue persistence studies submitted to EPA. The study allegedly showed EtO levels in spices at or below the limit of quantification within 60 days.

EPA's response: The issue central to the Delaney clause is whether EtO induces cancer in man or animals when ingested or in a study which is appropriate to evaluate the safety of a food additive. EtO is associated with cancer in animals following inhalation, oral, and subcutaneous administration. As explained above, EPA has determined that these studies are appropriate for the evaluation of the safety of EtO as a food additive. No data have been submitted which would establish affirmatively that all EtO residues in food would break down or be "detoxified" in the stomach. Therefore, EPA does not believe that it should reconsider the determination that inhalation data are appropriate for evaluating EtO as a food additive on these grounds. Further, as explained above, EtO is associated with genetic toxicity, including heritable mutation, *in vivo* following oral, inhalation, intraperitoneal, and intravenous administration.

The level of human exposure to EtO residues in treated spices is not relevant to the Delaney clause. As stated above, the critical issue is that EtO has been found to induce cancer in animals. The Delaney clause does not allow EPA to consider exposure levels. Although residue chemistry data submitted to the Agency show that EtO residues in spices dissipate over time, the data also show that sufficient residues remain so that a tolerance is needed for spices treated with EtO.

Comment: ASTA commented that the EPA Office of Pesticide Programs (OPP) should conduct a peer review of the carcinogenicity of EtO, and should not rely on a Health Assessment Document developed by the EPA Office of Research and Development (ORD) to establish the carcinogenicity of EtO.

EPA's response: The ORD Health Assessment Document cited in the proposal for this rule is an EPA document which reflects the position of the Agency on the carcinogenicity of EtO. This document was subjected to peer review, both internal and external, prior to publication. In addition, the content of the document was independently peer-reviewed in a public session by the Environmental Health Committee of EPA's Science Advisory Board. Therefore, the Agency does not believe that additional peer review of this finding is needed at this time.

Comment: ASTA stated its position that revocation of the FAR for EtO is a *de facto* cancellation of EtO's registration under FIFRA, and that therefore due process requires that FIFRA section 6 procedures be followed in this action. ASTA also suggested that EPA refer the matter of whether EtO induces cancer to the Scientific Advisory Panel (SAP).

EPA's response: EPA has clearly stated its policy on coordination between FFDCA and FIFRA. Congress has charged EPA with administering two statutes with different procedural schemes. As discussed in EPA's

Coordination Policy, EPA has taken an approach which harmonizes the two statutory standards to the extent possible. FIFRA does not require EPA to take action under FIFRA before acting under the FFDCA. EPA does not believe that the rulemaking procedures in the FFDCA violate Constitutional due process. With respect to ASTA's suggestion that EPA consult the SAP, there is no requirement that EPA refer FFDCA tolerance revocations to the SAP prior to taking action. The Agency has reviewed all the available information on EtO and has made its determination that EtO induces cancer within the meaning of the Delaney Clause. In addition, as noted above, the EPA Health Assessment Document for EtO, which included an evaluation of the chemical's carcinogenicity, was peer-reviewed in a public session by the Environmental Health Committee of EPA's Science Advisory Board.

Comment: The National Food Processors' Association (NFPA) and Grocery Manufacturers Association (GMA) commented that EPA should withdraw the proposed section 409 revocation of EtO pending a detailed reexamination of the data.

EPA's response: EPA has made the findings in this notice with respect to EtO after reviewing all available information, and sees no reason to withdraw the proposal based on the speculation that other information might become available someday which would disprove this finding. If interested persons submit new information on the carcinogenicity of EtO in the future, EPA will review it and consider then whether additional regulatory action is warranted.

Mancozeb

Comment: The Mancozeb Task Force (MTF) objected to EPA's conclusions that exposure to mancozeb causes an increased incidence of benign and malignant thyroid tumors in rats and an increasing trend of tumors at the highest dose tested (HDT). The MTF believes that these tumors resulted from exposure to ETU formed metabolically from mancozeb.

EPA's response: The Agency is aware that ETU is a contaminant and degradation product present in mancozeb, and that ETU is a plant and animal metabolite of mancozeb which is present in food treated with mancozeb. Exposure to either mancozeb or ETU results in induction of the same tumor type (thyroid tumors) in rats (ETU also induced thyroid and liver tumors in mice). Consistent with prior FDA decisions, EPA believes that the Delaney clause applies to metabolites of a food additive as well as the parent compound. (See, e.g., 56 FR 41902, 41909, August 23, 1991.)

Comment: The MTF also argued that the rat thyroid lesions resulted from overstimulation of the thyroid and the development of proliferative lesions when the threshold for thyroid-pituitary feedback is exceeded on a chronic basis.

EPA's response: This may be a plausible mechanism for the thyroid tumors in rats. However, EPA has not received sufficient evidence to show the mechanism through which mancozeb induces cancer. Moreover, as noted in EPA's response to ACPA's comments, EPA has not determined the legal relevance of secondary mechanism claims to the Delaney clause finding.

In the Agency's Draft Policy Document on Thyroid Follicular Carcinogenesis: Mechanistic and Science Policy Considerations, SAB Review Draft, May 1988, EPA explained a mechanism through which a substance could cause thyroid cancer:

> Studies over the last several decades in multiple laboratories and using a number of different treatment regimens (e.g., iodine deficiency) have demonstrated the significance of long-term thyroid-pituitary hormonal imbalance in thyroid carcinogenesis. A consistent progression of events is noted: reduction in thyroid hormone concentrations, elevation in thyroid stimulating hormone (TSH) levels, cellular hypertrophy and hyperplasia, nodular hyperplasia, and neoplasia. Hyperplasia and sometimes neoplasia of the pituitary may also be seen * * *. A block in any of the early steps act as a block for subsequent steps including tumor development, and cessation of treatment at an early stage in the progression results in regression toward normal thyroid structure and function.

Two basic questions must be addressed before this draft policy is applied. The MTF has not submitted data establishing that the neoplasms found in the mancozeb studies are due to thyroid-pituitary imbalance, or that other carcinogenic mechanisms can be discounted. Specifically, the MTF has not submitted data to demonstrate any of the following six points:

(a) Goitrogenic activity *in vivo*;

(b) Clinical chemistry changes (e.g., reduced thyroid hormone and increased TSH serum concentrations);

(c) Specific evidence of reduced hormone synthesis (e.g., inhibited iodine uptake) or increased thyroid hormone clearance (e.g., enhanced biliary excretion);

(d) Evidence of progression (e.g., hypertrophy/hyperplasia, nodular hyperplasia–neoplasia);

(e) Reversibility of effects after exposure is terminated; and

(f) Structure Activity Relationships (SAR) to other thyroid tumorigens.

Comment: The MTF also commented that the FAR for mancozeb in or on brans and flours is not necessary because residues do not concentrate in RTE foods above the level of the RAC tolerance, and that EPA should complete action on the Task Force's petition to revoke the FAR for brans and flours on that basis.

EPA's response: As discussed above in EPA's coordination policy, EPA does not have any obligation to determine whether or not a FAR is necessary before proceeding to revoke it. However, EPA has reviewed the Task Force's petition, and, as discussed in Unit V.A. of this preamble, where EPA agrees with the petition, EPA is revoking the FAR on grounds that the residues do not concentrate above the level of the RAC tolerance. The FARs for mancozeb in or on flours of oat, barley, rye and wheat, and for brans of barley and rye are not needed, and are being revoked on that basis. EPA did not agree with the petition with respect to oat bran, which is a RTE food. Therefore, the FAR for oat bran is being revoked because it violates the Delaney clause.

Propargite

Comment: Uniroyal Chemical Co., Inc. commented that the Agency has not performed a weight of the evidence review of all available data and information on propargite, including mechanistic considerations. Uniroyal also asserted that EPA's "induces cancer" determination does not reflect that one mutagenic study was negative and ignores all other mutagenicity studies. Based on one negative mutagenicity study and strong evidence for a secondary mechanism for tumors in rats, Uniroyal argued that propargite cannot be said to induce cancer.

EPA's response: After a full evaluation of all the data and supporting information regarding animal carcinogenicity, EPA concludes that exposure to propargite results in an increased incidence of undifferentiated sarcoma of the jejunum in both sexes of Sprague-Dawley rats. This rare (unusual site) and malignant tumor was produced with a high incidence and is fatal. The mutagenicity data support the carcinogenicity of propargite.

The commenter argues that the jejunal tumors were caused by a secondary mechanism involving cell proliferation. In support, the commenter submitted a study purporting to show that propargite only causes cell proliferation at high doses. The theory that cancer can be caused by cell proliferation, and that proliferation is subject to a

threshold, is just that—a theory. The Agency has yet to validate the cell proliferation model as it tentatively has done with regard to the mechanism involving thyroid-pituitary hormonal imbalance in thyroid carcinogenicity (see EPA's response to secondary mechanism comment on mancozeb, above). Important basic science data are needed, like those developed for the thyroid, before EPA can even consider this model.

With respect to the comment regarding mutagenicity data, propargite was demonstrated to be mutagenic in a Chinese hamster ovary cell gene mutation study in the absence, but not presence of metabolic activation; this indicates that propargite is a direct-acting mutagen. Propargite produced positive and negative results in two replicate experiments for micronuclei in mouse bone marrow. Propargite was negative in an older, unclassified Salmonella gene mutation assay and for unscheduled DNA synthesis. Overall, these data provide evidence for mutagenicity that would support a finding of carcinogenicity.

Comment: Uniroyal also commented that revocation of the FARs for propargite may increase dietary risk to consumers and raise the cost and lower the quality of food. Finally, Unireyal commented that raisins and dried tea should be classified as RACs rather than as processed foods.

EPA's response: The concerns raised by Uniroyal regarding relative dietary risks and cost or quality of food are not relevant to the analysis of FARs under the Delaney clause. The Delaney clause contains no provision for consideration of exposure levels, relative risks, or cost impacts. See *Les* v. *Reilly*, 968 F.2d 985 (9th Cir. 1992), *cert. denied*, 113 S.Ct. 1361 (1993).

With regard to whether raisins and dried tea are RACs or processed foods, EPA recently issued an interpretive ruling defining RACs. Under this ruling, commodities which are routinely dried for storage or transportation purposes are considered RACs, while commodities which are dried for the purpose of creating a distinct commodity are considered processed. As specifically discussed in that ruling, raisins are produced by a drying process that converts one distinct commodity (i.e. grapes) into another distinct commodity (i,e. raisins). Therefore, raisins are a processed food.

EPA has found that dried tea is also a processed food, but for a slightly different reason. Tea leaves are not only dried prior to storage and transport; some varieties constituting a significant amount, if not the majority, of tea imported into this country, are fermented to various degrees prior to drying. Fermenting is certainly within the meaning of "processing," therefore the status of dried tea as a processed food was not affected by the RAC interpretation of drying. Although there are some varieties of tea which are not fermented prior to the drying process, the propargite tea FAR applies to dried tea generally, and thus must be revoked.

Propyline Oxide

Comment: The Warren Chemical Co. (Warren) commented that inhalation studies should not be used to determine carcinogenicity because propylene oxide converts to propylene glycol in the stomach.

EPA's response: The Agency believes that inhalation studies are appropriate for evaluating the safety of propylene oxide due to the appearance of tumors in both mice and rats at a site distant (e.g. in the mammary gland) from the route of exposure (inhalation). EPA does not have sufficient data to establish that ingestion of propylene oxide residues in foods would only result in exposure to propylene glycol, as the commenter asserts. Therefore, the Agency believes that the inhalation data are appropriate for the evaluation of propylene oxide.

Comment: Warren also commented that EPA's finding that female mice showed a significant dose related trend of mammary gland adenocarcinomas relative to controls did not consider a statement in the study report. The authors of the study stated that the tumor incidence was within the range found in historical untreated controls, and that they did not consider the incidence of this tumor to be related to exposure to propylene oxide.

EPA's response: For comparisons of tumor incidence in treated and control animals, it is the concurrent control which is the primary reference. The following excerpt is from EPA's "Guidelines for Carcinogen Risk Assessment" (51 FR 33992–34003, September 24, 1986)

> To evaluate carcinogenicity, the primary comparison is tumor response in dosed animals as compared with that in contemporary matched control animals. Historical control data are often valuable, however, and could be used along with concurrent control data in the evaluation of carcinogenicresponses.

Thus, comparisons with historical controls are secondary to those with concurrent controls. Historical control data when it is from the same laboratory and same time period as that in which the study was performed may be used to determine if the concurrent control response is within the normal range. EPA often disagrees with authors of studies regarding the significance of certain observations. In this case, the EPA review considered the concurrent controls a more appropriate reference for comparing the tumor incidence in treated animals. In any event, there were tumors found in the rat study as well, which fact also forms part of the basis for EPA's finding that propylene oxide induces cancer.

Comment: Warren also commented that EPA should not consider fibroadenomas when applying the Delaney clause because a fibroadenoma could possibly disappear without becoming malignant.

EPA's response: A fibroadenoma is a benign neoplastic lesion. Adenocarcinomas are malignant and can arise within fibroadenomas. A fibroadenoma may or may not progress to a carcinoma. As discussed above, an increase in the incidence of malignant tumors or, where appropriate, benign tumors or a combination of benign and malignant tumors, satisfy the "induce cancer" standard under the Delaney clause. In any event, adenocarcinomas were also found in the study where fibroadenomas occurred.

Comment: Warren also argued that EPA should not rely on the rat gavage study for each of the following reasons:

(a) It showed tumors only in the forestomach, an organ humans do not have.

(b) EPA's peer review did not take into account the fact that propylene oxide converts in the stomach to propylene glycol.

(c) The study went on for three years instead of two, which is improper because older rats are more susceptible to cancer.

(d) Human stomachs have a protective lining which rat forestomachs do not have.

(e) Gavage, or pipetting substance into an animal's stomach, is not what "ingested" means in the context of the Delaney clause.

EPA's response: (a) The commenter points out that humans do not have forestomachs, and argues that tumors in this organ should be disregarded by EPA in assessing the carcinogenicity of propylene oxide. However, it is not always possible to draw a direct site to site correlation between tumors in different species. Just because humans do not have forestomachs does not mean that there could not be any tumorigenic response in another organ. In any event, the absence of a forestomach in humans does not affect the fact that cancer was induced in the rat forestomach.

(b) EPA addressed the issue of conversion of propylene oxide to propylene glycol in the stomach in its response to a prior comment above.

(c) The commenter argues that because the study lasted three years instead of two, the Q^* or cancer potency factor assigned to propylene oxide should have been revised. The fact that the study lasted three years instead of two does not necessarily mean that its findings were not valid. Although older rats may tend to get more cancer than younger rats, the concurrent control animals also aged, and their chance of developing tumors increased with that of the treated animals. Whether or not the Q^* should account for this element of the study is not relevant to the determination that tumors were produced in the study, and therefore propylene oxide induces cancer. An "induces cancer" finding under the Delaney clause does not depend on relative potency.

(d) The commenter speculates that the protective lining of the human stomach would protect it from any tumor-causing effects of exposure to propylene oxide, therefore rat forestomach tumors cannot be relevant to whether propylene oxide residues in food would cause cancer in humans. However, there is no data to support the commenter's theory that such a protective lining would have prevented the forestomach tumors in the rat study. As noted above, there is not necessarily a direct site to site correlation between species. EPA does not believe that this speculation forms any basis to disregard the rat gavage study.

(e) The Agency believes that studies where test compounds are administered to treated animals by gavage are "ingestion" studies within the meaning of the Delaney clause. EPA also believes that gavage studies are generally appropriate for the evaluation of the safety of food additives. See EPA's response to comments of Grocery Manufacturers' Association, below.

Comment: Finally, Warren commented that there is no alternative sterilant for cocoa or for nutmeats. The commenter noted that irradiation is not appropriate for treatment of cocoa powder because irradiated cocoa tends to turn rancid. The commenter also noted that irradiation is not a viable alternative for all spices because it degrades the oils and flavor of some spices (like chili powder). Finally, the commenter stated that irradiation would impose high costs on production of these commodities.

EPA's response: As noted earlier regarding costs of food, availability of pesticide alternatives is not relevant to the Agency's decisions on FARs under the Delaney clause. EPA can only consider whether the substance at issue induces cancer when ingested by man or animals, or when tested in a test which is appropriate for evaluating the safety of a food additive.

Comment: John A. Todhunter commented on behalf of Aberco, Inc., a registrant of pesticides containing propylene oxide. With regard to cocoa, Dr. Todhunter commented that there will be no propylene oxide residues in foods made with treated cocoa powder because the cocoa is incorporated into foods which are processed at high temperatures (i.e. baked or cooked foods). With regard to gums and spices, Dr. Todhunter commented that propylene oxide is not a pesticide under the FFDCA when it is used to sterilize gums and spices. The commenter argued that FDA has listed gums and spices as "generally regarded as safe" (GRAS), and that therefore anything which becomes a constituent of a GRAS substance through good manufacturing practices (GMP) cannot be regulated under section 409. The commenter cited FDA regulations at 21 CFR 182.10 (spices) and 184.1330 through 184.1351 (gums). With regard to starch, Dr. Todhunter commented that propylene oxide is not a pesticide under the FFDCA when it is used to sterilize starch because starch is not a RAC. The commenter also stated that there will be no propylene oxide residues on foods made with treated starch because the starch is later incorporated into foods and beverages which are all processed at high temperatures. Dr. Todhunter also recommended that EPA establish tolerances for propylene oxide on cocoa powder, gums and starch under section 406 of the FFDCA. Dr. Todhunter further commented that the nuts on which propylene oxide is used are not "processed nutmeats" but are RACs, and therefore propylene oxide should be regulated under FFDCA section 408 rather than 409.

EPA's response: EPA disagrees with most of these comments. First, propylene oxide, when used to sterilize these processed foods, is a pesticide as defined under FIFRA because it is used to destroy or mitigate pests. See 7 U.S.C. 136(u). Cocoa powder is a processed food which is treated before it moves in commerce, therefore propylene oxide is a food additive when used to treat cocoa powder. Whether residues would remain in the cocoa after it is incorporated into other foods is not relevant to whether or not a FAR is necessary for propylene oxide residues on cocoa powder.

Edible gums and spices are processed foods which are treated with propylene oxide before they move in commerce, therefore propylene oxide is a food additive when used to sterilize them. Whether or not use of propylene oxide is part of GMP for production of these foods is not relevant to whether or not a FAR is necessary for propylene oxide residues. The regulations cited are simply the FDA's listing of the gums and spices themselves as GRAS. The FDA regulations are not intended to make anything which may become part of the foods (such as a sterilant) GRAS.

Starch is a processed food which is treated before it moves in commerce, therefore propylene oxide is a food additive when used to treat starch. Whether residues would remain in a food made from treated starch after it is incorporated into other foods is not relevant to whether or not a FAR is necessary for propylene oxide residues on starch.

The notion that EPA should regulate pesticides in processed foods under FFDCA section 406 was raised by NFPA in their second petition submitted in July 1995. EPA responded to this issue in the notice issuing the Coordination Policy (61 FR 2377, January 25, 1996). To the extent that Congress left EPA with discretion to regulate pesticides under either sections 406 or 409, EPA has declined to change from its current practice.

With regard to nutmeats, EPA agrees that nutmeats per se are a RAC that should have a raw food tolerance established under FFDCA section 408. See Pesticide Assessment Guidelines, Subdivision O: Residue Chemistry Table II (October 1982, amended September 1995).

The current FAR for propylene oxide on processed nutmeats was established more than 25 years ago. EPA determined in 1982 that nuts were a RAC, and since then, has established raw food tolerances for nuts under FFDCA section 408. Although the FAR was established for "processed" nutmeats, it has been viewed by the industry as covering the current use of propylene oxide on nutmeats, regardless of whether they were considered raw or processed.

EPA has not yet reviewed propylene oxide in its pesticide reregistration program, at which time the discrepancy in the tolerance situation would have been addressed routinely. In light of the strict standard of the *Les* v. *Reilly* court decision, however, EPA has focused its attention more carefully on each of the statutory provisions affecting its decisions relating to tolerances. For instance, EPA has articulated or refined its policies in a number of areas, including its concentration, ready-to-eat

and raw/processed policies, discussed in Unit II of this preamble.

EPA has received a petition from SRS International corporation, on behalf of Aberco, Inc., to establish a 408 tolerance for propylene oxide on raw nutmeats. A notice of filing of this petition was published in the Federal Register on February 1, 1996 (61 FR 3696). The Agency is currently reviewing the petition and the toxicology and residue databases for propylene oxide, and will act on the petition as soon as practicable.

Simazine

Comment: Ciba-Geigy Corp. (Ciba) commented that the results of studies relied upon by EPA for its determination that simazine induces cancer are not appropriate for evaluation of the human safety of simazine as a food additive and do not demonstrate that simazine "induces cancer" within the meaning of Delaney Clause. Ciba's first argument for this premise was based on the fact that no increased incidence of any tumor type was observed in male or female mice which were fed simazine.

EPA's response: EPA has found that simazine induces cancer in animals when ingested within the meaning of the Delaney clause. As such, EPA was precluded from considering relevance of this finding to humans. (See response to ACPA's comments.) In construing the "induce cancer" standard as to animals, EPA follows a weight-of-the-evidence approach. After a full evaluation of all the data and supporting information regarding animal carcinogenicity, EPA concluded that exposure to simazine by ingestion results in increased incidence of malignant mammary gland carcinomas and malignant pituitary gland carcinomas in female Sprague-Dawley rats. The study's tumor incidence results were statistically significant when compared with concurrent controls and exceeded the upper limit of the historical control range of the testing laboratory. The pituitary tumors were fatal with a possibly accelerated onset at both the mid- and highest dose, and the mammary tumors also contributed to the increased mortality at the highest dose. There was equivocal evidence of kidney tubule tumors (an uncommon tumor type) in both sexes. The structural analogs are strongly supportive as these compounds mostly induced malignant mammary gland tumors in Sprague-Dawley rats. There was some evidence of genotoxicity for simazine, as well as for some of the analogs.

The Agency agrees that there was no increased incidence of tumors associated with Simazine exposure in the CD-1 mouse study. However, this negative study in mice does not convince EPA that simazine did not induce cancer in the study on rats.

Comment: Ciba also argued that the mid-dose level (100 ppm) in the Sprague-Dawley rat study exceeded the Maximum Tolerated Dose (MTD), based on significant reductions in survival at this dose. Based on this argument, Ciba asserted that increased incidence of mammary gland carcinomas resulted only at doses that exceeded the MTD, i.e., the mid- and high doses.

EPA's response: The Agency is not convinced that the mid-dose in female rats exceeded the MTD, because the pituitary tumors contributed to the mortality. There were statistically significant increases in mammary gland carcinomas and in pituitary adenomas and combined adenoma/carcinoma at both the mid-and highest-doses.

The study authors reported that the pituitary tumors (adenomas and carcinomas) in female rats were considered to be fatal "by virtue of their size and compression of the mid-brain" and thus contributed to the decreased survivability of both the mid- and highest-dose group females. In addition, their onset was 4–15 weeks earlier in the mid- and highest-dose groups as compared to the control and low dose groups.

Comment: Ciba also commented that atrazine, a structurally similar compound, while displaying a similar oncogenic profile in S-D rats and in mice, did not induce mammary tumors in the Fisher 344 female rat.

EPA's response: Simazine is one of several s-triazine compounds used in agriculture as herbicides. It is structurally related to atrazine, cyanazine, and propazine, among others. Although atrazine did not induce mammary tumors in Fisher 344 female rats, these structural analogs provide much evidence from other studies to support EPA's finding regarding simazine. Atrazine was associated with increased mammary gland tumors (primarily malignant tumors) in female Sprague-Dawley rats; early onset of mammary tumors was also observed. Cyanazine was also associated with increased mammary gland tumors (primarily malignant tumors in female Sprague-Dawley rats.) Propazine was associated with increased mammary gland tumors (primarily benign) in female Sprague-Dawley rats. The structural analogs are strongly supportive as these compounds mostly induced malignant mammary gland tumors in Sprague-Dawley rats.

Comment: Ciba asserted that simazine is not genotoxic, although the commenter admitted that a few positive genotoxicity results have been reported in the public literature. Ciba argued that potent genotoxic oncogens usually induce mammary tumors in almost one hundred percent of animals, while mammary tumor incidence with simazine was far short of one hundred percent.

EPA's response: Simazine was found negative in the Salmonella assay for gene mutations; this is consistent with other tested s-triazines. However, it is reported that simazine is positive for gene mutations in the mouse lymphoma assay, the Drosophila sex-linked recessive lethal assay, the cell transformation assay in Syrian hamster embryo cells, and plant cytogenetic assays. Simazine is also reported negative in several other assays including yeast assays, unscheduled DNA synthesis (UDS), sister chromatid exchanges, and for aneuploidy. Overall, these data suggest a possible mutagenic action for simazine. The Agency believes that the evidence of simazine's genotoxicity provides additional support for the finding that it induces cancer.

In addition, structural analogs of simazine have shown genotoxic actions as well. For example, cyanazine has evidence of positive genotoxic activity in the mouse lymphoma assay for gene mutations and for UDS in rat hepatocytes, and propazine induces gene mutations in the cultured V79 cell assay for gene mutations.

Comment: Ciba argued that Sprague-Dawley rats have a high spontaneous background rate of mammary tumors, and that any mammary tumors induced by simazine are hormonally-mediated and therefore have a threshold. Ciba asserted that therefore simazine's carcinogenicity should be regulated qualitatively with a safety factor and not quantitatively.

EPA's response: Simazine induced increased incidence of malignant mammary gland carcinomas and malignant pituitary gland carcinomas in female Sprague-Dawley rats. Mammary tumor incidence was as high as 78%, and was outside the historical control incidence of the testing laboratory. The pituitary and mammary tumors also contributed to the observed increased mortality. There was equivocal evidence of kidney tubule tumors (an uncommon tumor type) in both sexes. The structural analogs are strongly supportive as these compounds mostly induced malignant mammary gland tumors in Sprague-Dawley rats. There was some evidence of genotoxicity for Simazine as well as for some of the analogs.

Although a hormonal mechanistic argument for the mammary tumors was proposed by the commenter, neither the Agency nor the scientific community at large has yet developed or identified protocols which could provide data to demonstrate such a mechanism. No agreed upon experimental model has been identified, and the critical step associated with the mode of action has not been identified. As discussed with respect to cell proliferation and jejunal tumors in EPA's response to comments on propargite, important basic science data must be developed, as were developed for the thyroid mechanism, before the Agency can evaluate the validity of the claim that simazine induces cancer through a hormonal mechanism. (See also EPA's response to ACPA regarding secondary mechanisms in general.)

Other Comments

Comment: GMA commented that FDA determined in 1974 that the term "ingestion" in the Delaney clause does not include gavage studies, and therefore the results of a gavage study would invoke the Delaney clause only if this type of study is found to be scientifically "appropriate" as a model for dietary exposure. The commenter submitted an excerpt of FDA's "Study of the Delaney Clause and Other Anti-Cancer Clauses," (Agriculture, Environmental and Consumer Protection Appropriations for 1975: Hearings before a Subcommittee on Appropriations, House of Representatives, 93rd Cong., 2nd Sess., part 8, 1974).

EPA's response: EPA disagrees with this comment. Gavage is merely one of several different techniques for administering a test compound to animal orally. Gavage is sometimes used instead of incorporating the substance into an animal's food because a more precise dose can be given by gavage. EPA could not find any reference, other than the report cited, where FDA stated that a gavage study must be evaluated under the "appropriate test" prong of the Delaney clause rather than the "ingestion" prong. Moreover, there is no explanation in the report as to why a gavage study should not be considered an ingestion study. In any event, it is not necessary to determine whether gavage is ingestion for purposes of this notice because EPA believes that gavage studies are generally appropriate for the evaluation of the safety of a food additive because they involve dietary exposure to the test substance, albeit by forced feeding.

VII. Procedural Matters

A. Filing of Objections and Requests for Hearings

Any person adversely affected by this final rule may file written objections to the final rule, and may include with any such objection a written request for an evidentiary hearing on the objection. Such objections must be submitted to the Hearing Clerk on or before April 22, 1996. A copy of the objections and hearing requests filed with the Hearing Clerk shall be submitted to the Office of Pesticide Programs Docket Room. Regulations applicable to objections and requests for hearings are set out at 40 CFR parts 178 and 179. Those regulations require, among other things, that objections specify with particularity the provisions of the final rule objected to, the basis for the objections, and the relief sought. Additional requirements as to the form and manner of the submission of objections are set out at 40 CFR 178.25. The Administrator will respond as set forth in 40 CFR 178.30, 178.35 and/or 178.37 to objections that are not accompanied by a request for evidentiary hearing.

A person may include with any objection a written request for an evidentiary hearing on the objection. A hearing request must include a statement of the factual issues on which a hearing is requested, the requestor's contentions on each such issue, and a summary of any evidence relied upon by the requestor. Additional requirements as to the form and manner of submission of requests for an evidentiary hearing are set out at 40 CFR 178.27. Under 40 CFR 178.32(c), the Administrator, where appropriate, will make rulings on any issues raised by an objection if such issues must be resolved prior to determining whether a request for an evidentiary hearing should be granted. The Administrator will respond to requests for evidentiary hearings as set forth in 40 CFR 178.30, 178.32, 178.35, 178.37, and/or 179.20. Under 40 CFR 178.32(b), a request for an evidentiary hearing on an objection will be granted if the objection and request have been properly submitted and if the Administrator determines that the material submitted show:

(1) There is a genuine and substantial issue of fact for resolution at a hearing.

(2) There is a reasonable possibility that available evidence identified by the requestor would, if established, resolve one or more of such issues in favor of the requestor.

(3) Resolution of one or more of the factual issues in the manner sought by the person requesting the hearing would be adequate to justify the action requested.

Any person wishing to comment on any objections or requests for a hearing may submit such comments to the Hearing Clerk on or before May 6, 1996.

B. Effective Date

EPA is making this final rule effective May 21, 1996. In addition, if EPA does not receive objections to this order, this order and the factual and legal basis for this order, become final and are not judicially reviewable. See section 409(g)(1), 21 U.S.C. 348 (g)(1) and *Nader v. EPA*: 859 F.2d 747 (9th Cir. 1988), *cert. denied*, 490 U.S. 1931 (1989). For example, if an interested person disagrees with a necessary finding in this order but agrees with the outcome, that person must file timely objections to that finding in this order; if no objection to the finding is made, the finding will become final for purposes of any future proceedings to which that finding is relevant.

C. Request for Stays of Effective Date

A person filing objections to this final rule may submit with the objections a petition to stay the effective date of this final rule. Such stay petitions must be submitted to the Hearing Clerk on or before April 22, 1996. A copy of the stay request filed with the Hearing Clerk shall be submitted to the Office of Pesticide Programs Docket Room. A stay may be requested for a specific time period or for an indefinite time period. The stay-petition must include a citation to this final rule, the length of time for which the stay is requested, and a full statement of the factual and legal grounds upon which the petitioner relies for the stay. In determining whether to grant a stay, EPA will consider the criteria set out in the Food and Drug Administration's regulations regarding stays of administrative proceedings at 21 CFR 10.35. Under those rules, a stay will be granted if it is determined that:

(1) The petitioner will otherwise suffer irreparable injury.

(2) The petitioner's case is not frivolous and is being pursued in good faith.

(3) The petitioner has demonstrated sound public policy grounds supporting the stay.

(4) The delay resulting from the stay is not outweighed by public health or other public interests.

Under FDA's criteria, EPA may also grant a stay if EPA finds such action is

in the public interest and in the interest of justice.

Any person wishing to comment on any stay request may submit such comments and objections to a stay request, to the Hearing Clerk, on or before May 6, 1996. Any subsequent decisions to stay the effect of this order, based on a stay request filed, will be published in the **Federal Register**, along with EPA's response to comments on the stay request.

VIII. Regulatory Requirements

A. Executive Order 12866

EPA submitted this action to the Office of Management and Budget (OMB) for review and any changes made during that review have been documented in the public record.

EPA has estimated the following economic impacts on the affected pesticide use sites:

1. Spices

EtO may currently be used either on whole spices under its raw food tolerance (40 CFR 180.151), which are then ground (processed), or directly on ground spices under the processed food tolerance being revoked today. Sixty to eighty percent of the American spice supply is imported, and an estimated 22% of those imported spices are treated with EtO.

EPA does not have information on what portion of EtO treatments are made to whole as opposed to ground spices. If EtO were unavailable for use on all spices (both whole and ground), there would be an estimated impact of $18 million to $27 million per year in increased costs of alternative treatments and loss of some untreated product. Impacts are unlikely to be this high, because only the tolerance on ground spices is being revoked. The section 408 tolerance will remain, thus allowing continued use of EtO on whole spices. To the extent that spices are currently treated whole, a portion of the above estimated impacts will not be incurred.

Moreover, EPA believes that some portion, possibly a substantial portion, of spices currently treated in ground form can be shifted to treatment in whole form. If a change to treating them whole would cost less than substitution of alternatives, impacts would be further reduced.

Alternatives to EtO treatment are limited to irradiation treatment and heat-based technologies, both of which have practical limitations. There is currently insufficient capacity of contract irradiation facilities to handle all spices currently treated with EtO. The majority of these facilities' business comes from the sterilization of medical devices which have rigorous hygienic specifications causing most facilities to not accept spices. Current heat-based technologies have an adverse effect on the color and flavor of some spices. However these limitations are expected to be reduced over time by the industry.

Only about one percent of the total U.S. spice supply is treated with propylene oxide and its loss is not expected to cause significant economic impacts.

2. Nutmeats

Propylene oxide is used to reduce microbial contamination of raw nutmeats (except peanuts) which are to be used in other food products such as ice cream, cheese, ready-to-eat cereals, some baked goods and some confections. It is used because these foods are not processed at high enough temperatures to reduce microbial contamination to acceptable levels. There appear to be no viable alternatives to propylene oxide for nutmeats used in these foods.

The section 409 FAR being revoked today does not authorize propylene oxide residues in raw nutmeats, only processed nutmeats. At the time of proposal there was no section 408 tolerance covering use of propylene oxide on raw nutmeats. The proposed revocation of the processed nutmeat tolerance would have left no tolerance covering any use of propylene oxide on nutmeats. As a result, EPA received considerable comment on the potential economic impacts of the loss of propylene oxide.

Information on the impacts of the loss of propylene oxide for nutmeats is limited, and quantifying these impacts is complicated. U.S. nut production is nearly 1 billion pounds annually. According to commenters, about 10 to 20 percent of all nutmeats are currently treated with propylene oxide. At a value of approximately $1.60 per pound, the farm value of the 10–20% of nutmeats that are treated is $160–320 million. Commenters suggested that this 10–20 percent segment of the nutmeat industry would be a total loss if propylene oxide became unavailable for use. EPA believes that this estimate is high because it assumes that there are no alternative uses of the nuts.

Untreated nuts currently are roasted or salted or added to other foods that are processed under conditions that effectively reduce microbial contaminants to acceptable levels. EPA believes that nuts that cannot be treated with propylene oxide will not be a total loss, but will be diverted into alternative uses. EPA cannot estimate with current information how much this would reduce the overall impacts on the nutmeat industry, nor can EPA estimate the impacts on the food industries whose nut supply could be severely curtailed. EPA believes that there would be substantial incentive for the affected industries to develop alternative practices or treatments to reduce microbial contamination in raw nutmeats.

EPA has received a petition to establish a section 408 raw food tolerance for propylene oxide on nutmeats. If a section 408 tolerance is granted, propylene oxide could continue to be used on nutmeats, and there would be no impacts.

3. Cocoa

Impacts to the cocoa industry of losing the use of propylene oxide are expected to be minor or insignificant. There are no chemical alternatives to propylene oxide for use on cocoa. However, with proper handling and processing techniques cocoa powder can be safely produced without propylene oxide. The U.S. imports all of its cocoa, and generally, only that cocoa which comes from relatively unsanitary processing plants (50 percent or less) is treated with propylene oxide. Without propylene oxide, switching to markets with higher quality cocoa beans and better processing plant management techniques may cause slightly higher prices to consumers for products containing cocoa powder. In 1994, the U.S. imported over 650,000 metric tons of cocoa, valued at $1 billion.

4. Dried Tea

Insignificant impacts are expected on the dried tea industry from the loss of the propargite FAR. Propargite is not registered for use in the U.S. on dried tea and is not the miticide of choice in tea exporting countries. Dicofol is the preferred miticide on tea and its FAR currently remains in effect.

5. No impacts

No impacts are expected from revocation of the FARs for the following processed foods:

Propylene oxide is no longer registered for use on the following: Glace fruit, gums, dried prunes, and starch.

EPA no longer establishes FARs in potable water. Therefore, no impact is expected due to this FAR revocation.

For the 13 FARs that are not needed (listed in table I) the section 408 tolerances and registered uses will remain effective. Therefore, no impact is expected.

Three of the section 409 FARs being revoked today also have section 408 tolerances which were proposed for revocation in the **Federal Register** on March 1, 1996 (61 FR 8174). The estimated impacts from the loss of these three pesticide uses are included in that notice. These FARs are mancozeb/oat bran, propargite/dried figs, and simazine/sugarcane molasses.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (Pub. L. 96–354; 94 Stat. 1164, 5 U.S.C. 601 *et seq.*) requires EPA to analyze regulatory options to assess the economic impact on small businesses, small governments and small organizations.

In general, regulating pesticide residues and FARs in food is indiscriminate with respect to the size of the farm or business that was the source or processor of the food. The existence or absence of FARs, and the levels at which FARs are set must logically apply to all food available to U.S. consumers. In this instance, there is unlikely to be a regulatory option that would treat small businesses differently than large businesses with respect to pesticide FARs. In any event, under the Delaney clause, the Agency is compelled to take this action without regard to the economic impacts on either large or small entities.

C. Paperwork Reduction Act

This order does not contain any information collection requirements subject to review by Office of Management and Budget under the Paperwork Reduction Act of 1980, 44 U.S.C. 3501 *et seq.*

D. Unfunded Mandates Reform Act and Executive Order 12875

Under Title II of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), this action does not result in the expenditure of $100 million or more by any State, local or tribal governments, or by anyone in the private sector, and will not result in any "unfunded mandates" as defined by Title II. The costs associated with this action are described in the Executive Order 12866 section of this preamble.

Under Executive Order 12875 (58 FR 58093, October 28, 1993), EPA must consult with representatives of affected State, local, and tribal governments before promulgating a discretionary regulation containing an unfunded mandate. This action does not contain any mandates on States, localities or tribes and is therefore not subject to the requirements of Executive Order 12875.

List of Subjects in 40 CFR Part 185

Environmental protection, Food additives, Pesticides and pests.

Dated: March 15, 1996.

Lynn R. Goldman,

Assistant Administrator for Prevention, Pesticides and Toxic Substances.

Therefore, 40 CFR part 185 is amended as follows:

PART 185—[AMENDED]

1. The authority citation for part 185 continues to read as follows:

Authority: 21 U.S.C. 346a and 348.

§ 185.500 [Removed]

2. By removing § 185.500.

§ 185.2850 [Removed]

3. By removing § 185.2850.

§ 185.4600 [Removed]

4. By removing § 185.4600.

§ 185.5000 [Amended]

5. By removing from the table in § 185.5000 the entries for "Figs, dried", "Raisins" and "Tea, dried."

Part VI

Environmental Protection Agency

Consumer Labeling Initiative; Notice of Project Initiation; Notice

ENVIRONMENTAL PROTECTION AGENCY

[OPPTS–00169; FRL–4956–8]

Consumer Labeling Initiative; Notice of Project Initiation

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA is launching a voluntary Consumer Labeling Initiative (CLI) pilot project to invite ideas from its customers, including consumers, industry, and health and safety professionals, on ways to improve the environmental, health, and safe use information appearing on household product labels, specifically home and garden pesticides and household hard surface cleaners. The project goal is to ensure that consumers have and understand the information they need in order to make responsible product choices based on their own needs and values, and to use chosen products safely as directed. This voluntary project is not intended to produce new regulations or mandatory requirements.

DATES: Written submissions must be received on or before April 22, 1996.

ADDRESSES: All nonconfidential submissions should be sent to: OPPT Document Control Officer (7407), AR-139 - Consumer Labeling Initiative, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Nonconfidential submissions will be placed in the Administrative Record, file number AR-139, for public inspection. Persons interested in reviewing the record should contact the TSCA Nonconfidential Information Center (NCIC), NE Mall Rm. B-607, 401 M St., SW., Washington, DC 20460, (202) 260-7099. The TSCA NCIC is open from noon to 4 p.m., Monday through Friday, excluding legal holidays. See the SUPPLEMENTARY INFORMATION unit of this document for information on submitting comments containing confidential business information (CBI).

Information may also be submitted electronically by sending electronic mail (e-mail) to: ncic@epamail.epa.gov. Electronic communications must be submitted as an ASCII file avoiding the use of special characters and any form of encryption. Submissions will also be accepted on disks in WordPerfect in 5.1 file format or ASCII file format. All submissions in electronic form must be identified by the file number "AR-139." No CBI should be submitted through e-mail. Electronic comments on this notice may be filed online at many Federal Depository Libraries. Additional information on electronic submissions can be found in the SUPPLEMENTARY INFORMATION unit of this document.

FOR FURTHER INFORMATION CONTACT: Mary F. Dominiak, CLI Task Force Co-Chair, Chemical Control Division (7405), Office of Pollution Prevention and Toxics, Rm. E-209B, 401 M St., SW., Washington, DC 20460, (202) 260-3068.

SUPPLEMENTARY INFORMATION: EPA is interested in improving the labeling of products used in the home. Of particular concern are labels of pesticide products which are often difficult to understand and inconsistent with non-pesticide products of similar composition, such as cleaners. EPA is proposing that the CLI examine labeling of certain non-pesticide household products to instruct this effort, and to seek ways in which the consumer can be better served by the way information is presented on like kinds of products. EPA is not proposing to duplicate efforts of the Consumer Product Safety Commission (CPSC), and in fact has included CPSC in the CLI Task Force to both learn from the Agency's experience, and to avoid any potential unnecessary overlap between EPA and CPSC. Specifically, EPA is not planning to propose regulatory changes to non-pesticide household product labeling which is already under the purview of CPSC. The CLI is a voluntary, partnership effort in the spirit of reinventing government to find better ways to serve industry and consumer customers. The CLI is intended to make it easier for consumers to find and understand environmental, health, and safe use information on household chemical product labels. The CLI pilot project will focus on home and garden pesticides and on household hard surface cleaners, including disinfectant and antimicrobial cleaning products.

EPA has formed a special State and Federal CLI Task Force including representatives from the CPSC, the Federal Trade Commission (FTC), the Food and Drug Administration (FDA), the Vermont Agency of Natural Resources, the California Office of Environmental Health and Hazard Assessment, the American Association of Pest Control Officials (AAPCO), and the Forum of State and Tribal Toxic Actions (FOSTTA). Through the CLI Task Force, EPA will closely coordinate with other regulatory agencies responsible for consumer labeling in order to learn from their experiences and to avoid duplicating or interfering with their existing regulatory programs and requirements. The Task Force will seek voluntary approaches for achieving its goals and will cooperate across Federal and State programs and with international, industry, consumer, and environmental groups. New regulations and mandatory requirements are not the intended outcome of the CLI, but the project may recommend subsequent rulemaking to amend existing FIFRA regulations in order to remove barriers to label improvements suggested by the CLI for household pesticide products.

The pilot project will focus on assessing consumer needs regarding labeling as it relates to the use and disposal of home and garden pesticides and household hard surface cleaners, including disinfectant and antimicrobial products. The Task Force will assist EPA in: (1) Identifying and inviting input from the diverse stakeholders who are interested in the issues, including companies and organizations interested in becoming partners in exploring the issues of label improvement; (2) conducting focus groups to ask consumers directly how to improve both the content and presentation of environmental, health, and safe use information on labels; and (3) conducting a review of the existing literature to update and expand the current understanding of consumer-related product labeling. This information will be used by EPA to generate options and recommendations to the Administrator for future private and Agency action to bring about label improvement.

Additional details and descriptive materials on this project can be obtained by calling the number appearing in FOR FURTHER INFORMATION CONTACT. Interested parties are invited to help by providing information regarding existing research on consumer labeling issues. Producers of household consumer products who are interested in becoming industry partners in this project are invited to call and identify themselves. Industry partners may be asked to share their knowledge of the scientific, marketing, economic, and other factors affecting product labeling, and to take leadership roles, e.g., piloting potential labeling improvements.

An administrative record has been established for this project under file number "AR-139." A public version of this record, including printed, paper versions of electronic submissions, which does not include any information claimed as CBI, is available for inspection from noon to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in the TSCA Nonconfidential Information Center, Rm. NE-B607, 401 M St., SW., Washington, DC 20460.

Electronic submissions can be sent directly to EPA at:

ncic@epamail.epa.gov

Electronic information must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

The official record for this project, as well as the public version, as described above, will be kept in paper form. Accordingly, EPA will transfer all submissions received electronically into printed, paper form as they are received and will place the paper copies in the official record which will also include all information submitted directly in writing. The official record is the paper record maintained at the address in ADDRESSES at the beginning of this document.

Any person who submits written information containing CBI must mark the submission as "Confidential Business Information." Submissions not claimed as confidential at the time of submission will be placed in the public file. Any submissions marked as "Confidential Business Information" will be treated in accordance with the procedures in 40 CFR part 2. Any party submitting information claimed to be CBI must prepare and separately submit a public version of the information that EPA can place in the public file. CBI information should be submitted in triplicate to Document Control Office (7407), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. CBI submissions should be mailed in a double envelope with "CBI" and the Administrative Record file number AR-139 marked on the inner envelope, and the submission should be marked with Administrative Record file number AR-139.

Dated: March 5, 1996.

Lynn R. Goldman,

Assistant Administrator, Office of Prevention, Pesticides and Toxic Substances.

Acquisition regulations:
Contract financing; comments due by 3-25-96; published 1-24-96
Federal Acquisition Regulation (FAR):
Mentor-protege program; comments due by 3-26-96; published 1-26-96

ENERGY DEPARTMENT
Radiation protection of public and environment; comments due by 3-25-96; published 2-22-96

ENVIRONMENTAL PROTECTION AGENCY
Air pollution control; new motor vehicles and engines:
Heavy-duty vehicles and engines; 1996 and 1998 model year emission standards; nonconformance penalties; comments due by 3-25-96; published 2-23-96
Air quality implementation plans; approval and promulgation; various States:
Delaware; comments due by 3-29-96; published 2-28-96
Maryland; comments due by 3-29-96; published 2-28-96
Texas; comments due by 3-29-96; published 1-29-96
Hazardous waste:
Land disposal restrictions--
Definitions and clarifications; comments due by 3-25-96; published 1-25-96
Solid wastes:
State/tribal permit program adequacy determination; municipal solid waste facilities; comments due by 3-26-96; published 1-25-96
Superfund program:
National oil and hazardous substances contingency plan--
National priorities list update; comments due by 3-25-96; published 2-22-96
National priorities list update; comments due by 3-25-96; published 2-22-96
Toxic substances:
Acrylamide and N-methylolacrylamide grouts; ban; comments due by 3-29-96; published 2-28-96
Water pollution control:
National pollutant discharge elimination system--
Marine waters; secondary treatment requirements; comments due by 3-28-96; published 2-27-96
Publicly owned treatment works, etc.; permit application requirements; comments due by 3-29-96; published 3-4-96
Water programs:
Pollutants analysis test procedures; guidelines--
Oil and grease and total petroleum hydrocarbons; comments due by 3-25-96; published 1-23-96

FEDERAL COMMUNICATIONS COMMISSION
Common carrier services:
Telephone number portability; policy and technical issues; comments due by 3-29-96; published 3-19-96
Radio services, special:
Aviation services--
Aeronautical advisory stations (unicoms); automatic operation; comments due by 3-29-96; published 3-6-96
Radio stations; table of assignments:
Oregon; comments due by 3-29-96; published 2-9-96

FEDERAL RESERVE SYSTEM
Freedom of Information Act:

Availability of Information; processing rules; comments due by 3-29-96; published 2-28-96

International banking operations (Regulation K):

Foreign banks, shell branches management; U.S. branches or agencies prohibition from management through offshore branches; comments due by 3-25-96; published 2-23-96

LIST OF PUBLIC LAWS

This is a list of public bills from the 104th Congress which have become Federal laws. It may be used in conjunction with "PLUS" (Public Laws Update Service) on 202–523–6641. The text of laws is not published in the **Federal Register** but may be ordered in individual pamphlet form (referred to as "slip laws") from the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 (phone, 202–512–2470).

H.R. 2778/P.L. 104–117

To provide that members of the Armed Forces performing services for the peacekeeping efforts in Bosnia and Herzegovina, Croatia, and Macedonia shall be entitled to tax benefits in the same manner as if such services were performed in a combat zone, and for other purposes. (Mar. 20, 1996; 110 Stat. 827)

Briefings on How To Use the Federal Register
For information on briefings in Washington, DC and Raleigh, NC, see announcement on the inside cover of this issue.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the **Federal Register** as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to help@eids05.eids gpo.gov; by faxing to (202) 512–1262; or by calling (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $494, or $544 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $433. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA or MasterCard. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 61 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development of regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC
[Two Sessions]
WHEN: March 26, 1996 at 9:00 am
April 23, 1996 at 9:00 am
WHERE: Office of the Federal Register Conference Room, 800 North Capitol Street, NW., Washington, DC (3 blocks north of Union Station Metro)
RESERVATIONS: 202–523–4538

RALEIGH, NC
WHEN: April 16, 1996 at 9:00 am
WHERE: Federal Building and U.S. Courthouse, Room 209, 310 New Bern Avenue, Raleigh, NC 27601
RESERVATIONS: 1–800–688–9889

Rules and Regulations

Federal Register
Vol. 61, No. 58
Monday, March 25, 1996

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

FARM CREDIT ADMINISTRATION

12 CFR Part 615

RIN 3052–AB66

Funding and Fiscal Affairs, Loan Policies and Operations, and Funding Operations; Global Debt

AGENCY: Farm Credit Administration.

ACTION: Final rule.

SUMMARY: The Farm Credit Administration (FCA) adopts as final without change an interim rule that clarifies the Federal Farm Credit Banks Funding Corporation's (Funding Corporation) statutory authority to use more than one fiscal agent to facilitate the sale of Systemwide debt securities. The rule permits the Funding Corporation to employ fiscal agents other than Federal Reserve Banks (FRBs) for issuance of dollar denominated Systemwide debt securities in foreign capital markets. The rule recognizes the authority of the Funding Corporation to issue, sell, and distribute Systemwide debt securities on behalf of the Farm Credit banks (banks) on a global basis and allows the banks to engage in debt marketing practices used by other Government-Sponsored Enterprises (GSEs).

EFFECTIVE DATE: January 2, 1996.

FOR FURTHER INFORMATION CONTACT:
Laurie A. Rea, Policy Analyst, Office of Examination, Farm Credit Administration, McLean, VA 22102–5090, (703)883–4498;

or

William L. Larsen, Senior Attorney, Office of General Counsel, Farm Credit Administration, McLean, VA 22102–5090, (703)883–4020, TDD (703)883–4444.

SUPPLEMENTARY INFORMATION: On November 24, 1995, the FCA published an interim rule with a request for public comments (60 FR 57916). The interim rule clarified the Funding Corporation's statutory authority to employ fiscal agents other than FRBs for issuance of dollar-denominated Systemwide debt securities in foreign capital markets and required the Funding Corporation Board of Directors to approve each prospective global agent. The interim rule also established a new subpart that differentiates Systemwide debt securities distributed outside the United States from those issued through the FRBs under existing Funding Corporation programs. In adopting the interim rule, the FCA noted that marketing debt internationally may broaden the investor base for Systemwide debt securities and lead to lower funding costs.

The FCA received one comment on the interim rule. In its comment letter, the Funding Corporation supported the interim rule as essential for the successful issuance of securities under a global debt program. The Funding Corporation also requested clarification on the reference in the preamble to "* * * the requirement that the Funding Corporation Board of Directors approve each prospective global agent *and clearing system*" (60 FR 57919) (emphasis added). The Funding Corporation pointed out that, in contrast, the interim rule does not refer to Funding Corporation board approval of clearing systems but only to approval of "each global agent" (§ 615.5502(b)).

The preamble was designed to emphasize the significant role a global agent plays in global debt offerings rather than place an additional requirement on the Funding Corporation Board of Directors. The intent of the regulation is only to require the Funding Corporation Board of Directors to approve each prospective global agent. The preamble broadly contrasts the operational risks of using a global agent and international clearing system(s) with the operational risks of using the FRBs as fiscal agent and the FRBs' book-entry system and recognizes that the global agent will have significant influence on the determination of which international clearing system(s) are used.

As a practical matter, the Funding Corporation, global agent, and dealers will agree on the clearing system(s) that will be made available for clearance and settlement of transactions in advance of any primary distribution of global debt securities. Therefore, information concerning the clearance and settlement procedures and the responsibilities of program participants can be provided in either the offering circular or pricing supplement.

With this clarification, the FCA Board adopts the interim rule amending 12 CFR part 615, which was published at 60 FR 57916 on November 24, 1995, as final without change.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–NM–48–AD; Amendment 39–9549; AD 96–07–01]

Airworthiness Directives; McDonnell Douglas Model DC–10–10, –15, –30, and –40 Series Airplanes, and KC–10A (Military) Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), applicable to certain McDonnell Douglas Model DC–10 series airplanes and KC–10A (military) airplanes, that requires visual inspections to detect failure of the attachments located in the banjo No. 4 fitting of the vertical stabilizer. This amendment also requires an eddy current inspection to detect cracking of the flanges and bolt holes of that fitting, and repair or replacement of attachments. This amendment is prompted by reports of failed attachments of the vertical stabilizer; the failures are attributed to fatigue. The actions specified by this AD are intended to prevent loss of the fail safe capability of the vertical stabilizer due to cracking of its attachments.

DATES: Effective April 24, 1996.

The incorporation by reference of certain publications listed in the regulations is approved by the Director of the **Federal Register** as of April 24, 1996.

ADDRESSES: The service information referenced in this AD may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1–L51 (2–60). This information may be examined at the Federal Aviation Administration (FAA), Transport Airplane Directorate, Rules Docket, 1601 Lind Avenue SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, Transport Airplane Directorate, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the **Federal Register**, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: John Cecil, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (310) 627–5322; fax (310) 627–5210.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–10 series airplanes and KC–10A (military) airplanes was published in the **Federal Register** on July 18, 1995 (60 FR 36749). That action proposed to require repetitive visual inspections to detect failure of the attachments located in the banjo No. 4 fitting of the vertical stabilizer. That action also proposed to require an eddy current inspection to detect cracking of the flanges and bolt holes of that fitting, and repair or replacement of attachments.

Interested persons have been afforded an opportunity to participate in the making of this amendment. Due consideration has been given to the comments received.

Two commenters request that the proposed compliance time for the repetitive inspections be revised to coincide with routine maintenance visits. One commenter, the manufacturer, requests that the initial compliance time and the repetitive inspection interval of one year be expressed as 1,500 landings. The manufacturer points out that since the failures of the attachments are fatigue related, it would be appropriate to specify the compliance time in terms of landings.

The FAA concurs with the commenters' request to revise the compliance time. The FAA agrees with the manufacturer that the compliance times are more appropriately expressed in terms of landings. Accordingly, the FAA has revised paragraphs (a) and (a)(1) of the AD to reflect a revised initial compliance time and repetitive inspection interval of 1,500 landings.

Two commenters request clarification concerning the proposed visual inspections of the attachments. The commenters ask whether that inspection is to be accomplished from the exterior or the interior surface of the airplane (i.e., an external or an internal visual inspection). The FAA finds that clarification is necessary. Paragraphs (a) and (a)(1) of the final rule have been revised to reflect the FAA's intent that the inspection to be performed is an external visual inspection.

One commenter, the manufacturer, requests that paragraph (b) of the proposed rule be revised to specify that accomplishment of the replacement prior to December 17, 1993, in accordance with the original issue of McDonnell Douglas DC–10 Service Bulletin 55–23, dated December 17, 1992, is considered acceptable as terminating action for the requirements of the proposed AD, provided that an eddy current surface inspection of the forward and aft flanges is accomplished in accordance with Revision 1 of that service bulletin. The commenter states that several operators have already accomplished the replacement in accordance with the original issue of the service bulletin.

The FAA concurs. The FAA agrees that paragraph (b)(1) of the proposed rule should be revised to allow credit for replacements accomplished prior to December 17, 1993, in accordance with the original issue of McDonnell Douglas DC–10 Service Bulletin 55–23, provided that an eddy current surface inspection of the forward and aft flanges is accomplished in accordance with McDonnell Douglas DC–10 Service Bulletin 55–23, Revision 1, dated December 17, 1993.

Additionally, the FAA finds that the type of inspection required by paragraph (b) requires clarification. That paragraph has been revised to specify that the type of inspection required for the forward and aft flanges is an "eddy current surface inspection." In addition, the FAA has determined that certain bolt holes of the banjo No. 4 fitting do not require eddy current inspections, provided that the attachments of that fitting have been replaced in accordance with McDonnell Douglas DC–10 Service Bulletin 55–23, dated December 17, 1992. A note has been added to the final rule to clarify that eddy current inspection of the bolt holes is not required in that case.

The FAA also has revised paragraph (b)(1) of the final rule to specify that the replacement required by that paragraph may be accomplished in accordance with the original issue of the service bulletin or Revision 1, dated December 17, 1993. That paragraph has also been revised to specify that accomplishment of the replacement in accordance with the original issue of the service bulletin constitutes terminating action for the requirements of the AD, provided that the eddy current surface inspection of the forward and aft flanges is accomplished in accordance with Revision 1 of the service bulletin. Additionally, accomplishment of the replacement in accordance with Revision 1 of the service bulletin constitutes terminating action for the requirements of the AD, provided that the eddy current surface inspection of the forward and aft flanges and the eddy current bolt hole inspection of the bolt holes of the banjo No. 4 fitting are accomplished in accordance with Revision 1 of the service bulletin.

One commenter, the manufacturer, requests that the FAA revise paragraph (b)(2) of the proposed rule to reference the repair procedures described in Figure 6 or Figure 7, as applicable, of Chapter 55–20–00, Volume 1, of the DC–10 Structural Repair Manual (SRM) as an alternative method of compliance. The commenter states that repair procedures for cracking detected in the No. 4 banjo fitting have been developed and incorporated into the SRM. The FAA concurs. The FAA has determined that those repair procedures incorporated into the SRM are acceptable as an alternate method of compliance. The FAA has revised paragraph (b)(2) of the final rule accordingly.

One commenter states that there is a lack of available parts, which will not allow operators to perform the replacement of the attachments as required by paragraph (b)(1) of the proposed rule. From that comment, the FAA infers that the commenter is requesting that the compliance time be extended to allow time for the manufacture of replacement parts. The FAA does not concur. The FAA has verified with the manufacturer that parts will be available to operators before the required compliance time. However, paragraph (c) of the final rule does provide affected operators the opportunity to require an adjustment of the compliance time if data are presented to justify such an extension.

The FAA notes that a statement in the Summary section of the preamble to the notice, indicated that failures of the attachments of the vertical stabilizer were attributed to "stress corrosion fatigue." The FAA finds that revision is necessary in order to clarify the fact that the failures of the attachments of the vertical stabilizer were attributed to "fatigue."

Additionally, the manufacturer has notified the FAA that, while McDonnell Douglas DC–10 Service Bulletin 55–23 describes procedures for performing an eddy current inspection to detect cracking of the forward and aft flanges and bolt holes of the banjo No. 4 fitting and the pylon carry-through cap, the correct description would entail deleting the words "pylon carry-through cap." The manufacturer noted that the pylon carry through cap is not directly inspected by eddy current inspections. Therefore, references to the "pylon carry-though cap" have been deleted in paragraph (b) of the final rule, and elsewhere in the Supplementary information section of this preamble to the final rule.

After careful review of the available data, including the comments noted above, the FAA has determined that air safety and the public interest require the adoption of the rule with the changes previously described. The FAA has determined that these changes will neither increase the economic burden on any operator nor increase the scope of the AD.

There are approximately 420 Model DC–10–10, –15, –30, –40 series airplanes and KC–10A (military) airplanes of the affected design in the worldwide fleet. The FAA estimates that 237 airplanes of U.S. registry will be affected by this AD.

The FAA estimates that it will take approximately 1 work hour per airplane to accomplish the visual inspections, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the visual inspections on U.S. operators is estimated to be $14,220, or $60 per airplane, per inspection cycle.

The FAA estimates that it will take approximately 2 work hours per airplane to accomplish the eddy current inspection, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of the eddy current inspection on U.S. operators is estimated to be $28,440, or $120 per airplane.

The FAA estimates that it will take approximately 6 work hours per airplane to accomplish the replacement of the 12 attachments located at the banjo No. 4 fitting, at an average labor rate of $60 per work hour. Required parts cost approximately $250 per airplane. Based on these figures, the total cost impact of the replacement on U.S. operators is estimated to be $144,570, or $610 per airplane.

The cost impact figures discussed above are based on assumptions that no operator has yet accomplished any of the requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A final evaluation has been prepared for this action and it is contained in the Rules Docket. A copy of it may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

96–07–01 McDonnell Douglas: Amendment 39–9549. Docket 95–NM–48–AD.

Applicability: Model DC–10–10, –15, –30, –40 series airplanes and KC–10A (military) airplanes; as listed in McDonnell Douglas DC–10 Service Bulletin 55–23, Revision 1, dated December 17, 1993; certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been otherwise modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously. To prevent loss of fail safe capability of the vertical stabilizer due to cracking of its attachments, accomplish the following:

(a) Within 1,500 landings after the effective date of this AD, perform an external visual inspection, using a minimum 5X power magnifying glass, to detect failure of the 12 attachments located in the banjo No. 4 fitting of the vertical stabilizer (as depicted in McDonnell Douglas DC–10 Service Bulletin 55–23, Revision 1, dated December 17, 1993). Perform this inspection in accordance with procedures specified in McDonnell Douglas Nondestructive Testing Manual Chapter 20–10–00 or McDonnell Douglas Nondestructive Testing Standard Practice Manual, Part 09.

(1) If no failure is detected, repeat the external visual inspection thereafter at intervals not to exceed 1,500 landings until the requirements of paragraph (b) of this AD are accomplished.

(2) If any failure is detected, prior to further flight, accomplish the requirements of paragraph (b) of this AD.

(b) Except as required by paragraph (a)(2) of this AD: Within 5 years after the effective date of this AD, perform an eddy current surface inspection to detect cracking of the forward and aft flanges; and an eddy current bolt hole inspection of the bolt holes of the banjo No. 4 fitting; in accordance with McDonnell Douglas DC–10 Service Bulletin 55–23, Revision 1, dated December 17, 1993.

Note 2: Paragraph (b) of this AD does not require that eddy current bolt hole inspections be accomplished for the bolt holes of the banjo No. 4 fitting if the attachments were replaced, prior to the effective date of this AD, in accordance with McDonnell Douglas DC–10 Service Bulletin 55–23, dated December 17, 1992.

(1) If no cracking is detected, prior to further flight, replace the 12 attachments

located on the banjo No. 4 fitting, in accordance with McDonnell Douglas DC–10 Service Bulletin 55–23, dated December 17, 1992, or Revision 1, dated December 17, 1993. Accomplishment of this replacement terminates the requirements of this AD, provided that the eddy current surface inspection of the forward and aft flanges; and the eddy current bolt hole inspection of the bolt holes of the banjo No. 4 fitting, if applicable; are accomplished in accordance with Revision 1 of the service bulletin.

(i) Accomplishment of the replacement in accordance with the original issue of the service bulletin constitutes terminating action for the requirements of this AD, provided that the eddy current surface inspection of the forward and aft flanges is accomplished in accordance with Revision 1 of the service bulletin.

(ii) Accomplishment of the replacement in accordance with Revision 1 of the service bulletin constitutes terminating action for the requirements of this AD, provided that the eddy current surface inspection of the forward and aft flanges; and the eddy current bolt hole inspection of the bolt holes of the banjo No. 4 fitting are accomplished in accordance with Revision 1 of the service bulletin.

(2) If any cracking is detected, prior to further flight, repair either in accordance with Figure 6 or Figure 7, as applicable, of Chapter 55–20–00, Volume 1, of the DC–10 Structural Repair Manual (SRM); or in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office, (ACO), FAA, Transport Airplane Directorate.

(c) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(d) The actions shall be done in accordance with McDonnell Douglas DC–10 Service Bulletin 55–23, dated December 17, 1992, and McDonnell Douglas DC–10 Service Bulletin 55–23, Revision 1, dated December 17, 1993. This incorporation by reference was approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1–L51 (2–60). Copies may be inspected at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Los Angeles Aircraft Certification Office, Transport Airplane Directorate, 3960 Paramount Boulevard, Lakewood, California; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

(e) This amendment becomes effective on April 24, 1996.

Issued in Renton, Washington, on March 18, 1996.

James V. Devany,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 96–6932 Filed 3–22–96; 8:45 am]

BILLING CODE 4910–13–P

14 CFR Part 39

[Docket No. 95–CE–13–AD; Amendment 39–9550; AD 95–17–09 R1]

Airworthiness Directives; Fairchild Aircraft SA226 and SA227 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule

SUMMARY: This amendment revises Airworthiness Directive (AD) 95–17–09, which requires relocating the left-hand (LH) and right-hand (RH) essential bus current limiters (225 amp) to the battery bus (main bus tie) on certain Fairchild Aircraft SA226 and SA227 series airplanes. The Federal Aviation Administraton (FAA) has determined that the applicability of the current AD should be changed to reflect a different serial number range and model designation of certain SA227 series airplanes. This action retains the essential bus current limiter relocations required by AD 95–17–09, and revises the Applicability section of that AD. The actions specified by this AD are intended to prevent failure of the LH and RH essential bus when engine failure results in a blown generator current limiter, which could result in loss of airplane electrical power.

DATES: Effective May 13, 1996.

The incorporation by reference of certain publications listed in the regulations was previously approved by the Director of the **Federal Register** as of October 3, 1995.

ADDRESSES: Service information that applies to this AD may be obtained from Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279–0490; telephone (210) 824–9421. This information may also be examined at the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–13–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106; or at the Office of the Federal Register, 800 North Capitol Street, NW., suite 700, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Ms. Ingrid D. Knox, Aerospace Engineer, FAA, Airplane Certification Office, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0150; telephone (817) 222–5190; facsimile (817) 222–5960.

SUPPLEMENTARY INFORMATION: A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain Fairchild Aircraft SA226 and SA227 series airplanes that utilize a DC generator was published in the **Federal Register** on October 13, 1995 (60 FR 53309). The action proposed to revise AD 95–17–09 by retaining the requirement of relocating the LH and RH essential bus current limiters (225 amp) to the battery bus (main bus tie); and revising the Applicability section to reflect correct serial numbers and incorporating the correct airplane model designation in paragraph (a) of AD 95–17–09. Accomplishment of the proposed modification would be in accordance with Fairchild Aircraft Engineering Kit Drawing 27K82376, "Current Limiter Rebusing Kit," as referenced in Fairchild Service Bulletin (SB) 226–24–034, SB 227–24–015, and SB CC7–24–002, all Issued: September 29, 1994.

Interested persons have been afforded an opportunity to participate in the making of this amendment. No comments have been received regarding the proposal or the FAA's estimate of the cost impact upon the public.

After careful review of all available information related to the subject presented above, the FAA has determined that air safety and the public interest require the adoption of the rule as proposed except for minor editorial corrections. The FAA has determined that these minor corrections will not change the meaning of the AD and will not add any additional burden upon the public than was already proposed.

The FAA estimates that 622 airplanes in the U.S. registry will be affected by this AD, that it will take approximately 4 workhours per airplane to accomplish the required action, and that the average labor rate is approximately $60 an hour. Parts cost approximately $98 per airplane. Based on these figures, the total cost impact of the AD on U.S. operators is estimated to be $210,236 or $338 per airplane. This figure is based on the assumption that no affected airplane owner/operator has incorporated the required modification. Fairchild Aircraft has informed the FAA that parts have not been distributed to any owner/operator of the affected airplanes.

The required action only corrects a model designation and certain serial numbers of certain SA227 series airplanes that are affected by AD 95–17–09. The cost impact upon the public specified in this AD is exactly the same as that currently required by AD 95–17–09.

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the final evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by removing Airworthiness Directive (AD) 95–17–09, Amendment 39–9339 (60 FR 43361, August 21, 1995), and by adding a new AD to read as follows:

95–17–09 R1 Fairchild Aircraft: Amendment 39–9550; Docket No. 95–CE–13–AD. Revises AD 95–17–09, Amendment 39–9339.

Applicability: The following model and serial number airplanes, certificated in any category, that utilize a direct current (DC) generator:

Models	Serial Nos.
SA226–T, SA226–AT, SA226–TC, and SA226–T(B).	All.
SA227–AC, SA227–AT, SA227–BC, and SA227–TT.	420 through 783, and 785 through 789.
SA227–CC and SA227–DC.	784, and 790 through 883.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (c) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required within the next 2,000 hours time- in-service after the effective date of this AD, unless already accomplished (compliance with AD 95–17–09).

To prevent failure of the left hand (LH) and right hand (RH) essential bus when engine failure results in a blown generator current limiter, which could result in loss of airplane electrical power, accomplish the following:

(a) Relocate the LH and RH essential bus current limiters (225 amp) to the battery bus (main bus tie) in accordance with Fairchild Aircraft Engineering Kit Drawing 27K82376, "Current Limiter Rebusing Kit," as referenced in the following service bulletins (SB):

SB	Date	Models affected
226–24–034	September 29, 1994.	All affected SA226 models.
227–24–015	September 29, 1994.	SA227–AC, SA227–AT, SA227–BC, and SA227–TT.
CC7–24–002	September 29, 1994.	SA227–CC and SA227–DC.

(b) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(c) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Fort Worth Airplane Certification Office (ACO), FAA, 2601 Meacham Boulevard, Fort Worth, Texas 76193–0150. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Fort Worth ACO.

(d) Alternative methods of compliance approved for AD 95–17–09 are approved as alternative methods of compliance for this AD.

Note 2: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Fort Worth ACO.

(e) The modification required by this AD shall be done in accordance with Fairchild Aircraft Engineering Kit Drawing 27K82376, "Current Limiter Rebusing Kit," as referenced in Fairchild Aircraft Service Bulletins 226–24–034, 227–24–015, and CC7–24–002, all Issued: September 29, 1994. This incorporation by reference was previously approved by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be obtained from Fairchild Aircraft, P.O. Box 790490, San Antonio, Texas 78279–0490. Copies may be inspected at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri, or at the Office of the Federal Register, 800 North Capitol Street, NW., 7th Floor, suite 700, Washington, DC.

(f) This amendment (39–9950) revises AD 95–17–09, Amendment 39–9339.

(g) This amendment (39–9550) becomes effective on May 13, 1996.

Issued in Kansas City, Missouri, on March 19, 1996.

James E. Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

[FR Doc. 96–7149 Filed 3–22–96; 8:45 am]

BILLING CODE 4910–13–U

14 CFR Part 71

[Airspace Docket No. 96–ASO–2]

Amendment to Class E Airspace; Brunswick, GA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment modifies the Class E airspace area at Brunswick, GA, to accommodate a VOR or GPS–A Standard Instrument Approach Procedure (SIAP) for the Jekyll Island Airport. Additional controlled airspace extending upward from 700 feet above the surface (AGL) is needed to accommodate this SIAP and for instrument flight rules (IFR) operations at the airport.

EFFECTIVE DATE: 0901 UTC, June 20, 1996.

FOR FURTHER INFORMATION CONTACT: Benny L. McGlamery, System Management Branch, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5570.

SUPPLEMENTARY INFORMATION:

History

On January 23, 1996, the FAA proposed to amend part 71 of the Federal Aviation Regulations (14 CFR part 71) by modifying Class E airspace at Brunswick, GA (61 FR 1724). This action would provide adequate Class E airspace for IFR operations at the Jekyll Island Airport.

Interested parties were invited to participate in this rulemaking proceeding by submitting written comments on the proposal to the FAA. No comments objecting to the proposal were received. Designations for Class E airspace extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9C dated August 17, 1995, and effective September 16, 1995. The Class E airspace designation listed in this document will be published subsequently in the Order.

The Rule

This amendment to part 71 of the Federal Aviation Regulations (14 CFR part 71) modifies Class E airspace at Brunswick, GA, to accommodate a VOR or GPS–A SIAP and for IFR operations at the Jekyll Island Airport.

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—[AMENDED]

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; EO 10854, 24 FR 9565, 3 CFR 1959–1963 Comp., p. 389; 14 CFR 11.69.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9C, Airspace Designations and Reporting Points, dated August 17, 1995, and effective September 16, 1995, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet above the surface of the earth.

* * * * *

ASO GA E5 Brunswick, GA [Revised]

Brunswick/Malcolm-McKinnon Airport, GA
(lat. 31°09'06" N, long. 81°23'29" W)
Brunswick/Glynco Jetport Airport
(lat. 31°15'33" N, long. 81°27'59" W)
Jekyll Island Airport
(lat. 31°04'28" N, long. 81°25'40" W)

That airspace extending upward from 700 feet above the surface within 7-mile radius of the Malcolm-McKinnon Airport and within a 7-mile radius of the Glynco Jetport Airport and within a 6.3-mile radius of the Jekyll Island Airport and within 2.4 miles each side of the Brunswick VOR 217° radial, extending from the 6.3-mile radius to 7 miles southwest of the VOR.

* * * * *

Issued in College Park, Georgia, on March 15, 1996.

Benny L. McGlamery,

Acting Manager, Air Traffic Division, Southern Region.

SECURITIES AND EXCHANGE COMMISSION

17 CFR Part 211

[Release No. SAB 96]

Staff Accounting Bulletin No. 96

AGENCY: Securities and Exchange Commission.

ACTION: Publication of Staff Accounting Bulletin.

SUMMARY: The interpretations in this staff accounting bulletin express certain views of the staff regarding treasury stock acquisitions following a business combination accounted for as a pooling-of-interests.

EFFECTIVE DATE: March 19, 1996.

FOR FURTHER INFORMATION CONTACT: Mary Tokar or Brian Heckler, Office of the Chief Accountant (202–942–4400), or Kurt Hohl, Division of Corporation Finance (202–942–2960), Securities and Exchange Commission, 450 Fifth Street NW., Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The statements in staff accounting bulletins are not rules or interpretations of the Commission nor are they published as bearing the Commission's official approval. They represent interpretations and practices followed by the Division of Corporation Finance and the Office of the Chief Accountant in administering the disclosure requirements of the Federal securities laws.

Dated: March 19, 1996.

Margaret H. McFarland,

Deputy Secretary.

Accordingly, Part 211 of Title 17 of the Code of Federal Regulations is amended by adding Staff Accounting Bulletin No. 96 to the table found in Subpart B.

PART 211—[AMENDED]

Staff Accounting Bulletin No. 96

The staff hereby adds Section F to Topic 2 of the Staff Accounting Bulletin Series. Topic 2–F provides guidance regarding the effect of treasury stock acquisitions following consummation of a business combination accounted for as a pooling-of-interests.

Topic 2–F: Treasury Stock Acquisitions Following Consummation of a Business Combination Accounted for as a Pooling-of-Interests

Facts: An issuer, concurrently with the development of a plan for a business combination, formulates a plan to reacquire treasury stock after the consummation date of the combination. The treasury stock will not be reacquired directly from former shareholders of the combining company.

Question 1: Does the staff believe that an intention to reacquire treasury stock precludes accounting for a business combination as a pooling-of-interests?

Interpretive Response: Yes, except in certain limited circumstances. The staff believes that an intention to reacquire treasury stock is part of the plan of combination (a "planned transaction") if the intention is formulated concurrently with the development of the plan of combination. However, the staff does not believe that planned transactions that merely defer actions that would be permitted prior to consummation preclude the application of pooling-of-interests accounting to the combination. Accordingly, the staff has not objected to planned transactions involving reacquisitions of either untainted treasury stock (as discussed in Accounting Series Release Numbers 146 and 146–A) or tainted treasury stock up to the limits permitted under paragraph 47 of APB Opinion 16, *Business Combinations.*

Paragraph 48 of APB Opinion 16 provides that some planned transactions preclude accounting for a combination as a pooling-of-interests. This prohibition extends not only to transactions explicitly agreed to, but also to intended transactions.[1] Specifically, paragraph 48(a) of APB Opinion 16 identifies the intention to reacquire the common stock issued to effect the combination as a planned transaction that is inconsistent with a pooling-of-interests. Paragraph 48(a) of APB Opinion 16 does not specify a period after which an otherwise prohibited reacquisition of treasury stock is permitted. However, based on related planned transaction guidance in paragraph 48(c) of APB Opinion 16, which precludes application of pooling-of-interests accounting if a company plans to make significant dispositions of assets within two years of consummation, the staff has not required a period longer than two years for other prohibited planned transactions.

In applying the 90% test of paragraph 47 of APB Opinion 16 at the consummation date, the staff believes that, unless the shares to be reacquired would be untainted, the maximum number of shares that may be reacquired within two years of consummation of the combination pursuant to any planned transaction should be aggregated with other "paragraph 47 exceptions." If the total paragraph 47 exceptions exceed 10% of any combining company's outstanding shares, the staff believes that application of pooling-of-interests accounting to the combination would not be appropriate.[2]

Question 2: Does the staff believe that an intention to reacquire treasury stock should be considered part of the plan of combination if the intention is not announced until after consummation of the business combination?

Interpretive Response: Yes. The staff believes that the formulation of an intention to reacquire treasury stock, and not the announcement of that intention, is the action that precludes application of pooling-of-interests accounting. Further, it is difficult to conclude that an action that occurs shortly after a business combination is consummated is not evidence of an intention formulated concurrently with development of the plan of combination. Accordingly, the staff considers whether a registrant's actions, both prior to and following consummation of a business combination, provide evidence of an intention to reacquire shares after the combination.[3]

In applying this interpretive guidance, the staff presumes that reacquisitions of treasury stock within six months following consummation of a business combination are planned transactions that are part of the combination plan. Other actions that may occur less than six months after consummation of a business combination provide persuasive evidence of a prior intention that was part of the combination plan. For example, the staff believes that the announcement of an intention to reacquire shares made within six months following consummation of a business combination provides persuasive evidence of an intention that was part of the combination plan.

The staff generally has not questioned the use of pooling-of-interests accounting as a result of reacquisitions of treasury stock made more than six months after the combination is consummated in circumstances in which there is no evidence that the reacquisitions of treasury stock were planned transactions.

Question 3: Prior to initiation of a business combination, a company announced a plan to reacquire tainted treasury stock, but suspended reacquisitions pursuant to that plan prior to consummation of the combination. Does the staff believe that an intention to resume reacquisitions of treasury stock after consummation of the combination pursuant to a pre-existing plan can be distinguished from other intentions to reacquire treasury stock after the combination?

Interpretive Response: No. The staff believes that an intention to resume reacquiring tainted treasury stock pursuant to a pre-existing plan cannot be distinguished from an intention to reacquire treasury stock formulated concurrently with development of the plan of combination. As the Commission commented in ASR 146, it is difficult to separate reasons for reacquiring treasury stock from intentions to reacquire shares that are part of the plan of combination, even if the reason for the acquisition of such shares is reissuance for recurring distributions.[4] Unless treasury stock reacquired will be untainted treasury stock, the assertion that those shares were acquired for reasons other than the business combination is not sufficient to separate the intention to resume reacquiring treasury stock from other planned transactions to reacquire shares issued to effect the combination.[5]

Question 4: Paragraph 48(a) of APB Opinion 16 prohibits application of pooling-of-interests accounting when there is an intention to reacquire, either directly or indirectly, the common stock issued to effect the combination. In the opinion of the staff, does an intention to reacquire treasury stock from parties other than former shareholders of the combining company after consummation of a business combination represent an intention to reacquire shares issued to effect the combination?

---

[1] Paragraph 48 of APB Opinion 16, captioned "*Absence of planned transactions,*" states, "Some transactions after a combination is consummated are inconsistent with the combining of entire existing interests of common stockholders: Including those transactions in the negotiations and terms of the combination, either explicitly or by intent, counteracts the effect of combining stockholder interests" [emphasis added].

[2] *See* the computational guidance provided by the FASB's Emerging Issues Task Force, in its discussion of Issue 87–16, regarding how tainted treasury shares (net of shares "cured" through reissuance) should be aggregated with other "paragraph 47 exceptions" (e.g., dissenters' shares) when testing for satisfaction of the requirements of paragraph 47 of APB Opinion 16. The 10% limitation described above normally is computed by reference to the number of shares issued to effect the combination. In some circumstances, such as those where the smaller of the combining companies is the issuer, the 10% limitation might be further constrained.

Additionally, while an issuer may cure tainted treasury stock acquired prior to consummation, issuing shares to effect the pooling would not cure tainted treasury stock.

[3] Actions that the staff has determined provide evidence of an intention to reacquire shares after consummation of a combination include use of projections or forecasts reflecting post-consummation acquisitions of treasury stock or decisions to reacquire treasury stock where those decisions were made by management having the requisite authority to commit the enterprise to such a plan. Any statement made prior to consummation of a business combination that a company intends to reacquire treasury stock after consummation of that combination also is evidence of a planned transaction. These examples are illustrative only and do not include all instances in which the staff may conclude that a company has formulated an intention to reacquire treasury stock.

[4] ASR 146 comments that, "in determining the purpose of treasury stock acquisitions, it is ordinarily appropriate to focus on the intended subsequent distribution of common shares rather than on the business reasons for acquiring treasury shares [emphasis added]. For example, shares may be reacquired because management believes the company is overcapitalized or considers that "the price is right," but such reasons do not overcome the presumption that they were acquired in contemplation of effecting business combinations to be accounted for as poolings of interests."

[5] ASR 146 states that "the mere assertion that common shares are acquired for such purposes [as stock option or purchase plans or stock dividends] even where the assertion is formalized by action of the board of directors reserving the treasury shares, does not provide persuasive evidence [that the acquisition of treasury stock is unrelated to a business combination]. * * * Accordingly, the Commission concludes that treasury shares acquired in the restricted period for recurring distributions should be considered "tainted" unless they are acquired in a [seasoned] systematic pattern of reacquisition * * *"

Interpretive Response: Yes. The staff believes that the identity of the seller of the treasury stock is not the deciding factor in determining whether the issuer has reacquired stock issued to effect the combination. For example, the staff believes that a reacquisition of treasury stock in an open market transaction results in an indirect reacquisition of shares issued to effect the combination.[6]

Federal Highway Administration

23 CFR Part 645

RIN 2125–AD31

Utilities; Technical Correction

AGENCY: Federal Highway Administration (FHWA), DOT.

SUMMARY: This document amends the FHWA's regulation on accommodation of utilities to remove the reference to a paragraph citation that no longer exists. On July 5, 1995, at 60 FR 34846, 34850, in FR Doc. 95–16403, the FHWA removed the paragraph designations from the definitions in the utilities regulation. Inadvertently, one of the paragraph designations within the text of the definition of *private lines* was not removed. This document corrects the definition by removing such reference and revising the language accordingly.

EFFECTIVE DATE: March 25, 1996.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Scott, Office of Engineering, (202) 366–4104; or Mr. Wilbert Baccus, Office of the Chief Counsel, (202) 366–0780, 400 Seventh Street SW., Washington, DC 20590. Office hours are from 7:45 a.m. to 4:15 p.m., e.t., Monday through Friday, except Federal holidays.

List of Subjects in 23 CFR Part 645

Grant programs—transportation, Highways and roads.

In consideration of the foregoing, the FHWA hereby amends title 23, Code of Federal Regulations, part 645, subpart B as set forth below:

[6] See, for example, paragraph 47(b) of APB Opinion 16, which notes that the choice of an issuer in a combination is a matter of convenience. This interpretive response also recognizes the fungible nature of common stock. The Commission has commented on the fungibility of shares of common stock when addressing cures of tainted treasury stock in ASR 146, noting that there is no substantive difference between treasury stock and newly-issued stock.

PART 645—UTILITIES

1. The authority citation for part 645 continues to read as follows:

Authority: 23 U.S.C. 101, 109, 111, 116, 123, and 315; 23 CFR 1.23 and 1.27; 49 CFR 1.48(b); and E.O. 11990, 42 FR 26961 (May 24, 1977).

2. In § 645.207, the definition of *private lines* is revised to read as follows:

§ 645.207 Definitions.

* * * * *

Private lines—privately owned facilities which convey or transmit the commodities outlined in the definition of *utility facility* of this section, but devoted exclusively to private use.

* * * * *

(23 U.S.C. 315; 49 CFR 1.48)

Issued on: March 15, 1996.

Edward V.A. Kussy,

Acting Chief Counsel.

DEPARTMENT OF THE INTERIOR

Minerals Management Service

30 CFR Part 260

RIN 1010–AC14

Deepwater Royalty Relief for New Leases

AGENCY: Minerals Management Service, Interior.

ACTION: Interim rule.

SUMMARY: The Outer Continental Shelf Deep Water Royalty Relief Act (Act) authorizes the Secretary of the Interior (Secretary) to offer Outer Continental Shelf tracts for lease with suspension of royalties for a volume, value, or period of production. The Act requires the Secretary to use this bidding system on tracts offered for lease in water depths of 200 meters or more in parts of the Gulf of Mexico through November 28, 2000. The Minerals Management Service (MMS) intends to hold a lease sale in April 1996. This interim rule specifies the royalty suspension terms under which the Secretary will make tracts available for that sale.

DATES: *Effective Date:* This interim rule is effective April 24, 1996.

Comments: We will consider all comments we receive by April 24, 1996. We will begin review of comments at that time and may not fully consider comments we receive after April 24, 1996.

ADDRESSES: Mail or hand-carry comments to the Department of the Interior, Minerals Management Service, Mail Stop 4700, 381 Elden Street, Herndon, Virginia 22070–4817, Attention: Chief, Engineering and Standards Branch.

FOR FURTHER INFORMATION CONTACT: Walter Cruickshank, Offshore Minerals Analysis Division, telephone (202) 208–3822.

SUPPLEMENTARY INFORMATION:

I. Background on the New Legislation

On November 28, 1995, President Clinton signed Public Law 104–58, which included the Act. The Act contains four major provisions concerning new and existing leases. New leases are tracts leased during a sale held after the Act's enactment on November 28, 1995. Existing leases are defined as all other leases.

First, section 302 of the Act clarifies the Secretary's pre-existing authority in 43 U.S.C. 1337(a)(3) to reduce royalty rates on existing leases in order to promote development, increase production, and encourage production of marginal resources on producing or non-producing leases. This provision applies only to leases in the Gulf of Mexico west of 87 degrees, 30 minutes west longitude.

Second, section 302 also provides that "new production" from existing leases in water depths of 200 meters or greater qualifies for royalty suspensions if the Secretary determines that the new production would not be economic in the absence of royalty relief. The Secretary must then determine the appropriate royalty suspension volume on a case-by-case basis, subject to specified minimums for leases not in production prior to the date of enactment. This provision also applies only to leases in the Gulf of Mexico west of 87 degrees, 30 minutes west longitude.

Third, section 303 establishes a new bidding system that allows the Secretary to offer tracts with royalty suspensions for a period, volume, or value the Secretary determines. On February 2, 1996, we published a final rule modifying the regulations governing the bidding systems we use to offer OCS tracts for lease (61 FR 3800). New § 260.110(a)(7) addresses the new bidding system mandated by section 303 of the Act.

Fourth, section 304 provides that all tracts offered within 5 years of the date of enactment in water depths of 200 meters or greater in the Gulf of Mexico west of 87 degrees, 30 minutes west longitude, must be offered under the new bidding system. The following

minimum volumes of production are not subject to a royalty obligation:

- 17.5 million barrels of oil equivalent (mmboe) for leases in 200 to 400 meters of water,
- 52.5 mmboe for leases in 400 to 800 meters of water, and
- 87.5 mmboe for leases in more than 800 meters.

II. The Proposed April 1996 Lease Sale and the Need for an Interim Rule

The Act requires the Secretary to issue implementing regulations within 180 days of enactment. We published an advance notice of proposed rulemaking (ANPR) in the **Federal Register** on February 23, 1996 (61 FR 6958), and informed the public of our intent to develop comprehensive regulations implementing the Act. It sought comments and recommendations to assist us in that process. We continue to collect comments and conducted a public meeting in New Orleans on March 12–13, 1996, about the matters the ANPR addressed.

In accordance with the current 5-year OCS program, which provides for annual lease sales in the Central and Western Gulf of Mexico, we have scheduled a lease sale for April 24, 1996, for tracts in the Central Gulf of Mexico. Many of these tracts are in water depths of 200 meters or more. Therefore, before we proceed with the sale, we must issue regulations to implement section 304 of the Act.

We estimate that bonus bids at this sale could be as much as $300 million. Thus, delay of this sale would be contrary to the public interest.

Also, a significant delay of the lease sale could seriously disrupt investment activity important to both the national and regional economies. The natural gas and oil industry relies on regularly-scheduled lease sales in the Gulf of Mexico to enable it to conduct its annual land acquisition and exploration activities in an orderly and predictable manner.

A full notice and comment rulemaking could not be completed prior to the proposed April 1996 sale. Since the Act does apply to Central and Western Gulf of Mexico lease sales for the next 5 years, we are publishing this interim rule to allow the sale of deep-water tracts in the Central Gulf of Mexico to proceed with a minimum of delay from the original sale date established under the current 5-year OCS program. We invite comments on this interim rule, and we also will consider them as part of our review of responses to the ANPR mentioned above. Based on comments received and experience gained at the upcoming sale, we may include changes to the matters this interim rule addresses in the comprehensive rulemaking that implements the remaining provisions of the Act.

III. How To Implement Section 304 of the Act

Section 304 of the Act does not provide specific guidance on how to apply the royalty suspension volumes to leases issued during sales after November 28, 1995. The primary question is how to apply the minimum royalty suspension volumes laid out in the statute. There are several possibilities. One is to apply the royalty suspension volumes on a unitary basis, so that there would be only one royalty suspension volume in each water depth category in the entire area of the Gulf subject to section 304. A second possibility is to apply the royalty suspension volumes on the basis of geological fields, so that all tracts producing from a single field collectively would receive the royalty suspension volume. A third possibility is to apply the full royalty suspension volume to each qualifying lease.

Ultimately, the choice among these alternatives is dictated by the meaning of the statute. Unfortunately, the statutory language, as discussed further below, does not unambiguously resolve this issue.

Turning first to the statutory text, section 304 is quite indistinct. The first thing to note is that it is framed in the passive voice ("suspension of royalties shall be set at [the following volumes]"). This fails to make clear against what the royalty suspension volumes should be applied. The section does speak in the plural or multiple, referring to "all tracts" and "any lease sale." This suggests that the royalty suspension volumes were not to be applied on an individual lease basis. In section 302, by contrast, Congress specified quite clearly that the owner(s) of each individual lease could apply for a royalty suspension. (E.g., "Such application may be made on the basis of an individual lease or unit.")

The legislative history helps clarify the meaning of the statutory language. In bringing before the full Senate for vote the language that eventually became law, Senator Johnston, the bill's primary sponsor, explained that it was intended only to provide incentives for drilling leases that would not otherwise be drilled and to bring new fields on production:

> It is only with respect to *those leases that would not otherwise be drilled, either existing or future leases, that this amendment would provide that incentive.*
>
> * * * The Secretary of the Interior wanted the incentive to be sufficient but not too much. That took a lot of negotiating. * * * [The legislation] should bring on at least two new fields with approximately 150 million barrels of oil equivalent from existing leases and *it significantly improves the economics of 10 to 12 possible and probable fields.*

_____ Cong. Rec. S. 6731 (daily ed., May 16, 1995) [emphasis added].

This statement by the bill's prime sponsor, the most pertinent in the legislative record, strongly suggests that the legislation was not intended to provide each new lease in deep water the full royalty suspension volume. If the legislation were interpreted to apply the full royalty suspension volume to each lease, each new deep-water lease issued for the next 5 years in fields already in production on the date of enactment (November 28, 1995) would be entitled to the full royalty suspension volume. That hardly would further the Act's purpose of providing an economic incentive to develop new fields and "leases that otherwise would not be drilled." It might also skew production because producers could slow development of existing leases to await new leases in the field that would have royalty suspension volumes.

Legislators' statements in committee hearings sounded the same theme—that the purpose was to bring new fields into production. Senate Energy Committee Chairman Murkowski noted that the development of OCS deep-water areas "are dependent on the economics of the field * * *" and Senator Johnston emphasized that "the volumes [the royalty suspension volumes specified in the legislation] were based on assumptions of the economic field size relative to cost." Hearing on S. 158 Before the Committee on Energy and Natural Resources, 104th Cong., 1st Sess. 7, 39 (March 23, 1995).

In fact, the royalty suspension volumes set forth in section 304 for new tracts offered for lease originated with MMS. They were developed out of technical analyses conducted by MMS of the royalty suspension volumes needed for capital cost recovery in developing unproduced oil and gas fields at various water depths in the Gulf of Mexico. This helps explain the fact that the chief congressional sponsor, Senator Johnston, expressly linked the royalty suspension volumes in the Act to the cost of developing a field. It also counsels that section 304 should, in order to be faithful to its proponents' intent, be applied to make royalty suspension volumes available on a field basis, rather than giving each and every individual lease the full royalty suspension volume.

For the same reasons, section 304 should be read more broadly than simply providing one royalty suspension volume at each specified depth range (e.g., 200 to 400 meters) across the entire area of the Gulf eligible for royalty relief. Such an application, done without regard for fields or numbers of leases at those depth ranges, would not grant sufficient incentive for any more than one new field at each water depth. Such a reading, while possible to fit within the statutory language, is clearly not in accord with the purposes of the Act.

The middle ground, applying the royalty suspension volumes in section 304 on a field basis, is the most reasonable approach. In the words of the bill's sponsor, only it fulfills what the Secretary wanted, i.e., sufficient incentive to bring new fields into production.

Two other considerations support this outcome. First, as Congress was doubtless aware when it enacted deepwater royalty relief, section 8(b), of the Outer Continental Shelf Lands Act (OSCLA) (43 U.S.C. 1337(b)) contains no fixed maximum tract size for a single lease. Instead, it authorizes the Secretary to aggregate a large acreage into a single tract for leasing if the Secretary "finds a larger area is necessary to comprise a reasonable economic production unit." Even if section 304 were interpreted to mandate the Secretary to apply royalty suspension volumes on an individual lease basis, the Secretary would nevertheless retain the discretion, by virtue of section 8(b), to choose a larger tract size for a single lease. Rather than going that route, we have determined that section 304 is best interpreted to apply royalty suspension volumes on a field basis. If royalty suspension volumes were to be mandated on a lease basis, the Secretary would have to seriously examine whether to lease larger tracts.

Second, as Congress was also doubtless aware when it enacted deepwater royalty relief, the OCSLA sets no maximum royalty on Federal oil and gas leases. Instead, it authorizes the Secretary to set an initial royalty rate of "*no less than* 12½ per centum" (emphasis added) per unit of production for new leases issued under the new bidding system established by section 303 and mandated for use for the next 5 years. If section 304 required the Secretary to provide a full royalty suspension volume to each and every lease, the Secretary would still have the discretion to set an initial royalty rate above the statutory minimum or the rate traditionally used for Gulf of Mexico leases. This higher royalty would kick in after the royalty-free volumes for new leases in deep water terminated. This approach would allow the Secretary to ensure that the development incentive provided in the Act is consistent with giving the public a fair return on the oil and gas resources that it owns. Once again, the interim rule, by adopting the approach of applying the royalty suspension volumes on a field basis, may avoid the need for including a higher royalty in the lease at this time.

As these considerations illustrate, Congress preserved the Secretary's broad discretion over tract size and royalty rate when it came to enact deepwater royalty relief. By doing so, it in effect preserved the authority of the Secretary to apply the royalty relief volumes to fields rather than individual leases. This comports with what we believe is the best and most reasonable interpretation of the statutory language.

Based on our careful consideration of the Act, and its history, the Secretary has settled upon this regulation. It provides for a suspension of royalty payments for any one lease or several leases in a field that finds and produces first the royalty-exempt volume of oil equivalent from a new field. Thus, one lease may receive the whole suspension volume or several leases may share it depending on which lease(s) first produces the volume from the field.

IV. What the Interim Rule Provides

For the purposes of this rule, an "eligible" lease is a lease that results from a sale held after November 28, 1995; is located in the Gulf of Mexico in water depths 200 meters or deeper; lies wholly west of 87 degrees, 30 minutes west longitude; and is offered subject to a royalty suspension volume authorized by statute. We will add this definition to 30 CFR 260.102.

The rule implementing section 304 of the Act will be in 30 CFR 260.110. As explained above, under § 206.110(d)(1), we will allow only one royalty suspension volume per new field (i.e., a field not producing prior to November 28, 1995). That suspension volume is available to the eligible leases in a new field based on which lease or leases first produce the oil or gas until the suspension volume is reached.

As an example, for eligible leases in a new field in 850 meters of water, no royalties will be due from the first 87.5 mmboe of production from all eligible leases producing from that field. [For the purpose of this preamble, the Act's minimum royalty suspension volumes for each water depth are assumed to apply although, for any particular lease sale, we could increase the volume specified in the Act.] That production could come from only one eligible lease, several eligible leases, or all eligible leases in the field. In any event, only a total of 87.5 mmboe will be allowed royalty free for that new field. Under this rule, any lease-use production that otherwise is not subject to royalty does not count toward the royalty suspension volume.

Under § 206.110(d)(2), in each Final Notice of Sale, we will specify the water depth of each tract offered for lease that is in at least 200 meters of water. Once the lease is issued, our determination of water depth is final. This rule applies even if the lease could be shown actually to be in deeper water. We will not change the depth determination and the applicable royalty suspension volume since one factor we consider in determining the adequacy of the bonus bid is the water depth specific royalty suspension volume that could apply to the lease. As a result, the interim rule provides that the depth classification by MMS is final and unappealable upon bid acceptance, lease issuance, and lease acceptance by the high bidder for a tract. To allow otherwise significantly alters the nature of the property right offered at the lease sale, renders the lease auction and bid adequacy process unreliable, and unfairly conveys an excessive benefit to the successful bidder (or to the Federal Government if the water depth later were determined to be shallower). It also would encourage endless administrative and judicial litigation and appeals over varying measurements of water depths. The Final Notice of Sale will also specify the royalty suspension volumes for each of the prescribed water depths, subject to the minimums stated in the Act.

Since all eligible leases in a field could share the royalty suspension volume, each eligible lease must be assigned to a new or existing field by the time production from that lease begins. In accordance with our practice for over 20 years, we will assign a lease to a field when a well on a lease qualifies as capable of producing in paying quantities under the regulations at 30 CFR 250.11. If a well does not qualify under the rule, we will assign the lease to a field when hydrocarbons are first produced from the lease or the lease is allocated production under an approved unit agreement.

We will either assign the lease to an existing field or designate a new field. This interim rule includes the definition of field for this purpose in 30 CFR 260.102. The definition is based on geology. We issue the *OCS Operations Field Names Master List* each quarter, with monthly updates, which lists all the tracts in each field on the OCS.

Fields in deep water may consist of one or more leases, including leases issued before and after November 28, 1995, and leases in different water depths. Therefore, we must specify how to determine the royalty suspension volume in many different circumstances. The simplest factual case would be where a single eligible lease produces a new field. The lessee would receive the entire royalty suspension volume if that lease produces it. (See § 206.110(d)(5).)

However, other cases will arise. Accordingly, in determining individual lease eligibility for, and the volume of, royalty suspensions, this is how the rule applies:

1. Under § 206.110(d)(2), the Final Notice of Sale will specify the royalty suspension volume for new fields in each of the specified water depth ranges. Under § 206.110(d)(3), at the time of first production (not including test production) from an eligible lease in a field, we will determine the royalty suspension volume available to eligible lease(s) in that field based on the volumes specified in the Final Notice of Sale.

2. If a new field consists of leases in different water depth categories, the royalty suspension volume associated with the deepest eligible lease applies. This is set forth in § 206.110(d)(4).

3. If an eligible lease is designated as part of a field where any current lease produced prior to November 28, 1995, that eligible lease will not receive a royalty suspension volume from that field. Under these circumstances, Congress certainly recognized that it is not necessary to encourage production.

4. If an eligible lease is designated as part of a field where no production from any current lease occurred prior to November 28, 1995, a royalty suspension volume will apply to the eligible lease(s). The royalty suspension volume will equal the volume specified for the relevant water depth in the Final Notice of Sale. In this case, we view the specified royalty suspension volume as the amount Congress determined is needed to make a field economic to produce.

5. If a field did not produce before November 28, 1995, and consists of more than one lease, no royalty is due on the first production from any eligible leases in that field until they have cumulatively produced the royalty suspension volume specified in the Final Notice of Sale. Under § 260.110(d)(6), the suspension volume attributable to each lease depends upon which lease produces it first. For example, if two eligible leases are producing from a new field in 300 meters of water, their royalty suspension would end when production from those leases reaches 17.5 mmboe, the royalty suspension volume for that water depth. If one lease had produced 10.0 mmboe and the second lease had produced 7.5 mmboe, that would determine their respective suspension volumes.

6. The addition of an eligible lease to a field that has an established royalty suspension volume will not change the field's royalty suspension volume, even if the added lease is in deeper water. Under § 260.110(d)(7), the added lease will benefit from the field's royalty suspension only to the extent of its production before cumulative production from all eligible leases in the field equals the field's previously established royalty suspension volume.

7. Under § 260.110(d)(8), if we reassign a well on an eligible lease to another field, the past production from that well will count toward the royalty suspension volume, if any, specified for the new field to which it is assigned. The past production will not be counted toward the suspension volume, if any, for the first field.

8. Section 260.110(d)(9) provides that you may receive the royalty relief only if your entire lease is west of 87 degrees, 30 minutes west longitude. This requirement is expressly provided in the Act. A new field that lies on both sides of this meridian will receive a royalty suspension volume only for those new leases lying west of the meridian and in 200 meters of water or more.

9. The Act provides royalty suspension volumes only to leases in at least 200 meters of water. We will establish the water depth for each lease in the Final Notice of Sale. If a field includes leases in both less than 200 meters and more than 200 meters of water, only those eligible leases in water depths of at least 200 meters may share in the royalty suspension volume.

10. Under § 260.110(d)(10), a lease may obtain more than one royalty suspension volume. If a new field is discovered on an eligible lease that already benefits from the royalty suspension volume for another field, production from that new field receives a separate royalty suspension. For example, assume an eligible lease already receives up to 17.5 mmboe of royalty-free production from a field in 300 meters of water. If another new field is discovered under that lease, the lease may obtain a second royalty suspension of up to 17.5 mmboe on production prescribed for that second field. Your royalty suspension volume for the second field depends upon whether other eligible leases produce in that second field. This second royalty suspension volume may occur even if the same production facilities develop both fields. However, the royalty suspension volumes are specific to the individual fields. Thus, for example, if the lease eventually produces 10 mmboe from wells in one field and 50 mmboe from wells in the other, and there are no other eligible leases in either field, the total royalty-free production will be 27.5 mmboe (i.e., 10 plus 17.5 mmboe).

We understand that other factual situations may arise under this rule. Those situations must be resolved consistent with the principles described above.

V. Additional Examples

The following examples further clarify the situations listed above.

1. If a field consists only of two eligible leases, one in 750 meters of water and one in more than 800 meters, the field will have a royalty suspension volume of 87.5 mmboe. The first 87.5 mmboe produced from either or both leases in the field would be royalty-free.

2. If an eligible lease in 300 meters of water is added to a field consisting of leases issued from a sale held prior to November 28, 1995, and that field begins production after that eligible lease is added, the field's suspension volume would be 17.5 mmboe. The eligible lease may produce up to 17.5 mmboe royalty-free. However, if that lease only produces 10 mmboe over its productive life and no other eligible leases are part of the field, that field will receive only 10 mmboe of relief.

3. If an eligible lease in 600 meters of water is added to a producing field consisting of leases issued from sales held prior to November 28, 1995, and there are no other eligible leases in the field, and that field started continuous production (other than test production) after November 28, 1995, the lease could receive 52.5 mmboe of royalty suspension regardless of the previous production. However, if the new lease only produces 10 mmboe over its productive life and no other eligible lease is added to the field, that field will receive only 10 mmboe of relief under this provision.

4. If an eligible lease in 850 meters of water is added to a field that already has an established royalty suspension volume from other eligible leases in the field in shallower water, the field's royalty suspension volume will not change. For example, if production from the field already amounts to 30 mmboe of its 52.5 mmboe royalty suspension volume when the additional lease

begins production, that lease may share in the field's remaining 22.5 mmboe of royalty-free production to the extent that it first produces some portion of the remaining 22.5 mmboe. This example also shows that even though the added lease was in deeper water, it does not increase the royalty suspension volume already established for that field by a shallower lease.

VI. Technical Issues Related to Royalty Suspension Volumes

For purposes of accounting for production accruing to the royalty suspension volume, 5.62 thousand cubic feet of natural gas equal one barrel of oil equivalent, as measured at 15.025 pounds per square inch (psi) pressure, 60 degrees Fahrenheit, and fully saturated (§ 260.110(d)(11)). This is the conversion factor which has been used traditionally in the Gulf of Mexico.

A royalty suspension will continue until the end of the month in which the cumulative production from eligible leases in the field reaches the royalty suspension volume for the field.

When a field is not being jointly developed, lessees may not know when the field has produced all of its royalty suspension volume. We will provide monthly field production data to all lessees in a field. However, this data may not become available until shortly after a field's production exceeds the royalty suspension volume. In such cases, royalties still will be due on the last day of the second month following the month in which cumulative production from the field reaches the royalty suspension volume. Any royalties paid late will be subject to interest pursuant to 30 CFR 218.54.

Nothing in this interim rule affects the eligibility of a lessee to apply for royalty relief under the other provisions of the Act or under existing regulatory authority. Lessees of leases issued as the result of a lease sale held before November 28, 1995, whether or not they are part of a field that produced prior to that date, may apply for a royalty suspension volume under section 302 of the Act. Content, supporting documentation, and procedures for submission and review of such applications will be addressed in the comprehensive rulemaking mentioned above. Further, any OCS lessee may apply for a reduction or elimination of its lease royalty rate or net profit share under section 8(a)(3) of the OCSLA (as amended by the Act with respect to leases in parts of the Gulf of Mexico).

VII. Administrative Matters

Executive Order (E.O.) 12866

The interim rule is significant due to novel policy issues arising out of legal mandates, and the Office of Management and Budget (OMB) has reviewed this rule. A copy of this determination is available from MMS.

Offering tracts subject to royalty suspension volumes should result in accelerated investment on the OCS. In deep water, exploration wells can cost more than $30 million, and field development can cost as much as $1 billion. However, the best assumption is that most of this investment would eventually occur under any royalty terms; the royalty suspension tends to make this activity occur earlier.

We analyzed two alternatives for implementing section 304 of the Act. The approach in this interim rule (MMS approach) is where there is a single suspension volume for each field at the volumes designated in the legislation. The alternative approach is where the full royalty suspension volume applies to each lease.

For scheduled 1996 lease sales in the deep-water Gulf of Mexico, the alternative approach results in more resources being leased (905 mmboe versus 680 mmboe) and higher bonuses ($261 million versus $113 million) than the MMS approach. However, the MMS approach generates higher royalty payments over the productive life of the lease ($352 million versus $40 million) than the alternative approach. On a net present value basis, the MMS approach also collects more revenue for the Treasury ($284 million versus $277 million). On the basis of revenues-per-boe, the MMS approach generates more than twice the nominal revenues and 35 percent more revenues-per-boe in net present value than the alternative approach.

We chose the approach embodied in this interim rule because:

- The Act's primary author stated that he intended the Act to encourage production from new fields without providing too much relief,
- The MMS approach provides a substantial incentive for new investment and production in deep water while still ensuring a reasonable return to the Treasury, and
- The minimum suspension volumes specified in the Act were derived from an analysis of fields, not individual leases.

Regulatory Flexibility Act

The Department of the Interior (DOI) has determined that this interim rule will not have a significant effect on a substantial number of small entities. In general, the entities that engage in offshore activities in the deep waters of the Gulf of Mexico are not considered small due to the technical and financial resources and experience necessary to safely conduct such activities.

Administrative Procedure Act

We have determined, in accordance with 5 U.S.C. 553(b)(3)(B) of the Administrative Procedure Act, that a notice of proposed rulemaking is not required and is impracticable in the issuance of this rule. The comment period associated with a proposed rulemaking would require that we delay the upcoming lease sale in the Central Gulf of Mexico for a significant period. The public interest is best served by collecting the sale revenues for the Treasury in a timely manner and avoiding direct detrimental effects on the offshore industry's investment plans. We invite comments on this interim rule so changes can be made in the future, if warranted.

Paperwork Reduction Act

The rule contains no new reporting and recordkeeping requirements.

Takings Implication Assessment

The DOI certifies that this rule does not represent a governmental action capable of interference with constitutionally protected property rights. A Takings Implication Assessment prepared pursuant to E.O. 12630, Government Action and Interference with Constitutionally Protected Property Rights, is not required.

E.O. 12988

The DOI has certified to the OMB that this regulation meets the applicable standards provided in section 3(b)(2) of E.O. 12988.

National Environmental Policy Act

The MMS has examined the interim rulemaking and have determined that this rule does not constitute a major Federal action significantly affecting the quality of the human environment pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332).

List of Subjects in 30 CFR Part 260

Continental shelf, Government contracts, Minerals royalties, Oil and gas exploration, Public lands—mineral resources.

Dated: March 13, 1996.

Bob Armstrong,

Assistant Secretary, Land and Minerals Management.

For the reasons set forth in the preamble, the Minerals Management Service amends 30 CFR part 260, Subpart B—Bidding Systems, as follows:

PART 260—[AMENDED]

1. The authority citation for part 260 continues to read as follows:

Authority: 43 U.S.C. 1331 and 1337.

2. Section 260.102 is amended by adding in alphabetical order the definitions for "Eligible Lease" and "Field" which read as follows:

§ 260.102 Definitions.

* * * * *

Eligible lease means a lease that results from a sale held after November 28, 1995; is located in the Gulf of Mexico in water depths 200 meters or deeper; lies wholly west of 87 degrees, 30 minutes west longitude; and is offered subject to a royalty suspension volume authorized by statute.

Field means an area consisting of a single reservoir or multiple reservoirs all grouped on, or related to, the same general geological structural feature and/or stratigraphic trapping condition. There may be two or more reservoirs in a field that are separated vertically by intervening impervious strata, or laterally by local geologic barriers, or by both.

* * * * *

3. In § 260.110, paragraph (d) is added to read as follows:

§ 260.110 Bidding systems.

* * * * *

(d) This paragraph explains how the royalty suspension volumes in section 304 of the Outer Continental Shelf Deep Water Royalty Relief Act, Pub. L. 104–58, apply to eligible leases. For purposes of this paragraph, any volumes of production that are not royalty bearing under the lease or the regulations in this chapter do not count against royalty suspension volumes. Also, for the purposes of this paragraph, production includes volumes allocated to a lease under an approved unit agreement.

(1) Your eligible lease may receive a royalty suspension volume only if your lease is in a field where no current lease produced oil or gas (other than test production) before November 28, 1995. Paragraph (d) of this section applies only to eligible leases in fields meeting this condition.

(2) The Final Notice of Sale will specify the water depth for each eligible lease. Our determination of water depth for each lease is final once we issue the lease. The Notice also will specify the royalty suspension volume applicable to each water depth. The minimum royalty suspension volumes for fields are:

(i) 17.5 mmboe in 200 to 400 meters of water;

(ii) 52.5 mmboe in 400 to 800 meters of water; and

(iii) 87.5 mmboe in more than 800 meters of water.

(3) When production (other than test production) first occurs from any of the eligible leases in a field, we will determine what royalty suspension volume applies to the eligible lease(s) in that field. The determination is based on the royalty suspension volumes specified in paragraph (d)(2) of this section.

(4) If a new field consists of eligible leases in different water depth categories, the royalty suspension volume associated with the deepest eligible lease applies.

(5) If your eligible lease is the only eligible lease in a field, you do not owe royalty on the production from your lease up to the applicable royalty suspension volume.

(6) If a field consists of more than one eligible lease, payment of royalties on the eligible leases' initial production is suspended until their cumulative production equals the field's established royalty suspension volume. The royalty suspension volume for each eligible lease is equal to each lease's actual production (or production allocated under an approved unit agreement) until the field's established royalty suspension volume is reached.

(7) If an eligible lease is added to a field that has an established royalty suspension volume, the field's royalty suspension volume will not change even if the added lease is in deeper water. The additional lease may receive a royalty suspension volume only to the extent of its production before the cumulative production from all eligible leases in the field equals the field's previously established royalty suspension volume.

(8) If we reassign a well on an eligible lease to another field, the past production from that well will count toward the royalty suspension volume, if any, specified for the new field to which it is assigned. The past production will not be counted toward the suspension volume, if any, from the first field.

(9) You may receive a royalty suspension volume only if your entire lease is west of 87 degrees, 30 minutes west longitude. A field that lies on both sides of this meridian will receive a royalty suspension volume only for those eligible leases lying entirely west of the meridian.

(10) Your lease may obtain more than one royalty suspension volume. If a new field is discovered on your eligible lease that already benefits from the royalty suspension volume for another field, production from that new field receives a separate royalty suspension.

(11) You must measure natural gas production subject to the royalty suspension volume as follows: 5.62 thousand cubic feet of natural gas equals one barrel of oil equivalent, as measured at 15.025 psi, 60 degrees Fahrenheit, and fully saturated.

[FR Doc. 96–7038 Filed 3–22–96; 8:45 am]

BILLING CODE 4310–MR–P

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 920

[MD–039–FOR]

Maryland Regulatory Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), Interior.

ACTION: Final rule; approval of amendment.

SUMMARY: OSM is approving a proposed amendment to the Maryland regulatory program (hereinafter referred to as the "Maryland program") under the Surface Mining Control and Reclamation Act of 1977 (SMCRA). Maryland proposed revisions and additions to rules and statutes pertaining to remined areas. The amendment is intended to revise the Maryland program to be consistent with the corresponding Federal regulations and SMCRA.

EFFECTIVE DATE: March 25, 1996.

FOR FURTHER INFORMATION CONTACT: George Rieger, Program Manager, OSM, Appalachian Regional Coordinating Center, 3 Parkway Center, Pittsburgh, PA 15220. Telephone: (412) 937–2849.

SUPPLEMENTARY INFORMATION:

I. Background on the Maryland Program
II. Submission of the Proposed Amendment
III. Director's Findings
IV. Summary and Disposition of Comments
V. Director's Decision
VI. Procedural Determinations

I. Background on the Maryland Program

On December 1, 1980, the Secretary of the Interior conditionally approved the Maryland program. Background information on the Maryland program, including the Secretary's findings, the

disposition of comments, and the conditions of approval can be found in the December 1, 1980, **Federal Register** (45 FR 79449). Subsequent actions concerning conditions of approval and program amendments can be found at 30 CFR 920.12, 920.15, and 920.16.

II. Submission of the Proposed Amendment

By letter dated October 26, 1995 (Administrative Record No. MD–573.00), Maryland submitted a proposed amendment to its program pursuant to SMCRA at its own initiative. Maryland proposed to revise the remining provisions of the Annotated Code of Maryland (Code) at sections 7–501, 7–505, and 7–511 and add to the Code of Maryland Regulations (COMAR) at section 08.20.14.14. In response to two communications by OSM, by letters dated January 31, 1996 and February 16, 1996 (Administrative Record No. MD–573.05), Maryland clarified certain provisions of the proposed amendment. Because the information was explanatory in nature and did not constitute a major revision of the original submission, OSM did not reopen the comment period.

OSM announced receipt of the proposed amendment in the November 27, 1995, **Federal Register** (60 FR 58319), and in the same document opened the public comment period and provided an opportunity for a public hearing on the adequacy of the proposed amendment. The public comment period closed on December 27, 1995.

III. Director's Findings

Set forth below, pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17, are the Director's findings concerning the proposed amendment. Revisions not specifically discussed below concern nonsubstantive wording changes and paragraph notations to reflect organizational changes resulting from this amendment.

Annotated Code of Maryland—Chapter 0469—Lands Eligible for Remining

At sections 7–501(m) and (w), Maryland proposes to delete the terms "net project construction cost" and "project construction cost." There are no Federal counterparts to these terms, nor are they used in the Maryland Code for anything related to the Maryland program. Therefore, the Director finds that the proposed deletions at sections (m) and (w) do not render the Maryland program less effective than the Federal regulations. At section 7–501(m), Maryland proposes to add the term "lands eligible for remining" and define it as any land that would otherwise be eligible for expenditures under subtitle 9. Subtitle 9 of the Maryland statute is the State's counterpart to Title IV of SMCRA. The Director finds that the proposed definition at section (m) is substantively identical to and therefore no less stringent than the Federal definition at section 701(34) of SMCRA.

At section 7–505(i)(2), Maryland proposes to prohibit the issuance of a permit on slopes of 20 degrees or more from the horizontal. Certain measurement requirements are specified. A permit may be issued for lands eligible for remining when, in the opinion of the Land Reclamation Committee, the land could be restored to its original contour. OSM conducted a technical review of the proposed revision on February 8, 1996 (Administrative Record No. MD–573.06), and concluded that Maryland's proposal is feasible and technically acceptable. Maryland has stated in its January 31, 1996, letter that it will allow this mining when the remining will result in the reclamation that is in compliance with present requirements. Since the area must be reclaimed in accordance with the Maryland regulatory program, the Director finds that the proposed revision is not inconsistent with the requirements of SMCRA and the Federal regulations.

At section 7–511(b)(2), Maryland proposes to revise subsection (I) to reference the requirements of subsections (II) and (III) and to add new subsections (II) and (III). Subsection (II) requires that on land eligible for remining, the period of operator responsibility is 2 full years after the approval of the backfilling and planting report. The authority expiration dates are specified as September 30, 2004 or on any later date authorized under SMCRA. Section 515(b)(2)(B) of SMCRA requires that on lands eligible for remining, the operator must assume responsibility for successful revegetation for a period of 2 full years after the last year of augmented seeding, fertilizing, irrigation or other work to comply with applicable standards. Maryland's backfilling and planting report is filed after the backfilling, regarding and seeding is completed. Pursuant to COMAR 08.20.29.06, bond release may occur no sooner than two years after the last augmented seeding. Therefore, the Director finds that the proposed revisions at subsections (I) and (II) are no less stringent than the revegetation provisions of section 515(b)(2)(B) of SMCRA and the termination of authority provisions of section 510(e). Subsection (III) requires that for any reported area other than land eligible for remining, the period of operator responsibility is 5 full years after the approval of the report. The Director finds that the proposed revisions at subsection III are no less stringent than the provisions of section 515(b)(20)(A) of SMCRA.

COMAR 08.20.14.14—Release of Bonds on Remining Areas

Maryland proposes to add new section 08.20.14.14. At section (A), Maryland requires that the criteria and procedures of this chapter apply to the release of bonds for remining areas, except as modified. At section (B), Maryland specifies that the portion of the bond submitted in accordance with section .03C may be released upon completion of all Reclamation Phase I work on the remining areas. Phase I work, as defined in COMAR 08.20.14.08, is achieved when the permittee completes the following conditions: backfilling, regarding, topsoil replacement, seeding, mulching, and draining control in accordance with the reclamation plan. These conditions include the requirements of 30 CFR 800.40(c)(1), which is the Federal regulatory subsection on Phases I bond release. Since section (B) requires the completion of Phases I work before bond release, section (B) is consistent with 30 CFR 800.40(c)(1). At section (C), Maryland specifies that the portion of the bond submitted in accordance with section .03D may be released if the permittee demonstrates and Maryland finds that (1) the permittee has met certain revegetation standards and the requirements of the Maryland regulatory program, (2) with respect to prime farmlands, soil productivity has been returned to the required level of yield, (3) the Maryland Department of the Environment has released the permittee from NPDES Coal Remining Permit obligations in accordance with COMAR 26.08.03F, (4) all temporary draining control structures not authorized to remain on the remining area have been removed and the affected area has been regarded, seeded, and mulched, (5) all permanent drainage control structures have been inspected and any deficiencies repaired by the operator, (6) the provisions of an approved plan for the sound future management of any permanent impoundment for the permittee or landowner have been satisfactorily implemented, and (7) the applicable liability period for remining areas has been met. Section 08.20.14.14 continues to include criteria and procedures of Chapter 08.20.14 unless modified by COMAR 08.20.14.14. In response to a question, Maryland clarified that COMAR section

08.20.14.08 (E) (2) and (3), applies to these areas. COMAR 08.20.14.08 (E) (2) and (3) require the completion of Phase II and Phase III work before bond release. This is consistent with 7–511(b)(5) of the Maryland Code which requires that no bond shall be fully released until all the reclamation requirements are fully met.

Phase II work, as defined in COMAR 08.20.14.08, is achieved when the permittee completes the following conditions: revegetation is established in accordance with the approved plan, lands are not contributing suspended solids in excess of program requirements, soil productivity is returned to required level of yield with respect to prime farmlands, permanent impoundment management provisions are implemented, and designated temporary drainage control structures are removed and permanent structures inspected. Phase III work, as defined in COMAR 08.20.14.08, is achieved when the permittee completes mining and reclamation operations in accordance with the approved plan and achieves compliance with the requirements of the regulatory program, the permit, and the liability period has expired. These conditions include the requirements of 30 CFR 800.40(c) (2) and (3), which are the Federal regulatory subsections on Phase II and III bond release. Since section (c), read in conjunction with COMAR 08.20.14.08, requires the completion of Phase II and III work before bond release, the Director finds that section (C) is consistent with 30 CFR 800.40(c) (2) and (3). At section (D), Maryland requires that it will retain sufficient bond on any area disturbed to remove temporary drainage control structures until certain requirements at C(1), C(5), and C(6) have been met. In its letter dated January 31, 1996, Maryland stated that a typographical error was made in the original submission and that the correct references should be C(1), C(2), and C(7). There is no direct Federal counterpart to Section D. Section D is an additional prerequisite to 7–511(b)(5) of the Maryland Code which requires that no bond shall be fully released until all the reclamation requirements are fully met. Therefore, the Director finds section D is not inconsistent with the requirements of SMCRA and the Federal regulations.

IV. Summary and Disposition of Comments

Public Comments

The Director solicited public comments and provided an opportunity for a public hearing on the proposed amendment. By letter dated November 22, 1995, the Maryland Historical Trust concurred without objection or comment. Because no one requested an opportunity to speak at a public hearing, no hearing was held.

Federal Agency Comments

Pursuant to 30 CFR 732.17(h)(11)(i), the Director solicited comments on the proposed amendment from various Federal agencies with an actual or potential interest in the Maryland program. None were received.

Environmental Protection Agency (EPA)

Pursuant to 30 CFR 732.17(h)(11)(ii), OSM is required to obtain the written concurrence of the EPA with respect to those provisions of the proposed program amendment that relate to air or water quality standards promulgated under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*).

On November 1, 1995, OSM solicited EPA's concurrence with the proposed amendment (Administrative Record No. MD–573.01). On December 5, 1995, EPA gave its written concurrence (Administrative Record No. MD–573.04).

The Federal regulations at 30 CFR Part 920, codifying decisions concerning the Maryland program, are being amended to implement this decision. This final rule is being made effective immediately to expedite the State program amendment process and to encourage States to bring their programs into conformity with the Federal standards without undue delay. Consistency of State and Federal standards is required by SMCRA.

VI. Procedural Determinations

Executive Order 12866

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866 (Regulatory Planning and Review).

Executive Order 12778

The Department of the Interior has conducted the reviews required by section 2 of Executive Order 12778 (Civil Justice Reform) and has determined that, to the extent allowed by law, this rule meets the applicable standards of subsections (a) and (b) of this section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments since each such program is drafted and promulgated by a specific State, not by OSM. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR Parts 730, 731, and 732 have been met.

National Environmental Policy Act

No environmental impact statement is required for this rule since section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

Paperwork Reduction Act

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

Regulatory Flexibility Act

The Department of the Interior has determined that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*). The State submittal which is the subject of this rule is based upon corresponding Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. Accordingly, this rule will ensure that existing requirements previously promulgated by OSM will be implemented by the State. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the corresponding Federal regulations.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[IL18–8; FRL–5445–5]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule; withdrawal.

SUMMARY: On January 26, 1996 (61 FR 2423), the United States Environmental Protection Agency (USEPA) approved Illinois' October 21, 1993 and March 4, 1994, requests to incorporate rules to control volatile organic compounds in the Chicago Ozone nonattainment area and thereby complete the replacement of the federally promulgated Chicago Ozone Federal Implementation Plan with federally approved State adopted rules as a part of the Illinois State Implementation Plan (SIP). The USEPA is withdrawing this final rule due to the adverse comments received on these actions. In a subsequent final rule USEPA will summarize and respond to the comments received and announce final rulemaking action on this requested Illinois SIP revision.

EFFECTIVE DATE: March 25, 1996.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 5, Air Programs Branch, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: Randolph O. Cano, Regulation Development Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604. Telephone: (312) 886–6036.

State Implementation Plan for Michigan: Withdrawal of Direct Final Action

AGENCY: Environmental Protection Agency (USEPA).

ACTION: Withdrawal of direct final rule.

SUMMARY: On February 2, 1996, the USEPA published a proposed rule (61 FR 3891) and a direct final rule (61 FR 3815) approving State Implementation Plan (SIP) revision for the State of Michigan which was submitted pursuant to the USEPA general conformity rules set forth at 40 ozone maintenance part 51, subpart W—Determining Conformity of General Federal Actions to State or Federal Implementation Plans. The EPA is withdrawing the final rule due to adverse comments and will summarize and address all public comments received in a subsequent final rule (based upon the proposed rule cited above).

EFFECTIVE DATE: This withdrawal of the direct final rule will be effective March 25, 1996.

ADDRESSES: Copies of the documents relevant to this action are available for public inspection during normal business hours at the following location: U.S. Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois, 60604.

Regulation of Fuels and Fuel Additives: Revision to the Oxygen Maximum Standard for Reformulated Gasoline

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rulemaking.

SUMMARY: The Environmental Protection Agency (EPA or the Agency) today revises the regulations for reformulated gasoline in two ways. These changes only apply to reformulated gasoline certified using the Simple Model, which applies until January 1, 1998. First, the maximum allowed level of oxygen in reformulated gasoline is set at 3.2 percent by weight ("wt%"), where a state notifies the Administrator that a limit is needed for various air quality concerns. Second, absent such a state notification, the maximum limit on oxygen content for reformulated gasoline certified using the Simple Model would be that set by the valid range limits of the Simple Model. In addition, the provisions of section 211(f) of the Clean Air Act ("CAA" or "the Act") continue to apply to reformulated as well as other gasolines. These provisions independently set a maximum oxygen content for motor vehicle gasoline.

EFFECTIVE DATE: This rule will be effective on March 18, 1996.

ADDRESSES: Materials relevant to this FRM are contained in Public Docket No. A–95–29. Materials relevant to the reformulated gasoline final rule are contained in Public Dockets A–91–02 and A–92–12. Public Docket A–93–49 contains materials relevant to the renewable oxygenate requirement for reformulated gasoline; some of these materials may also be relevant to today's action. These dockets are located at Room M–1500, Waterside Mall (ground floor), U.S. Environmental Protection Agency, 401 M Street SW., Washington, D.C. 20460. The docket may be inspected from 8:00 a.m. until 5:00 p.m. Monday through Friday. A reasonable fee may be charged by EPA for copying docket materials.

FOR FURTHER INFORMATION CONTACT: Christine M. Brunner, U.S. EPA, Fuels and Energy Division, 2565 Plymouth Road, Ann Arbor, MI 48105. Telephone: (313) 668–4287. To request copies of this document, contact Delores Frank, U.S. EPA, Fuels and Energy Division, 2565 Plymouth Road, Ann Arbor, MI 48105. Telephone: (313) 668–4295.

SUPPLEMENTARY INFORMATION:

I. Electronic Copies of Rulemaking Documents Through the Technology Transfer Network Bulletin Board System (TTNBBS)

A copy of this notice is also available electronically on the EPA's Office of Air Quality Planning and Standards (OAQPS) Technology Transfer Network Bulletin Board System (TTNBBS). The service is free of charge, except for the cost of the phone call. The TTNBBS can be accessed with a dial-in phone line and a high-speed modem per the following information:

TTN BBS: 919–541–5742
(1200–14400 bps, no parity, 8 data bits, 1 stop bit)
Voice Help-line: 919–541–5384
Accessible via Internet: TELNET ttnbbs.rtpnc.epa.gov
Off-line: Mondays from 8:00 AM to 12:00 Noon ET

A user who has not called TTN previously will first be required to answer some basic informational questions for registration purposes. After completing the registration process, proceed through the following menu choices from the Top Menu to access information on this rulemaking.

<T> GATEWAY TO TTN TECHNICAL AREAS (Bulletin Boards)
<M> OMS—Mobile Sources Information
<K> Rulemaking and Reporting

<9> File Area #9 * * * Reformulated gasoline

At this point, the system will list all available files in the chosen category in reverse chronological order with brief descriptions. These files are compressed (i.e., ZIPed). Today's notice can be identified by the following title: OXCPFRM.ZIP. To download this file, type the instructions below and transfer according to the appropriate software on your computer:

<D>ownload, <P>rotocol, <E>xamine, <N>ew, <L>ist, or <H>elp Selection or <CR> to exit: D filename.zip

You will be given a list of transfer protocols from which you must choose one that matches with the terminal software on your own computer. The software should then be opened and directed to receive the file using the same protocol. Programs and instructions for de-archiving compressed files can be found via <S>ystems Utilities from the top menu, under <A>rchivers/de-archivers. After getting the files you want onto your computer, you can quit the TTNBBS with the <G>oodbye command. Please note that due to differences between the software used to develop the document and the software into which the document may be downloaded, changes in format, page length, etc., may occur.

II. Introduction

A. Background

As stated in the proposal (NPRM) to this rule (60 FR 52135, October 5, 1995), 40 CFR 80.41 contains the standards for certification under the reformulated gasoline program. Paragraph (g) of section 80.41 specified that reformulated gasoline designated as VOC-controlled (i.e. for sale during the summertime ozone season) must have no more than 2.7 wt% oxygen per gallon. The regulations further specified that if a state notifies the Administrator that it wishes to have the oxygen standard increased for VOC-controlled reformulated gasoline, a higher cap of 3.5 wt% would be approved by the Administrator, provided that there have been no occasions within the three preceding years when the ozone ambient air quality standard was exceeded within any covered area within the state. The requirements of this paragraph (g) apply to reformulated gasoline certified under the Simple Model, which is applicable until January 1, 1998.

In reexamining this reformulated gasoline provision, EPA determined that the maximum oxygen content for VOC-controlled reformulated gasoline generally was an unnecessary regulatory burden on gasoline and oxygenate producers, and that the requirements for a state to choose a higher oxygen level were also too rigid.

Therefore, EPA proposed to raise the maximum oxygen content of VOC-controlled reformulated gasoline to a higher oxygen level than was allowed by the regulation. Additionally, EPA proposed that upon request of the Governor to the Administrator, the maximum oxygen content of reformulated gasoline sold in that state would be capped at a lower level on the basis of air quality concerns. These two changes would make the maximum oxygen content provisions for VOC-controlled reformulated gasoline similar to those for non-VOC-controlled reformulated gasoline.

Today's action promulgates the provisions contained in the NPRM, with the exception that the references to the maximum oxygen content allowed under section 211(f) of the Act are deleted as unnecessary. This deletion does not change the substantive effect of the regulation. The maximum oxygen content allowed under section 211(f) continues to apply to reformulated gasoline and does not need to be referenced in this regulatory provision. There are a number of benefits to be gained by these changes to the regulation. These benefits include the potential for reduced burden on the states and industry, reduced cost of compliance with the reformulated gasoline requirements, and reduced costs to consumers. Discussion of the changes promulgated today, comments received on the proposal, and EPA's responses to these comments are presented below.

B. Final Rule

The maximum cap on oxygen content is deleted from section 80.41(g), so that the maximum amount of oxygen allowed in reformulated as well as other gasolines would be that allowed under section 211(f) of the Act subject to the limits of the valid range for use of the Simple Model.[1] There is an exception to this general rule. Where a state notifies the Administrator that the use of an oxygenate will interfere with attainment or maintenance of an ambient air quality standard or will contribute to an air quality problem, then the maximum amount of oxygen shall not exceed 3.2 wt% oxygen from ethanol.[2] The state

[1] The maximum amount allowed under section 211(f) of the Act is the amount that is substantially similar to gasoline used in the motor vehicle certification process, or allowed under a waiver granted under section 211(f)(4). In 1991, EPA issued an interpretive rule increasing the maximum amount of oxygen that EPA believes is allowed under the substantially similar criteria of section 211(f)—from 2.0 to 2.7 wt% oxygen. See 56 FR 5352 (February 11, 1991). In addition, the valid range of the Simple Model sets a maximum of 4.0 wt% oxygen. See 40 CFR 80.42(c).

[2] The maximum content is phrased as a limit on the amount of oxygen from ethanol because that is the only oxygenate that currently may be blended

Continued

may request this maximum for either VOC-controlled or non-VOC-controlled reformulated gasoline.

This is in effect the same revision that EPA proposed. It revises the current regulation in the following ways: (1) It treats VOC-controlled and non-VOC-controlled reformulated gasoline the same, under the Simple Model, as far as the maximum oxygen standard, (2) it deletes the oxygen cap in the regulation except where a state notifies EPA of air quality problems, (3) it revises the criteria for imposing an oxygen cap on request from a state, and (4) it changes the oxygen cap to 3.2 wt% oxygen from ethanol where a state requests a cap.

III. Summary of and Response to Comments

A. General

EPA received over 50 comments on this proposal. Over half of the comments were from individual citizens supporting the proposal and thanking EPA and the Administration for their continued efforts to enhance ethanol's usage in the reformulated gasoline program. EPA agrees that the use of ethanol in reformulated gasoline is an important issue of public policy. From the remaining comments, the substantive remarks applicable to this rulemaking are addressed here. Several commenters also remarked on issues not related to this rulemaking, for example, suggestions for other rules and other aspects of the reformulated gasoline program they would like modified. These remarks are not addressed here.

Several commenters that supported the rule indicated that EPA had not addressed many of the benefits of higher oxygenate and/or specifically ethanol use, such as reducing U.S. dependence on imported oil; stabilizing greenhouse gas emissions; benefits if the oxygenate is from a renewable feedstock; benefits to the rural economy; and development of alternative energy sources.

EPA had proposed that today's rule would be effective 60 days after publication in the **Federal Register**. However, commenters suggested making the rule effective immediately since VOC-controlled reformulated gasoline can be certified/used anytime prior to the beginning of the ozone season and a delay in the effective date would disrupt marketing plans and perpetuate the burden which EPA was attempting to reduce. EPA agrees with the commenter and thus is making today's action effective immediately upon signature of the Administrator.

lawfully above approximately 2.7 wt% oxygen, under section 211(f) of the Act.

B. Reformulated Gasoline Regulatory Negotiation

In developing the reformulated gasoline rulemaking, EPA participated in a regulatory negotiation (RegNeg) with interested parties. The result of this process was an agreement in principle (AIP) which contained an outline of the proposed reformulated gasoline rules. As a signatory to the AIP, EPA agreed to draft proposed rules consistent with the AIP outline and to give serious consideration to the outline in developing the final rule.

The AIP states that reformulated gasoline under the Simple Model would be deemed to result in no increase in NO_X emissions if it contained no more than 2.1 wt% oxygen or 2.7 wt% oxygen solely from MTBE. The AIP also states that other oxygenates may be approved at 2.7 wt% if no adverse NO_X impacts can be shown. As discussed in the NPRM, in the February 26, 1993 proposal (58 FR 11722) EPA proposed to allow all oxygenates to be used up to a 2.7 wt% oxygen contribution. At that point, EPA believed that increasing oxygen content to 3.5 wt% might increase NO_X emissions, so it limited use of the higher oxygen content to those states which requested a higher oxygen content and could provide supportive test data. In the December 1993 final rule (59 FR 7716, February 16, 1994), EPA maintained the 2.7 wt% cap, but allowed a state to request a higher cap of 3.5 wt% if it had had no ozone exceedances for the previous three years.

Only a few commenters addressed this issue. One commenter stated that during RegNeg, 2.7 wt% oxygen was deemed to not increase NO_X emissions. The commenter stated that that conclusion was subject to reassessment, and thus it was appropriate to consider modifying that portion of the rule at this time. Two other commenters, however, stated that the proposal was a breach of RegNeg which specifically limited the maximum summertime oxygen content. One commenter indicated they could only support this change if all RegNeg participants approved.

EPA does not believe that today's rulemaking to increase the maximum oxygen content of summertime reformulated gasoline is a breach of the RegNeg agreement. EPA did follow the AIP by drafting proposed rules consistent with the AIP outline and seriously considering the outline when developing the final reformulated gasoline rule. In fact, the 2.7 wt% summertime oxygen cap was part of that rule. In any case, EPA's regulatory actions at this time, several years after the AIP, must be based on a current exercise of discretion, taking into account present facts and circumstances. For example, EPA's Complex Model, one of the models used to certify reformulated gasoline, shows no increase in NO_X emissions with increased fuel oxygen content. Second, EPA believes that other factors (such as increasing base gasoline levels for sulfur and other fuel parameters in anticipation of lower levels in the final gasoline blend due to dilution when oxygenate is added) will not occur and thus will not increase NO_X emissions when higher oxygen contents are allowed. Additionally, today's rule simply modifies the final reformulated gasoline rule which contained provisions (which were not part of the AIP) allowing the higher oxygen content under certain circumstances.

C. Substantially Similar

Today's rule allows all oxygenates to be used in summertime reformulated gasoline (which is certified under the Simple Model) up to the limits in oxygen and/or oxygenate content specified for that oxygenate or combination of oxygenates under the substantially similar requirements of section 211(f) of the Act, or up to the limits which have been granted a waiver under that section, subject to the valid range limits of the Simple Model. Realistically, because of compliance requirements and oxygenate/gasoline economics, EPA expects only a few oxygenates to be used in reformulated gasoline.

A few commenters expressed concern that raising the maximum oxygen cap for all oxygenates to the highest allowable levels could potentially have negative effects on vehicles. One commenter stated that EPA should consider the American Automobile Manufacturer's Association's (AAMA's) recommended oxygenate limits. AAMA's fuel specifications (which also address other fuel components) are based on automotive requirements for optimum performance and maximum durability. In some cases, as with ethanol, the AAMA limits agree with the limits specified or waivered under section 211(f), but for other oxygenates, like isopropyl alcohol, they do not. Additionally, the commenter stated that under AAMA's fuel specification, use of certain oxygenates, e.g., methanol, at waivered or substantially similar levels is undesirable. Finally, one commenter stated that EPA should clarify specific oxygenate/maximum oxygen content values.

Although EPA understands the intent of the AAMA fuel specification, and the desire to have the most optimum fuel for automotive use, today's rule will not result in a fuel which is significantly different from fuels already in the marketplace or which could be in the marketplace. This rulemaking simply allows summertime reformulated gasoline to have a slightly higher maximum oxygen content, under the Simple Model, than it did last summer. Currently, all conventional gasoline and wintertime reformulated gasoline, with the exception of California gasoline, could contain oxygenates up to those levels specified or waivered under section 211(f). The "substantially similar" or waivered limits of section 211(f) apply to all gasoline in the country, conventional and reformulated gasoline. Additionally, it would not be technically sound, and could result in anti-competitive effects, to allow the "substantially similar" definitions to be valid for one fuel but not for another. For these reasons, EPA is retaining the intent of its proposal language on this aspect, namely that for summertime reformulated gasoline the maximum oxygen content shall be the maximum allowed under the provisions of section 211(f). This includes fuels with oxygen/oxygenate contents deemed "substantially similar" under 211(f) and fuels which contain oxygen/oxygenates at levels which have been waivered under 211(f).

EPA also proposed to increase the maximum oxygen content of non-VOC-controlled reformulated gasoline from the current 3.5 wt% oxygen (which was meant to be akin to 10 vol% ethanol) to the maximum allowed under the section 211(f) "substantially similar" provision and any waivers granted under that section. All comments received on this issue supported this change.

Today's rulemaking does not change the maximum oxygen and/or oxygenate contents allowed for the various oxygenates under the "substantially similar" and waiver provisions, and as a result these provisions are not addressed here.

D. Environmental Impacts

Some comments supported the proposal as having no significant environmental impact. One commenter stated that, assuming that this proposal results primarily in increased ethanol use, ethanol production is both energy-efficient and environmentally sound. Several other commenters opposed the proposal based on expected environmental harm, and questioned EPA's environmental assessment. One commenter stated that it opposes the rule until EPA can demonstrate, with more appropriate analyses, that no detrimental environmental impacts result. These commenters were particularly concerned with increases in NO_X and VOC emissions. Their comments are discussed in more detail below. One commenter questioned the use of models to estimate environmental impact, asserting that it is scientifically dishonest to draw conclusions from a scientific model, since model output is a mathematical reflection of model input. This commenter felt that EPA should draw its conclusions solely from measured data. One commenter said that concerns about water and soil implications of increased corn farming for ethanol production do not reflect the increasing use of sustainable agricultural practices which save money and better protect the environment.

EPA has examined the environmental impacts of modifying the oxygen cap requirements under the Simple Model, and those impacts are expected to be minimal. As will be discussed (section E), EPA stands by its use of the Simple and Complex Models to estimate environmental impact, as they are the basis of the reformulated gasoline program.

1. NO_X Emissions Impacts

As stated in the NPRM, EPA has clearly determined that changing the oxygen content of reformulated gasoline is unlikely to have any negative impact on NO_X emissions, regardless of the type of oxygenate under consideration, for purposes of compliance with the no NO_X increase requirements for reformulated gasoline [3]. In addition, an increase in the maximum oxygen content is not expected to increase NO_X emissions from reformulated gasoline compared to a gasoline with a lesser oxygen content when viewed from the perspective of the entire in-use fleet.

Some commenters disagree with EPA's determination that an increase in the maximum oxygen content would not be expected to increase NO_X emissions. These commenters feel that EPA has not provided adequate justification that environmental detriment will not occur, and that EPA does not adequately justify the expected impact on NO_X emissions. One commenter pointed out that the Auto-Oil research studies show increased NO_X with increased oxygenate use, and even that all data sets show the same or increased NO_X emissions. Theoretically, oxygenated fuels are used to reduce CO by enleaning the air/fuel mixture and should therefore increase NO_X emissions. Further, this commenter pointed to EPA's 1989 Guidance, and other Agency studies, which conclude that ethanol blends increase NO_X.

The MOBILE model is EPA's best model available for predicting emissions from the in-use fleet because it accounts for the current in-use technology distribution as well as the mix of normal and high-emitting vehicles, i.e., vehicles of different ages. EPA believes that accounting for both normal-emitters and high-emitters is crucial in the estimation of in-use emissions. The current MOBILE model shows no increase in NO_X emissions with increased fuel oxygen content.

EPA recognizes that much of the currently available data suggests that increases in oxygen content will increase NO_X emissions. However, most of this data was collected on normal-emitting, properly maintained vehicles representing a subset of the technologies available in-use. EPA has concluded that robust conclusions concerning the in-use fleet cannot be drawn from such data. Both the MOBILE model and the Complex Model, which is essentially a major subset of the MOBILE model because it represents 1990 technology, include emission estimates for both normal-emitting and high-emitting vehicles, and thus may provide more accurate estimates of the effects of oxygen on NO_X. For example, the high-emitter portion of the Complex Model indicates that increases in oxygen content decrease NO_X emissions. Such an effect might be due to the cooler burn that oxygenates effect on combustion, or a suppression of preignition by the high octane value of the oxygenate. Regardless, a weighted representation of normal-emitter and high-emitter effects in the Complex Model results in oxygen having essentially no effect on NO_X overall. The MOBILE model, which is designed to represent the in-use distribution of vehicle technologies and emission levels, concurs with the Complex Model in this respect.

Conversely, other commenters agreed that increased oxygenate use would not result in increased NO_X emissions. Assuming that ethanol use would increase, one commenter stated that ethanol displaces other gasoline components which have greater NO_X impacts. Additionally, as noted in the NPRM, increased E200 does increase NO_X, but the overall effect is decreased NO_X. This commenter included data which showed no statistically significant NO_X emissions increase from splash-blending ethanol to get 3.5 wt% oxygen. Another commenter pointed out that preliminary data show that the

[3] Under section 211(k)(2), reformulated gasoline is not allowed to increase NO_X emissions from baseline vehicles when compared to the statutory baseline gasoline.

summer 1995 reformulated gasoline program reduced NO_X emissions somewhat. In general, this commenter believed that NO_X emissions will be lower and sulfur, olefins and aromatics will not increase (supported by the 1995 data), but stated that this cannot be concluded for all batches.

EPA has concluded, on the basis of results generated by the Complex Model, that the use of greater levels of oxygen would not by itself increase NO_X emissions (although the associated higher levels of oxygenates could theoretically increase emissions due to the unpredictable impacts of dilution—as discussed below). As will be discussed, use of the Complex Model in determining the emissions impacts of reformulated gasoline is appropriate and correct. However, EPA recognizes that, in-use, individual states may still have some concerns about the impact of increased oxygen levels on NO_X emissions from the in-use fleet. EPA is retaining an option whereby states could elect to maintain the currently promulgated lower maximum oxygen content.

One commenter pointed out that a no NO_X increase is specified in the Clean Air Act. This commenter believes that oxygen use in gasoline leads to increased NO_X emissions and that this regulation is in violation of the Act by allowing any oxygenation of reformulated gasoline. This commenter feels that allowing 10% ethanol, which results in the highest NO_X increases, would seem to compound the "marginally legal" interpretation of the Act.

As stated above, EPA has determined that increased oxygen does not result in increased NO_X emissions when evaluated with the Complex Model. Therefore this action in no way violates section 211(f) of the Act.

2. VOC Emissions Impacts

Several commenters were opposed to the proposal to increase the maximum oxygen content because it would result in increased summertime VOCs, at a time when those emissions present the greatest problem. One commenter pointed out that a result of this proposal could be to displace MTBE with ethanol, increasing the market-share of ethanol-containing reformulated gasoline and increasing VOC emissions in those areas. Another commenter felt that EPA's argument that most of the VOC reductions are due to RVP incorrectly suggests that the reactivity of the VOC emissions has little to do with ozone formation. However, other commenters agreed that, as long as there is no RVP allowance for 10% ethanol blends, increases in evaporative VOC emissions should be minimal. A final commenter felt that the proposal would result in beneficial VOC impacts.

EPA continues to believe that increased maximum oxygen content is unlikely to negatively affect VOC emissions, and could have slightly positive impacts. Although ethanol does slightly increase the RVP of gasoline to which it is added, there is no potential for an increase in RVP in a VOC-controlled reformulated gasoline under the Simple Model because the RVP specifications are not being changed. A fuel producer would have to use other means to reduce RVP when ethanol is added.

Two commenters noted apparent inconsistencies in the assumption of ethanol use and potential increases in evaporative emissions. Specifically, commenters pointed out that in the December 1993 final rule, EPA had stated that a 1 psi RVP allowance for ethanol blends could forfeit all VOC emissions reductions of the reformulated gasoline program. Yet, they say, in this proposal, EPA stated that ethanol "slightly" increases the RVP of gasoline to which it is added. They suggest that EPA should correctly characterize the RVP impact.

The statements are not inconsistent. As stated above, while ethanol does increase RVP if RVP is not otherwise controlled, the reformulated gasoline standards limit RVP for all reformulated gasolines.

E. Complex Model

Several commenters thought EPA had inappropriately used the Complex Model to estimate the impact of higher oxygen content on NO_X emissions from reformulated gasoline. They stated that the Complex Model was designed for reformulated gasoline certification and that it was not an air quality or emissions inventory model. Most of these commenters stated that EPA's MOBILE model is the most appropriate tool for forecasting emissions and demonstrating air quality impacts. Other commenters said that the MOBILE model, the Complex Model and the CARB Predictive Model should all be used in any evaluation of NO_X emissions impacts. One commenter said that neither the Complex Model nor the CARB model is directly applicable to EPA's analysis regarding this rulemaking.

The Complex Model is not an air quality or emissions inventory model, and EPA did not propose using the Complex Model for such purposes. Improved air quality is the purpose of the reformulated gasoline program, and significant reductions in ozone-forming VOC emissions and toxics emissions will be realized because of the program. The MOBILE model is a valuable tool for estimating the air quality impacts of fuels for an in-use fleet, as it includes a wide variety of vehicle ages and technologies. The impact of Federal reformulated gasoline (but not California Phase 2 reformulated gasoline at this point) on in-use emissions can be estimated using the MOBILE model. However, for certification purposes, the effects of the reformulated gasoline program must be determined relative to 1990 technology vehicles run on 1990 baseline gasoline. This rulemaking is aimed at establishing the requirements for certification of gasoline as meeting the reformulation requirements established under the CAA, including compliance with the oxygen content and no NO_X increase requirements. For this reason and the reasons discussed in section D, EPA believes that the Complex Model is the most appropriate tool for estimating changes in NO_X emissions due to this rulemaking, for purposes of compliance with the no NO_X increase requirement for reformulated gasoline under section 211(k)(2) of the Act. EPA did evaluate the air quality impacts of this rulemaking, which are addressed in section D. As indicated there, both the Complex Model and the MOBILE model show no increase in NO_X emissions with increased oxygen content.

EPA certifies fuels as meeting the reformulated gasoline requirements on the basis of a comparison to 1990 technology vehicles. Both the Simple and Complex Models are tools through which this certification is carried out. There are no oxygen caps under the Complex Model other than the upper limits for the valid range of the model, set at 4.0 wt% oxygen. For reformulated gasoline, the Complex Model results must show no increase in NO_X emissions over statutory baseline levels. As discussed, the Complex Model shows no increase in NO_X emissions when oxygen content is increased. EPA has made and continues to make a variety of decisions, including setting the Phase II reformulated gasoline standards, based on the Complex Model, again, because that it is the basis for reformulated gasoline certification.

Several commenters indicated that EPA's finding that increased oxygen will not increase NO_X emissions is due to statutory constraints placed on the model and certain key assumptions. EPA agrees that certain statutory requirements and certain assumptions have affected the emission effects estimated by the Complex Model.

Commenters expressed concern about the size of the high-emitter database and the fact that the Complex Model represents only a portion of the in-use fleet, which could make it an inappropriate tool for estimating emissions impacts of the overall fleet. EPA's conclusions regarding oxygen effects on NO_X are based on test data from 1986 and later closed-loop, adaptive-learning vehicles with 3-way or 2-way plus oxidation catalysts (i.e., 1990 technology), and would apply to much of the fleet. EPA acknowledges that the results of the Complex Model do not automatically apply to the entire in-use fleet, but nonetheless believes that it is not inappropriate, especially given the agreement between the Complex Model and the MOBILE model with regard to the impact of oxygen content on NO_X emissions.

Several commenters indicated that, theoretically, due to air/fuel enleanment and combustion theory, NO_X emissions should increase with increased oxygen content. EPA believes however, that NO_X emissions increases due to increased oxygen content would not necessarily occur. The fundamental science behind closed-loop, adaptive-learning designs (i.e., the 1990 technology contained in the Complex Model) argues that enleanment due to oxygenate addition would be offset by reduced air intake. Because of the offset enleanment effects, NO_X emissions will not necessarily increase with increased oxygen content. The test data on which the Complex Model is based supports this.

One commenter stated that numerous studies, including Auto-Oil studies, have shown increased NO_X emissions with increased fuel oxygen content. EPA does not refute these studies—vehicle technologies and ages certainly affect emissions results, and EPA recognizes that in these instances, NO_X increases were observed. However, as discussed earlier in section D, the Complex Model, which is the basis of EPA's analysis for this rulemaking, has both a normal-emitter portion and a high-emitter portion. The effect of oxygen on NO_X emissions for these two emitter groups, when weighted, yields essentially no negative change in NO_X emissions with increased oxygen content.

One commenter stated that the normal emitter part of the Complex Model is consistent with theory but the high emitter part is not, and therefore, overall, the model is incorrect. EPA does not believe that simply because one part of the model "disagrees" with theory and another part of the model "agrees" with theory that the model is incorrect. Many factors affect the emission results predicted by the Complex Model, and it is inappropriate to discount those results simply because they do not agree with theory. The Complex Model was adopted after rigorously analyzing a broad spectrum of empirical test data. The commenters objections fail to show the invalidity of this test data or the analysis leading to the Complex Model.

Unlike the Complex Model, the CARB Predictive Model, also a fuel certification model, shows that NO_X emissions increase with increased fuel oxygen content. According to most commenters on this issue, the difference in NO_X predictions between the models is due to differences in approach to model development. Commenters mentioned that the CARB model contains more data, represents more of the in-use fleet and differs in its treatment of high emitters. For these reasons, commenters say, the CARB model is more appropriate for estimating emissions impacts in California associated with oxygen changes. EPA agrees that the difference in NO_X predictions between the two models is due to different approaches to model development. Factors such as vehicle technologies, vehicle age, and quality control during testing all affect predicted emissions results. Because of the manner in which normal-emitting and high-emitting vehicles are included in the Complex Model, EPA believes that the Complex Model is the more appropriate tool for estimating NO_X impacts due to fuel changes, for certification of reformulated gasoline. Together with the MOBILE model, the Complex Model is also appropriate for in-use evaluation purposes, from a national perspective.

In contrast with most of the comments on this issue, one commenter stated that EPA's suggestion that the Complex Model was not representative of the in-use fleet is unfounded. The reformulated gasoline program is meant to reduce ozone through VOC (and NO_X) emissions reductions. Based on the Complex Model, these reductions should occur. EPA believes that the Complex Model and the MOBILE model are sound tools for predicting the impact on in-use NO_X emissions from the regulatory change adopted today from the perspective of the fleet nationwide. It may not be the most appropriate tool for predicting local in-use emissions, however, given differences in local fleets versus the fleet on which the Complex Model is based. That is one of the reasons EPA is providing states with an option that would lower the oxygen maximum to 3.2 wt % oxygen from ethanol.

F. Dilution

In the proposal, EPA stated that it expected no NO_X increases due to this rulemaking because (1) the Complex Model shows no increase in NO_X emissions with increased oxygen content, (2) the addition of oxygenate to a base gasoline dilutes other fuel parameters which overall should yield a net reduction in NO_X emissions, and (3) EPA does not expect fuel producers to offset the dilution effects, i.e., to purposely take fuel parameters back toward their original value in the base gasoline. Several commenters agreed with EPA. In fact one commenter stated that the argument that dilution effects should result in net decrease in NO_X can be strengthened by reviewing California data and the outstanding performance of reformulated gasoline during the summer of 1995.

One commenter stated that the proposal relies heavily on "expected" fuel changes. Because these changes are not guaranteed, the commenter stated that they should not be counted in estimating NO_X emissions. This commenter also stated that EPA does not allow such latitude (i.e., the use of "expected" fuel changes) with state implementation plans (SIPs) and should not take advantage of it in this case. The focus of this rulemaking is determining what regulatory controls, if any, are appropriate to implement the Act's requirement that reformulated gasoline not increase NO_X emissions compared to baseline gasoline. In that context, expected fuel changes are quite relevant. Fuel producers must determine for themselves the most cost-effective means for complying with the reformulated gasoline requirements. When complying under the Simple Model, which is all that is affected by today's rulemaking, refiners must meet the Simple Model RVP and toxics requirements, oxygen and benzene content requirements and ensure that the finished gasoline and reformulated gasoline blendstock for oxygenate blending, or RBOB, (plus oxygenate) they produce will not exceed their baseline values for sulfur, olefins and T90. The values of these latter three fuel parameters then, on average, should be less than or equal to the baseline values, and reductions in these values have been shown to reduce NO_X emissions. It is possible but highly unlikely that E200 could increase (aside from the increase due to dilution), and no data to refute EPA's assumption on this matter has been submitted. Thus EPA is highly confident that the expected fuel changes will occur, on average, and that there will be no net increase in NO_X

emissions. An additional maximum cap on oxygen is not reasonably needed to achieve this result.

It is not possible, nor necessary, for EPA to know exactly what fuel changes each refiner will make, as long as the requirements of the reformulated gasoline program are met. The overall premise of this rule is that the Complex Model shows—even without the effects of other fuel changes—no increase in NO_X emissions with increased oxygen. Any other fuel changes will either increase or decrease NO_X emissions, and EPA is simply saying that it believes, given the other requirements of the program, that the net effect of these other fuel changes will be to further reduce NO_X. EPA's discussion of "expected" fuel changes are based on refinery studies as well as discussions with the industry, have been discussed in other works and rules related to the reformulated gasoline program and have not been significantly refuted.

G. Ethanol Market Share

Several comments were received regarding how this change to the reformulated gasoline regulation would impact ethanol use. Several felt that this change would result in increased ethanol use. However, one commenter felt that since EPA is not changing RVP standards for reformulated gasoline, summer 10 vol % ethanol blends would be produced only by using sub-RVP blendstock, which is in short supply.

Assuming that ethanol use would increase, commenters cited many benefits that would be realized by this change. One commenter stated that even a modest increase in the use of ethanol would provide associated energy gains and environmental benefits. Another commenter felt a potential effect of the change may be to shift ethanol use from conventional areas, and most likely would reduce ethanol exports. Other commenters noted that increased ethanol use would benefit rural America by increasing grain production.

One commenter felt that an expanded market opportunity for ethanol would not necessarily harm the domestic MTBE/methanol market. This commenter pointed out that domestic MTBE is not able to meet reformulated gasoline demand. As much as 895 million gallons of MTBE could be imported to satisfy reformulated gasoline demand, and this deficit is 30 times the potential demand this change will create for ethanol. This commenter also pointed out that this change creates a demand for ethanol which is only a fraction of that which would have been created by the renewable oxygenate standard.

EPA recognizes that this change in the maximum oxygen content allowed in reformulated gasoline may result in slightly increased ethanol use. This increase in the ethanol market could well result in the benefits these commenters have mentioned. However, today's action does not guarantee an increase or decrease in marketshare for any oxygenate. EPA today is simply removing a regulatory burden, the current oxygen content cap. Ultimate use of any oxygenate, including ethanol, will depend on the economic situation of each fuel producer.

H. Commingling

One commenter stated that the commingling concern discussed in the proposal was exaggerated. However, many commenters on this issue disagreed with EPA's comment that there may be a slight commingling benefit due to this rule if (under an assumption of constant ethanol volume) there are fewer gallons of reformulated gasoline at the 10 vol% ethanol rather than more gallons at 7.8 vol%. Most believed that summertime VOC emissions in nonattainment areas would increase, due to commingling, as a result of this rule. Commenters said that if ethanol use increases (or MTBE market share decreases) during the summer, there will be more gallons of ethanol-containing reformulated gasoline, and more instances of commingling. One commenter stated that commingling effects are complex and dependent on a number of factors—oxygenate market share, consumer purchase patterns, etc. This commenter stated that EPA's analysis cannot justify a conclusion that commingling impacts are improved or worsened by the proposed rule. Another commenter stated that EPA should evaluate the persistence of the commingling RVP boost. This commenter stated that the persistence will be increased since there will be a higher concentration of ethanol in the tank.

EPA agrees with the commenter's statement that a reduction or increase in commingling impacts cannot be concluded. In the proposal, EPA discussed some scenarios under which the impact of today's rule could increase or decrease the commingling effects. However, as indicated in the Regulatory Impact Analysis (RIA) to the December 1993 final rule, commingling is affected by several factors including ethanol marketshare and ethanol content. This rulemaking may result in changes in ethanol marketshare in reformulated gasoline and/or conventional gasoline areas, or in changes in the ethanol content of reformulated gasoline and/or conventional gasoline, compared to last year. Depending on whether such changes occur, and their magnitude, it is possible that VOC emissions could increase or decrease, due to commingling, as a result of this rule. EPA believes, however, that it would be difficult to quantify or compare the commingling impact of ethanol at 7.8 vol% (as in 1995) to the 10 vol% which is allowed by today's action.

Several commenters indicated that EPA appeared to be contradicting itself not only in the proposal, but in conflict with earlier work not directly related to this rulemaking. For instance, one commenter stated that EPA was inconsistent with its expected change (or no change) in ethanol use—"should contribute to ethanol increase" and "* * * total ethanol volume remains the same". EPA does not agree with commenters in this regard. EPA cannot be assured of any one outcome, e.g., whether ethanol marketshare increases or decreases, whether more ethanol is used in fewer gallons of reformulated gasoline compared to last year, or whether ethanol volumes will shift from conventional to reformulated gasoline areas or from one reformulated gasoline area to another. These factors will be resolved in the marketplace after promulgation of this rule. The language contained in the proposal represented EPA's thoughts about possible outcomes for given scenarios.

One commenter mentioned that in the Renewable Oxygenate proposal, EPA excluded ethanol as a renewable oxygenate when used in VOC-controlled reformulated gasoline because the commingling VOC increase were unacceptable. In that proposal, commingling VOC increases were deemed unacceptable because the increased use of ethanol could approach a 30% marketshare. An ethanol marketshare of that magnitude would certainly have unacceptable increases in VOC emissions due to commingling. However, although the effect of today's action on oxygenate marketshare cannot be definitively determined, it almost certainly will not approach the 30% level (for ethanol) discussed in the Renewable Oxygenate proposal. For this reason, EPA's commingling concerns regarding that proposal are not applicable to today's rulemaking.

A few commenters were concerned that any commingling benefits would occur in attainment areas—where it's not needed. Again, as stated above, EPA can only estimate the commingling impact of today's rule. Marketplace dynamics will determine, among other things, whether more ethanol is produced, whether it is used in conventional or reformulated gasoline areas, and whether ethanol volumes shift geographically. One commenter expressed concern that by referring to a national basis, EPA has lost sight of the specificity of reformulated gasoline to nonattainment areas. EPA has not lost sight of the area specificity of the reformulated gasoline program but again was attempting to estimate potential impacts of today's rule.

I. Energy Impacts

One commenter stated that EPA was underestimating the potential energy benefits, including benefits for increased displacement of gasoline and imported MTBE (energy security, trade balance). A few commenters questioned the DOE study mentioned in the proposal—one mentioned that the cited study was draft—and provided a copy of the final report which had a more positive energy balance attributable to ethanol production. It showed that ethanol production is 25% more energy efficient than gasoline. Another commenter indicated that recent USDA studies have shown a positive energy balance for the production of ethanol.

EPA agrees that use of ethanol has some positive energy implications, depending on various circumstances, including whether it is used in VOC-controlled or non-VOC-controlled reformulated gasoline. However, because the additional ethanol use allowed by today's rule will be only be roughly 2.2 vol% (per gallon) over 1995 levels, EPA does not expect the energy impacts of the overall reformulated gasoline program to change significantly due to this rulemaking.

J. Economic Impacts

As stated in the NPRM, the largest part of the cost associated with Phase I reformulated gasoline is the oxygen content required by the Act. Lifting the oxygen cap may provide an economic advantage by allowing some refiners to use ethanol during the ozone season when they would not otherwise be able to do so. However, as discussed in the NPRM, refiners must consider a variety of factors when selecting an oxygenate for reformulated gasoline (or any other fuel).

Several commenters supported EPA's economic assessment of the impact of today's action. Some suggested that further economic benefit may occur due to an expanded industrial base and additional jobs from increased domestic oxygenate production. Additional positive economic impacts suggested by commenters include reduced consumer reformulated gasoline cost and increased farm income. One commenter felt the higher oxygen cap would allow refiners to maximize the displacement value of ethanol, reducing the cost of RBOB and ethanol-containing reformulated gasoline. This commenter also stated that since ethanol costs are lower than MTBE costs, additional use of ethanol would increase market penetration of ethanol and provide greater savings for consumers. One commenter explained that the current cap denies refiners the dilution benefits of higher ethanol blends to meet the reformulated gasoline toxics requirements cost-effectively. This commenter indicated that to use ethanol now, refiners must produce a blendstock lower in RVP and aromatics.

One commenter was concerned that EPA's economic assessment ignored the effect of this rule on alkylates. This commenter stated that both alkylates and oxygenates (ethers) use olefins as a feedstock, are high octane blending components, and can contribute to emissions reductions. If olefin feedstocks are limited, by maximizing oxygenates, alkylate feedstocks will also be limited, therefore limiting the emissions benefits of alkylates. A refiner's lowest cost option will likely be to substitute oxygenates for alkylates, leaving olefins and aromatics in gasoline. According to this commenter, the California reformulated gasoline program regulates out olefins and aromatics by increasing alkylates and oxygenates while the Federal reformulated gasoline program has shifted gasoline from alkylates to oxygenates with questionable improvement in emissions. Further, this commenter states that by replacing alkylates with oxygenates, consumers will be paying substantially more per mile driven, since alkylates increase fuel economy. This commenter concludes that EPA neglected these issues in its economic analysis and only superficially addressed economic burden, without regard for actual impact on consumers. This commenter suggests that the Agency review what has actually occurred in the marketplace, and consider the economic burden on consumers.

EPA did not intend to evaluate the impact of oxygenate as a whole, but merely the impact of slightly increased oxygenate use, as this rulemaking seeks only to increase the maximum allowable oxygen content, one limited aspect of the oxygen content requirements in the reformulated gasoline program. EPA believes increasing the maximum allowable oxygen content increases flexibility in oxygenate choice for refiners, which can only be economically beneficial for fuel producers and consumers. As most of this increased oxygenate use is likely to be ethanol, this provision will have little impact on the refinery trade-off between alkylate and oxygenate production.

K. Compliance Burden

As stated in the NPRM, EPA expects today's action will reduce the regulatory burden on gasoline and oxygenate producers, and will simplify the requirements for a state to choose a different maximum oxygen level. Several commenters agreed that this change in the regulation would reduce the burden on fuel producers and on the states. This change would provide increased flexibility in meeting the reformulated gasoline requirements and maximize the efficiency of oxygenate use. One commenter pointed out that it would also reduce the burden for blenders, simplifying logistics and inventory management by eliminating the need to change ethanol blending volumes on a seasonal basis. However, some commenters felt that this change could increase the burden on the states by requiring them to request a lower cap. These commenters felt that estimating a reduced burden on the states assumes that the states want to increase oxygenates. Finally, one commenter felt that when proposing these changes, EPA must address actual or potential regulatory conflicts between technical changes and fuel changes, and not focus solely on attempts to reduce administrative burden.

EPA continues to believe that this regulatory change in the maximum oxygen content of reformulated gasoline will reduce the regulatory burden on gasoline and oxygenate producers and blenders, and on the states. Even if the majority of states prefer to keep the lower oxygen cap, the requirements for doing so are minimal. The Complex Model has revealed that there is no technical reason to limit the oxygen content of gasoline certified as reformulated gasoline, hence the reduction in burden is justified.

L. California

Several commenters felt that California should be exempt from the requirements of this regulation for a variety of environmental and regulatory reasons. First, California has unique air quality problems. One commenter stated that the higher maximum oxygen content allowed under today's action could have a detrimental effect on California's ability to meet the National Ambient Air Quality Standards (NAAQS). Additionally, California retains its authority to regulate fuels.

See section 211(c)(4)(B) of the CAA. Under this authority, California has limited the oxygen content of gasoline sold in the state to 2.7 wt%. Commenters felt that, for these reasons, California should not be required to go through the bureaucratic opt-out hurdle and should be specifically exempted from the rule.

EPA recognizes California's unique environmental problems and regulatory authority. While the Federal standards for reformulated and conventional gasoline do apply in California, if California has imposed its own more stringent regulations, as it has regarding oxygen content, then fuel producers must abide by California's more stringent standards. Thus, because California's oxygen maximum is more stringent than EPA's, that maximum would be the controlling maximum in the state, and the Governor of California would not be required to request a lower oxygen maximum.

M. State Requests for Lower Oxygen Maximum (Cap)

In the NPRM, EPA proposed that the maximum oxygen content of reformulated gasoline sold in a state will be limited to a lower level upon the request of the state on the basis of local air quality concerns. EPA expects that such a request would come from the Governor of the state or their authorized representative. To obtain the lower maximum oxygen content, the state must notify the Administrator that the use of an oxygenate at higher levels would interfere with attainment or maintenance of an ambient air quality standard, or will contribute to an air quality problem. EPA proposed that the lower oxygen cap would become effective 30 days after the Administrator announced the lower standard in the **Federal Register**.

Some commenters had concerns regarding the procedures and requirements for the lowering of the maximum oxygen content by the Governor. One commenter stated that the EPA must include notice and comment rulemaking procedures for any change to an reformulated gasoline rule, per section 307(d)(1), including states requesting a lower cap. EPA disagrees with this comment. EPA does not agree that a separate rulemaking must be conducted in response to each state's request for a lower oxygen maximum. Through this rulemaking, EPA is establishing a petition-based process that will address, on a case-by-case basis, future individual state requests for a lower oxygen maximum standard under the Simple Model. The regulations establish a clear and objective criteria for EPA to apply in these future non-rulemaking, adjudication actions. These criteria specify that a state's notification to the Administrator must include a notification that the use of an oxygenate will interfere with attainment or maintenance of an ambient air quality standard or will contribute to an air quality problem. This application of regulatory criteria on a case-by-case basis to future individual situations does not require notice and comment rulemaking, either under section 307(d) of the Clean Air Act or the Administrative Procedure Act.

It is not uncommon for the Agency to establish such a petition-based process within its regulations as a way to apply the criteria established in a regulation to a wide variety of individual cases. The reformulated gasoline regulations, for example, include a petition process for approval of individual baseline, augmentations of the Complex Model, exemptions, alternative test procedures, and the like. EPA believes that approach is most appropriate here as well, as it will allow for expeditious and consistent Agency action on the individual request presented by states.

The provision allowing a Governor to request a lower maximum oxygen content is the same as allowed for non-VOC-controlled reformulated gasoline in the December 1993 rule. No notice and comment procedures were specified in that situation, and similarly, none are required under today's rulemaking. This commenter also objected to the proposed 30 days from publication (in the **Federal Register**) effective date for the lower cap. This commenter felt that refiners would need at least 90 days to sell off stocks of 10 vol% ethanol reformulated gasoline. Another commenter supported the states rights to have a lower cap, but suggested that it become effective in 60 days rather than 30 days. A third commenter felt that as much as 6 months would be needed before a new, lower oxygen maximum took effect. A final commenter suggested that if a request would take effect 30 days after publication, the announcement should be published within 15 days of EPA's receipt of the request. These timing concerns were supported by another commenter who could not support allowing states to impose different oxygen caps, suggesting that this could strain gasoline distribution bulk storage capacity.

EPA agrees with commenters that 30 days may be too short a transition for fuel producers. Therefore the period has been extended to 60 days. A longer extension would not be practical, since this change only applies to the Simple Model during the summer seasons of 1996 and 1997. Based upon information previously supplied to the Agency,[4] EPA believes that 60 days will be sufficient to use the higher-oxygen content reformulated gasoline, thus minimizing storage and distribution problems. While this provision could potentially add another layer of fuel distinction to the reformulated gasoline program, the impact is expected to be small, primarily because the use of specific oxygenates tends to occur in geographic pockets. Use of ethanol (in reformulated gasoline) for instance, is prevalent in certain areas of the country and is very limited in other areas. Those states where it is widely used are not likely to request a lower oxygen maximum, because in those states, ethanol likely provides significant economic benefits. In states which request a lower maximum, it is likely that ethanol use in that state has always been minimal. For clarification purposes, states are not allowed to choose any lower maximum oxygen content. The lower oxygen maximum would be 3.2 wt% oxygen for ethanol for all cases where a lower maximum is requested by a state.

Comments were mixed regarding the requirements which states must fulfill when requesting the lower oxygen maximum. One commenter stated that EPA needed to verify in the final rule that a state would merely have to notify EPA of its intent to have a lower cap. Those commenters opposed to allowing states to request a lower maximum oxygen cap felt that a state should be required to demonstrate "to the satisfaction of the Administrator" that unique localized circumstances exist which require the lower oxygen. According to these commenters, states should be required to include specific modeling and test data.

Another commenter felt that states should be allowed to use models more appropriate to their region (than the Complex Model) to make demonstrations for the lower oxygen maximum.

EPA believes that each state should retain the greatest flexibility in addressing local concerns over increased oxygenate use. This will minimize the risk that increased oxygenate use will interfere with local air quality problems. Thus, EPA is retaining its proposed language on this issue. This provisions will maintain

[4] U.S. EPA, "Final Regulatory Impact Analysis and Summary and Analysis of Comment For: Renewable Oxygenate Requirement for Reformulated Gasoline," June 29, 1994.

EPA's intent of increased flexibility and reduced burden for the states, as well as other parties which may benefit by today's action.

Several commenters questioned the need for a lower cap at all. These commenters felt that EPA's technical findings on the air quality effects of higher ethanol reformulated gasoline blends shows no adverse impact and are technically sound. Additionally, these commenters felt that many stakeholders have participated in the research, and the conclusions should therefore be difficult to challenge. While EPA is confident of its technical findings, it recognizes that general modelling will not apply to all regions of the country, and that there may exist unique regions that may be negatively impacted by the increased oxygen content. Therefore the option of requesting the lower standard is appropriate.

Finally, some commenters were concerned that a state's request for a lower maximum oxygen content be to control average oxygen content, and not to discriminate against a particular oxygenate. They did not want the lower cap to be a marketplace barrier to ethanol. States must request a lower maximum oxygen content based on air quality concerns. Regardless of which oxygen maximum a state has, the reformulated gasoline program is neutral with respect to the type of oxygenate used to satisfy the oxygen requirement.

N. Performance

In the proposal, EPA did not address potential engine or vehicle performance problems that might occur as a result of this rulemaking, primarily because none attributable solely to this rulemaking are expected. Although this rule will essentially allow a slightly higher ethanol content in summertime reformulated gasoline than was allowed last summer, the increase will not result in gasoline ethanol contents which are greater than those currently in the marketplace in conventional gasoline and wintertime reformulated gasoline. Additionally, if a refiner was determining compliance based on the Complex Model, he could have produced reformulated gasoline containing 10 vol% ethanol last summer. Thus, since this rulemaking does not allow a significantly different fuel into the marketplace, no performance problems are expected, and thus the issue was not addressed in the proposal. A few comments were, however, received on this issue.

One commenter expressed concern that an increase in allowable ethanol content will increase compatibility problems for consumer vehicles, resulting in higher maintenance costs. This commenter also stated that truck mixing, typically how ethanol blends are produced, can be insufficient—stratification can occur with one layer having a higher (than 10 vol%) alcohol content. Although it is possible that fuels containing greater than 10 vol% ethanol could result in vehicle or engine performance problems, and that truck mixing could result in a non-complying fuel, such concerns are not directly or solely applicable to this rulemaking. As discussed above, the maximum oxygen content of summertime reformulated gasoline allowed by today's rule is limited to the maximum ethanol content allowed under section 211(f), namely 10 vol%. The potential performance and mixing problems cited could occur with any gasoline containing up to the maximum amount of ethanol allowed under section 211(f).

Another commenter expressed concern about the impact of this regulation on small engines, particularly nonroad engines. This commenter stated that EPA had not considered the effects of this rulemaking on small engines. The commenter was concerned that increased oxygenates would lead to deterioration in the condition and performance of small two-cycle engines, and cited several potential performance problems. The performance problems included vapor lock; warm start; increased fuel consumption; deposition problems; separation of mixing oil; swelling of rubber parts; corrosion; extraction of rubber material and deposition at other locations. Although the commenter claimed that some of these problems had occurred recently in tests with 10 vol% ethanol blends, no data was provided to support this claim. The commenter noted that with present levels of allowable oxygenates, some performance problems have been noted and was concerned that increasing the allowed level would cause more serious performance problems. Of particular concern were enleanment-related problems which can occur with oxygenated fuels. As stated by the commenter, small engines without oxygen sensors cannot compensate for changing oxygen levels.

EPA understands the concerns expressed by this commenter regarding oxygenated fuels and small, particularly nonroad, engines. EPA evaluated the impact of oxygenated fuels with regard to potential performance and other related problems in its April 1995 "Technical Overview of the Effects of Reformulated Gasoline on Automotive and Non-Automotive Engine Performance" (EPA420–R–95–001) and concluded that "Reformulated gasolines are expected to have little or no influence on the incidence of many engine performance concerns * * *." Regarding enleanment-related problems, EPA did state that, as with any oxygenated fuel, minor adjustments to the fuel intake system may be required to compensate for an enleanment effect. Nonetheless, as stated before, since today's rulemaking does not result in a fuel which is significantly different than other oxygenated fuels currently available, EPA does not expect new or unique performance problems, for either automotive or non-automotive engines, due to the higher oxygen content allowed by today's action.

This same commenter also stated that EPA had not considered the impact of increased oxygenate levels on other EPA rulemakings involving small engine technology and emission levels. The commenter stated that several regulatory programs for small nonroad engines were in the development process, e.g., Phase 2 exhaust emission regulations for small gasoline engines. These programs may require significant changes in technology, and today's rulemaking may undermine the purpose and effect of those regulatory programs and create regulatory conflict between fuel and technology changes.

As stated earlier, EPA did not address potential performance problems in the proposal to today's FRM because none were expected. The fuel changes that might occur as a result of today's rule will not create a significantly different fuel than is already in commerce. In any case, today's regulatory changes only apply under the Simple Model which may not be used to certify reformulated gasoline after December 31, 1997. EPA has reviewed the upcoming nonroad engine regulations. Phase 1 of the nonroad regulatory program was promulgated on July 3, 1995 (60 FR 34582), and the program takes effect in 1997. Engine certification began about January 1996. Because the fuels allowed under today's rule are not significantly different than current fuels, EPA does not believe that engine design changes would have occurred for engines designed to meet the Phase 1 nonroad regulations. Additionally, the final Phase 2 nonroad regulations will not take effect until some model years after 1997. Today's rulemaking is therefore not expected to affect compliance under either Phase 1 or 2 of this nonroad program.

The commenter also expressed concern about the possible increased use of methanol, particularly with regard to material deterioration and phase separation. Methanol use in

reformulated gasoline or any other gasoline is limited to those methanol blends which have received a waiver under section 211(f). Today's rulemaking does not change this requirement in any way.

O. Alternatives

In the notice of proposed rulemaking, EPA requested comment on two alternatives to the proposal. The first alternative was to remove the oxygen cap entirely, allowing up to the maximum oxygen content permitted under section 211(f), (including up to 10 vol% ethanol, roughly 3.5–4.0 wt% oxygen, or 15 vol% MTBE, roughly 2.7—3.2 wt% oxygen), year-round for both VOC- and non-VOC-controlled reformulated gasoline. Under this option, the regulations would not limit the oxygen content of reformulated gasoline even if a state notifies EPA of the environmental reasons for such a limit.

The comments received on this first alternative were mixed. One commenter opposed the alternative because they felt it eliminated flexibility for the states in meeting their air quality needs. In addition, the commenter stated that this alternative plan could create uncertainty in the marketplace for areas with programs which currently limit reformulated gasoline's oxygen content. Two other commenters supported this alternative to remove the oxygen cap entirely, and not allow states to restore the cap simply by notifying the Agency. They felt this approach would provide incentives to use ethanol in non-traditional markets, such as the East Coast. A final commenter stated that the proposal was preferable to either of the alternatives suggested by EPA.

The second alternative presented by EPA in the NPRM would maintain the oxygen cap at 2.7 wt% in the summertime, but allow states to request a higher maximum oxygen content, up to the maximum allowed under section 211(f). Currently states may request a higher cap, but must show that no ozone exceedances had occurred in a covered area during the previous three years. This alternative would remove the "no ozone exceedances" requirement.

This alternative was not opposed by commenters, though it was felt that the proposal was the better option. Those supporting this second alternative felt it would be far less disruptive to the reformulated gasoline program than the first alternative would be.

EPA is proceeding with the original proposal, and did not choose to implement either of these alternatives. EPA believes it is important to maintain flexibility for the states in meeting their air quality goals, and thus does not desire to implement the first alternative. Since there was little support for the second alternative, and since it does less to accomplish the goals of the proposal, EPA has also rejected the second alternative.

IV. Compliance With the Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 requires federal agencies to examine the effects of their regulations and to identify any significant adverse impacts of those regulations on a substantial number of small entities. Pursuant to section 605(b) of the Regulatory Flexibility Act, 5 U.S.C. 605(b), the Administrator certifies that this rule will not have a significant economic impact on a substantial number of small entities. In fact, today's proposals are designed to remove overly burdensome regulations and make it easier for refiners to use ethanol in reformulated gasoline, and thus to ensure market access for ethanol in reformulated gasoline.

V. Administrative Designation

Pursuant to Executive Order 12866, (58 FR 51735 (October 4, 1993)) the Agency must determine whether the regulatory action is "significant" and therefore subject to OMB review and the requirements of the executive order. The Order defines "significant regulatory action as one that is likely to result in a rule that may:

(1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or state, local or tribal governments or communities;

(2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency;

(3) Materially alter the budgetary impact of entitlement, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in the Executive Order.

Pursuant to the terms of Executive Order 12866, it has been determined that this notice of proposed rulemaking is not a "significant regulatory action".

VI. Paperwork Reduction Act

The Paperwork Reduction Act of 1980, 44 U.S.C. 3501 et seq., and implementing regulations, 5 CFR Part 1320, do not apply to this action as it does not involve the collection of information as defined therein.

VII. Unfunded Mandates Act

Under section 202 of the Unfunded Mandates Reform Act of 1995 ("Unfunded Mandates Act"), signed into law on March 22, 1995, EPA must prepare a budgetary impact statement to accompany any proposed or final rule that includes a Federal mandate that may result in expenditure by state, local, and tribal governments, in the aggregate; or by the private sector, of $100 million or more. Under Section 205, EPA must select the most cost-effective and least burdensome alternative that achieves the objectives of the rule and is consistent with statutory requirements. Section 203 requires EPA to establish a plan for informing and advising any small governments that may be significantly or uniquely impacted by the rule.

EPA has determined that the action proposed today does not include a Federal mandate that may result in estimated costs of $100 million or more to either state, local or tribal governments in the aggregate, or to the private sector. This action has the net effect of reducing burden of the reformulated gasoline program on regulated entities, as well as the states. Therefore, the requirements of the Unfunded Mandates Act do not apply to this action.

VIII. Statutory Authority

The statutory authority for the actions proposed today is granted to EPA by Sections 211(c), (k) and 301 of the Clean Air Act, as amended: 42 U.S.C. 7545(c),(k), and 7601.

List of Subjects in 40 CFR Part 80

Environmental protection, Air pollution control, Fuel additives, Gasoline, Motor vehicle pollution, Reporting and recordkeeping requirements.

Dated: March 18, 1996.

Carol M. Browner,

Administrator.

For the reasons set out in the preamble, part 80 of title 40 of the Code of Federal Regulations is amended as follows:

PART 80—REGULATION OF FUELS AND FUEL ADDITIVES

1. The authority citation for part 80 continues to read as follows:

Authority: Sections 114, 211, and 301(a) of the Clean Air Act as amended (42 U.S.C. 7414, 7545 and 7601(a)).

2. Section 80.41 is amended by revising paragraph (g) to read as follows:

§ 80.41 Standards and requirements for compliance.

* * * * *

(g) Oxygen maximum standard.

(1) The per-gallon standard for maximum oxygen content, which applies to reformulated gasoline subject to the simple model per-gallon or average standards, is as follows:

(i) Oxygen content shall not exceed 3.2 percent by weight from ethanol within the boundaries of any state if the state notifies the Administrator that the use of an oxygenate will interfere with attainment or maintenance of an ambient air quality standard or will contribute to an air quality problem.

(ii) A state may request the standard specified in paragraph (g)(1)(i) of this section separately for reformulated gasoline designated as VOC-controlled and reformulated gasoline not designated as VOC-controlled.

(2) The standard in paragraph (g)(1)(i) of this section shall apply 60 days after the Administrator publishes a notice in the **Federal Register** announcing such a standard.

BILLING CODE 6560–50–P

LEGAL SERVICES CORPORATION

45 CFR Part 1611

Eligibility: Income Level for Individuals Eligible for Assistance

AGENCY: Legal Services Corporation.

ACTION: Final rule.

SUMMARY: The Legal Services Corporation ("Corporation") is required by law to establish maximum income levels for individuals eligible for legal assistance. This document updates the specified income levels to reflect the annual amendments to the Federal Poverty Guidelines as issued by the Department of Health and Human Services.

EFFECTIVE DATE: March 25, 1996.

FOR FURTHER INFORMATION CONTACT: Victor M. Fortuno, General Counsel, Legal Services Corporation, 750 First Street NE., Washington, DC 20002–4250; 202–336–8800.

SUPPLEMENTARY INFORMATION: Section 1007(a)(2) of the Legal Services Corporation Act ("Act"), 42 U.S.C. 2996f(a)(2), requires the Corporation to establish maximum income levels for individuals eligible for legal assistance, and the Act provides that other specified factors shall be taken into account along with income.

Section 1611.3(b) of the Corporation's regulations establishes a maximum income level equivalent to one hundred and twenty-five percent (125%) of the official Federal Poverty Income Guidelines.

Responsibility for revision of the official Federal Poverty Income Guidelines was shifted in 1982 from the Community Services Administration to the Department of Health and Human Services. The revised figures for 1996 set out below are equivalent to 125% of the current official Poverty Guidelines as set out at 61 FR 8286 (March 4, 1996).

List of Subjects in 45 CFR Part 1611

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 675

[Docket No. 960129019–6019–01; I.D. 031996A]

Groundfish of the Bering Sea and Aleutian Islands Area; Pacific Ocean Perch in the Western Aleutian District

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Closure.

SUMMARY: NMFS is closing the directed fishery for Pacific ocean perch in the Western Aleutian District of the Bering Sea and Aleutian Islands management area (BSAI). This action is necessary to prevent exceeding the specification of Pacific ocean perch in this area.

EFFECTIVE DATE: 12 noon, Alaska local time (A.l.t.), March 20, 1996, until 12 midnight, A.l.t., December 31, 1996.

FOR FURTHER INFORMATION CONTACT: Andrew N. Smoker, 907–586–7228.

SUPPLEMENTARY INFORMATION: The groundfish fishery in the BSAI exclusive economic zone is managed by NMFS according to the Fishery Management Plan for the Groundfish Fishery of the Bering Sea and Aleutian Islands Area (FMP) prepared by the North Pacific Fishery Management Council under authority of the Magnuson Fishery Conservation and Management Act. Fishing by U.S. vessels is governed by regulations implementing the FMP at 50 CFR parts 620 and 675.

In accordance with § 675.20(a)(7)(ii), the Final 1996 Specifications of Groundfish (61 FR 4311, February 5, 1996) for the BSAI established 5,143 metric tons (mt) as the initial total allowable catch of Pacific ocean perch for the Western Aleutian District.

The Director, Alaska Region, NMFS (Regional Director), has determined, in accordance with § 675.20(a)(8), that the Pacific ocean perch initial total allowable catch in the Western Aleutian District will soon be reached. Therefore, the Regional Director has established a directed fishing allowance of 4,945 mt after determining that 200 mt will be taken as incidental catch in directed fishing for other species in the Western Aleutian District. NMFS is prohibiting directed fishing for Pacific ocean perch in the Western Aleutian District to prevent exceeding the directed fishing allowance.

Maximum retainable bycatch amounts for applicable gear types may be found in the regulations at § 675.20(h).

Classification

This action is taken under § 675.20 and is exempt from review under E.O. 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: March 19, 1996.

Richard W. Surdi,

Acting Director, Office of Fisheries Conservation and Management, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 61, No. 58
Monday, March 25, 1996

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 711

Management Official Interlocks

AGENCY: National Credit Union Administration.

ACTION: Notice of proposed rulemaking.

SUMMARY: The National Credit Union Administration (NCUA) is proposing to revise its rules regarding management interlocks between credit unions and other financial institutions. The proposal conforms the interlocks rules to recent statutory changes, modernizes and clarifies the rules, and reduces unnecessary regulatory burdens where feasible, consistent with statutory requirements.

DATES: Comments must be received by May 24, 1996.

ADDRESSES: Comments should be directed to Becky Baker, Secretary of the Board. Mail or hand-deliver comments to: National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428. Fax comments to (703) 518–6319. Post comments on NCUA's electronic bulletin board by dialing (703) 518–6480. Please send comments by one method only.

FOR FURTHER INFORMATION CONTACT: Jeffrey Mooney, Staff Attorney (703/518–6563), Office of General Counsel, or Kimberly Iverson, Program Officer (703/518–6375), Office of Examination and Insurance.

SUPPLEMENTARY INFORMATION:

Background

Summary of Statutory Changes

The Depository Institution Management Interlocks Act (12 U.S.C. 3201 *et seq.*) (Interlocks Act) prohibits certain management interlocks between depository institutions. The Interlocks Act exempts interlocking arrangements between credit unions and therefore, in the case of credit unions, only restricts interlocks between credit unions and other institutions—banks and thrifts.

The Riegle Community Development and Regulatory Improvement Act of 1994 (CDRI Act) amended the Interlocks Act by removing the NCUA's and the other banking agencies'[1] broad authority to exempt otherwise impermissible interlocks and replacing it with the authority to exempt interlocks under more narrow circumstances. The CDRI Act also required a depository organization with a "grandfathered" interlock to apply for an extension of the grandfather period if the organization wanted to keep the interlock in place.[2]

After the changes made by the CDRI Act, a person subject to the Interlocks Act's restrictions seeking an exemption from those restrictions must qualify either for a "regulatory standards" exemption or an exemption under a "management official consignment program" (the Management Consignment exemption). An applicant seeking a regulatory standards exemption must submit a board resolution certifying that no other candidate from the relevant community has the necessary expertise to serve as a management official, is willing to serve, and is not otherwise prohibited by the Interlocks Act from serving. Before granting the exemption request, the NCUA must find that the individual is critical to the institution's safe and sound operations, that the interlock will not produce an anticompetitive effect, and that the management official meets any additional requirements imposed by the agency. Under the Management Consignment exemption, the NCUA or appropriate agency may permit an interlock that otherwise would be prohibited by the Interlocks Act if the agency determines that the interlock would improve the provision of credit to low- and moderate-income areas, increase the competitive position of a minority- or woman-owned institution, or strengthen the management of a newly chartered institution or an institution that is in an unsafe or unsound condition. (*See* text following "Management Consignment exemption" in this preamble for a discussion regarding interlocks involving newly chartered institutions or institutions that are in an unsafe or unsound condition).

The proposal reflects these statutory changes, and streamlines and clarifies the interlocks regulations in various respects. These changes are discussed in the text that follows. The NCUA invites comments on all aspects of this proposal.

The following is a section-by-section discussion of the proposed rule changes.

Authority, Purpose, and Scope

This section identifies the Interlocks Act as the statutory authority for the management interlocks regulation. There are no significant changes from the current authority, purpose and scope rule. It also states that the purpose of the rules governing management interlocks is to foster competition between unaffiliated institutions. Finally, this section currently identifies the types of institutions to which NCUA's regulation applies.

Definitions

The NCUA's current regulation sets forth definitions of key terms used in the regulation. The proposed regulation changes some of the current definitions. A discussion of the substantive differences between the current rule and proposal follows.

Anticompetitive Effect

The current regulation neither uses nor defines the term "anticompetitive effect." The proposed regulation defines the term to mean "a monopoly or substantial lessening of competition." This term is used in the regulatory standards exemption. Under that exemption, the NCUA may approve a request for an exemption to the Interlocks Act if, among other things, the NCUA finds that continuation of service by the management official does not produce an anticompetitive effect with respect to the affected credit union. The statute does not define the term "anticompetitive effect," nor does the legislative history to the CDRI Act point to a particular definition.

[1] The NCUA participated in an interagency effort to revise the management interlocks regulations. The other banking agencies, the Office of the Comptroller of the Currency, the Office of Thrift Supervision, the Federal Reserve Board and the Federal Deposit Insurance Corporation have already published proposed revisions to their respective management interlocks regulations in a joint notice of proposed rulemaking. (See 60 FR 67424, December 29, 1995).

[2] The NCUA did not receive any requests for extensions, therefore, the provision regarding extending the grandfather period is moot for purposes of this regulation.

The context of the regulatory standards exemption suggests, however, that the NCUA and other agencies should apply the term "anticompetitive effect" in a manner that permits interlocks that present no substantial lessening of competition. By prohibiting an interlock that would result in a monopoly or substantial lessening of competition, the proposed definition preserves the free flow of credit and other banking services that the Interlocks Act is designed to protect. While the proposed definition is familiar to the banking industry since it is derived from the Bank Merger Act (12 U.S.C. 1828(c)), it is not used by the credit union industry. Therefore, NCUA requests comment on whether another definition would be more appropriate for interlocks between credit unions and other types of depository institutions.

Area Median Income

The current regulation does not use the term "area median income," and, therefore, does not define this term. The proposed regulation defines "area median income" as the median family income for the metropolitan statistical area (MSA) in which an institution is located or the statewide nonmetropolitan median family income if an institution is located outside an MSA. This term is used in the definition of "low- and moderate-income areas," which in turn is used in the implementation of the Management Consignment exemption.

Contiguous or Adjacent Cities, Towns, or Villages

The current regulation defines "adjacent cities, towns, or villages" as cities, towns, or villages whose borders are within 10 road miles from each other. It also defines "contiguous cities, towns, or villages" as cities, towns, or villages whose borders touch. The statute and regulation apply these terms to prohibit interlocks involving small institutions that are located in contiguous or adjacent cities, towns, or villages. The proposed regulation combines these two definitions, given that contiguous cities, towns, or villages necessarily are within 10 miles of each other.

Critical

The current regulation neither uses nor defines "critical." The proposed regulation defines the term in connection with the regulatory standards exemption. Under that exemption, the NCUA must find that a proposed management official is critical to the safe and sound operations of the affected institution. 12 U.S.C. 3207(b)(2)(A).

Neither the statute nor its legislative history define "critical." The NCUA is concerned that a narrow interpretation of this term would nullify the regulatory standards exemption. If someone were "critical" to the safe and sound operations of an institution only if the institution would fail but for the service of the person in question, the exemption would have little relevance because the standard would be practically impossible to meet. Given that Congress clearly intended for the regulatory standards exemption to permit interlocks under some circumstances, the question thus becomes how to define those circumstances.

This proposal addresses the issue by stating that the NCUA will consider a person to be critical to a depository organization if the person will play an important role in helping the institution either address current problems or maintain safe and sound operations going forward. The NCUA believes that this approach is consistent with the legislative intent by insuring that only persons of demonstrated expertise and importance to the institution will be allowed to serve pursuant to a regulatory standards exemption.

Low- and Moderate-Income Areas

The current regulation permits interlocks under certain circumstances involving a depository organization located "in a low income or other economically depressed area." However, the current rule does not define "low income" or "economically depressed."

Section 209(c)(1)(A) of the Interlocks Act (12 U.S.C. 3207(c)(1)(A)) authorizes the NCUA to permit interlocks pursuant to the Management Consignment exemption if the NCUA determines that the proposed service would "improve the provision of credit to low- and moderate-income areas." The proposed regulation defines "low- and moderate-income areas" as areas where the median family income is less than 100 percent of the area median income. This definition is consistent with Title I, Subtitle A of the CDRI Act (the Community Development Banking and Financial Institutions Act of 1994) (12 U.S.C. 4701–4718), which, like the Management Consignment exemption affecting institutions in low- and moderate-income areas, is intended to assist the flow of credit into economically depressed areas. Section 103(17) of the CDRI Act (12 U.S.C. 4702(17)) defines "low income" to mean not more than 80 percent of the area median income. The NCUA believes that Congress, by using the term "low- and moderate-income" in the Management Consignment exemption, intended for that term to apply to an area where the median family income exceeds 80 percent of the median income for the area. The NCUA has selected 100 percent of the area median income as the cutoff for defining "low- and moderate-income areas" based on the belief that a higher threshold would permit interlocks that would not improve the provision of credit to low- and moderate-income areas.

Management Official

The current regulation defines "management official" to include an employee or officer "with management functions" (including a branch manager), a director, a trustee of an organization under the control of trustees, or any person who has a representative or nominee serving in such capacity. The definition excludes (1) A person whose management functions relate either exclusively to the business of retail merchandising or manufacturing or principally to business outside the United States of a foreign commercial bank and (2) a person excluded by section 202(4) of the Interlocks Act (12 U.S.C. 3201(4)).

The proposed regulation adopts the definition of "management official" set forth in the current rule, except that the phrase "an employee or officer with management functions" is removed. It is replaced by the term "senior executive officer" as defined by the NCUA's regulation pertaining to the prior notice of changes in senior executive officers, which implements section 212 of the Federal Credit Union Act (FCU Act) (12 U.S.C. 1790a) as added by section 914 of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA).

The NCUA is proposing this change to eliminate the uncertainty and attendant compliance burden created by the ambiguous term "management functions." The proposal incorporates specific illustrative examples of positions at credit unions that will be treated as senior executive officers. *See* 12 CFR 701.14. The NCUA believes that these definitions will allow credit unions to identify impermissible interlocks with greater certainty and thus will enhance compliance. The NCUA requests comment on the advisability of defining "management official" by using "senior executive officer" rather than "employee or officer with management functions."

The current definition of "management official" exempts those individuals whose management functions relate to retail merchandising or manufacturing. Stated another way, the current exemption applies to a category of persons whose responsibilities are unrelated to the business of a deposit-taking institution.

The NCUA specifically asks commenters to address whether the NCUA should exempt a broader category of management officials whose duties are unrelated to the provision of financial services by a depository institution or depository holding company, and if so, how the NCUA should define that category of excluded officials.

Relevant Metropolitan Statistical Area (RMSA)

The current regulation defines "relevant metropolitan statistical area" as an MSA, a primary MSA, or a consolidated MSA that is not comprised of designated primary MSAs as defined by the Office of Management and Budget (OMB). This definition is derived from section 203(1) of the Interlocks Act (12 U.S.C. 3202(1)).

The proposed regulation defines "relevant metropolitan statistical area (RMSA)" as an MSA, a primary MSA, or a consolidated MSA that is not comprised of designated primary MSAs, to the extent that the OMB defines and applies these terms. This change reflects the fact that the OMB defines "consolidated MSA" to include two or more primary MSAs. Given that consolidated MSAs, by the OMB's definition, are comprised of primary MSAs, the reference to consolidated MSAs in the Interlocks Act and the NCUA's regulation is inappropriate. The proposed change enables the NCUA to implement the statute in a way that complies with both the spirit and the letter of the Interlocks Act.

Representative or Nominee

The current regulation defines "representative or nominee" as a person who serves as a management official and has an express or implied obligation to act on behalf of another person with respect to management responsibilities. The current definition goes on to state that the determination of whether someone is a representative or nominee depends on the facts of a particular case and that certain relationships (such as family, employment, and so on) may evidence an express or implied obligation to act.

The proposed regulation also defines "representative or nominee" as someone who serves as a management official and has an obligation to act on behalf of someone else. The proposed definition deletes the rest of the current definition, however, and inserts in lieu thereof a statement that the NCUA will find that someone has an obligation to act on behalf of someone else *only* if there is an agreement (express or implied) to act on behalf of another. The NCUA proposes this change to clarify that the determination that a representative or nominee situation exists will depend on whether there is a basis to conclude that an agreement exists to act on someone's behalf. The NCUA notes that the current definition provides specific guidance for determining when a representative or nominee relationship might be found to exist, and requests comment on whether the current definition, the proposed definition, or another definition is preferable.

Prohibitions

The current regulation prohibits interlocks in the following three instances. First, no two unaffiliated depository organizations may have an interlock if they (or their depository institution affiliates) have offices in the same community. Second, a depository organization may not have an interlock with any unaffiliated depository organization if either depository organization has assets exceeding $20 million and the depository organizations (or depository institution affiliates of either) have offices in the same RMSA.[3] Third, if a depository organization has total assets exceeding $1 billion, it (and its affiliates) may not have an interlock with any depository organization with total assets exceeding $500 million (or affiliate thereof), regardless of location.

The proposed regulation amends the rule as it applies to institutions with assets of less than $20 million to better conform to the purposes of the Interlocks Act. Whereas the current rule prohibits interlocks in an RMSA if *one* of the organizations has total assets of $20 million or more, the proposed rule would apply the RMSA-wide prohibition only if *both* organizations have total assets of $20 million or more. Interlocks within a community involving unaffiliated depository organizations would continue to be prohibited.

The NCUA believes that this proposed change is consistent with both the language and the intent of the Interlocks Act. While the statute uses the plural "depository institutions" when referring to the community-wide prohibition, in context, neither the statute nor its legislative history compels the conclusion that the interlock must involve two institutions with less than $20 million in assets before the less restrictive prohibition applies.

The Interlocks Act seeks to prohibit interlocks that could enable two institutions to engage in anticompetitive behavior. However, an institution with less than $20 million is likely to derive most of its business from the community in which it is located and unlikely to compete with institutions that do not have offices in that community. Therefore, interlocks involving one institution with assets under $20 million and another institution with assets of at least $20 million not in the same community are not likely to lead to the anticompetitive conduct that the Interlocks Act is designed to prohibit.

The NCUA believes, moreover, that the proposed change will promote rather than inhibit competition. Expanding the pool of managerial talent for institutions with assets under $20 million could enhance the ability of smaller institutions to compete by improving the management of these institutions.

The proposed regulation reflects the change affecting depository organizations with less than $20 million in total assets. It also sets forth the prohibition against interlocks involving large depository organizations but does not change the substance of that prohibition. The proposed regulation changes the wording of all three prohibitions in order to make them easier to understand.

The NCUA invites comment on any aspect of this proposed section. The NCUA specifically seeks comment on whether the proposed reinterpretation of 12 U.S.C. 3202(1) might result in anticompetitive effects and thus run counter to the legislative intent of the Interlocks Act. For example, could the proposed change enable a large depository organization to engage in anticompetitive conduct by creating interlocks with one or more smaller depository institutions located in the same RMSA but not in the same community (a "hub and spokes" interlock)? The NCUA also seeks comment on whether the final rule should specifically address such situations.

Interlocking Relationships Expressly Permitted by Statute

The current regulation restates most of the exemptions that are expressly permitted by the Interlocks Act as well as listing those exemptions that the NCUA has permitted by regulation pursuant to the broad exemptive

[3] A community as that term is defined in the proposal is smaller than RMSA. There may be several communities in one RMSA.

authority that applied before the enactment of the CDRI Act. The proposal deletes the exemptions authorized by NCUA's regulations and states the exemptions found in 12 U.S.C. 3204(1)–(8). The proposed regulation reorders the exemptions set forth in the current regulations in order to conform the list of exemptions to the list set forth in the Interlocks Act.

Regulatory Standards Exemption

The current rule contains no regulatory standards exemption. The proposed rule sets forth the standards that a credit union must satisfy in order to obtain a regulatory standards exemption. The proposal implements the requirement regarding certification by allowing a credit union's board of directors (or the organizers of a credit union that is being formed) to certify to the NCUA that it located no other qualified candidates after undertaking reasonable efforts to locate other qualified candidates who are not prohibited from service under the Interlocks Act. If read narrowly, the Interlocks Act could require a credit union to evaluate every person in a given locale that might be qualified and interested. This would create a requirement that, in practice, would be impossible to satisfy. Given that Congress would not have included an exemption that would have no practical application, the NCUA believes that the proposed "reasonableness" standard is consistent with the legislative intent.

The proposed regulation also sets forth a presumption that the NCUA will apply when reviewing an application for a regulatory standards exemption. NCUA will presume that a person is critical to a credit union's safe and sound operations if the NCUA also approves that individual under section 914 of FIRREA and the credit union in question either was a newly chartered institution, or was in a "troubled condition" as defined in § 701.14(b)(3) of NCUA's regulations at the time the section 914 filing was approved.

The NCUA invites comment on the utility of the proposed presumption and on whether other presumptions also should apply.[4]

[4] The other banking agencies have proposed a presumption that an interlock will not have an anticompetitive effect if it involves institutions that, if merged, would not trigger a challenge from the agencies on competitive grounds. The agencies will use the Herfindahl-Hirschman Index ("HHI") (*See* Department of Justice Merger Guidelines (49 FR 26823, June 29, 2984)) to determine whether the potential interlock has an anticompetitive effect since banks and savings associations frequently use the HHI as an initial indicator of the effects a transaction is likely to have on competition in a given market. NCUA does not propose implementing this presumption because there is no statutory authority for credit unions to merge with other types of depository institutions, and the typical HHI analysis does not reflect the shares/deposits held by credit unions, therefore, any HHI analysis involving credit unions would be meaningless.

The proposed regulation also addresses the duration of an interlock permitted under the regulatory standards exemption. The statute does not require that these interlocks terminate. In light of this open-ended grant of authority, the NCUA is not proposing a specific term for a permitted exemption. Instead, the NCUA may require a credit union to terminate the interlock if the NCUA determines that the management official in question either no longer is critical to the safe and sound operations of the affected organization or that continued service will produce an anticompetitive effect. The NCUA will provide affected organizations an opportunity to submit information before they make a final determination to require termination of an interlock.

Grandfathered Interlocking Relationships—Removed

The current regulation restates the grandfather provisions set forth in section 206 of the Interlocks Act (12 U.S.C. 3205). Section 338(a) of the CDRI Act authorizes the NCUA to extend a grandfathered interlock for an additional five years if the management official in question satisfied the statutory criteria for obtaining an extension. Individuals who wished to extend their dual service had until March 23, 1995, to apply to the NCUA. The proposed regulation removes the section addressing the grandfather exemption because it is unnecessary and redundant in light of the statute.

Management Consignment Exemption

The current regulation sets forth a number of instances in which the NCUA may permit an exemption to the Interlocks Act. However, the statutory provisions authorizing the NCUA to grant exemptions have been amended, thereby requiring that the current regulation be amended as well. The Management Consignment exemption set forth in section 209(c) of the Interlocks Act (12 U.S.C. 3207(c)) is modeled after certain exemptions that appear in the NCUA's current regulation.

The proposed regulation implements the Management Consignment exemption, and restates the statutory criteria, with three clarifications. First, the proposed rule states that the NCUA considers a "newly chartered institution" to be an institution that has been chartered for less than two years at the time it files an application for exemption. This standard is consistent with NCUA's threshold for determining when a credit union is considered newly chartered (*See* 12 CFR 701.14(c)(1)).

Second, the proposal clarifies that the exemption available for "minority- and women-owned institutions" is available for an institution that is owned either by minorities or women. In noting the types of exemptions that the Federal banking agencies have approved, the House Conference Report to the CDRI Act (H.R. Conf. Rep. No. 652, 103d Cong., 2d Sess. 181 (1994)) (Conference Report) states that the types of institutions that have received exemptions include those that are "owned by women or minorities." These exemptions ultimately were codified in the Interlocks Act. Accordingly, the NCUA, along with the other banking agencies have concluded that Congress intended the Management Consignment exemption to assist institutions owned by women and/or by minorities, but did not intend to require the institution to be owned by both.

Third, the proposal permits an interlock if the interlock would strengthen the management of *either* a newly chartered institution or an institution that is in an unsafe or unsound condition. Section 209(c)(1)(C) of the Interlocks Act (12 U.S.C. 3207(c)(1)(C)) permits an exemption if the interlock would "strengthen the management of newly chartered institutions that are in an unsafe or unsound condition." However, this provision contains what appears on its face to be an error, given that an exemption limited to situations involving newly chartered institutions that also are in an unsafe and unsound condition would have no practical utility. The NCUA does not approve an application for a credit union charter unless the applicant seeking a charter can demonstrate that the proposed new credit union will operate in a safe and sound manner for the foreseeable future. While there may be an extraordinary instance where a newly chartered credit union immediately experiences unforeseen problems so severe that they threaten the safety and soundness of that institution, there is nothing in the legislative history to suggest that Congress intended to limit the Management Consignment exemption to such rare instances.

Moreover, the legislative history of the CDRI Act suggests that the NCUA is to apply the Management Consignment exemption in cases involving either newly chartered institutions or institutions that are in an unsafe or unsound condition. The Conference Report notes that the Federal banking agencies have used their exemptive authority to grant exemptions in limited cases where institutions "are particularly in need of management guidance and expertise to operate in a safe and sound manner." *Id.* The Conference Report goes on to state that "Examples of exceptions permissible under an agency management official consignment program include improving the provision of credit to low- and moderate-income areas, increasing the competitive position of minority- and women-owned institutions, and strengthening he [sic] management of newly chartered institutions or institutions that are in an unsafe or unsound condition." *Id.* at 182 (emphasis added).

Finally, Congress used the exemptions in the agencies' current rules as the model for the Management Consignment exemption. See id. at 181–182. These exemptions distinguish newly chartered institutions from institutions that are in an unsafe or unsound condition. The reference in the CDRI Act's legislative history to the current regulatory exemptions suggests that Congress intended to codify these exemptions.

For these reasons, the NCUA proposes to permit exemptions pursuant to the Management Consignment exemption if the management official will strengthen either a newly chartered institution or an institution that is in an unsafe or unsound condition. Commenters are requested to address this approach.

The proposal sets forth two presumptions that the NCUA will apply in connection with an application for an exemption under the Management Consignment exemption. First, the NCUA will presume that an individual is capable of strengthening the management of a credit union that has been chartered for less than two years if the NCUA approved the individual to serve as a management official of that credit union pursuant to section 914 of FIRREA. Second, the NCUA will presume that an individual is capable of strengthening the management of a credit union that is in an unsafe or unsound condition if the NCUA approved the individual to serve under section 914 as a management official of an institution at a time when that institution was in a "troubled condition."

The NCUA believes that presumptions of suitability are less valid when applied to the other Management Consignment exemptions because there is no reason to conclude that a management official approved under section 914 necessarily will improve the flow of credit to low- and moderate-income areas or increase the competitive position of minority- or woman-owned institutions. No presumption regarding effects on competition is proposed, given that this is not a factor to be considered by the NCUA when reviewing an application for a Management Consignment exemption.

The NCUA seeks comment on the utility of the proposed presumptions and on whether additional presumptions should apply as well.

The proposed regulation sets forth the limits on the duration of a Management Consignment exemption. The Interlocks Act limits a Management Consignment exemption to two years, with a possible extension for up to an additional two years if the applicant satisfies at least one of the criteria for obtaining a Management Consignment exemption. The proposed regulation implements this limitation by requiring interested parties to submit an application for an extension at least 30 days before the expiration of the initial term of the exemption and by clarifying that the presumptions and procedures that apply to initial applications also apply to extension applications.

Change in Circumstances

The current regulation provides a 15-month grace period for nongrandfathered interlocks that become impermissible due to a change in circumstances. This period may be shortened by the NCUA under appropriate circumstances. The proposed regulation revises the wording of this section in the current regulations but not its substance. The NCUA specifically seeks comment on the proposed continued availability of a grace period.

Enforcement

The current regulations set forth the jurisdiction of the NCUA to enforce the Interlocks Act. The proposed regulations simplify the wording of this section in the current regulations but not its substance.

Regulatory Procedures

Regulatory Flexibility Act

It is hereby certified that this proposal will not have a significant economic impact on a substantial number of small entities. Accordingly, a regulatory flexibility analysis is not required.

Paperwork Reduction Act

The Board has determined that the requirements of the Paperwork Reduction Act do not apply.

Executive Order 12612

This proposed rule, like the current 12 CFR part 711 it would replace, will apply to all Federally insured credit unions. The NCUA Board, pursuant to Executive Order 12612, has determined, however, that this proposed rule will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among various levels of government. Further, this proposed rule will not preempt provisions of State law or regulations.

List of Subjects in 12 CFR Part 711

Antitrust, Credit unions, Holding companies.

By the National Credit Union Administration Board on March 13, 1996.

Becky Baker,

Secretary of the Board.

For the reasons set out in the preamble, the NCUA proposes to revise part 711 of chapter VII of title 12 of the Code of Federal Regulations to read as follows:

PART 711—MANAGEMENT OFFICIAL INTERLOCKS

Sec.

711.1 Authority, purpose, and scope.
711.2 Definitions.
711.3 Prohibitions.
711.4 Interlocking relationships permitted by statute.
711.5 Regulatory Standards exemption.
711.6 Management Consignment exemption.
711.7 Change in circumstances.
711.8 Enforcement.

Authority: 12 U.S.C. 1766 and 3201–3208.

§ 711.1 Authority, purpose, and scope.

(a) *Authority.* This part is issued under the provisions of the Depository Institution Management Interlocks Act (Interlocks Act) (12 U.S.C. 3201 *et seq.*), as amended, and the NCUA's general rulemaking authority in 12 U.S.C. 1766.

(b) *Purpose.* The purpose of the Interlocks Act and this part is to foster competition by generally prohibiting a management official from serving two nonaffiliated depository organizations in situations where the management interlock could have an anticompetitive effect.

(c) *Scope.* This part applies to management officials of federally insured credit unions and their affiliates.

§ 711.2 Definitions.

For purposes of this part, the following definitions apply:

(a) *Affiliate.* (1) The term *affiliate* has the meaning given in section 202 of the Interlocks Act (12 U.S.C. 3201). For purposes of section 202, shares held by an individual include shares held by members of his or her immediate family. "Immediate family" includes spouse, mother, father, child, grandchild, sister, brother, or any of their spouses, whether or not any of their shares are held in trust.

(2) For purposes of section 202(3)(B) of the Interlocks Act (12 U.S.C. 3201(3)(B)), an affiliate relationship involving common ownership does not exist if the NCUA determines, after giving the affected persons the opportunity to respond, that the asserted affiliation was established in order to avoid the prohibitions of the Interlocks Act and does not represent a true commonality of interest between the depository organizations. In making this determination, the NCUA considers, among other things, whether a person owns a nominal percentage of the shares of one of the organizations and the percentage is substantially disproportionate with that person's ownership of shares in the other organization.

(b) *Anticompetitive effect* means a monopoly or substantial lessening of competition.

(c) *Area median income* means:

(1) The median family income for the metropolitan statistical area (MSA), if a depository organization is located in an MSA; or

(2) The statewide nonmetropolitan median family income, if a depository organization is located outside an MSA.

(d) *Community* means city, town, or village, and contiguous or adjacent cities, towns, or villages.

(e) *Contiguous or adjacent cities, towns, or villages* means cities, towns, or villages whose borders touch each other or whose borders are within 10 road miles of each other at their closest points. The property line of an office located in an unincorporated city, town, or village is the boundary line of that city, town, or village for the purpose of this definition.

(f) *Credit union* means a federal or state-chartered credit union that is insured by the National Credit Union Share Insurance Fund.

(g) *Critical* means important in helping a depository organization either address current problems or maintain safe and sound operations going forward.

(h) *Depository holding company* means a bank holding company or a savings and loan holding company (as more fully defined in section 202 of the Interlocks Act (12 U.S.C. 3201)) having its principal office located in the United States.

(i) *Depository institution* means a commercial bank (including a private bank), a savings bank, a trust company, a savings and loan association, a building and loan association, a homestead association, a cooperative bank, an industrial bank, or a credit union, chartered under the laws of the United States and having a principal office located in the United States. Additionally, a United States office, including a branch or agency, of a foreign commercial bank is a depository institution.

(j) *Depository institution affiliate* means a depository institution that is an affiliate of a depository organization.

(k) *Depository organization* means a depository institution or a depository holding company.

(l) *Low- and moderate-income areas* means areas where the median family income is less than 100 percent of the area median income.

(m) *Management official.* (1) The term *management official* includes:

(i) A director;

(ii) An advisory or honorary director of an institution with total assets of $100 million or more;

(iii) A senior executive officer as that term is defined in 12 CFR 701.14(b)(2), or a person holding an equivalent position, regardless of title;

(iv) A branch manager;

(v) A trustee of a depository organization under the control of trustees; and

(vi) Any person who has a representative or nominee serving in any of the above capacities.

(2) The term *management official* does not include:

(i) A person whose management functions relate exclusively to the business of retail merchandising or manufacturing;

(ii) A person whose management functions relate principally to the business outside the United States of a foreign commercial bank; or

(iii) A person described in the provisos of section 202(4) of the Interlocks Act (12 U.S.C. 3201(4)) (referring to an officer of a State-chartered savings bank, cooperative bank, or trust company that neither makes real estate mortgage loans nor accepts savings).

(n) *Office* means a principal or branch of a depository institution located in the United States. *Office* does not include a representative office of a foreign commercial bank, electronic terminal, or a loan production office.

(o) *Person* means a natural person, corporation, or other business entity.

(p) *Relevant metropolitan statistical area (RMSA)* means an MSA, a primary MSA, or a consolidated MSA that is not comprised of designated primary MSAs to the extent that these terms are defined and applied by the Office of Management and Budget.

(q) *Representative or nominee* means a natural person who serves as a management official and has an obligation to act on behalf of another person with respect to management responsibilities. The NCUA will find that a person has an obligation to act on behalf of another person only if the first person has agreed to act on behalf of the second person with respect to management responsibilities. The NCUA will determine, after giving the affected person an opportunity to respond, whether a person is a "representative or nominee."

(r) *Total assets.* (1) The term *total assets* means assets measured on a consolidated basis as of the close of the organization's last fiscal year.

(2) The term *total assets* does not include:

(i) Assets of a diversified savings and loan holding company as defined by section 10(a)(1)(F) of the Home Owners' Loan Act (12 U.S.C. 1467a(a)(1)(F)) other than the assets of its depository institution affiliate;

(ii) Assets of a bank holding company that is exempt from the prohibitions of section 4 of the Bank Holding Company Act of 1956 pursuant to an order issued under section 4(d) of that Act (12 U.S.C. 1843(d)) other than the assets of its depository institution affiliate; or

(iii) Assets of offices of a foreign commercial bank other than the assets of its United States branch or agency.

(s) *United States* includes any State or territory of the United States of America, the District of Columbia, Puerto Rico, Guam, American Samoa, and the Virgin Islands.

§ 711.3 Prohibitions.

(a) *Community.* A management official of a depository organization may not serve at the same time as a management official of an unaffiliated depository organization if the depository organizations in question (or a depository institution affiliate thereof) have offices in the same community.

(b) *RMSA.* A management official of a depository organization may not serve at the same time as a management official of an unaffiliated depository organization if the depository organizations in question (or a depository institution affiliate thereof) have offices in the same RMSA and each depository organization has total assets of $20 million or more.

(c) *Major assets.* A management official of a depository organization with total assets exceeding $1 billion (or any affiliate thereof) may not serve at the same time as a management official of an unaffiliated depository organization with total assets exceeding $500 million (or any affiliate thereof), regardless of the location of the two depository organizations.

§ 711.4 Interlocking relationships permitted by statute.

The prohibitions of § 711.3 do not apply in the case of any one or more of the following organizations or to a subsidiary thereof:

(a) A depository organization that has been placed formally in liquidation, or which is in the hands of a receiver, conservator, or other official exercising a similar function;

(b) A corporation operating under section 25 or section 25A of the Federal Reserve Act (12 U.S.C. 601, *et seq.* and 12 U.S.C. 611 *et seq.*, respectively) (Edge Corporations and Agreement Corporations);

(c) A credit union being served by a management official of another credit union;

(d) A depository organization that does not do business within the United States except as an incident to its activities outside the United States;

(e) A State-chartered savings and loan guaranty corporation;

(f) A Federal Home Loan Bank or any other bank organized solely to serve depository institutions (a bankers' bank) or solely for the purpose of providing securities clearing services and services related thereto for depository institutions, and securities companies;

(g) A depository organization that is closed or is in danger of closing as determined by the appropriate Federal depository institutions regulatory agency and is acquired by another depository organization. This exemption lasts for five years, beginning on the date the depository organization is acquired; and

(h)(1) A diversified savings and loan holding company (as defined in section 10(a)(1)(F) of the Home Owners' Loan Act (12 U.S.C. 1467a(a)(1)(F)) with respect to the service of a director of such company who also is a director of an unaffiliated depository organization if:

(i) Both the diversified savings and loan holding company and the unaffiliated depository organization notify their appropriate Federal depository institutions regulatory agency at least 60 days before the dual service is proposed to begin; and

(ii) The appropriate regulatory agency does not disapprove the dual service before the end of the 60-day period.

(2) The NCUA may disapprove a notice of proposed service if it finds that:

(i) The service cannot be structured or limited so as to preclude an anticompetitive effect in financial services in any part of the United States;

(ii) The service would lead to substantial conflicts of interest or unsafe or unsound practices; or

(iii) The notificant failed to furnish all the information required by the NCUA.

(3) The NCUA may require that any interlock permitted under this paragraph (h) be terminated if a change in circumstances occurs with respect to one of the interlocked depository organizations that would have provided a basis for disapproval of the interlock during the notice period.

§ 711.5 Regulatory Standards exemption.

(a) *Criteria.* The NCUA may permit an interlock that otherwise would be prohibited by the Interlocks Act and § 711.3 if:

(1) The board of directors of the depository organization (or the organizers of a depository organization being formed) that seeks the exemption provides a resolution to the NCUA certifying that the organization, after the exercise of reasonable efforts, is unable to locate any other candidate from the community or RMSA, as appropriate, who:

(i) Possesses the level of expertise required by the depository organization and who is not prohibited from service by the Interlocks Act; and

(ii) Is willing to serve as a management official; and

(2) The NCUA, after reviewing an application submitted by the depository organization seeking the exemption, determines that:

(i) The management official is critical to the safe and sound operations of the affected depository organization; and

(ii) Service by the management official will not produce an anticompetitive effect with respect to the depository organization.

(b) *Presumptions.* The NCUA applies the following presumption when reviewing any application for a Regulatory Standards exemption: A proposed management official is critical to the safe and sound operations of a credit union if that official is approved by the NCUA to serve as a director or senior executive officer of that credit union pursuant to 12 CFR 701.14 or pursuant to conditions imposed on a newly chartered credit union and the institution has operated for less than two years, or otherwise was in a "troubled condition" as defined in 12 CFR 701.14 at the time the service under 12 CFR 701.14 is approved.

(c) *Duration of interlock.* An interlock permitted under this section may continue until the NCUA notifies the affected organizations otherwise. The NCUA may require a credit union to terminate any interlock permitted under this section if the NCUA concludes, after giving the affected persons the opportunity to respond, that the determinations under paragraph (a)(2) of this section no longer may be made.

§ 711.6 Management Consignment exemption.

(a) *Criteria.* The NCUA may permit an interlock that otherwise would be prohibited by the Interlocks Act and § 711.3 if the NCUA determines that the interlock would:

(1) Improve the provision of credit to low- and moderate-income areas;

(2) Increase the competitive position of a minority- or woman-owned depository organization;

(3) Strengthen the management of an institution that has been chartered for less than two years at the time an application is filed under this part; or

(4) Strengthen the management of an institution that is in an unsafe or unsound condition as determined by the NCUA on a case-by-case basis.

(b) *Presumptions.* The NCUA applies the following presumptions when reviewing any application for a Management Consignment exemption:

(1) A proposed management official is capable of strengthening the management of a depository institution described in paragraph (a)(3) of this section if that official is approved by the NCUA to serve as a director or senior executive officer of that institution pursuant to 12 CFR 701.14 or pursuant to conditions imposed on a newly chartered credit union and the institution has operated for less than two years at the time the service under 12 CFR 701.14 is approved.

(2) A proposed management official is capable of strengthening the management of a depository institution described in paragraph (a)(4) of this section if that official is approved by the NCUA to serve as a director or senior executive officer of that institution pursuant to 12 CFR 701.14 and the institution was in a "troubled condition" as defined under 12 CFR 701.14 at the time service under 12 CFR 701.14 is approved.

(c) *Duration of interlock.* An interlock granted under this section may continue

for a period of two years from the date of approval. The NCUA may extend this period for one additional two-year period if the depository organization applies for an extension at least 30 days before the current exemption expires and satisfies one of the criteria specified in paragraph (a) of this section. The provisions set forth in paragraph (b) of this section also apply to applications for extensions.

§ 711.7 Change in circumstances.

(a) *Termination.* A management official shall terminate his or her service or apply for an exemption to the Interlocks Act if a change in circumstances causes the service to become prohibited under that Act. A change in circumstances may include, but is not limited to, an increase in asset size of an organization, a change in the delineation of the RMSA or community, the establishment of an office, an acquisition, a merger, a consolidation, or any reorganization of the ownership structure of a depository organization that causes a previously permissible interlock to become prohibited.

(b) *Transition period.* A management official described in paragraph (a) of this section may continue to serve the credit union involved in the interlock for 15 months following the date of the change in circumstances. The NCUA may shorten this period under appropriate circumstances.

§ 711.8 Enforcement.

The NCUA administers and enforces the Interlocks Act with respect to credit unions, and their affiliates, and may refer any case of a prohibited interlocking relationship involving these institutions to the Attorney General of the United States to enforce compliance with the Interlocks Act and this part.

BILLING CODE 7535–01–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 95–ANE–19]

Airworthiness Directives; General Electric Company CF34 Series Turbofan Engines

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to General Electric Company (GE) CF34 series turbofan engines. This proposal would reduce the allowable operating cyclic life limit for affected fan disks. This proposal is prompted by an updated stress and life analysis. The actions specified by the proposed AD are intended to prevent fan disk rupture, engine failure, and damage to the aircraft.

DATES: Comments must be received by May 24, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–ANE–19, 12 New England Executive Park, Burlington, MA 01803–5299. Comments may be inspected at this location between 8:00 a.m. and 4:30 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Eugene Triozzi, Aerospace Engineer, Engine Certification Office, FAA, Engine and Propeller Directorate, 12 New England Executive Park, Burlington, MA 01803–5299; telephone (617) 238–7148, fax (617) 238–7199.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 95–ANE–19." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, New England Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–ANE–19, 12 New England Executive Park, Burlington, MA 01803–5299.

Discussion

The Federal Aviation Administration (FAA) has reviewed and approved an updated stress and life analysis for fan disks installed in General Electric Company (GE) CF34 series turbofan engines. Although the FAA has not received any reports of cracked or failed fan disks, the stress and life analysis was performed using new, improved methodology. This analysis revealed that the published cyclic life limits were higher than updated calculated lives, which could result in the operation of a fan disk beyond its cyclic life. This condition, if not corrected, could result in fan disk rupture, engine failure, and damage to the aircraft.

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would reduce the allowable operating cyclic life limit for affected fan disks.

There are approximately 440 engines of the affected design in the worldwide fleet. The FAA estimates that 150 engines installed on aircraft of U.S. registry would be affected by this proposed AD, that it would take approximately zero additional work hours per engine to accomplish the proposed actions, and that the average labor rate is $60 per work hour. Required parts would cost approximately $106,320 per engine, based on the estimated current part cost, prorated downward by a factor equal to the quotient of the difference between the original cyclic life limit (38,280 cycles) and the revised cyclic life limit (9,000 cycles) divided by the original cyclic life limit. Based on these figures, the total cost impact of the proposed AD on U.S. operators is estimated to be $15,950,000.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 USC 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

General Electric Company: Docket No. 95–ANE–19.

Applicability: General Electric Company (GE) Model CF34–1A, –3A, and –3A2 turbofan engines, with fan disk part numbers (P/N's) 6020T62G04, 6020T62G05, 6078T00G01, or 5921T54G01 installed. These engines are installed on but not limited to Canadair Limited Model CL–600–2A12 and CL–600–2B16 aircraft.

Note: This airworthiness directive (AD) applies to each engine identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For engines that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must use the authority provided in paragraph (d) to request approval from the Federal Aviation Administration (FAA). This approval may address either no action, if the current configuration eliminates the unsafe condition, or different actions necessary to address the unsafe condition described in this AD. Such a request should include an assessment of the effect of the changed configuration on the unsafe condition addressed by this AD. In no case does the presence of any modification, alteration, or repair remove any engine from the applicability of this AD.

Compliance: Required as indicated, unless accomplished previously.

To prevent fan disk rupture, engine failure, and damage to the aircraft, accomplish the following:

(a) Remove from service fan disks, P/N's 6020T62G04, 6020T62G05, 6078T00G01, and 5921T54G01, prior to accumulating 9,000 cycles in service (CIS) since new, and replace with a serviceable part.

(b) For the purpose of this AD, a serviceable part is defined as a fan disk with less than 9,000 CIS.

(c) This AD defines a new life limit of 9,000 CIS for fan disks, P/N's 6020T62G04 6020T62G05, 6078T00G01, and 5921T54G01.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Engine Certification Office. The request should be forwarded through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Engine Certification Office.

Note: Information concerning the existence of approved alternative methods of compliance with this airworthiness directive, if any, may be obtained from the Engine Certification Office.

Issued in Burlington, Massachusetts, on March 11, 1996.

James C. Jones,

Acting Manager, Engine and Propeller Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–U

14 CFR Part 39

[Docket No. 95–CE–44–AD]

Airworthiness Directives; Jetstream Aircraft Limited HP137 Mk1, Jetstream Series 200, and Jetstream Models 3101 and 3201 Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Supplemental notice of proposed rulemaking (NPRM); Reopening of the comment period.

SUMMARY: This document proposes to revise an earlier proposed airworthiness directive (AD) that would have required the following on Jetstream Aircraft Limited (JAL) HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes: repetitively inspecting the main landing gear (MLG) pintle to cylinder interface for cracks, and replacing any MLG cylinder that has a crack exceeding certain limits. Reports of MLG cracks in the area of the pintle to cylinder interface on three of the affected airplanes prompted the proposal. Since publication of that proposal, the Federal Aviation Administration (FAA) has determined that the proposed action is still a valid safety issue, but that the MLG cylinder should be replaced if any cracks are found regardless of the length. This proposed action revises the previous proposal by incorporating this change. The actions specified by the proposed AD are intended to prevent failure of the MLG caused by cracks in the pintle to cylinder interface area, which, if not detected and corrected, could result in loss of control of the airplane during landing operations. Since the comment period for the original proposal has closed and the change described above goes beyond the scope of what was originally proposed, the FAA is allowing additional time for the public to comment.

DATES: Comments must be received on or before May 24, 1996.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Assistant Chief Counsel Attention: Rules Docket No. 95–CE–44–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106. Comments may be inspected at this location between 8 a.m. and 4 p.m., Monday through Friday, holidays excepted.

Service information that applies to the proposed AD may be obtained from Jetstream Aircraft Limited, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, telephone (44–292) 79888; facsimile (44–292) 79703; or Jetstream Aircraft Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, D.C. 20041–6029; telephone (703) 406–1161; facsimile (703) 406–1469. This information also may be examined at the Rules Docket at the address above.

FOR FURTHER INFORMATION CONTACT: Ms. Dorenda Baker, Program Manager, Brussels Aircraft Certification Office, FAA, Europe, Africa, and Middle East Office, c/o American Embassy, B–1000 Brussels, Belgium; telephone (32 2) 508.2715; facsimile (32 2) 230.6899; or Mr. Jeffrey Morfitt, Project Officer, Small Airplane Directorate, Aircraft Certification Service, FAA, 1201 Walnut, suite 900, Kansas City, Missouri 64105; telephone (816) 426–6932; facsimile (816) 426–2169.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as

they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this supplemental notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this supplemental notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 95–CE–44–AD." The postcard will be date stamped and returned to the commenter.

Availability of Supplemental NPRM's

Any person may obtain a copy of this supplemental NPRM by submitting a request to the FAA, Central Region, Office of the Assistant Chief Counsel, Attention: Rules Docket No. 95–CE–44–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Discussion

A proposal to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) to include an AD that would apply to certain JAL HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes was published in the **Federal Register** on September 19, 1995 (60 FR 48429). The action proposed to require repetitively inspecting (using non-destructive testing eddy current methods) the MLG pintle to cylinder interface for cracks, and replacing any MLG cylinder that has a crack exceeding certain limits. Accomplishment of the proposed inspections would be in accordance with Jetstream Alert Service Bulletin 32–A–JA 941245, Revision 2, dated March 28, 1995, and AP Precision Hydraulics Ltd. Service Bulletin 32–56, Revision 3, dated February 1995.

Interested persons have been afforded an opportunity to participate in the making of this amendment. One comment was received in favor of the proposed rule and no comments were received regarding the FAA's determination of the cost to the public.

Since publication of the proposal, the FAA has re-examined all information related to this subject and determined that the MLG cylinder should be replaced if any cracks are found, and not merely if cracks are found that exceed certain limits. The FAA has determined that no airplane should be allowed to operate with cracks in a single-load path primary structure element (the MLG is considered a single-load path primary structure element), and should be repaired or replaced immediately.

Since the comment period for the original proposal has closed and revision of the NPRM to require immediate MLG cylinder replacement if any crack is found in the MLG pintle to cylinder interface for the JAL HP137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes proposes actions that go beyond the scope of what was already proposed, the FAA is allowing additional time for the public to comment.

The FAA estimates that 250 airplanes in the U.S. registry would be affected by the proposed AD, that it would take approximately 6 workhours per airplane to accomplish the proposed action, and that the average labor rate is approximately $60 an hour. Based on these figures, the total cost impact of the proposed inspection on U.S. operators is estimated to be $90,000. This figure does not take into account the cost of repetitive inspections or the cost of replacement MLG cylinders if cracks are found that exceed certain limits. The FAA has no way of determining the number of repetitive inspections each owner/operator would incur over the life of the airplane or the number of MLG cylinders that may be found cracked during the inspections proposed by this action.

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this action (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action has been placed in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

Jetstream Aircraft Limited: Docket No. 95–CE–44–AD.

Applicability: HP 137 Mk1, Jetstream series 200, and Jetstream Models 3101 and 3201 airplanes (all serial numbers), certificated in any category, that are equipped with one of the following main landing gear (MLG) part numbers: 1863, 1863/4A, 1863/4B, 1863/4C, 1864, 1864/4A, 1864/4B, 1864/4C, BOOA702850A, BOOA702851A, BOOA702925A, BO1A702925A, BOOA703065A, BO1A703065A, BOOA703030A, BOOA702926A, BO1A702926A, BOOA703066A, BO1A703066A, BOOA703031A.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required initially upon the accumulation of 8,500 landings on an affected MLG or within the next 100 landings after the effective date of this AD, whichever occurs later, unless already accomplished, and thereafter at intervals not to exceed 4,000 landings accumulated on an affected MLG.

Note 2: If the number of landings is unknown, hours time-in-service (TIS) may be used by multiplying the number of hours TIS by 0.75. If hours TIS are utilized to calculate the number of landings, this would make the AD effective "initially upon the accumulation of 11,333 hours TIS on an affected MLG or within the next 133 hours TIS after the effective date of this AD, whichever occurs later, and thereafter at intervals not to exceed to 5,333 hours TIS accumulated on an affected MLG."

To prevent failure of the MLG caused by cracks in the pintle to cylinder interface area, which, if not detected and corrected, could result in loss of control of the airplane during landing operations, accomplish the following:

(a) Using non-destructive testing (NDT) eddy current methods, inspect the MLG pintle to cylinder interface for cracks in accordance with the following:

(1) Jetstream Alert Service Bulletin 32–A–JA 941245, Revision 2, dated March 28, 1995; and

(2) AP Precision Hydraulics Ltd. Service Bulletin 32–56, Revision 3, dated February 1995.

(b) If any crack is found during any inspection required by this AD, prior to further flight, replace the MLG cylinder with a new part. Replacing the MLG cylinder does not eliminate the repetitive inspection requirement of this AD.

Note 3: The "prior to further flight" compliance time required by this AD if a MLG cylinder is cracked is different from the compliance time referenced in Jetstream Alert Service Bulletin 32–A–JA 941245, Revision 2, dated March 28, 1995; and AP Precision Hydraulics Ltd. Service Bulletin 32–56, Revision 3, dated February 1995. This AD takes precedence over the service information.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the initial and repetitive compliance times that provides an equivalent level of safety may be approved by the Manager, Brussels Aircraft Certification Office (ACO), Europe, Africa, Middle East office, FAA, c/o American Embassy, B–1000 Brussels, Belgium. The request should be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Brussels ACO.

Note 4: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Brussels ACO.

(e) All persons effected by this directive may obtain copies of the documents referred to herein upon request to Jetstream Aircraft Limited, Manager Product Support, Prestwick Airport, Ayrshire, KA9 2RW Scotland; or Jetstream Aircraft Inc., Librarian, P.O. Box 16029, Dulles International Airport, Washington, DC, 20041- 6029; or may examine these documents at the FAA, Central Region, Office of the Assistant Chief Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Issued in Kansas City, Missouri, on March 19, 1996.

James E. Jackson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

Control of Air Pollution; Emission Standards for New Gasoline Spark-Ignition and Diesel Compression-Ignition Marine Engines; Exemptions for Nonroad Compression-Ignition Engines at or Above 37 Kilowatts and New Nonroad Spark-Ignition Engines at or Below 19 Kilowatts

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of comment period.

SUMMARY: EPA is allowing more time for comments from the public on its proposals in the Supplementary Notice of Proposed Rulemaking (SNPRM) February 7, 1996 (61 FR 4600). This extension of time is limited to comments concerning its proposal to reduce emissions from marine compression-ignition engines.

DATES: The comment period on the SNPRM proposals concerning marine compression-ignition engines will remain open until April 24, 1996.

ADDRESSES: Interested parties may submit written comments (in duplicate, if possible) for EPA consideration by addressing them as follows: EPA Air Docket (LE–131), Attention: Docket Number A–92–28, room M–1500, 401 M Street, S.W., Washington, D.C. 20460. Materials relevant to this rulemaking are contained in this docket and may be reviewed at this location from 8:00 a.m. until 5:30 p.m. Monday through Friday. As provided in 40 CFR part 2, a reasonable fee may be charged by EPA for photocopying.

FOR FURTHER INFORMATION CONTACT: Deanne R. North, Office of Mobile Sources, Engine Programs and Compliance Division, (313) 668–4283, or James A. Blubaugh, Office of Mobile Sources, Engine Programs and Compliance Division, (202) 233–9244.

SUPPLEMENTARY INFORMATION:

I. Extension of Comment Period

On February 7, 1996, EPA published a Supplemental Notice of Proposed Rulemaking (SNPRM) (61 FR 4600) proposing provisions to regulate emissions from marine gasoline spark-ignition and diesel compression-ignition engines. The SNPRM requested comments no later than March 8, 1996. EPA is now extending the comment period for the compression-ignition portion of the SNPRM, specifically, those portions of the rulemaking that concern revisions to 40 CFR Part 89. The Agency is taking this action in response to a request from EUROMOT to extend the comment period because the International Maritime Organization had a major meeting on February 27 and 28, 1996, in Hamburg, Germany, that made it difficult for their members and other affected parties to comment on EPA's SNPRM before March 8, 1996

II. Obtaining Information on This Rulemaking

The SNPRM preamble, proposed regulatory language, and supporting data are available to the public through several sources. Electronic copies (on 3.5" diskettes) of the proposed regulatory language may be obtained free of charge by visiting, writing, or calling the Environmental Protection Agency, Engine Programs and Compliance Division, 2565 Plymouth Road, Ann Arbor, MI 48105, (313) 668–4288. Refer to Docket A–92–28. A copy is also available for inspection in the docket (see **ADDRESSES**).

The SNPRM preamble, proposed regulatory language, and some supporting information are also available electronically on the Technology Transfer Network (TTN), which is an electronic bulletin board system (BBS) operated by EPA's Office of Air Quality Planning and Standards. The service is free of charge, except for the cost of the phone call. Users are able to access and download TTN files on their first call using a personal computer and modem per the following information.

TTN BBS: 919–541–5742 (1200–14400 bps, no parity, 8 data bits, 1 stop bit) Voice Helpline: 919–541–5384 Also accessible via Internet: TELNET ttnbbs.rtpnc.epa.gov Off-line: Mondays from 8:00 AM to 12:00 Noon ET

A user who has not called TTN previously will first be required to answer some basic informational questions for registration purposes. After completing the registration process, proceed through the following

menu choices from the Top Menu to access information on this rulemaking.

<T> GATEWAY TO TTN TECHNICAL AREAS (Bulletin Boards)
<M> OMS—Mobile Sources Information
<K> Rulemaking & Reporting
<6> Non-Road
<1> File area #1. Non-Road Marine Engines

At this point, the system will list all available files in the chosen category in chronological order with brief descriptions. To download a file, select a transfer protocol that is supported by the terminal software on your own computer, then set your own software to receive the file using that same protocol.

If unfamiliar with handling compressed (that is, ZIP'ed) files, go to the TTN top menu, System Utilities (Command: 1) for information and the necessary program to download in order to unZIP the files of interest after downloading to your computer. After getting the files you want onto your computer, you can quit the TTN BBS with the <G>oodbye command.

Please note that due to differences between the software used to develop the document and the software into which the document may be downloaded, changes in format, page length, etc. may occur.

Dated: March 19, 1996.

Mary Nichols,

Assistant Administrator.

Land Disposal Restrictions, Supplemental Proposal to Phase IV Rule: Clarification of Bevill Exclusion for Mining Wastes, Changes to the Definition of Solid Waste for Mineral Processing Wastes, and Associated Issues—Extension of Comment Period

AGENCY: Environmental Protection Agency (EPA).

ACTION: Extension of comment period.

SUMMARY: EPA is extending the public comment period on the mineral processing sections of the supplemental Phase IV proposal (61 FR 2338, January 25, 1996) for 30 days beyond the original 60-day comment period. Public comments must be submitted to EPA by April 24, 1996.

DATES: Comments must be submitted by April 24, 1996.

ADDRESSES: To submit comments, the public must send an original and two copies to Docket Number F–95–PH4A-FFFFF, located at the RCRA Docket. The mailing address is: RCRA Information Center, U.S. Environmental Protection Agency (5305W), 401 M Street, S.W., Washington, D.C. 20460. The RCRA Information Center is located at 1235 Jefferson Davis Highway, First Floor, Arlington, Virginia. The RCRA Information Center is open for public inspection and copying of supporting information for RCRA rules from 9:00 am to 4:00 pm Monday through Friday, except for Federal holidays. The public must make an appointment to review docket materials by calling (703) 603–9230. The public may copy a maximum of 100 pages from any regulatory document at no cost. Additional copies cost $0.15 per page.

FOR FURTHER INFORMATION CONTACT: For general information or to order paper copies of this **Federal Register** document, call the RCRA Hotline. Callers within the Washington, Metropolitan Area must dial 703–412–9810 or TDD 703–412–3323 (hearing impaired). Long-distance callers may call 1–800–424–9346 or TDD 1–800–553–7672. The RCRA Hotline is open Monday-Friday, 9:00 a.m. to 6:00 p.m., Eastern Standard Time. For information on mineral processing issues, contact Van Housman at (703) 308–8419 or Steven Hoffman at (703) 308–8413. For other information on this notice, contact Sue Slotnick at (703) 308–8462.

SUPPLEMENTARY INFORMATION:

Paperless Office Effort

EPA is asking prospective commenters to voluntarily submit one additional copy of their comments on labeled personal computer diskettes in ASCII (TEXT) format or a word processing format that can be converted to ASCII (TEXT). It is essential to specify on the disk label the word processing software and version/edition as well as the commenter's name. This will allow EPA to convert the comments into one of the word processing formats utilized by the Agency. Please use mailing envelopes designed to physically protect the submitted diskettes. EPA emphasizes that submission of comments on diskettes is not mandatory, nor will it result in any advantage or disadvantage to any commenter. This expedited procedure is in conjunction with the Agency "Paperless Office" campaign. For further information on the submission of diskettes, contact Sue Slotnick of the Waste Treatment Branch at (703) 308–8462.

This **Federal Register** notice is available on the Internet System through EPA Public Access Server at gopher.epa.gov.or through WWW.epa.gov. For the text of the notice, choose: Rules, Regulations, and Legislation; the FR-Waste; finally, Year/Month/Day.

Extension of Comment Period

On August 22, 1995, EPA proposed the Phase IV Land Disposal Restrictions rule (60 FR 43654) containing proposed treatment standards for newly listed and characteristic wastes, among other issues. In a supplemental proposal (61 FR 2338, January 25, 1996), EPA proposed treatment standards for hazardous mineral processing wastes, changes to the definition of solid waste for mineral processing wastes, related issues regarding mineral processing wastes, and several unrelated issues. The two proposals will form the basis for a single final rule due to be promulgated later this year, referred to as the Phase IV rule.

EPA has received requests from the Environmental Defense Fund, the National Mining Association, ASARCO Incorporated, Kennecott Corporation, Barrick Goldstrike Mines Incorporated, and the Precious Metals Producers for an extension of the 60-day public comment period due to the broad scope and complexity of the proposal. The additional time requested ranged from 30 to 90 days. EPA is today extending the comment period an additional 30 days, resulting in a 90-day comment period, on the supplemental rule. Comments must be submitted by April 24, 1996. EPA is not extending the comment period beyond the extra 30 days because it believes that a 90-day comment period is adequate. Furthermore, EPA had provided major interested parties with a copy of the signed rule and one of the major background documents 38 days prior to publication in the **Federal Register**, i.e. before the comment period began. In addition, EPA held several meetings with major interested parties during the development of the proposal. In those meetings, EPA presented the positions it eventually proposed on mineral processing issues, and received feedback from the public which was used in EPA's decision-making.

In letters to EPA, the National Mining Association and ASARCO Incorporated stated that one reason for requesting additional time for the comment period was because the docket was incomplete. In several of the technical background documents prepared for this rule, which have been in the docket since the proposal was signed, EPA listed as secondary references certain other sources. Most of these documents are publicly available in other EPA rulemaking dockets and in the public literature, while some are not. The latter include, for example, correspondence from EPA's contractors. EPA has now placed these referenced documents (except those already publicly available) in the docket to provide more complete access to them. EPA does not view these reference documents as critical to the decision-making process for the rulemaking, and does not believe that additional time is warranted for response.

At the time of publication, EPA indvertently omitted from the docket a document concerning the proposed exclusion of processed scrap metal and shredded circuit boards. The document is entitled, "Scrap Metal Management: Assessment of Environmental and Human Health Damages Attributable to Scrap Metals: Technical Memorandum," dated February 28, 1995. EPA has now placed it in the docket and it is available for public review.

Dated: March 21, 1996.

Michael Shapiro,

Director, Office of Solid Waste.

Spiny Lobster Fishery of the Gulf of Mexico and South Atlantic; Removal of Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to withdraw approval of the Fishery Management Plan for the Spiny Lobster Fishery of the Gulf of Mexico and South Atlantic (FMP) and remove its implementing regulations. Virtually the entire commercial and recreational fisheries for spiny lobsters occur off Florida's coast and State regulations are adequate to protect and manage the resource. Accordingly, removal of the Federal regulations eliminates duplication of effort, reduces costs of enforcement and data collection, and is in accordance with the President's Regulatory Reinvention Initiative intended to reform Federal regulations.

DATES: Written comments must be received on or before May 9, 1996.

ADDRESSES: Send comments on the proposed rule and requests for copies of the Environmental Assessment/Regulatory Impact Review on this action to the Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702.

FOR FURTHER INFORMATION CONTACT: Georgia Cranmore, 813–570–5305.

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and was implemented in 1982 through regulations at 50 CFR part 640 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act).

The spiny lobster fishery managed under the FMP is located primarily off the coast of Florida. The majority of harvest is from Florida's waters (0–3 nautical miles (0–5.6 km) off the Atlantic coast and 0–9 nautical miles (0–16.7 km) off the Gulf coast), and virtually all of the harvest is landed in Florida's ports. The principal harvest area is the Florida Keys reef tract. Consequently, the great preponderance of landings have occurred in Dade and Monroe Counties, the southernmost counties of Florida. In 1995, 97 percent of the commercial landings of spiny lobster were in these two counties and 92 percent of those spiny lobster were harvested in Florida's waters. A Florida license is required for all commercial landings in Florida. The FMP, as implemented in 1982, and subsequently amended, complemented the State's management regime. By adopting Florida's rules, the Council and NMFS accommodated Florida's leading role in regulating this fishery.

The regulations to implement Amendment 4 to the FMP (60 FR 21493, May 2, 1995) for the first time established management measures other than Florida's for the spiny lobster fishery off the states of Georgia, South Carolina, and North Carolina. These regulations opened the fishery year-round in the exclusive economic zone (EEZ) off those states, but established a daily bag or possession limit of two spiny lobsters per person in or from the EEZ in both the commercial and recreational fisheries.

Recent commercial landings of spiny lobster off the southern Atlantic states north of Florida are negligible—not exceeding 45 lb (20 kg) per year in the years 1990 through 1994. Recreational landings north of Florida are not known. However, a recent NMFS survey indicated that only a small number of recreational divers harvested spiny lobster north of Florida. In addition, scientific debate continues regarding the biological status and population dynamics of spiny lobsters in waters north of Florida, including the issues of recruitment and the fate of larvae from the adult population in this area. Commercial landings in Gulf states other than Florida are sporadic and minimal, not exceeding 507 lb (230 kg) in any of the years 1990 through 1994. The level of recreational fishing for lobsters in these Gulf states is unknown. For these reasons, lack of Federal management of this fishery is unlikely to have any significant effect on the status of the resource or on the conduct of the fishery.

Section 303(a)(1) of the Magnuson Act (16 U.S.C. 1853 (a)(1)) requires that a fishery management plan contain the measures that are "necessary and appropriate for the conservation and management of the fishery to prevent overfishing, and to protect, restore, and promote the long-term health and stability of the fishery," and that are "consistent with the national standards." NMFS has concluded that Florida's regulations are adequate to protect and manage the spiny lobster resource off its coast and that the removal of Federal regulations for the spiny lobster fishery in the EEZ off the other states should have no significant regulatory or biological effects. If necessary, other states may implement regulations that will protect and manage the resource off their coasts. Therefore, NMFS has determined that Federal regulations for this fishery are not "necessary and appropriate." Furthermore, continuation of Federal regulations would not be consistent with the Magnuson Act's National Standard 7 that requires that "conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication."

The FMP also includes a management measure applicable to slipper lobsters, *Scyllarides* spp., which are a minor component of the incidental catch in bottom trawl fisheries. The FMP prohibits taking of egg-bearing female slipper lobsters but includes no further management measures for these species. There is no known directed fishery for slipper lobsters and slipper lobsters are so broadly and sparsely distributed over the range of the management unit that insufficient information is available either to monitor their abundance or assess their status relative to

overfishing. It is believed that their principal or preferred habitats are areas of rough and irregular bottom where trawling is not possible; this may afford them adequate protection against overfishing.

For the reasons summarized above, and in accordance with the President's Regulatory Reinvention Initiative, NMFS proposes to withdraw approval of the FMP and to remove its implementing regulations. If approval of the FMP is withdrawn, a notice establishing a control date governing entry into the Gulf of Mexico and South Atlantic spiny lobster fishery under any future limited entry program (51 FR 5713, February 18, 1986) would no longer be relevant.

NMFS recognizes the states' authority under section 306(a)(3) of the Magnuson Act (16 U.S.C. 1856(a)(3)) to regulate vessels registered under its laws when such vessels harvest spiny lobsters in the EEZ. If fishing practices outside the authority of a state should constitute an emergency situation that jeopardizes effective management of the spiny lobster fishery or resource in the EEZ, NMFS would consider promulgating emergency regulations to address the emergency, as authorized by section 305(c)(1) of the Magnuson Act (16 U.S.C. 1855(c)(1)).

Classification

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. As a result, a regulatory flexibility analysis was not prepared. Since Florida's regulations on the spiny lobster fishery are not substantively different from the Federal regulations that would be removed, conduct of the fishery off Florida would not be significantly affected. The number of vessels in the spiny lobster fishery off other states is not a substantial number.

Stone Crab Fishery of the Gulf of Mexico; Removal of Regulations

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NMFS proposes to withdraw approval of the Fishery Management Plan for the Stone Crab Fishery of the Gulf of Mexico (FMP) and remove its implementing regulations. The stone crab fishery takes place entirely off Florida's coast and State regulations are adequate to protect and manage the resource. Accordingly, removal of the Federal regulations eliminates duplication of effort, reduces costs of enforcement and data collection, and is in accordance with the President's Regulatory Reinvention Initiative intended to reform Federal regulations.

DATES: Written comments must be received on or before May 9, 1996.

ADDRESSES: Send comments on the proposed rule and requests for copies of the Environmental Assessment/Regulatory Impact Review to the Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702.

FOR FURTHER INFORMATION CONTACT: Georgia Cranmore, 813–570–5305.

SUPPLEMENTARY INFORMATION: The FMP was prepared by the Gulf of Mexico Fishery Management Council (Council) and was implemented in 1979 through regulations at 50 CFR part 654 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act).

The stone crab fishery managed under the FMP is located entirely off the coast of Florida. The majority of harvest is from Florida's waters (0–9 nautical miles (0–16.7 km) from shore on the Gulf coast and 0–3 nautical miles (0–5.6 km) from shore on the Atlantic coast), and virtually all of the harvest is landed in Florida's ports, principally in the southwestern Florida counties of Monroe through Lee. In 1995, almost 75 percent of stone crab landings were in these counties and 78 percent of the entire harvest was from Florida's waters. NMFS believes that all vessels in this fishery are registered in Florida. A Florida license is required for all commercial landings in Florida. For these reasons, lack of Federal management of this fishery is unlikely to have any significant effect on the status of the resource or on the conduct of the fishery.

Florida has actively managed the fishery since 1929. The FMP was intended to resolve gear conflicts between shrimp fishermen with vessels registered in states other than Florida and Florida stone crab fishermen. Other FMP objectives include managing the stone crab resource for optimum yield, conserving the stocks while attaining full utilization, establishing an effective reporting system, and promoting uniformity of the regulations throughout the management area. The FMP, as amended, adopted Florida's rules for stone crab in the exclusive economic zone (EEZ). By adopting Florida's rules, the Council and NMFS accommodated Florida's leading role in regulating this fishery.

Section 303(a)(1) of the Magnuson Act (16 U.S.C. 1853 (a)(1)) requires that a fishery management plan contain the measures that are "necessary and appropriate for the conservation and management of the fishery to prevent overfishing, and to protect, restore, and promote the long-term health and stability of the fishery," and that are "consistent with the national standards." NMFS has concluded that Florida's regulations are adequate to protect and manage the stone crab resource throughout its range. Therefore, NMFS has determined that Federal regulations for this fishery are not "necessary and appropriate." Furthermore, continuation of Federal regulations would not be consistent with the Magnuson Act's National Standard 7 that requires that "conservation and management measures shall, where practicable, minimize costs and avoid unnecessary duplication."

For the reasons summarized above, and in accordance with the President's regulatory reform initiative, NMFS proposes to withdraw approval of the FMP and to remove its implementing regulations. If approval of the FMP is withdrawn, an advance notice of proposed rulemaking (60 FR 37868, July 24, 1995), which announced that the Council was considering measures to limit entry into the fishery and established a control date if a limited entry program were implemented, would no longer be relevant.

NMFS recognizes Florida's authority under section 306(a)(3) of the Magnuson Act (16 U.S.C. 1856(a)(3)) to regulate vessels registered under its laws when such vessels harvest stone crab in the EEZ. If fishing practices outside Florida's authority should constitute an emergency situation that jeopardizes effective management of the stone crab fishery in the EEZ, NMFS would consider issuing emergency regulations to address the emergency, as authorized by section 305(c)(1) of the Magnuson Act (16 U.S.C. 1855(c)(1)). Additionally, Federal shrimping regulations will prevent gear conflicts by maintaining shrimp/stone crab separation zones in the EEZ.

Classification

This proposed rule has been determined to be not significant for purposes of E.O. 12866.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that this proposed rule, if adopted, would not have a significant economic impact on a substantial number of small entities. As a result, a regulatory flexibility analysis was not prepared. Since Florida's regulations on the stone crab fishery are not substantively different from the Federal regulations that would be removed, conduct of the fishery would not be significantly affected.

DEPARTMENT OF AGRICULTURE

Office of the Secretary

[Docket No. 96–016–1]

Declaration of Extraordinary Emergency Because of Karnal Bunt

An exotic fungal disease, Karnal bunt, has been detected in the United States. The disease was detected in Arizona, and potentially contaminated seed was sent to New Mexico and Texas. The disease had not previously been detected in the United States.

Karnal bunt (*Tilletia indica*) is a serious disease of wheat, durum wheat, and triticale, a hybrid of wheat and rye. The disease affects both yield and grain quality. It adversely affects the color, odor, and palatability of flour and other foodstuffs made from wheat. It does not present a risk to human health.

If Karnal bunt is allowed to spread, the overall crop loss and impact on quality may be significant. The disease could affect United States grain exports. The United States is the world's leading wheat exporter, accounting for one-third of the world wheat exports. Wheat exports from the United States were valued at $4.9 billion in Fiscal Year 1995. At least 21 countries are known to regulate or prohibit grain movement on the basis of Karnal bunt.

Control and eradication of Karnal bunt is difficult. Management of the disease is through quarantine and containment of regulated articles. Initial emergency action was taken by the Arizona Department of Agriculture (ADA) and the Animal and Plant Health Inspection Service (APHIS). APHIS and ADA have instituted emergency quarantines on the infected premises and are regulating the movement of seed, farm equipment, and soil associated with the infected wheat.

This infection of Karnal bunt represents a threat to United States wheat crops. It constitutes a real danger to the national economy and seriously burdens interstate and foreign commerce. Therefore, the U.S. Department of Agriculture (the Department) has determined that an extraordinary emergency exists because of the existence of Karnal bunt in Arizona and possibly New Mexico and Texas.

The Department has reviewed the measures being taken by the States of Arizona, New Mexico, and Texas to survey, regulate, and control Karnal bunt and has consulted with the Governors of Arizona, New Mexico, and Texas. Based on such review and consultation, the Department has determined that measures being taken by the States of Arizona, New Mexico, and Texas are inadequate because these States are unable to take all of the measures required to obtain and maintain the cooperation of the owners of wheat crops necessary to effectively and efficiently control Karnal bunt.

Therefore, in accordance with 7 U.S.C. 150dd, this declaration of extraordinary emergency authorizes the Secretary to: (1) seize, quarantine, treat, apply other remedial measures to, destroy, or otherwise dispose of, in such manner as the Secretary deems appropriate, any product or article of any character whatsoever, or means of conveyance that the Secretary has reason to believe is infected by or contains Karnal bunt; (2) quarantine, treat, or apply other remedial measures to, in such manner as the Secretary deems appropriate, any premises, including articles on such premises, that the Secretary has reason to believe are infected by Karnal bunt. The Governors of Arizona, New Mexico, and Texas have been informed of these facts.

EFFECTIVE DATE: This declaration of extraordinary emergency shall become effective March 20, 1996.

Dan Glickman,

Secretary of Agriculture.

BILLING CODE 3410–34–P

Food and Consumer Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Adolescent WIC Participants Study

AGENCY: Food and Consumer Service, USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, Pub. L. 104–13, this notice announces the Food and Consumer Service's (FCS) intention to request OMB approval of the Adolescent WIC Participants Study.

DATES: Comments on this notice must be received by May 24, 1996.

ADDRESSES: Send comments and requests for copies of this information collection to: Michael E. Fishman, Acting Director, Office of Analysis and Evaluation, Food and Consumer Service, U.S. Department of Agriculture, 3101 Park Center Drive, Alexandria, VA 22302.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

FOR FURTHER INFORMATION CONTACT: Michael E. Fishman, (703) 305–2117.

SUPPLEMENTARY INFORMATION:

Title: Adolescent WIC Participants Study.

OMB Number: Not yet assigned.

Expiration Date: N/A.

Type of Request: New collection of information.

Abstract: The Adolescent WIC Participants Study will determine whether adolescent WIC participants have needs that (a) set them apart from other WIC clients, and (b) require special program measures. The needs of adolescent participants will be assessed for each of the following WIC program benefits:

- Knowledge of nutrition,
- Adoption of healthy dietary practices,
- Knowledge of available health care services, and
- Access to available services.

Surveys of WIC clinic directors and adolescent participants will identify unique needs and determine the extent to which they are met by WIC.

A nationally representative sample of 150 local WIC agencies will be scientifically selected and divided into two subsamples, one containing 100 agencies and the other containing 50 agencies. An average of two clinics will be sampled from each of the 150 WIC agencies in the combined sample. The resulting 300 clinics will support a national survey of 300 WIC clinic directors. Clinic directors will be asked about the needs of adolescent clients, and whether special measures have been taken to meet such needs. The 100 clinics in the larger of the two subsamples will support a national survey of 3,000 adolescent WIC participants. This survey will assess needs of adolescent WIC participants.

Estimate of Burden: Public reporting burden is estimated to average 30 minutes for each WIC clinic director and 30 minutes for each adolescent WIC participant.

Respondents: WIC clinic directors will respond to a telephone survey. Adolescent WIC participants will respond to an audio computer assisted self-interviewing system.

Estimated Number of Respondents: 300 directors of WIC clinics and 3,000 adolescent WIC participants.

Estimated Number of Responses per Respondent: one.

Estimated Total Annual Burden on Respondents: 1,650 hours.

dated: March 18, 1996.

William E. Ludwig,

Administrator, Food and Consumer Service.

BILLING CODE 3410–30–P

Forest Service

Southwest Washington Provincial Advisory Committee Meeting Notice

AGENCY: Forest Service, USDA.

ACTION: Notice of Meeting.

SUMMARY: The Southwest Washington Provincial Advisory Committee will meet on April 18, 1996, at the Red Lion Inn in Kelso, Washington. The meeting will begin at 9 a.m. and continue until 4:30 p.m. The purpose of the Advisory Committee meeting is to utilize the Province Health Matrix to advise on proposed Timber sales for the Cowlitz, Lewis, Wind River, and White Salmon Basins. Agenda items to be covered include: (1) 1996 and 1997 Timber Sale Program, (2) Updates from Subcommittees on the Social and Economic Indicators of Basin Health and Forest Monitoring Program, (3) Cispus AMA Update, (4) Replacements for vacated seats, (5) Flood damage report, and (6) Public Open Forum. The purpose of the Monitoring Subcommittee meeting is to develop a proposal on components of the forest Monitoring Program. All Southwest Washington Provincial Advisory Committee meetings are open to the public. Interested citizens are encouraged to attend. The "open forum" provides opportunity for the public to bring issues, concerns, and discussion topics to the Advisory Committee. The "open forum" is scheduled as part of agenda item (1) for this meeting. Interested speakers will need to register prior to the open forum period. The committee welcomes the public's written comments on committee business at any time.

FOR FURTHER INFORMATION CONTACT: Direct questions regarding this meeting to Sue Lampe, Public Affairs, at (360) 750–5091, or write Forest Headquarters Office, Gifford Pinchot National Forest, 6926 E. Fourth Plain Blvd., PO Box 8944, Vancouver, WA 98668–8944.

Dated: March 18, 1996.

Ted. C. Stubblefield,

Forest Supervisor.

BILLING CODE 3410–11–M

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 22–96]

Foreign-Trade Zone 43, Battle Creek, Michigan, Application for Subzone Status; Abbott Manufacturing, Inc./ Ross Products, Plant (Infant Formula, Adult Nutritional Products), Sturgis, MI

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the City of Battle Creek Michigan, grantee of FTZ 43, requesting special-purpose subzone status for export activity at the infant formula and adult nutritional products manufacturing plant of Abbott Manufacturing, Inc. (AMI) (a subsidiary of Abbott Laboratories, Inc.), located in Sturgis, Michigan. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 12, 1996.

The plant (624,000 sq.ft. on 76 acres), known as the Ross Products facility, is located at 901 N. Centreville Road, Sturgis (St. Joseph County), Michigan, approximately 45 miles southwest of Battle Creek. The facility (500 employees) is used to produce milk and sugar-based infant formula and adult nutritional products for export and the domestic market; however, zone procedures would be used only for production for export. The production process involves blending foreign, ex-quota milk powder and foreign, ex-quota sugar with domestically-sourced oils, soy isolates, vitamins and minerals, and EZO ends. Other foreign-sourced items that may be used in the export-blending activity include: cocoa powder, pharmaceutical grade fat emulsions, vitamins and minerals, and caseinates (up to 14% of finished product value). All foreign-origin milk and sugar would be re-exported as ingredients in finished blended products.

Zone procedures would exempt AMI from quota requirements and Customs duty payments on the foreign milk and sugar products used in the export activity and from Customs duty payments on the other foreign ingredients involved. The application indicates that subzone status would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is May 24, 1996. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to June 10, 1996).

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

Office of the Port Director, U.S. Customs Service, 4950 West Dickman Road, Battle Creek, MI 49015

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th Street & Pennsylvania Avenue NW., Washington, DC 20230–0002.

Dated: March 14, 1996.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 96–7049 Filed 3–22–96; 8:45 am]

BILLING CODE 3510–DS–P

[Docket 21–96]

Foreign-Trade Zone 40, Cleveland, Ohio; Application for Expansion

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Cleveland-Cuyahoga County Port Authority (Port Authority), grantee of FTZ 40, requesting authority to expand its zone in Cleveland, Ohio, within the Cleveland Customs port of entry. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 12, 1996.

FTZ 40 was approved on September 29, 1978 (Board Order 135, 43 FR 46886; 10/11/78), and expanded in June 1982 (Board Order 194, 47 FR 27579; 6/25/82) and April 1992 (Board Order 574, 57 FR 13694; 4/17/92). The zone project currently consists of two sites in the Cleveland, Ohio, area: *Site 1:* (94 acres)—Port of Cleveland complex on Lake Erie at the mouth of the Cuyahoga River in Cleveland; and, *Site 2:* (175 acres)—the IX Center (formerly, the "Cleveland Tank Plant"), in Brook Park, Ohio, adjacent to Cleveland Hopkins International Airport.

The applicant is now requesting authority to expand the zone to include 2 sites within the City of Cleveland: *Proposed Site 3* (1,900 acres)—Cleveland Hopkins International Airport complex; *Proposed Site 4* (450 acres)—Burke Lakefront Airport, located at 1501 North Marginal Road. Both airports are owned and operated by the City of Cleveland.

No specific manufacturing requests are being made at this time. Such requests would be made to the Board on a case-by case basis.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment (original and 3 copies) is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is May 24, 1996. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to June 10, 1996).

A copy of the application and accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, Bank One Center, 600 Superior Avenue, Suite 700, Cleveland, Ohio 44114.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th & Pennsylvania Avenue NW., Washington, DC 20230.

Dated: March 14, 1996.

John J. Da Ponte, Jr.,

Executive Secretary.

[FR Doc. 96–7050 Filed 3–22–96; 8:45 am]

BILLING CODE 3510–DS–P

[Docket 23–96]

Foreign-Trade Zone 207, Richmond, Virginia, Application for Subzone Status; Abbott Manufacturing, Inc., Plant (Infant Formula, Adult Nutritional Products), Altavista, VA

An application has been submitted to the Foreign-Trade Zones Board (the Board) by the Capital Region Airport Commission, grantee of FTZ 207, requesting special-purpose subzone status for export activity at the infant formula and adult nutritional products manufacturing plant of Abbott Manufacturing, Inc. (AMI) (a subsidiary of Abbott Laboratories, Inc.), located in Altavista, Virginia. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the Board (15 CFR Part 400). It was formally filed on March 12, 1996.

The AMI plant (1,000,000 sq. ft. on 215 acres) is located at U.S. Highway 29 North and State Route 711 in the City of Altavista (Campbell County), Virginia, approximately 20 miles south of Lynchburg, Virginia. The facility (650 employees) is used to produce milk and sugar-based infant formula and adult nutritional products for export and the domestic market; however, zone procedures would be used only for production for export. The production process involves blending foreign, ex-quota milk powder and foreign, ex-quota sugar with domestically-sourced oils, soy isolates, vitamins and minerals, and EZO ends. Other foreign-sourced items that may be used in the export-blending activity include: cocoa powder, pharmaceutical grade fat emulsions, vitamins and minerals, and caseinates (up to 14% of finished product value). All foreign-origin milk and sugar would be re-exported as ingredients in finished blended products.

Zone procedures would exempt AMI from quota requirements and Customs duty payments on the foreign milk and sugar products used in the export activity, and they would also exempt the company from Customs duty payments on the other foreign ingredients involved. The application indicates that subzone status would help improve the plant's international competitiveness.

In accordance with the Board's regulations, a member of the FTZ Staff has been designated examiner to investigate the application and report to the Board.

Public comment on the application is invited from interested parties. Submissions (original and three copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for their receipt is May 24, 1996. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period (to June 10, 1996).

A copy of the application and the accompanying exhibits will be available for public inspection at each of the following locations:

U.S. Department of Commerce, District Office, 700 Centre, Suite 550, 704 East Franklin Street, Richmond, VA 23219.

Office of the Executive Secretary, Foreign-Trade Zones Board, U.S. Department of Commerce, Room 3716, 14th Street & Pennsylvania Avenue NW., Washington, DC 20230–0002.

Dated: March 14, 1996.

John J. Da Ponte, Jr.,

Executive Secretary.

CONSUMER PRODUCT SAFETY COMMISSION

Sunshine Act Meeting

TIME AND DATE: 10:00 a.m., Wednesday, March 27, 1996.

LOCATION: Room 420, East West Towers, 4330 East West Highway, Bethesda, Maryland.

STATUS: Open to the Public.

Matter To Be Considered

Charcoal Labeling

The staff will brief the Commission on a draft final rule that would revise the label currently required by the Commission's regulations for packages of charcoal. The label addresses the hazard of inhalation of carbon monoxide that collects when charcoal is burned in confined areas.

For a recorded message containing the latest agenda information, call (301) 504–0709.

CONTACT PERSON FOR ADDITIONAL INFORMATION: Sadye E. Dunn, Office of the Secretary, 4330 East West Highway, Bethesda, MD 20207 (301) 504–0800.

Dated: March 19, 1996.

Sadye E. Dunn,

Secretary.

[FR Doc. 96–7287 Filed 3–21–96; 1:46 pm]

BILLING CODE 6355–01–M

DEPARTMENT OF EDUCATION

Intent To Compromise Two Audit Claims Against Connecticut State Board of Education

AGENCY: Department of Education.

ACTION: Notice of intent to compromise two audit claims.

SUMMARY: The U.S. Department of Education (the Department) intends to compromise two audit claims against the Connecticut State Board of Education (Connecticut) now pending before the Office of Administrative Law Judges (OALJ). Docket Nos. 92–53–R and 94–68–R (20 U.S.C. 1234a(j)).

DATES: Interested persons may comment on the proposed action by submitting written data, views, or arguments May 9, 1996.

ADDRESSES: Comments should be addressed to Effie Forde, Office of the General Counsel, U.S. Department of Education, 600 Independence Avenue, SW., (Room 5200, FB 10), Washington, DC 20202.

FOR FURTHER INFORMATION CONTACT: Effie Forde, Esq., Telephone (202) 401–8292. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The claims in question arose from two separate audits of the financial affairs and operations of Connecticut for fiscal years 1988 through 1991. The audits were performed by the State of Connecticut Auditor of Public Accounts to fulfill the requirements of Office of Management and Budget (OMB) Circular A–128. The audits included the evaluation of the internal control systems, including applicable internal administrative controls used in administering Federal financial assistance programs. Among the systems examined, the auditors reviewed Connecticut's procedures for allocating among programs costs for individual employees who had multi-program responsibilities.

Department officials issued two separate program determination letters (PDLs) to Connecticut. The first PDL was issued on March 31, 1992 demanding a refund in the amount of $575,329 (Connecticut I) for violations of the requirements in OMB Circular A–87 relating to recordkeeping for employees with multi-program responsibilities. Funds were disallowed for the following programs: Bilingual Education State Grant ($94,134); Education Consolidation and Improvement Act (ECIA) Migrant Education State Formula Grant ($108,358); Chapter 1 of the ECIA, Education for the Disadvantaged, State Administration ($36,120); Chapter 2 of the ECIA ($263,605); Part B of the Education of the Handicapped Act ($29,272); and Preschool Grants for Children with Disabilities ($43,910). Based on documentation submitted by Connecticut during the course of its appeal before the OALJ, the Department has withdrawn its claims relating to Chapter 2 of the ECIA ($263,605) and the Bilingual Education State Grant ($94,134). With the withdrawal of these two claims, the funds remaining at issue in Connecticut I have been reduced from $575,329 to $217,590.

The Department issued the second PDL on March 25, 1994 (Connecticut II) disallowing a total of $558,162 for similar recordkeeping violations relating to the following Federal programs: Bilingual Education State Grant program ($100,566); Carl D. Perkins Vocational Education Act ($3,133); Chapter 1 Handicapped ($201,438); Chapter 2 of the Elementary and Secondary Education Act (ESEA) ($234,640); and Handicapped Special Studies ($18,385). Based on documentation submitted by Connecticut after it filed its application for review with the OALJ, the Department has withdrawn its claims relating to Chapter 2 of the ESEA ($234,640) and the Bilingual Education State Grant ($100,566). As a result, the amount of funds remaining at issue in Connecticut II is $222,956.

Connecticut filed timely requests for review of the two PDLs with the OALJ. Thereafter, the Administrative Law Judge assigned to the appeals granted the parties' joint motion to enter into settlement negotiations.

The Department proposes to compromise the amount remaining at issue in Connecticut I ($217,590) for $82,500 and the amount at issue in Connecticut II ($222,956) for $64,260. Under the proposed compromise, Connecticut therefore would repay a total principal amount of $147,760, plus accrued interest, in three equal installments. Although Connecticut I and II are being resolved together through one settlement agreement, they involve separate PDLs and claims for purposes of the dollar limitation in 20 U.S.C. 1234a(j)(1) on the Secretary's authority to compromise claims.

During settlement negotiations, Connecticut provided substantial additional documentation and information relating to the individual employees at issue, their job duties, and how they spent their time. Furthermore, Connecticut raised additional legal and factual issues that could reduce or eliminate the remaining amounts at issue.

Given the amount that would be repaid by Connecticut under the settlement agreement, the additional documentation submitted during settlement discussions, and the litigation risks and costs of proceeding through the appeal process for both appeals, the Department has determined that it would not be practical or in the public interest to continue these proceedings. Rather, under the authority provided in 20 U.S.C. 1234a(j)(1), the Department has determined that compromise of these claims for $146,760 would be appropriate.

The public is invited comment on the Department's intent to compromise these claims. Additional information may be obtained by writing to Effie Forde at the address given at the beginning of this notice.

Program Authority: 20 U.S.C. 1234a(j).

Dated: March 19, 1996.

Donald R. Wurtz,

Chief Financial Officer.

[FR Doc. 96–7161 Filed 3–22–96; 8:45 am]

BILLING CODE 4000–01–P

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Submission for OMB review; comment request.

SUMMARY: The Director, Information Resources Group, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before April 24, 1996.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs,

Attention: Wendy Taylor, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue SW., Room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U. S. C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Director of the Information Resources Group publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, e.g., new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

Dated: March 19, 1996.

Gloria Parker,

Director, Information Resources Group.

Office of the Under Secretary

Type of Review: NEW.
Title: Case Studies for Direct Loan Evaluation.
Frequency: On occasion.
Affected Public: Business or other for-profit; Not-for-profit institutions.
Reporting Burden:
Responses: 1.
Burden Hours: 363.
Recordkeeping Burden:
Recordkeepers: 0.
Burden Hours: 0.
Abstract: Contractor will conduct site visits of institutions participating in the Federal Direct Student Loan Program to capture information about successful practices, required resources, and experiences with ED administration of the program.

[FR Doc. 96–7091 Filed 3–22–96; 8:45 am]

BILLING CODE 4000–01–P

National Institute on Disability and Rehabilitation Research

AGENCY: Department of Education.

ACTION: Notice of Proposed Funding Priority for Fiscal Years 1996 and 1997 for a Research and Demonstration Project.

SUMMARY: The Secretary proposes a funding priority for Research and Demonstration (R&D) projects under the National Institute on Disability and Rehabilitation Research (NIDRR) for fiscal years 1996–1997. The Secretary takes this action to focus research attention on areas of national need consistent with NIDRR's long-range planning process. This priority is intended to assist in the solutions to problems encountered by individuals with disabilities in their daily activities.

DATES: Comments must be received on or before April 24, 1996.

ADDRESSES: All comments concerning this proposed priority should be addressed to David Esquith, U.S. Department of Education, 600 Independence Avenue, S.W., Switzer Building, Room 3424, Washington, D.C. 20202–2601.

FOR FURTHER INFORMATION CONTACT: David Esquith. Telephone: (202) 205–8801. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8133. Internet: David—Esquith@ed.gov

SUPPLEMENTARY INFORMATION: This notice contains a proposed priority on universal design. Authority for the R&D program of NIDRR is contained in section 204(a) of the Rehabilitation Act of 1973, as amended (29 U.S.C. 760–762).

Under this program the Secretary makes awards to public agencies and private agencies and organizations, including institutions of higher education, Indian tribes, and tribal organizations. This program is designed to assist in the development of solutions to the problems encountered by individuals with handicaps in their daily activities, especially problems related to employment (see 34 CFR 351.1). Under the regulations for this program (see 34 CFR 351.32), the Secretary may establish research priorities by reserving funds to support the research activities listed in 34 CFR 351.10.

This proposed priority supports the National Education Goal that calls for all Americans to possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

The Secretary will announce the final funding priority in a notice in the **Federal Register**. The final priority will be determined by responses to this notice, available funds, and other considerations of the Department. Funding of particular projects depends on the final priority, the availability of funds, and the quality of the applications received. The publication of this proposed priority does not preclude the Secretary from proposing additional priorities, nor does it limit the Secretary to funding only this priority, subject to meeting applicable rulemaking requirements.

Note: This notice of a proposed priority does not solicit applications. A notice inviting applications under this competition will be published in the **Federal Register** concurrent with or following publication of the notice of the final priority.

Priority:

Under 34 CFR 75.105(c)(3) the Secretary proposes to give an absolute preference to applications that meet the following priority. The Secretary proposes to fund under this program only applications that meet this absolute priority:

Emerging Disability Populations

Background

Demographic and social trends indicate that the prevalence and distribution of various types of disability are changing, and that new populations of individuals are emerging to create unique demands on social policy and service systems. These new populations frequently result from such factors as: (1) Changing etiologies for existing disabilities; (2) growth in segments of the population with higher prevalence rates for certain disabilities, including the aging of the population in general and the population of individuals with disabilities in particular; (3) the unintended consequences of changes in public policy; or (4) the introduction of new disabilities.

The first category includes, for example, mental retardation that results from high-risk births, (President's Committee on Mental retardation, *The New Morbidity,* 1993) or spinal cord injury resulting from interpersonal violence (Stover, unpublished communique to NIDRR, 1994). The second category is exemplified by higher incidence and prevalence of activity limitations due to impairments typically correlated with increased age. (LaPlante, 1995) Examples include the onset of sensory loss in older persons, or certain strength-limiting musculoskeletal or neuromuscular diseases. A subset of this category is represented by the acquisition of secondary disabilities or new exacerbations of existing disabilities among individuals with disabilities as they age, for example post-polio syndrome or deterioration of stressed joints. The third category of emerging disabilities may have iatrogenic causes or may result from inappropriate societal interventions such as institutionalization or segregation during which the acquisition of social skills and learning opportunities are forfeited. Social policies such as deinstitutionalization into inadequately supportive environments, while not necessarily creating new disabilities, has led to different manifestations of problems associated with long-term mental illness, including homelessness, abuse, involvement in the criminal justice system, and the acquisition of additional disabilities and health problems. Other disabilities, particularly secondary disabilities, may result from policy decisions that result in inadequate preventive services. The final category includes persons with newly emergent disabilities, most clearly illustrated by persons living with HIV disease and AIDS, and by environmental or workplace disabilities such as repetitive motion syndrome, environmental allergies, and various hidden disabilities.

The causes of each of these categories of disabilities are such that emergent disabilities tend to be differentially distributed throughout the population in ways that are not typical of other common disabilities. While there is a strong correlation between disability and poverty generally. (LaPlante, 1995; *The New Morbidity,* 1993; McNeil, 1995; Aday, 1993) these emergent disabilities appear to be inordinately concentrated among the poor, minorities, youth, the aged, the poorly educated, and those who already have other disabilities.

The underlying causes of these emergent disabilities may be socio-behavioral, environmental, or socio-economic, but are most often a combination of these elements. Among the most important factors creating this "emerging universe of disability" are interpersonal violence, such as shootings, battery, or child abuse; low-birthweight and other high-risk births, often to mothers who are young teenagers, substance abusers, HIV-positive, or with poor prenatal care; aging, with or without prior existing disabilities; high risk behaviors involving substance abuse or sexual activities; and secondary conditions, often resulting from inadequate acute or long-term care.

The nation lacks a clear understanding of the existence of these disabilities, which are closely related to an individual's position in the social structure, and certainly does not comprehend the possible consequences for the disability service systems of a new population of disabled persons from among what one author calls "the vulnerable." (Aday, 1993) There are many gaps in the knowledge base about risk factors associated with the emergence of disability, as there are no comprehensive surveillance systems or epidemiological studies.

Priority:

The Secretary proposes to establish a research and demonstration project to: (1) Define and characterize the emerging universe of disability; (2) assess the incidence and prevalence of these "new universe" disabilities; (3) identify etiologies associated with these disabilities; and (4) evaluate the implications of these emerging disabilities for service systems and social policy. In addition to activities proposed by the applicant to carry out these purposes, the proposed R&D project shall carry out the following activities:

- Determine and test methods, using a range of existing databases, to estimate and describe the emerging universe of disability both for the present and in the future, and assess the feasibility of using existing, or establishing new, surveillance systems to predict and characterize future emerging disabilities;
- Assess the particular needs of the emerging universe, both now and for the future, for vocational rehabilitation, special education, medical and psychosocial rehabilitation, independent living services, and assistive technology services, as well as for community-based supports, income supports, and medical assistance;
- Analyze the implications for the selection, preparation, and training of personnel, including professionals and peers, to provide services to the emerging universe, and for the ways in which services should be delivered;
- Design a practical and prioritized agenda for a future research program to develop interventions and policy approaches to address the disability-related problems of various segments of the emerging universe; and
- Convene a conference of individuals both within and outside of the disability field to discuss the Center's findings and their implications.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding these proposed priorities.

All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 3423, Mary Switzer Building, 330 C Street S.W., Washington, D.C., between the hours of 8:00 a.m. and 3:30 p.m., Monday through Friday of each week except Federal holidays.

Applicable Program Regulations: 34 CFR Parts 350 and 351.

Program Authority: 29 U.S.C. 760–762.

(Catalog of Federal Domestic Assistance Number 84.133A, Research and Demonstration Projects)

Dated: February 7, 1996.

Judith E. Heumann,

Assistant Secretary for Special Education and Rehabilitative Services.

[FR Doc. 96–7074 Filed 3–22–96; 8:45 am]

BILLING CODE 4000–01–P

National Institute on Disability and Rehabilitation Research

AGENCY: Department of Education.

ACTION: Notice of Proposed Funding Priorities for Fiscal Years 1996–1997 for Rehabilitation Research and Training Centers.

SUMMARY: The Secretary proposes funding priorities for Rehabilitation Research and Training Centers (RRTCs) under the National Institute on Disability and Rehabilitation Research (NIDRR) for fiscal years 1996–1997. The Secretary takes this action to focus research attention on areas of national need identified through NIDRR's long-range planning process. These proposed priorities are intended to improve outcomes for individuals with disabilities.

DATES: Comments must be received on or before April 24, 1996.

ADDRESSES: All comments concerning these proposed priorities should be addressed to David Esquith, U.S. Department of Education, 600 Independence Avenue, S.W., Switzer

Building, Room 3424, Washington, D.C. 20202–2601.

FOR FURTHER INFORMATION CONTACT: David Esquith. Telephone: (202) 205–8801. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–8133. Internet: David__Esquith@ed.gov

SUPPLEMENTARY INFORMATION: This notice contains two proposed priorities under the RRTC program. The proposed priorities are for research related to vocational rehabilitation services to individuals who are blind or visually impaired and vocational rehabilitation services to individuals who are deaf or hard of hearing.

Authority for the RRTC program of NIDRR is contained in section 204(b)(2) of the Rehabilitation Act of 1973, as amended (29 U.S.C. 760–762). Under this program the Secretary makes awards to public and private organizations, including institutions of higher education and Indian tribes or tribal organizations for coordinated research and training activities. These entities must be of sufficient size, scope, and quality to effectively carry out the activities of the Center in an efficient manner consistent with appropriate State and Federal laws. They must demonstrate the ability to carry out the training activities either directly or through another entity that can provide such training.

The Secretary may make awards for up to 60 months through grants or cooperative agreements. The purpose of the awards is for planning and conducting research, training, demonstrations, and related activities leading to the development of methods, procedures, and devices that will benefit individuals with disabilities, especially those with the most severe disabilities.

These proposed priorities support the National Education Goal that calls for all Americans to possess the knowledge and skills necessary to compete in a global economy and exercise the rights and responsibilities of citizenship.

Under the regulations for this program (see 34 CFR 352.32) the Secretary may establish research priorities by reserving funds to support particular research activities.

NIDRR is in the process of developing a revised long-range plan. The priorities proposed in this notice are consistent with the long-range planning process.

Description of the Rehabilitation Research and Training Center Program

RRTCs are operated in collaboration with institutions of higher education or providers of rehabilitation services or other appropriate services. RRTCs serve as centers of national excellence and national or regional resources for providers and individuals with disabilities and the parents, family members, guardians, advocates or authorized representatives of the individuals.

RRTCs conduct coordinated and advanced programs of research in rehabilitation targeted toward the production of new knowledge to improve rehabilitation methodology and service delivery systems, alleviate or stabilize disabling conditions, and promote maximum social and economic independence of individuals with disabilities.

RRTCs provide training, including graduate, pre-service, and in-service training, to assist individuals to more effectively provide rehabilitation services. They also provide training including graduate, pre-service, and in-service training, for rehabilitation research personnel and other rehabilitation personnel.

RRTCs serve as informational and technical assistance resources to providers, individuals with disabilities, and the parents, family members, guardians, advocates, or authorized representatives of these individuals through conferences, workshops, public education programs, in-service training programs and similar activities.

NIDRR encourages all Centers to involve individuals with disabilities and minorities as recipients in research training, as well as clinical training.

Applicants have considerable latitude in proposing the specific research and related projects they will undertake to achieve the designated outcomes; however, the regulatory selection criteria for the program (34 CFR 352.31) state that the Secretary reviews the extent to which applicants justify their choice of research projects in terms of the relevance to the priority and to the needs of individuals with disabilities. The Secretary also reviews the extent to which applicants present a scientific methodology that includes reasonable hypotheses, methods of data collection and analysis, and a means to evaluate the extent to which project objectives have been achieved.

The Department is particularly interested in ensuring that the expenditure of public funds is justified by the execution of intended activities and the advancement of knowledge and, thus, has built this accountability into the selection criteria. Not later than three years after the establishment of any RRTC, NIDRR will conduct one or more reviews of the activities and achievements of the Center. In accordance with the provisions of 34 CFR 75.253(a), continued funding depends at all times on satisfactory performance and accomplishment.

General: The Secretary proposes that the following requirements will apply to all of the RRTCs pursuant to the priorities:

Each RRTC must conduct an integrated program of research to develop solutions to problems confronted by individuals with disabilities.

Each RRTC must conduct a coordinated and advanced program of training in rehabilitation research, including training in research methodology and applied research experience, that will contribute to the number of qualified researchers working in the area of rehabilitation research.

Each Center must disseminate and encourage the use of new rehabilitation knowledge. They must publish all materials for dissemination or training in alternate formats to make them accessible to individuals with a range of disabling conditions.

Each RRTC must involve individuals with disabilities and, if appropriate, their family members, as well as rehabilitation service providers in planning and implementing the research and training programs, in interpreting and disseminating the research findings, and in evaluating the Center.

Priorities: Under 34 CFR 75.105(c)(3) the Secretary proposes to give an absolute preference to applications that meet one of the following proposed priorities. The Secretary would fund under these competitions only applications that meet one of these absolute priorities:

Proposed Priority 1: Vocational Rehabilitation Services for Individuals Who are Blind or Visually Impaired

Background

In 1990, approximately 17 out of every 1,000 persons in the civilian noninstitutionalized population of the United States were unable to see to read ordinary newspaper print even when wearing glasses. Of these 4.3 million individuals approximately 515,000 were blind in both eyes (K.A. Nelson and E. Dimitrova, Severe Visual Impairment in the United States and in Each State, 1990, Journal of Visual Impairment and Blindness, March 1993, 80). The number of persons with a visual impairment that substantially limits one or more major life activity is estimated to be 1.3 million (M. Laplante and D. Carlson, Disability in the United States: Prevalence and Causes, 1992, Disability Statistics Rehabilitation Research and Training Center, University of California, San Francisco, October, 1995). These individuals are the primary target audience for this RRTC.

For the years 1991 and 1992, of the 4.57 million persons 21 to 64 years old who had some functional limitation seeing words or letters, 2.086 million individuals or 45.6 percent were employed, while 144,000 individuals, or 25.6 percent of those who were totally unable to see words or letters, were employed. By comparison, for the same age group, 80.5 percent of all individuals without a disability were employed (J. McNeil, Americans with Disabilities: 1991–1992, Household Economic Studies, P70–33, December 1993). Among the cases closed by State vocational rehabilitation agencies as non-rehabilitated or rehabilitated in 1993, 25,488 individuals were blind or visually impaired. Of those individuals, 18,273 or 71.7 percent, were rehabilitated (Rehabilitation Services Administration (RSA), Caseload Services data, 1993).

In order to improve the employment status of individuals who are blind and visually impaired, there is a need to identify barriers to achieving employment outcomes and to develop new and improved rehabilitation techniques that rehabilitation service providers can use to address these barriers. In addition, rehabilitation service providers and employers must be knowledgeable about job accommodations. Rehabilitation service providers and employers should have the ability to assist individuals who are blind or visually impaired to overcome not only physical barriers, but also technological barriers to the emerging electronic information infrastructure.

Since 1936 the Randolph-Sheppard Act program has been a source of employment for individuals who are blind. The program enables individuals who are blind to become licensed facility managers and operate vending facilities on Federal property. According to RSA, in fiscal year 1994, 3,524 blind vendors operated 3,419 vending facilities under the Randolph-Sheppard Act program. The program generated $401 million in gross earnings with vendors averaging an annual income of $26,478.

In order to ensure that the vending facilities are competitive, an assessment should be undertaken to identify areas of the program that may be improved by training State Business Enterprise program counselors and licensed facility managers.

Proposed Priority 1

The Secretary proposes to establish an RRTC on vocational rehabilitation services for individuals who are blind or visually impaired that will: (1) investigate and document the employment status of individuals who are blind or visually impaired; (2) identify the barriers to employment that can be addressed by rehabilitation service providers or employers, and develop or identify rehabilitation techniques or reasonable accommodations that address these barriers; (3) train rehabilitation professionals on new and effective rehabilitation techniques and accommodations; (4) develop a national information and resource referral data base for rehabilitation professionals and employers; and (5) identify the training needs of State Business Enterprise program counselors and licensed facility managers that will enable the vending facilities to be competitive, develop and deliver training programs to meet the identified needs, and evaluate the efficacy of the training.

In carrying out the purposes of the priority, the RRTC shall:

- Solicit and utilize input from individuals who are blind or severely visually impaired in the planning, development, and implementation of the activities of the RRTC as much as possible; and
- Coordinate its research efforts with other NIDRR grantees that address vocational rehabilitation in general, as well as those that address the needs of individuals who are blind or visually impaired.

Proposed Priority 2: Vocational Rehabilitation Services for Individuals Who are Deaf or Hard of Hearing

Background

In 1991–1992 there were approximately 10.9 million persons age 15 and older with a "functional limitation hearing normal conversation" and an additional 924,000 persons who were "unable to hear normal conversation" (J. McNeil, Americans with Disabilities: 1991–1992, Household Economic Studies, P70–33, December 1993). The number of persons with a hearing impairment that substantially limits one or more major life activity is estimated to be 1.2 million (M. Laplante and D. Carlson, Disability in the United States: Prevalence and Causes, 1992, Disability Statistics Rehabilitation Research and Training Center, University of California, San Francisco, October, 1995). These individuals are the primary target audience for this RRTC.

For the years 1991 and 1992, of all persons 21 to 64 years old who had some functional limitation hearing normal conversation, 3,335,000 individuals or 63.6 percent were employed, while 189,000 individuals, or 58.2 percent of those who were totally unable to hear normal conversation, were employed. By comparison, for the same age group, 80.5 percent of all individuals without a disability were employed (J. McNeil, 1993). Among the cases closed by State vocational rehabilitation agencies as non-rehabilitated or rehabilitated in 1993, 21,888 individuals were deaf or hard of hearing. Of those individuals, 15,901, or 72.6 percent, were rehabilitated (Rehabilitation Services Administration (RSA), Caseload Services data, 1993). Although the Federal vocational rehabilitation system successfully serves and rehabilitates significant numbers of individuals who are deaf or hard of hearing, new knowledge is needed to address the vocational rehabilitation needs of specific subgroups within this population such as late-deafened adults, individuals who have limited English proficiency, individuals who are functionally illiterate, and individuals with co-existing disabilities, including psychiatric disabilities and mental retardation.

"Low-functioning" deaf individuals often do not have comprehensive rehabilitation training and related services accessible and available to them. This segment of the deaf population—sometimes called "low achieving," "multiply disabled deaf," or "traditionally underserved deaf"—requires long-term and intensive habilitative and rehabilitative services. These individuals exhibit deficits in vocational skills, independent living skills, manual and oral communication skills, social skills, and academic skills, and many have significant secondary disabilities. Many are from socioeconomically and culturally disadvantaged backgrounds, and many are from ethnic or linguistic minorities. Services to this population are scarce and fragmented. In addition to understanding the social, vocational, and educational implications of the disability, vocational rehabilitation service providers must also be able to communicate with the individuals, often through less than optimal means, such as rudimentary sign language.

The application of emerging technology is expected to play a pivotal role in improving the vocational rehabilitation and employment status of persons who are deaf or hard of hearing. This new technology will address a wide-range of workplace

accommodation issues including, but not limited to, communication, safety, and literacy.

Proposed Priority 2

The Secretary proposes to establish an RRTC on the vocational rehabilitation of individuals who are deaf or hard of hearing that will: (1) investigate and document the employment status of individuals who are deaf or hard of hearing by age, gender, ethnic or linguistic background, education, level of impairment, age at on-set of impairment (particularly late-deafened adults), and co-existing conditions; (2) identify the barriers to entering or maintaining employment that can be addressed by vocational rehabilitation service providers or employers, and identify or develop vocational rehabilitation techniques or reasonable accommodations that address these barriers, including those using emerging assistive technology such as assistive listening devices, telecommunications equipment, and remote access technology; (3) train rehabilitation professionals, including peer advocates, on new and effective rehabilitation techniques and accommodations; (4) develop a national information and resource referral data base for rehabilitation professionals and employers; and (5) identify the range of vocational rehabilitation services and service resources required to meet the needs of low-functioning deaf individuals.

In carrying out the purposes of the priority, the RRTC shall:

- Examine patterns of vocational rehabilitation service usage by low-functioning deaf individuals with specific attention to those from diverse cultural backgrounds;
- Solicit and utilize input from individuals who are deaf or hard of hearing in the planning, development, and implementation of the activities of the grant as much as possible; and
- Coordinate its research efforts with other NIDRR grantees that address vocational rehabilitation in general, as well as those that address the needs of individuals who are deaf or hard of hearing.

Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding these proposed priorities. All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 3423, Mary Switzer Building, 330 C Street SW., Washington, D.C., between the hours of 8:00 a.m. and 3:30 p.m., Monday through Friday of each week except Federal holidays.

BILLING CODE 4000–01–P

National Institute on Disability and Rehabilitation Research

AGENCY: Department of Education.

ACTION: Notice of Proposed Funding Priority for Fiscal Years 1996–1997 for a Rehabilitation Engineering Research Center.

SUMMARY: The Secretary proposes a funding priority for a new Rehabilitation Engineering Research Center (RERC) under the National Institute on Disability and Rehabilitation Research (NIDRR) for fiscal years 1996–1997. The Secretary takes this action to focus research attention on areas of national need. This priority is intended to improve rehabilitation services and outcomes for individuals with disabilities.

DATES: Comments must be received on or before April 24, 1996.

ADDRESSES: All comments concerning this proposed priority should be addressed to David Esquith, U.S. Department of Education, 400 Maryland Avenue, S.W., Switzer Building, Room 3424, Washington, D.C. 20202–2601.

FOR FURTHER INFORMATION CONTACT: David Esquith. Telephone: (202) 205–8801. Individuals who use a telecommunications device for the deaf (TDD) may call the TDD number at (202) 205–5516. Internet: David__Esquith@ed.gov

SUPPLEMENTARY INFORMATION: This notice contains a proposed priority under the RERC program for research on technology for older persons with disabilities.

Authority for the RERC program of NIDRR is contained in section 204(b)(3) of the Rehabilitation Act of 1973, as amended (29 U.S.C. 760–762). Under this program the Secretary makes awards to public and private agencies and organizations, including institutions of higher education, Indian tribes, and tribal organizations, to conduct research, demonstration, and training activities regarding rehabilitation technology in order to enhance opportunities for meeting the needs of, and addressing the barriers confronted by, individuals with disabilities in all aspects of their lives. An RERC must be operated by or in collaboration with an institution of higher education or a nonprofit organization.

This proposed priority supports the National Education Goal that calls for every adult American to possess the skills necessary to compete in a global economy.

Under the regulations for this program (see 34 CFR 353.32) the Secretary may establish research priorities by reserving funds to support particular research activities.

The Secretary will announce the final priority in a notice in the **Federal Register**. The final priority will be determined by responses to this notice, available funds, and other considerations of the Department. Funding of a particular project depends on the final priority, the availability of funds, and the quality of the applications received. The publication of this proposed priority does not preclude the Secretary from proposing additional priorities, nor does it limit the Secretary to funding only this priority, subject to meeting applicable rulemaking requirements.

Note: This notice of proposed priority does not solicit applications. A notice inviting applications under this competition will be published in the **Federal Register** concurrent with or following the notice of final priority.

Description of the Rehabilitation Engineering Research Center Program

RERCs carry out research or demonstration activities by: (1) developing and disseminating innovative methods of applying advanced technology, scientific achievement, and psychological and social knowledge to (a) solve rehabilitation problems and remove environmental barriers, and (b) study new or emerging technologies, products, or environments; (2) demonstrating and disseminating (a) innovative models for the delivery of cost-effective rehabilitation technology services to rural and urban areas, and (b) other scientific research to assist in meeting the employment and independent living needs of individuals with severe disabilities; or (3) facilitating service delivery systems change through (a) the development, evaluation, and dissemination of consumer-responsive and individual and family centered innovative models for the delivery to both rural and urban areas of innovative cost-effective rehabilitation technology services, and (b) other scientific research to assist in meeting the employment and independent needs of individuals with severe disabilities.

Each RERC must provide training opportunities to individuals, including individuals with disabilities, to become researchers of rehabilitation technology and practitioners of rehabilitation technology in conjunction with institutions of higher education and nonprofit organizations.

General: The Secretary proposes that the following requirements apply to this RERC pursuant to this absolute priority unless noted otherwise:

The RERC must have the capability to design, build, and test prototype devices and assist in the transfer of successful solutions to the marketplace. The RERC must evaluate the efficacy and safety of its new products, instrumentation, or assistive devices.

The RERC must provide graduate-level research training to build capacity for engineering research in the rehabilitation field and to provide training in the applications of new technology to service providers and to individuals with disabilities and their families.

The RERC must develop all training materials in formats that will be accessible to individuals with various types of disabilities and communication modes, and widely disseminate findings and products to individuals with disabilities and their families and representatives, service providers, manufacturers and distributors, and other appropriate target populations.

The RERC must involve individuals with disabilities and, if appropriate, their family members in planning and implementing the research, development, and training programs, in interpreting and disseminating the research findings, and in evaluating the Center.

The RERC must share information and data, and, as appropriate, collaborate on research and training with other NIDRR-supported grantees including, but not limited to, the Americans with Disabilities Act (ADA) Disability and Business Technical Assistance Centers and other related RERCs and RRTCs. The RERC must work closely with the RERC on Technology Evaluation and Transfer at the State University of New York at Buffalo.

Priority: Under 34 CFR 75.105(c)(3) the Secretary proposes to give an absolute preference to applications that meet the following priority. The Secretary proposes to fund under this competition only applications that meet this absolute priority.

Proposed Priority: Assistive Technology for Older Persons With Disabilities

In 1991–1992, of 30.68 million persons who were 65 years old and over, 16.54 million or 53.9 percent had a disability. Of those 16.54 million with a disability, 15.21 million persons had a "functional limitation" performing activities such as seeing, hearing, reaching, or walking (J. McNeil, Americans with Disabilities: 1991–1992, Household Economic Studies, P70–33, December 1993). The prevalence of medical, neurological and orthopedic impairments increases with the age of the population. It is estimated that over half of all Americans over seventy years of age have one or more disabilities (McNeil, 1993). Also, as a result of improved life-long health care and expanded employment and educational opportunities, increased numbers of persons with severe disabilities will become part of our elderly population and experience new or changed assistive technology needs.

While assistive technology has been used in rehabilitation to help reduce the adverse effects of disability, it is only beginning to be used effectively to address problems in geriatric rehabilitation. An RERC on assistive technology for older persons with disabilities will address the application of technology to meet the special needs of older persons with disabilities and their caregivers.

Many devices or techniques aimed at ameliorating specific disabilities are designed to augment or take advantage of compensatory abilities. However, multiple and gradual changes related to aging may leave older persons without one or more areas of strength with which to compensate for other functional losses. For example, an older person requiring a wheelchair, because of gradual loss of muscle mass, may not have, or may not be able to develop, the requisite arm strength to use grab bars to assist them in transferring in and out of their wheelchair.

Efforts to develop and disseminate technological aids to older persons with functional limitations must be conducted in the context of using effective information dissemination strategies to reach older persons. It is also necessary to deliver effective training in the use and maintenance of the technology that is prescribed. It is particularly important to make information on assistive technology for older persons with disabilities available in relation to the major activities of work, personal and health care, and leisure.

Assistive technology can address the physical stress that is problematic for caregivers of older persons with disabilities. Many of these caregivers are spouses who are elderly themselves. Premature admission to institutional care is commonly caused by a crisis of the caregiver rather than by a sudden deterioration in the health or abilities of the older persons with a disability. Typically, the caregiver becomes injured or sick and finds it impossible to continue to do the lifting and other demanding physical tasks. Assistive technology that can assist the caregiver can have a major impact on eliminating the need or delaying the time for institutional placement of an older person with a disability.

Proposed Priority

The Secretary proposes to establish an RERC on assistive technology for older persons with disabilities for the purposes of: (1) Identifying the needs for assistive technology by older persons with disabilities; (2) developing design modifications to existing assistive technology devices and disseminating these modifications to developers of assistive technology; (3) developing and evaluating unique assistive technology devices that otherwise will not be developed by the field; (4) identifying the problems of assistive technology service delivery utilization, including maintenance, and developing and testing service delivery models to address those problems; and (5) developing and delivering training and technical assistance to rehabilitation service providers, providers of general services to older persons, and consumers, on sources and uses of assistive technology for older persons with disabilities and caregivers.

In addition to activities proposed by the applicant to carry out these purposes, the RERC shall:

- Develop and implement an information dissemination initiative to address utilization problems, including targeting disability and elderly organizations as well as assistive technology service providers;
- Coordinate and share information with NIDRR-funded RRTCs on Rehabilitation and Aging, and with programs funded under the Technology-Related Assistance for Individuals with Disabilities Act of 1988; and
- Establish a collaborative relationship with the RERC on Technology Evaluation and Transfer and the RERC on Accessible Housing and Universal Design.

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding this proposed priority. All comments submitted in response to this notice will be available for public inspection, during and after the comment period, in Room 3424, Switzer Building, 330 C Street SW., Washington, DC, between the hours of 9:00 a.m. and 4:30 p.m., Monday through Friday of each week except Federal holidays.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. RP96–136–002]

Algonquin Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

March 19, 1996.

Take notice that on March 15, 1996, Algonquin Gas Transmission Company (Algonquin), filed revised tariff sheets in compliance with the February 29, 1996, Order accepting certain tariff sheets and rejecting other tariff sheets concerning Algonquin's proposed lateral line policy. The following tariff sheets have been revised:

Fourth Revised Volume No. 1

Sub Third Revised Sheet No. 105
Sub Second Revised Sheet No. 106
Sub Third Revised Sheet No. 120
Sub First Revised Sheet No. 121
Sub Third Revised Sheet No. 140
Sub Third Revised Sheet No. 157
Sub First Revised Sheet No. 174
Sub First Revised Sheet No. 175
Third Revised Sheet No. 654
Sub Second Revised Sheet No. 701
Sub Original Sheet No. 713
Eighth Revised Sheet No. 1100
Tenth Revised Sheet No. 1101
Eighth Revised Sheet No. 1102
Eighth Revised Sheet No. 1103
Eighth Revised Sheet No. 1104
Ninth Revised Sheet No. 1105
Eighth Revised Sheet No. 1106
Eighth Revised Sheet No. 1107
Eighth Revised Sheet No. 1108
Seventh Revised Sheet No. 1109

Algonquin states that the purpose of this filing is to conform to the Commission's updated Regulations set forth in the Order No. 582 (Final Rule) pertaining to the form and composition of an interstate pipeline company's tariff. Algonquin respectfully requests that these tariff sheets be accepted effective April 15, 1996.

Algonquin states that copies of this tariff filing were mailed to all firm customers of Algonquin and interested state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[Docket No. FR 96–841–000]

Blandin Paper Company; Notice of Filing

March 19, 1996.

Take notice that on March 14, 1996 and March 15, 1996 Blandin Paper Company tendered for filing additional information to its January 16, 1996 filing in the above-referenced docket.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before March 29, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

BILLING CODE 6717–01–M

[Docket No. RP96–165–001]

Columbia Gas Transmission Corporation; Notice of Proposed Changes in FERC Gas Tariff

March 19, 1996.

Take notice that on March 14, 1996, Columbia Gas Transmission Corporation (Columbia) tendered the filing as part of its FERC Gas Tariff, Second Revised Volume No. 1, the following tariff sheets to become effective April 1, 1996.

Sub 3rd Sub Eleventh Rev Sheet No. 26
Sub 3rd Sub Eleventh Rev Sheet No. 27
Sub 3rd Sub Twelfth Rev Sheet No. 28

On March 1, 1996, Columbia filed with the Commission revised rates for its annual Transportation Costs Rate Adjustment (TCRA) to be effective April 1, 1996. It has since come to Columbia's attention that certain rates set forth on its tariff sheets are incorrect due to inadvertent clerical errors. Those tariff sheets must be withdrawn and replaced. Therefore, the instant filing is being made to correct certain errors. The calculation of the rates as set forth in the March 1, 1996 filing is correct and is not being revised herein. Certain of the rates were simply not brought to the tariff sheets correctly.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, Dockets Room, 888 First Street NE., Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

Secretary.

[FR Doc. 96–7087 Filed 3–22–96; 8:45 am]

BILLING CODE 6717–01–M

Equitrans, L.P.; Notice of Proposed Changes in FERC Gas Tariff

March 19, 1996.

Take notice that on March 15, 1996, Equitrans, L.P. (Equitrans) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following proposed tariff sheets, with a proposed effective date of March 1, 1996:

Substitute Second Revised Sheet No. 200
Substitute First Revised Sheet No. 250
Original Sheet No. 268
Sheet Nos. 269–299

Equitrans states that on January 23, 1996 it filed revised tariff sheets, proposing to: (1) correct certain minor errors in its existing Tariff; (2) make tariff modification required to comport with changes in Commission regulations; and (3) incorporate tariff changes which are advisable based on Equitrans' experience in a restructured environment. By unpublished letter Order dated February 29, 1996 the Commission accepted the tariff sheets for filing effective March 1, 1996. The Commission noted that Equitrans had neglected to include tariff provisions setting forth its policy on the construction of new facilities, and further that one of the filed tariff sheets contained an incorrect Section reference. The Commission required Equitrans to file revised tariff sheets to address these issues within 15 days.

Equitrans states that it is making this filing in compliance with the Commission's Order. Equitrans has revised Sheet No. 250 to incorporate the correct section reference and has provided a new Section 34 to its general terms setting forth its policy on the construction of new facilities.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 96–7081 Filed 3–22–95; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. OR96–11–000]

Express Pipeline Partnership; Notice of Petition for Declaratory Order and Request for Waiver

March 19, 1996.

Take notice that on March 8, 1996, Express Pipeline Partnership (Express), pursuant to Rules 207(a)(2) and 212 of the Commission's Rules of Practice and Procedure, 18 CFR 387.207(a) and 212, filed a request for declaratory order and certain waivers of the Commission's regulations.

Express states that it is a general partnership formed by affiliates of Alberta Energy Company Ltd. (AEC) and TransCanada Pipelines Limited (TransCanada), proposing to construct and operate a new, 515 mile, 24 inch diameter, common carrier crude oil pipeline to transport Western Canadian crude in interstate commerce from the U.S./Canadian international border near Wild Horse, Alberta through Montana to Casper, Wyoming. The U.S. pipeline will interconnect at the International Border with the Canadian pipeline (also owned by affiliates of AEC and TransCanada) which will originate at Hardisty, Alberta and run to the border. Express also states that it has acquired control of Platte Pipe Line Company, which extends from Bryon, Wyoming, through Casper to Wood River, Illinois, thus ensuring transportation service to Guernsey, Wyoming, and Wood River.

Express states that its proposed new pipeline is a competitive response to meet the needs of U.S. crude oil markets and that a key component of the project is the ability to provide superior transportation service at rates that are competitive with other pipelines. In order to proceed with the project, Express required a reasonable level of up front support from prospective shippers in the form of contractual commitments from transportation service. Express conducted an open season and received commitments from prospective shippers for 5, 10, and 15 year terms representing approximately 85 percent of the initial system capacity of 172,000 BPD. Express proposes to establish progressively lower rates for each class of term shippers in proportion to the length of the contractual commitment. Express is also proposing to offer service to the class of shippers that did not make contractual commitments, at a specified initial rate. Express also proposed specific surcharges for heavy and medium grades of crude oil and an agreed-to-adjustment mechanism for term shipper rates. Express claims that the proposed rates and waivers requested are lawful under the Interstate Commerce Act and relevant Commission regulations.

Express requests that the Commission issue a declaratory order confirming the lawfulness of its proposal, and that it issue any appropriate waivers of the Commission's regulations.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, D.C. 20426, in accordance with Section 385.214 [18 CFR 385.214] and Section 385.211 [18 CFR 385.211] of the Commission's Rules and Regulations. All such motions or protests should be filed on or before April 8, 1996. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection in the public reference room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP96–41–001]

Kern River Gas Transmission Company; Notice of Proposed Changes in FERC Gas Tariff

March 19, 1996.

Take notice that on March 14, 1996, Kern River Gas Transmission Company (Kern River) tendered for filing as part of its FERC Gas Tariff, First Revised Volume No. 1, the following tariff sheets:

Second Revised Sheet No. 436
Second Revised Sheet No. 437

Kern River requests waiver of the 30-day notice requirement in Section 154.207 and proposes a March 15, 1996, effective date. Kern River states that good cause exists to support waiver because these sheets are submitted only to reflect a change of address Kern River's administrative offices from Houston, Texas to Salt Lake City, Utah, and to reflect that change in the choice of law provision of the Form of License Agreement from Texas to Utah for Kern River's RAPIDS II electronic bulletin board service. Kern River also states that it is reserving the right to move these tariff sheets into effect after the effective date so that it can place all the RAPIDS II tariff sheets into effect upon completion of the RAPIDS II test program.

Kern River also requests, to the extent necessary, waiver of 18 CFR 154.205 governing changes to suspended tariff sheets. Kern River states that waiver may be unnecessary because these revised tariff sheets propose to replace tariff sheets that were accepted and suspended by the Commission in a December 28, 1995, order, but the suspension period terminated on March 1, 1996.

Kern River states that copies of the filing were served upon Kern River's jurisdictional customers and all affected state commissions.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, D.C. 20426, in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.211). All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. All protests filed with the Commission will be considered in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Docket No. RP95–442–001]

Northwest Pipeline Corporation; Notice of Compliance Filing

March 19, 1996.

Take notice that on March 14, 1996, Northwest Pipeline Corporation (Northwest) tendered for filing as part of its FERC Gas Tariff, Third Revised Volume No. 1, the following tariff sheets, to become effective April 1, 1996:

Substitute First Revised Sheet No. 204
Substitute First Revised Sheet No. 205
Original Sheet No. 205–A

Northwest states that the purpose of this filing is to submit revised tariff sheets to comply with the Commission's directives in its Order Following Technical Conference issued March 4, 1996 in Docket No. RP95–442–000. The Commission found the December 15, 1995 modifications to Northwest's gas quality specification revisions to be acceptable, subject to Northwest specifying that it will notify receipt point operators by both telephone and electronic bulletin board when a remedy will be required to alleviate a gas quality problem.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

[Docket No. RP96–132–001]

Southern Natural Gas Company; Notice of Proposed Changes to FERC Gas Tariff

March 19, 1996.

Take notice that on March 14, 1996, Southern Natural Gas Company (Southern) tendered for filing as part of its FERC Gas Tariff, Seventh Revised Volume No. 1, the following tariff sheet become effective March 1, 1996:

First Substitute Original Sheet No. 141a

Southern states that the purpose of this filing is to clarify the determination of high and low prices under the cashout mechanism of its imbalance resolution procedures. Under the new cashout mechanism, the high and low prices are defined as the highest and lowest prices, respectively, of those prices (a monthly index price and weekly average prices) used to calculate the monthly index price. Southern has requested that this sheet be made effective as of March 1, 1996.

Southern states that copies of the filing will be served upon its shippers and interested state commissions.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rule 211 of the Commission's Rules of Practice and Procedure (18 CFR Section 385.211). All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

[FR Doc. 96–7080 Filed 3–22–96; 8:45 am]

BILLING CODE 6717–01–M

[Docket No. RP95–206–004]

Tennessee Gas Pipeline Company; Notice of Proposed Changes in FERC Gas Tariff

March 19, 1996.

Take notice that on March 14, 1996, Tennessee Gas Pipeline Company (Tennessee) tendered for filing as part of its FERC Gas Tariff, Fifth Revised Volume No. 1, the following tariff sheets, to become effective on April 13, 1996.

First Revised Sheet No. 156
Second Revised Sheet No. 304
Third Revised Sheet No. 337
Second Revised Sheet No. 350
Second Revised Sheet No. 351
First Revised Sheet No. 351A
First Revised Sheet No. 618
First Revised Sheet No. 619
First Revised Sheet No. 620
Second Revised Sheet No. 621
First Revised Sheet No. 621A

Tennessee states that it is filing the proposed changes to eliminate its current Umbrella Service because its Supply Aggregation (SA) service, which was implemented for all shippers as of January 1, 1996 in Docket No. RP95–206, provides all of the services heretofore provided by the Umbrella Service. Thus, Tennessee states that the Umbrella Service is duplicative of SA Service and is no longer necessary.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed as provided in Section 154.210 of the Commission's Regulations. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Lois D. Cashell,

Secretary.

BILLING CODE 6717–01–M

[Project No. 1951–037]

Georgia Power Company; Notice of Availability of Final Environmental Assessment

March 19, 1996.

By letter to the Commission dated November 19, 1993, Georgia Power Company proposed to prepare and file an environmental assessment with their license application for the Sinclair Hydroelectric Project, as provided for by the Energy Policy Act of 1992.

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR Part 380 (Order No. 486, 52 FR 47897), the Office of Hydropower Licensing has reviewed the applicant prepared environmental assessment and application for major license for the existing Sinclair Hydroelectric Project, located on the Oconee River, Baldwin County, Georgia, and has prepared a Final Environmental Assessment (FEA) for the project. In the FEA, the Commission's staff has analyzed the potential environmental impacts of the existing project and has concluded that approval of the project, with appropriate mitigation measures, would not constitute a major federal action significantly affecting the quality of the human environment.

Copies of the FEA are available for review in the Public Reference Branch, Room 2–A, of the Commission's offices at 888 First Street NE., Washington, DC 20426.

Lois D. Cashell,

Secretary.

[FR Doc. 96–7085 Filed 3–22–96; 8:45 am]

BILLING CODE 6717–01–M

Notice of Amendment of License

March 20, 1996.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. Type of Application: Amendment of license.

b. Project No: 2365–011.

c. Date Filed: March 6, 1996.

d. Applicant: Madison Paper Industries.

e. Name of Project: Anson.

f. Location: On the Kennebec River, in the Towns of Anson and Madison, Somerset County, Maine.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Michael Kurman, Esq., Arent, Fox, Kintner, Plotkin & Kahn, 1050 Connecticut Avenue NW., Washington, DC 20036–5339, Tel: (202) 857–6345.

I. FERC Contact: Mohamad Fayyad, (202) 219–2665.

j. Comment Date: April 22, 1996.

k. Description of Amendment: Licensee proposes to reconfigure the permanent crest of the dam, raising the elevation from 241.67 feet to 242.62 feet (except for a 50-foot section which will be lowered to 242.62 feet) in order to install an inflatable flashboard system. The inflatable flashboard system would replace the existing wooden flashboards and would increase the normal headpond elevation by 1.5 feet. The change in headpond elevation would extend the upstream limit of the impoundment about 2,000 feet further up the Kennebec River and 400 feet up the Carrabassett River, and will increase the impoundment's surface area by about 80 acres.

1. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", or "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

Lois D. Cashell,

Secretary.

[FRL–5446–5]

Notice of Renewal of the Environmental Financial Advisory Board (EFAB)

The Environmental Protection Agency's (EPA) Environmental Financial Advisory Board (EFAB) has been renewed for a two-year period, as a necessary committee which is in the public interest, in accordance with the provisions of the Federal Advisory

Committee Act (FACA). The purpose of EFAB is provided authoritative analysis and advice to the EPA Administrator regarding environmental finance issues to assist EPA in carrying out its environmental mandates. EFAB will strive to increase the total investment in environmental protection by facilitating greater leverage of public and private environmental resources to help ease the environmental financing challenge facing our nation.

Dated: March 22, 1996.

George F. Ames,

Acting Director, Resource Management Division.

BILLING CODE 6560–50–M

FEDERAL COMMUNICATIONS COMMISSION

Notice of Public Information Collections Submitted to OMB for Review and Approval

March 18, 1996.

SUMMARY: The Federal Communications, as part of its continuing effort to reduce paperwork burden invites the general public and other Federal agencies to take this opportunity to comment on the following proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104–13. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Comments are requested concerning (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commissions burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

DATES: Written comments should be submitted on or before April 24, 1996. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all comments to Dorothy Conway, Federal Communications, Room 234, 1919 M St., N.W., Washington, DC 20554 or via internet to dconwayfcc.gov and Timothy Fain, OM Desk Officer, 10236 NEOB 725 17th Street, N.W., Washington, DC 20503 or fain—t@al.eop.gov.

FOR FURTHER INFORMATION CONTACT:

For additional information or copies of the information collections contact Dorothy Conway at 202–418–0217 or via internet at dconway@fcc.gov.

SUPPLEMENTARY INFORMATION:

OMB Approval No.: 3060–0444.

Title: 220 and 800 MHZ Construction Letter.

Form No.: 800A.

Type of Review: Revision of currently approved collection.

Respondents: Business or other-for-profit; individuals or households.

Number of Respondents: 11,500.

Estimated Time Per Response: 1 hour.

Total Annual Burden: 11,500 hours.

Total Annualized Cost per respondent: There are no start up or operational and maintenance costs associated with this collection.

Needs and Uses: The commission requests this collection of information as a method for licensees to provide information to verify a station has been placed into operation and to notify the Commission of the actual number of mobile units placed in operation after license grant. From this data, the Commission is able to determine full capacity channel loading, making frequencies available for assignment and modifying or cancelling licenses. The data collected ensures licensees are not authorized for more mobiles than they are actually using. The data collected is required by the Communications Act and FCC Rules 90.155, 90.313, 90.495, 90.496, 90.631, 90.633, 90.651, 90.725 and 90.737. The entities identified in the current 800A letter, such as trunked, convention, etc., have been re-named as CMRS and PMRS. The current 800A letter requests a breakdown in the types of mobiles and control stations, while the proposed 800A letter asks for a total number of mobiles and the number of parties affiliated with, controlled by, or related to the provider. The number of responses and estimated burden remains unchanged.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

[FR Doc. 96–7100 Filed 3–22–96; 8:45 am]

BILLING CODE 6712–01–M

Public Information Collection Approved by Office of Management and Budget

March 19, 1996.

The Federal Communications Commission (FCC) has received Office of Management and Budget (OMB) approval for the following public information collection pursuant to the Paperwork Reduction Act of 1995, Pub. L. 96–511. An agency may not conduct or sponsor a collection of information unless it displays a currently valid control number. Not withstanding any other provisions of law, no person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act (PRA) that does not display a valid control number. Questions concerning the OMB control numbers and expiration dates should be directed to Dorothy Conway, Federal Communications Commission, (202) 418–0217.

Federal Communications Commission

OMB Control No.: 3060–0520.

Expiration Date: 2/28/99.

Title: Section 90.127(e) Submission and Filing of Applications.

Estimated Annual Burden: 9,100 hours annual burden; average 5 minutes per respondent; 109,200 respondents.

Description: Section 90.127(e) requires licensees to report the number of mobiles and pagers when a license is modified or renewed. This information is used for frequency coordination and licensing.

OMB Control No.: 3060–0693.

Expiration Date: 5/31/96.

Title: Amendment of Part 90 of the Commission's Rules to Provide for the Use of 220–222 MHz Band by the Private Land Mobile Radio Service.

Estimated Annual Burden: 1,900 total annual hours; average 3.8 hours per respondent; 500 respondents.

Description: The information is used by the Commission to verify licensee compliance with the Commission rules and regulations and to ensure the integrity of the 220 MHz service and to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934. This is a certification that will accompany the form 600 which notifies the Commission that an applicant has reached the decision to relocate and will be filing FCC Form 600 on or before May 1, 1996.

OMB Control No.: 3060–0110.

Expiration Date: 5/31/96.

Title: Application for Renewal of License for AM, FM, TV, Translator or LPTV Station. FCC Form 303–S.

Estimated Annual Burden: 6,230 total annual hours; average 1.3 hours per respondent; 4,658 respondents.

Description: FCC From 303–S is used in applying for renewal of license for a commercial or noncommercial AM, FM or TV broadcast station and FM translator, TV translator or low power TV broadcast station. It can also be used in seeking joint renewal of licenses for FM or TV translator station and its co-owned primary FM, TV or LPTV station. The Telecommunications Act of 1996 requires that renewal applicants submit an exhibit summarizing the written comments and suggestions received from the public that "comment on applicant's programming, if any, and that are characterized by the commentor as constituting violent programming."

OMB Control No.: 3060–0623.

Expiration Date: 2/28/99.

Title: Application for Mobile Radio Service Authorization for Rural Radiotelephone Service Authorization FCC Form 600.

Estimated Annual Burden: 779,076 total annual hours; average 4 hours per respondent; 194,769 respondents.

Description: FCC Form 600 is filed by applicants applying for new or modified authorization to provide service in commercial private, or fixed services. The data is used to determine eligibility, for rulemaking proceedings, and enforcement purposes. The OMB collection was revised to include additional applicants.

OMB Control No.: 3060–0174.

Expiration Date: 3/31/99.

Title: Section 73.1212 Sponsorship identification; list retention; related requirements.

Estimated Annual Burden: 45,376 total annual hours; average 1.3 hours per respondent; 34,026 respondents.

Description: Section 73.1212 requires a broadcast station to identify the sponsors of any matter for which consideration is provided. For matters advertising commercial products or services, generally the mention of the name of the product or service constitutes sponsorship identification. In addition, when an entity rather than an individual sponsors the broadcast of a matter that is of a political or controversial nature, the licensee is required to retain a list of the executive officers, or board of directors, or executive committee, etc., of the organization payng for such matter. Sponsorship announcements are waved with respect to the broadcast of "want ads" sponsored by an individual but the licensee shall maintain a list showing the name, address and telephone number of each such advertiser. These lists shall be made available for public inspection. The data is used by the public so that they may know by whom they are being persuaded.

Federal Communications Commission.

William F. Caton,

Acting Secretary.

[FR Doc. 96–7101 Filed 3–22–96; 8:45 am]

BILLING CODE 6712–01–P

FEDERAL MARITIME COMMISSION

Notice of Agreement(s) Filed

The Federal Maritime Commission hereby gives notice of the filing of the following agreement(s) pursuant to section 5 of the Shipping Act of 1984.

Interested parties may inspect and obtain a copy of each agreement at the Washington, DC Office of the Federal Maritime Commission, 800 North Capitol Street NW., 9th Floor. Interested parties may submit comments on each agreement to the Secretary, Federal Maritime Commission, Washington, DC 20573, within 10 days after the date of the **Federal Register** in which this notice appears. The requirements for comments are found in section 572.603 of Title 46 of the Code of Federal Regulations. Interested persons should consult this section before communicating with the Commission regarding a pending agreement.

Agreement No.: 203–011389–001.

Title: Caribbean Maritime Services Agreement

Parties:

Tropical Shipping & Construction Co., Ltd.

Compagnie Generale Maritime, S.A.

Synopsis: The proposed amendment permits the parties to (1) add Caribbean General Maritime, Ltd. as a party; (2) change the name of the Agreement from Caribbean Maritime Services Agreement to Caribbean Feeder Services Agreement; (3) change the name of Compagnie General Maritime, S.A. to CGM–Sud, S.A.; and (4) expand the scope of the Agreement to include Puerto Rico, the Caribbean, Central America and the North Coast of South America (French Guiana, Suriname, Guyana, Venezuela and Colombia). It also provides for the addition of certain vessels to be operated in the U.S. trades to Trinidad, Jamaica and Barbados.

Dated: March 20, 1996.

By Order of the Federal Maritime Commission.

Ronald D. Murphy,

Assistant Secretary.

BILLING CODE 6730–01–M

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. Once the application has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act, including whether the acquisition of the nonbanking company can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal. Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 19, 1996.

A. Federal Reserve Bank of Boston (Robert M. Brady, Vice President) 600 Atlantic Avenue, Boston, Massachusetts 02106:

1. *CFX Corporation*, Keene, New Hampshire; to acquire 100 percent of

the voting shares of The Safety Fund Corporation, Fitchburg, Massachusetts, and thereby indirectly acquire Safety Fund National Bank, Fitchburg, Massachusetts.

B. Federal Reserve Bank of Richmond (Lloyd W. Bostian, Jr., Senior Vice President) 701 East Byrd Street, Richmond, Virginia 23261:

1. Macon Bancorp, Franklin, North Carolina; to become a bank holding company by acquiring 100 percent of the voting shares of Macon Savings Bank, SSB, Franklin, North Carolina.

Board of Governors of the Federal Reserve System, March 19, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

[FR Doc. 96–7053 Filed 3–22–96; 8:45 am]

BILLING CODE 6210–01–F

Notice of Proposals to Engage in Permissible Nonbanking Activities or to Acquire Companies that are Engaged in Permissible Nonbanking Activities

The companies listed in this notice have given notice under section 4 of the Bank Holding Company Act (12 U.S.C. 1843) (BHC Act) and Regulation Y, (12 CFR part 225) to engage *de novo*, or to acquire or control voting securities or assets of a company that engages either directly or through a subsidiary or other company, in a nonbanking activity that is listed in § 225.25 of Regulation Y (12 CFR 225.25) or that the Board has determined by Order to be closely related to banking and permissible for bank holding companies. Unless otherwise noted, these activities will be conducted throughout the United States.

Each notice is available for inspection at the Federal Reserve Bank indicated. Once the notice has been accepted for processing, it will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the question whether the proposal complies with the standards of section 4 of the BHC Act, including whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices" (12 U.S.C. 1843). Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

Unless otherwise noted, comments regarding the applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than April 9, 1996.

A. Federal Reserve Bank of St. Louis (Randall C. Sumner, Vice President) 411 Locust Street, St. Louis, Missouri 63166:

1. Boatmen's Bancshares, Inc., St. Louis, Missouri; to engage *de novo* through its proposed subsidiary, BIS, Inc., Des Moines, Iowa, in insurance agency activities, which include the sales and servicing of personal lines (including but not limited to home, auto, health and general liability insurance), commercial lines of insurance, life insurance, health insurance and various bonding products, pursuant to § 225.23(b)(8)(iv) of the Board's Regulation Y. These activities will be conducted throughout Iowa, in each of the states surrounding Iowa, and in any other state in which insurance agency activities were conducted by the Marengo Agency, Des Moines, Iowa (a subsidiary of Boatmen's Bank Iowa, N.A., Des Moines, Iowa), on May 1, 1982.

Board of Governors of the Federal Reserve System, March 19, 1996.

Jennifer J. Johnson,

Deputy Secretary of the Board.

BILLING CODE 6210–01–F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[INFO–96–13]

Proposed Data Collections Submitted for Public Comment and Recommendations

In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 for opportunity for public comment on proposed data collection projects, the Centers for Disease Control and Prevention (CDC) will publish periodic summaries of proposed projects. To request more information on the proposed projects or to obtain a copy of the data collection plans and instruments, call the CDC Reports Clearance Officer on (404) 639–7090.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques for other forms of information technology. Send comments to Wilma Johnson, CDC Reports Clearance Officer, 1600 Clifton Road, MS–D24, Atlanta, GA 30333. Written comments should be received within 60 days of this notice.

Proposed Projects

1. The HIV Epidemic in Small Cities and Rural Areas of the South—New—The HIV epidemic is increasingly spreading to small cities and rural areas of the South where little is known about the epidemic. Unlike other regions in the U.S., AIDS in the future is likely to be particularly severe in the South because STDs remain at epidemic levels in women and minorities in southern rural areas. Because funding is based on place of residence at diagnosis and because many patients with AIDS live in large metroplitan areas at diagnosis and then move to smaller cities and rural areas, resources may not be adequate for these patients after moving.

HIV-infected persons living in small cities and rural areas of the South will be interviewed to learn more about the circumstances of how they became infected and to determine what HIV-related health care services and prevention messages have been available to them before and after they became infected. Specific objectives include to: (1) Describe the demographics and modes of HIV transmission, (2) describe and compare high risk behaviors before and after being aware of their HIV infection, (3) determine in HIV-infected persons with a history of a sexually transmitted disease, the HIV/STD prevention services and messages that were offered when they were diagnosed with an STD at the visited health care sites, (4) determine the reasons for being HIV tested and the site and location of the HIV counseling and testing when the person first became HIV-positive and to describe the content of the counseling, (5) describe and compare HIV-related barriers to health care that HIV-infected persons have experienced in small MSAs and rural areas, (6) describe and compare characteristics of persons who acquired HIV infection in the area of current residence versus those who acquired HIV before moving to their current residence, and (7) describe and compare the extent of and reasons for this migration in HIV-infected persons currently living in small cities and rural areas of the South. The total cost to respondents is estimated at $7,000.

Respondents	No. of respondents	No. of responses/respondent	Average burden/response (in hrs.)	Total burden (in hrs.)
HIV-infected adults receiving HIV care	700	.....	1	700
Total	.....	.....	.....	700

Dated: March 19, 1996.

Wilma G. Johnson,

Acting Associate Director for Policy Planning and Evaluation, Centers for Disease Control and Prevention (CDC).

BILLING CODE 4163–18–P

Food and Drug Administration

[Docket No. 96F–0092]

Asahi Denka Kogyo K.K.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Asahi Denka Kogyo K.K. has filed a petition proposing that the food additive regulations be amended to provide for the expanded safe use of phosphorous acid, cyclic neopentanetetrayl bis(2,6-di-*tert*-butyl-4-methylphenyl)ester as an antioxidant and/or stabilizer at a level not to exceed 0.05 percent by weight in olefin copolymers intended for use in contact with food.

DATES: Written comments on petitioner's environmental assessment by April 24, 1996.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Vir D. Anand, Center for Food Safety and Applied Nutrition (HFS–216), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3081.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a food additive petition (FAP 6B4498) has been filed by Asahi Denka Kogyo K.K., 2–13 Shirahata 5–Chome, Urawa City, Saitama 336, Japan. The petition proposes to amend the food additive regulations in § 178.2010 *Antioxidants and/or stabilizers in polymers* (21 CFR 178.2010) to expand the safe use of phosphorous acid, cyclic neopentanetetrayl bis(2,6-di-*tert*-butyl-4-methylphenyl)ester for use as an antioxidant and/or stabilizer at levels not to exceed 0.05 percent by weight of olefin polymers complying with 21 CFR 177.1520 intended for use in contact with food.

The potential environmental impact of this action is being reviewed. To encourage public participation consistent with regulations promulgated under the National Environmental Policy Act (40 CFR 1501.4(b)), the agency is placing the environmental assessment submitted with the petition that is the subject of this notice on display at the Dockets Management Branch (address above) for public review and comment. Interested persons may, on or before April 24, 1996, submit to the Dockets Management Branch (address above) written comments. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. FDA will also place on public display any amendments to, or comments on, the petitioner's environmental assessment without further announcement in the **Federal Register**. If, based on its review, the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: March 7, 1996.

Alan M. Rulis,

Director, Office of Premarket Approval, Center for Food Safety and Applied Nutrition.

BILLING CODE 4160–01–F

[Docket No. 96D–0065]

"Medical Device Design Control Guidance" and "Do It By Design;" Draft Guidance; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of two draft guidance documents entitled, "Medical Device Design Control Guidance" and "Do It By Design." The "Medical Device Design Control Guidance" draft document is intended to provide a general understanding of design control theory, principles, and methods, and to update a previous guidance document on the subject of preproduction quality assurance. The "Do It By Design" draft guidance document is intended to provide a general understanding of the human factors theory as it relates to designing a medical device. Both draft guidance documents, once finalized, are intended to be basic educational tools for industry and FDA field investigators, and they will be used to aid implementation of the new "quality system regulation," now in the final stages of development.

DATES: Written comments by April 30, 1996.

ADDRESSES: Submit written requests for single copies of the draft guidances to the Division of Small Manufacturers Assistance (DSMA), Center for Devices and Radiological Health (HFZ–220) Food and Drug Administration, 1350 Piccard Dr., Rockville, MD 20850. Send two self-addressed adhesive labels to assist the office in processing your request. Copies of a facsimile of the draft guidances are available from CDRH Facts on Demand (1–800–899–0381). Copies of the draft guidances may also be obtained from the Electronic Docket administered by DSMA and are available to anyone with a video terminal or personal computer (1–800–252–1366).

Submit written comments to the Dockets Management Branch (HFA–

305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857. Comments for the two draft guidance documents should be kept separate and identified by their respective titles. Requests and comments should be identified with the docket number found in brackets in the heading of this document. A copy of the draft guidances and received comments are available for public examination in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Kimberly A. Trautman, Office of Compliance, Center for Devices and Radiological Health (HFZ–341), Food and Drug Administration, 2098 Gaither Rd., Rockville, MD 20850, 301–594–4648.

SUPPLEMENTARY INFORMATION:

I. Background

The Safe Medical Devices Act of 1990 (the SMDA) (Pub. L. 101–629), enacted on November 28, 1990, amended section 520(f) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360j (f)), providing FDA with the authority to add preproduction design controls to the current good manufacturing practice (CGMP) regulation part 820 (21 CFR part 820). This change in law was based on findings that a significant proportion of device recalls were attributed to faulty product design. FDA found that approximately 44 percent of the quality problems that led to voluntary recall actions during a 6-year period were attributed to errors or deficiencies that had been designed into particular devices and that may have been prevented by adequate design controls. These design-related defects involved both noncritical devices (e.g., patient chair lifts, in vitro diagnostics, and administration sets) and critical devices (e.g., pacemakers and ventilators). Also in 1990, the Department of Health and Human Services' Inspector General conducted a study which reached similar conclusions.

FDA undertook the revision of the CGMP regulation to add the design controls authorized by the SMDA to the CGMP regulation and because the agency believed that it would be beneficial to the public and the medical device industry for the CGMP regulation to be consistent, to the extent possible, with the requirements for quality systems contained in international standards. The agency's extensive efforts to revise the CGMP regulation included making publicly available a working draft of a final rule in July 1995, followed by a public workshop on August 23, 1995 (see 60 FR 37856, July 24, 1995), and an open public GMP Advisory Committee meeting on September 13 and 14, 1995 (see 60 FR 44037, August 24, 1995). The final regulation, generally referred to as the quality system regulation, is now in the final stages of development.

The "Medical Device Design Control Guidance" and "Do It By Design" draft guidance documents are intended to provide assistance in understanding what design controls are and provide recommendations on how to establish design controls, which would be consistent with the new design control requirements. The draft guidance "Medical Device Design Control Guidance" updates the Center for Devices and Radiological Health's "Preproduction Quality Assurance Planning: Recommendations for Medical Device Manufacturers," announced as a final document in the **Federal Register** of October 5, 1989 (54 FR 41165). The draft guidance documents are projected to be finalized later this year, soon after the new quality system regulation is published.

II. Significance of a Guidance

A guidance document does not bind FDA or the public, and does not create or confer any rights, privileges, or benefits for or on any person; however, it does represent the agency's current thinking on the subjects discussed therein. The draft guidance documents announced in this notice represent the agency's tentative thinking on design controls and the relationship of human factors with design controls.

III. Request for Comments

Interested persons may, on or before April 30, 1996, submit to the Dockets Management Branch (address above) written comments regarding the draft guidances. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified by the title of the respective draft guidance and with the docket number found in brackets in the heading of this document. The two draft guidance documents and received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday.

Received comments will be considered in revising the draft guidance documents.

Dated: March 15, 1996.

Joseph A. Levitt,

Deputy Director for Regulations Policy, Center for Devices and Radiological Health.

[FR Doc. 96–7047 Filed 3–22–96; 8:45 am]

BILLING CODE 4160–01–F

Health Resources and Services Administration

Special Project Grants and Cooperative Agreements; Maternal and Child Health Services; Federal Set-Aside Program; Comprehensive Hemophilia Centers, Genetic Services, and Maternal and Child Health Improvement Projects

AGENCY: Health Resources and Services Administration (HRSA), PHS.

ACTION: Notice of availability of funds.

SUMMARY: The HRSA announces that applications will be accepted for fiscal year (FY) 1996 funds for grants and cooperative agreements for the following activities: Maternal and Child Health (MCH) Special Projects of Regional and National Significance (SPRANS), including comprehensive hemophilia diagnostic and treatment centers; genetic disease testing, counseling and information services; and special MCH improvement projects (MCHIP) which contribute to the health of mothers, children, and children with special health care needs (CSHCN). All awards will be made under the program authority of section 502(a) of the Social Security Act, the MCH Federal Set-Aside Program. A revised regulation implementing the Federal Set-Aside Program (42 CFR part 51a) was published in the July 19, 1994, issue of the **Federal Register** at 59 FR 36703. Within the HRSA, SPRANS grants are administered by the Maternal and Child Health Bureau (MCHB). Awards are made for grant periods which generally run from 1 up to 5 years in duration. Grants for SPRANS research and training are being announced in a separate notice.

This program announcement is subject to the appropriation of funds. Applicants are advised that this program announcement is a contingency action being taken to assure that should funds become available for this purpose, they can be awarded in a timely fashion consistent with the needs of the program as well as to provide for even distribution of funds throughout the fiscal year. At this time, given a continuing resolution and the absence of FY 1996 appropriations for the MCH Federal Set-Aside Program, the amount of available funding for this specific grant program cannot be estimated.

The Public Health Service (PHS) is committed to achieving the health promotion and disease prevention objectives of Healthy People 2000, a PHS-led national activity for setting priority areas. The MCH Block Grant Federal Set-Aside Program addresses issues related to the Healthy People 2000 objectives of improving maternal, infant, child and adolescent health and developing service systems for children with special health care needs. Potential applicants may obtain a copy of Healthy People 2000 (Full Report: Stock No. 017–001–00474–0) or Healthy People 2000 (Summary Report: Stock No. 017–001–00473–1) through the Superintendent of Documents, Government Printing Office Washington, DC 20402–9325 (telephone: 202 783–3238).

The PHS strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of all tobacco products. In addition, Public Law 103–227, the Pro-Children Act of 1994, prohibits smoking in certain facilities (or in some cases, any portion of a facility) in which regular or routine education, library, day care, health care or early childhood development services are provided to children.

ADDRESSES: Grant applications for MCH SPRANS hemophilia, genetics, and MCHIP grants must be obtained from and submitted to: Chief, Grants Management Branch, Office of Operations and Management, Maternal and Child Health Bureau, Health Resources and Services Administration, Room 18–12, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–1440. Applicants will use revised PHS form #5161–1, approved by the Office of Management and Budget (OMB) under control number 0937–0189. You must obtain application materials in the mail. Written requests should specify the category or categories of activities for which an application is requested so that the appropriate materials may be provided.

Federal Register notices and application guidance for MCHB programs are available on the World Wide Web via the Internet at address: http://www.os.dhhs.gov/hrsa/mchb. Click on the file name you want to download to your computer. It will be saved as a self-extracting (Macintosh or) Wordperfect 5.1 file. To decompress the file once it is downloaded, type in the file name followed by a <return>. The file will expand to a Wordperfect 5.1 file. If you have difficulty accessing the MCHB Home Page via the Internet and need technical assistance, please contact Linda L. Schneider at 301–443–0767 or "lschneider@hrsa.ssw.dhhs.gov".

DATES: Potential applicants are invited to request application packages for the specific program category in which they are interested, and to submit their applications for funding consideration. Deadlines for receipt of applications differ for the several categories of grants. These deadlines may be found in Section 5, below, for each category covered by this notice.

Applications will be considered to have met the deadline if they are either: (1) Received on or before the deadline date, or (2) postmarked on or before the deadline date and received in time for orderly processing. Applicants should request a legibly dated receipt from a commercial carrier or the U.S. Postal Service, or obtain a legibly dated U.S. Postal Service postmark. Private metered postmarks will not be accepted as proof of timely mailing. Late applications or those sent to an address other than specified in the **ADDRESS** section will be returned to the applicant.

FOR FURTHER INFORMATION CONTACT: Requests for technical or programmatic information should be directed to the contact persons identified below for each category covered by this notice. Requests for information concerning business management issues should be directed to: Acting Grants Management Officer (GMO), MCHB, at the address specified in the **ADDRESS** section.

SUPPLEMENTARY INFORMATION: To facilitate the use of this announcement, information in this section has been organized, as outlined in the Table of Contents below, into a discussion of: Program Background, Special Concerns, Evaluation Protocol, Project Review and Funding, SPRANS Project Grants, Public Comment, Eligible Applicants, and Public Health System Reporting Requirements. In addition, for each research and training funding category or subcategory, information is presented under the following headings:

- Application Deadline.
- Purpose.
- Priorities.
- Special Eligibility Considerations.
- Project Period.
- Contact.

   5.2.3. Fetal/Infant Mortality Review Program Support Center
   5.2.4. Partnership for Adolescent Health
6. Public Comment
7. Eligible Applicants
8. Public Health System Reporting Requirements
9. Executive Order 12372

1. Program Background and Objectives

Under Section 502 of the Social Security Act, as amended by the Omnibus Budget Reconciliation Act (OBRA) of 1989, 12.75 percent of amounts appropriated for the MCH Block Grant in excess of $600 million are set aside by the Secretary of Health and Human Services (HHS) for special Community Integrated Service Systems projects under Section 501(a)(3) of the Act. Of the remainder of the total appropriation, 15 percent of the funds are to be retained by the Secretary to support (through grants, contracts, or otherwise) special projects of regional and national significance, research, and training with respect to maternal and child health and children with special health care needs (including early intervention training and services development); for genetic disease testing, counseling, and information development and dissemination programs; for grants (including funding for comprehensive hemophilia diagnostic treatment centers) relating to hemophilia without regard to age; and for the screening of newborns for sickle cell anemia, and other genetic disorders and follow-up services. The MCH SPRANS set-aside was established in 1981. Support for projects covered by this announcement will come from the SPRANS set-aside. Applications for FY 1996 funds for MCH research and training grants are being solicited separately from other SPRANS grants this year in order to reduce confusion to potential applicants from

announcement of grants in very large numbers of SPRANS categories and subcategories.

2. Special Concerns

In its administration of the MCH Services Block Grant, the MCHB places special emphasis on improving service delivery to women and children from racial and ethnic minority populations who have had limited access to accessible care. This means that SPRANS projects are expected to serve and appropriately involve in project activities individuals from the populations to be served, unless there are compelling programmatic or other justifications for not doing so. The MCHB's intent is to ensure that project interventions are responsive to the cultural and linguistic needs of special populations, that services are accessible to consumers, and that the broadest possible representation of culturally distinct and historically underrepresented groups is supported through programs and projects sponsored by the MCHB. This same special emphasis applies to improving service delivery to children with special health care needs.

In keeping with the goals of advancing the development of human potential, strengthening the Nation's capacity to provide high quality education by broadening participation in MCHB programs of institutions that may have perspectives uniquely reflecting the Nation's cultural and linguistic diversity, and increasing opportunities for all Americans to participate in and benefit from Federal public health programs, HRSA will place a funding priority on projects from Historically Black Colleges and Universities (HBCU) or Hispanic Serving Institutions (HSI) in all categories and subcategories in this notice for which applications from academic institutions are encouraged. This is in conformity with the Federal Government's policies in support of White House Initiatives on Historically Black Colleges and Universities (Executive Order 12876) and Educational Excellence for Hispanic Americans (Executive Order 12900). An approved proposal from a HBCU or HSI will receive a 0.5 point favorable adjustment of the priority score in a 4 point range before funding decisions are made.

3. Evaluation Protocol

With the exception of SPRANS hemophilia projects—which have an alternative assessment mechanism in place—an MCH discretionary grant project, including a SPRANS, is expected to incorporate a carefully designed and well planned evaluation protocol capable of demonstrating and documenting measurable progress toward achieving the project's stated goals. The protocol should be based on a clear rationale relating the grant activities, the project goals, and the evaluation measures. Wherever possible, the measurements of progress toward goals should focus on health outcome indicators, rather than on intermediate measures such as process or outputs. A project lacking a complete and well-conceived evaluation protocol as part of the planned activities will not be funded.

4. Project Review and Funding

Within the limit of funds determined by the Secretary to be available for the activities described in this announcement, the Secretary will review applications for funds under the specific project categories in section 4, below, as competing applications and may award Federal funding for projects which will, in her judgment, best promote the purpose of title V of the Social Security Act, with special emphasis on improving service delivery to women and children from culturally distinct populations; best address achievement of Healthy Children 2000 objectives related to maternal, infant, child and adolescent health and service systems for children at risk of chronic and disabling conditions; and otherwise best promote improvements in maternal and child health.

4.1 Criteria for Review

The criteria which follow are used, as pertinent, to review and evaluate applications for awards under all SPRANS grants and cooperative agreement project categories announced in this notice. Further guidance in this regard is supplied in application guidance materials, which may specify other criteria.

—The quality of the project plan or methodology.
—The need for the research or training.
—The extent to which the project will contribute to the advancement of maternal and child health and/or improvement of the health of children with special health care needs.
—The extent to which the project is responsive to policy concerns applicable to MCH grants and to program objectives, requirements, priorities and/or review criteria for specific project categories, as published in program announcements or guidance materials.
—The extent to which the estimated cost to the Government of the project is reasonable, considering the anticipated results.
—The extent to which the project personnel are well qualified by training and/or experience for their roles in the project and the applicant organization has adequate facilities and personnel.
—The extent to which, insofar as practicable, the proposed activities, if well executed, are capable of attaining project objectives.
—The strength of the project's plans for evaluation.
—The extent to which the project will be integrated with the administration of the MCH Block Grant, State primary care plans, public health, and prevention programs, and other related programs in the respective State(s).
—The extent to which the application is responsive to the special concerns and program priorities specified in this notice.

4.2 Funding of Approved Applications

Final funding decisions for SPRANS grants are the responsibility of the Director, MCHB. In considering scores for the ranking of approved applications for funding, preferences may be exercised for groups of applications; for example, new projects may be funded ahead of competing continuations, or vice versa. Within any category of approved projects, the score of an individual project may be favorably adjusted, as noted in the notice or in guidance for that category, if the project addresses specific identified priorities. In addition, special consideration in assigning scores may be given by reviewers to individual applications that address areas identified in this notice as special concerns.

5. Special Projects of Regional and National Significance

Three categories of SPRANS grants are discussed below: Comprehensive Hemophilia Diagnostic and Treatment Centers; Genetic Disease Testing, Counseling and Information; and Maternal and Child Health Improvement Projects.

5.1 Grants

Three major categories of SPRANS grants are discussed below: Comprehensive Hemophilia Diagnostic and Treatment Centers; Genetic Disease Testing, Counseling and Information; and Maternal and Child Health Improvement Projects (in 5 sub-categories):

5.1.1. Comprehensive Hemophilia Diagnostic and Treatment Centers

• Application Deadline: June 17, 1996.

• Purpose: To provide comprehensive hemophilia diagnostic and treatment services to individuals with hemophilia and other congenital bleeding disorders through a regional network of approximately 140 comprehensive hemophilia diagnostic and treatment centers and for regional coordination.

• Priorities: The following overall program goals are priorities; to be eligible for consideration, proposals must address all of these:

—Access to comprehensive care for hemophilia and HIV as described in "Standards and Criteria for the Care of Persons with Congenital Bleeding Disorders" as published by the National Hemophilia Foundation (NHF).
—Fostering development of comprehensive care systems that provide culturally sensitive, family-centered care, coordinated through a regional system of hemophilia diagnostic and treatment centers.
—Outreach and increased access to comprehensive care, especially to the underserved and minorities.
—Emphasis on prevention to reduce complications and morbidity associated with hemophilia.
—Provision of services to women with congenital bleeding disorders.
—Collaboration and coordination of services with State Title V Maternal and Child Health programs; Ryan White Titles I, II, and III; community based organizations; State and local health agencies; Ryan White Title IV Pediatric HIV projects funded by the MCHB; and education and peer support activities of the NHF, such as Men's Advocacy Network of NHF (MANN), Women's Outreach Network of NHF (WONN) and Chapter Outreach Development Program (CODP); and with the Centers for Disease Control and Prevention (CDC) regarding the provision of HIV prevention, risk reduction, and counseling services, especially those targeted to adolescents and their sexual partners.
—Evidence of formal patient choice and grievance policies and procedures.

Preference for funding will be given to existing MCHB-supported comprehensive hemophilia diagnostic and treatment centers that have demonstrated high performance in development and coordination of regional services.

• Project Period: The project period is 3 years.

• Contact: For programmatic or technical information, contact Patrick McGuckin, on (301) 443–9051.

5.1.2. Genetic Disease Testing, Counseling and Information

• Application deadline: April 29, 1996.

• Purpose: To support projects that demonstrate increased access to effective genetic information, education, testing, and counseling services.

• Priorities: Applicants are invited to submit proposals to broaden access to genetic services through the following:

—A council of regional networks for genetic services. To coordinate activities and facilitate collaboration of ten regional genetic services networks supported by MCHB, and to address issues of genetic services in public health programs at the national level.
—Four regional genetic services networks. To develop and maintain infrastructures for genetic services in the Midwest/Great Plains, Mid-Atlantic, New England, and Southeast regions of the United States.
—An alliance of genetic support groups. To maintain a national coalition of genetics support groups, consumers, and professionals to improve responsiveness of genetic services to concerns of individuals and families affected by genetic disorders.

Preference for funding will be given to existing MCHB-supported comprehensive genetic projects that have demonstrated high performance in fulfilling the above priorities.

• Project Period: Project periods are up to 3 years.

• Contact: For programmatic or technical information, contact Jane S. Lin-Fu, M.D., telephone 301/443–1080.

5.1.3. Maternal and Child Health Improvement Projects

Maternal and Child Health Improvement Projects (MCHIP) are divided into five subcategories: State Systems Development Initiative; Transition Services in Adolescent Health; Universal Newborn Hearing Screening; Data Utilization and Enhancement; and Healthy Tomorrows Partnerships for Children

5.1.3.1. State Systems Development Initiative.

Application Deadline: July 15, 1996.

Purpose: To assist State Agency Maternal and Child Health and Children with Special Health Care Need programs in the development of a State and community infrastructure that results in comprehensive, community-based systems of care for all children and their families. Projects must: (1) support systems development activities identified in the Title V MCH Block Grant application; (2) collaborate with CISS, Healthy Start, and the Primary Care Cooperative Agreement; (3) collaborate with other system development initiatives, such as, mental health and education; (4) build on systems already in place; (5) and make an effort to sustain systems development activities in the Title V agency.

Priorities: Priority for funding will be given to projects in the following areas:

—Establishing an integrated data management system which meets user needs at the local, State, and national levels and is electronically accessible.
—Supporting community-level planning for establishing priorities, policies, and strategies for systems development.
—Improving collaborative partnerships for integrating health services.
—Initiating collaborative partnerships for integrating health with other services, e.g., education, mental health, and social services.
—Promoting service systems that are family-centered and culturally competent.
—Developing a mechanism for assuring quality performance and utilization of community systems.
—Strengthening the skills, knowledge, and ability of state and community leaders to develop comprehensive community systems of care.

Special Eligibility Considerations Eligibility for funding is limited to the Title V agencies in the 50 States and 9 Jurisdictions.

Project Period: Three years.

Contact: Kay K. Guirl, R.N., M.N., Senior Public Health Analyst, Division of Services for Children with Special Health Needs, 301 443–2350.

5.1.3.2. Transition Services in Adolescent Health.

• Application Deadline: May 15, 1996.

• Purpose: To fund two categories of SPRANS projects which support ongoing efforts to develop comprehensive, culturally competent, community-based, family-centered, coordinated care systems for adolescents with special health care needs and their families. The funds are intended to help these adolescents achieve a successful transition to community-based, comprehensive care and to maximize potential for employment. The MCHB has identified the need for public and private partnerships to improve the coordination of services to assist and

support adolescents with disabilities. These efforts are based, in part, on the work of the Federal SSI/CSHCN Workgroup, a collaborative effort of the MCHB, the Social Security Administration (SSA), and State Title V CSHCN Programs, which has identified barriers faced by adolescents with special health needs; and the National Commission on Childhood Disability, which, in its October, 1995, Report to Congress, identified changes needed in the SSI Program to more effectively promote self sufficiency of SSI child beneficiaries.

Another excellent example of ongoing collaboration, the CHOICES Project is a public/private partnership jointly funded by the MCHB and the Shriners Hospitals. CHOICES has strengthened cooperation between Title V CSNCN programs, Shriners Hospitals, and Vocational Rehabilitation programs and maximized services available to adolescents with disabilities. The MCHB is seeking to build on the past efforts of CHOICES, to strengthen systems of care for adolescents and preadolescents with special health needs and encourage them to grow, develop and make a successful transition to comprehensive care, work and self sufficiency. Utilizing the resources of a broad spectrum of health and social services providers, vocational training and rehabilitation agencies, education and private employers, the initiative will: (1) Identify and increase the understanding of the needs and special problems of adolescents with disabilities in making successful transitions to adult care, to be "healthy and ready to work" and to achieve self sufficiency; (2) foster the development of public and private partnerships and collaborative relationships that will maximize the availability of and access to comprehensive, community-based, coordinated care systems for adolescents with special health needs and their families; and (3) improve the ability of adolescents with disabilities to lead productive lives and maximize financial independence.

• Priorities/Funding Categories: Applications are being accepted for two categories of projects in FY 1996. Applications which do not fall within these program categories will not be considered.

—The Priority 1 funding category will support community-based planning and initial development grants to strengthen community-based systems that help adolescents with disabilities make successful transitions to self sufficiency and work. The emphasis of this category is on support for community level infrastructures of agencies, providers, community organizations, business and families. Projects will focus on needs assessment and local capacity-building, identifying and making maximum use of all available public and private resources for reaching and providing services to the target population. Services to transition adolescents from child-centered to adult-based care are expected to include primary, preventive, and specialty care that also addresses psychosocial needs. Projects must involve targeted adolescents and their families in needs assessment, as well as ongoing project planning and development. Funding will support local capacity building for planning, coordination of services, and care and financing systems development. Collaboration must be evident with key public programs within the community responsible for serving adolescents with special needs and disabilities funded under Title V Maternal and Child Health programs, vocational rehabilitation, education, mental health, social services agencies, and the State's SSI Action Plan.

—The Priority 2 funding category will expand already established regional and/or national efforts to support adolescents in making successful transitions from hospital to ambulatory care, to be "healthy and ready to work" and to achieve independence. Priority 2 projects will have the same general goals as those defined in Priority 1; however Priority 2 applicants must have already completed planning and initial development and have an existing infrastructure to achieve project goals and objectives. This infrastructure must, at a minimum, include selected State Title V CSHCN programs, Shriners Hospitals, and Vocational Rehabilitation programs. Applicants must represent a public/private partnership of Title V and a national hospital network which serves significant numbers of adolescents with disabilities. In addressing the goal of preparing adolescents to make transitions to adult comprehensive care and independent living, the project must involve community resources, including Vocational Rehabilitation, education, and employers in order to identify appropriate work opportunities and assure that adolescents have ongoing comprehensive and coordinated health care coverage.

• Special Eligibility Considerations: In keeping with the September 15, 1995, report of the U.S. Senate Appropriations Committee (S. Rep. 104–145), which urged continued MCHB support for the CHOICES Project, special preference for Priority 2 grants will be given to projects of similar scope and organization.

• Project Period: One to two year awards for Priority 1 projects; one to three years for Priority 2 projects.

• Contact: For programmatic or technical information, contact Beth D. Roy, telephone 301 443–2370. A pre-application conference call will be held on Thursday, April 18, at 2:00 p.m., EST. Persons interested in participating should send a letter of interest, including a brief description of their proposal and any issues they wish to have addressed during the call, by Friday, April 5, to Beth Roy, Room 18A–27, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

5.1.3.3. Universal Newborn Hearing Screening.

• Application Deadline: May 17, 1996.

• Purpose: To promote the establishment of statewide universal newborn hearing screening programs in the United States through a national network which (a) increases awareness of the feasibility of newborn hearing screening, (b) provides technical assistance on program establishment, maintenance, and coordination, and (c) maintains and analyzes data to monitor and evaluate the impact of universal newborn hearing screening programs. This priority responds to the Healthy People 2000 objective (17.16) which calls for the reduction in the average age at which children with significant hearing impairment are identified to no more than 12 months.

• Priorities: Priority for funding will be given to those applications which address the following factors:

—Coordination of screening programs emphasizing linkages between hospital screening programs, pediatricians, audiologists, state agencies, and community services providers.

—Sustainability beyond the grant period emphasizing utilization of local funding to establish and institutionalize programs as part of the ongoing provision of health care services.

—Ongoing support and technical assistance for emerging programs utilizing valid, cost effective, and feasible strategies and instrumentation for the conduct of universal hearing screening.

—Impact of early screening, emphasizing outcome evaluation which includes both quantitative and qualitative data on identification, intervention, cost, and developmental outcomes for young children.

• Project Period: The project period is four years.

• Contact: For programmatic or technical information, contact Bonnie Strickland, Ph.D., 301/443–1080.

4.1.3.4. Data Utilization and Enhancement.

• Application Deadline: June 17, 1996.

• Purpose: To enhance the use of information and information technologies within State and local MCH/CSHCN agencies and within the MCH community in the development of policies, programs and evaluation of services to improve the health and well being of mothers and all children as outlined in the "MCH Strategy Statement: Data Systems and Enhancement." Activities in this initiative may include:

—Development of retrievable and usable information and model data systems. The systems will be used in the collection, management, and analysis of data to facilitate needs assessment, planning, program implementation, monitoring, and evaluation of the health status of mothers and children and the delivery of comprehensive health care to that population.

—Linkage of and/or improvement of access to information among various service and data systems. These may include administrative, clinical, educational, communities and population information.

—Analysis of economic cost, benefits and effectiveness of services and systems on the well being of the MCH community, particularly the high risk and underserved portions of the population, including a compilation of service cost impacts related to health outcomes, cost benefit analysis of major MCH services, and dissemination of economic information to the MCH community.

Work products may take a variety of forms, such as papers, models, software, information services, stipends, and reports. Work products will be directed to the MCH community, including all mothers and children, and the service and system providers integral to providing them with comprehensive, family centered, culturally competent, community services.

• Priorities: Proposals in this MCHIP subcategory are invited in the following program areas:

—Development of model information systems with data that can be retrieved, integrated, and used by others at national and State levels.

—Enhancement of information collection and analysis capabilities of national, State and local health agencies using the models developed, training, and peer consultation.

—Collection, management, and analysis of data, and development and application of analytic and information management techniques focusing on national MCH issues.

—Networking, coordination, and integration of existing and proposed resources and data information technologies and analysis systems developed by other States or organizations.

—Increasing national, State and local analytical and information system capacity to respond to and implement changes in the organization of health care resources.

—Dissemination of relevant programmatic and population information and developed models to enhance access and utility for the MCH populations.

—Provision of direction and incentives to individuals in carrying out the purpose of this initiative through partnerships with educational institutions and State and local MCH agencies.

—Monitoring and assessing information and information technology requirements parallel to organizational changes in delivery of health care services to all mother and children.

• Grants/Amounts: Up to 3 years, with declining Federal funding and escalating local funding.

• Contact: For programmatic or technical information, contact Russ Scarato, telephone: 301 443–8041.

5.1.3.5. Healthy Tomorrows Partnerships for Children.

• Application Deadline: May 13, 1996.

• Purpose: To support projects for mothers and children that improve access to health services and utilize preventive strategies. The initiative encourages additional support from the private sector and from foundations to form community-based partnerships to coordinate health resources for pregnant women, infants and children.

• Priorities: Proposals in this MCHIP category are invited in the following program areas:

—Local initiatives that are community-based, family-centered, comprehensive and culturally relevant and improve access to health services for infants, children, adolescents, or CSHCN.

—Initiatives which show evidence of a capability to meet cost participation goals by securing funds for the second and sequential years of the project.

• Special Eligibility Considerations: In the interest of equitable geographic distribution, special consideration for funding will be given to projects from States without a currently funded project in this category. These States are cited in the application guidance.

• Project Period: Five years.

• Contact: For programmatic or technical information, contact Latricia Robertson, M.S.N., M.P.H., telephone: 301 443–8041.

5.2. Cooperative Agreements

Cooperative agreements will be awarded in four categories: Maternal and Child Health Providers Partnership; Partnership for Information and Communication; Fetal/Infant Mortality Review Program Support Center; and Partnership for Adolescent Health.

There will be substantial Federal programmatic involvement in these cooperative agreements. This means that after award, awarding office staff provide technical assistance and guidance to, or coordinate and participate in, certain programmatic activities of award recipients beyond their normal stewardship responsibilities in the administration of grants. Federal involvement may include, but is not limited to, planning, guidance, coordination and participation in programmatic activities. Periodic meetings, conferences, and/or communications with the award recipient are held to review mutually agreed upon goals and objectives and to assess progress. Additional details on the scope of Federal programmatic involvement in cooperative agreements, consistent with HRSA grants administration policy, will be included in the application guidance for these cooperative agreements.

5.2.1. Maternal and Child Health Providers Partnership

• Application Deadline: June 1, 1996.

• Purpose: To support activities which improve access and the delivery of maternal and child health services through governmental and professional partnerships. Specifically, the program is designed to promote problem-solving approaches which enhance community and provider participation. This provider partnership will encourage private sector and other support for improved coordination of and access to health resources at the community-level for pregnant women, infants and children.

Any national membership organization able to demonstrate that it represents a group(s) of providers of pediatric services will be considered for funding.

Specific program requirements include:

—Analysis of the obstacles (issues and contributing factors) to provider participation in the delivery of maternal and child health services to low-income pregnant women and children, as well as involvement in problem solving at the community level.

—Development of strategies to improve maternal and child health status and systems through collaboration with the Federal MCHB which promote problem solving at the community level; encourage provider participation; and encourage private sector and other support for improved coordination of and access to health resources at the community level.

—Dissemination and effective communication of concerns and information pertaining to the issues and strategies employed to their members and other national organizations.

• Project Period: Up to 5 years.

• Contact: For programmatic or technical information, contact Latricia Robertson, M.S.N., M.P.H., telephone: 301–443–8041.

5.2.2. Partnership for Information and Communication (PIC)

• Application Deadline: June 15, 1996.

• Purpose: To facilitate dissemination of new maternal and child health-related information to policy and decision makers in a format most useful to them and provide those individuals with a means of communicating issues directly to each other and to MCHB. This is a continuous Bureau activity with a single priority—to enhance communication between the MCHB and governmental, professional and private organizations representing leaders and policy makers concerned with issues related to maternal and child health. Organizations currently receiving support as part of this cooperative agreement represent State governors and their staffs; State Title V programs; State legislators; private business, particularly self-insured businesses; philanthropic organizations; and parent organizations, as well as national membership organizations representing groups or constituencies listed below.

To ensure continuity, membership for the organizations participating in PIC is rotated so that not all project periods coincide. For this year, only national membership organizations representing the following groups will be considered for funding:

—County health policymakers.

—Municipal health policymakers.

• Project Period: Up to 5 years.

• Contact: For programmatic or technical information, contact David Heppel, M.D., telephone: 301–443–2250.

5.2.3. Fetal/Infant Mortality Review Program Support Center

• Application Deadline: June 14, 1996.

• Purpose: To provide technical support to States and communities as they develop and implement community-based fetal/infant mortality review process. Fetal/Infant Mortality Review (F/IMR) is a process that identifies, through use of a community multidisciplinary team, community health care system, economic and social factors that may have contributed to an infant death. These findings are then used by the community to address the identified contributing factors and to promote local program development.

The Center will be responsible for working with the MCHB to promote the F/IMR process, provide assistance in setting up the process, share pertinent information among communities and States, develop refinements and new approaches to the F/IMR process to make it more responsive and efficient, and expand the use of this problem-solving to other mortality and morbidity events impacting the MCH population.

• Project Period: Up to five years.

• Contact: For programmatic or technical information, contact David Heppel, M.D., telephone: 301–443–2250.

5.2.4. Partnership for Adolescent Health

• Application Deadline: June 14, 1996.

Purpose: To collaborate with membership organizations having an historic interest in adolescent health in seeking policy guidance from and providing programmatic information to their memberships. This cooperative agreement stems from Congress's mandate to the Department, in section 1708 of the Public Health Service Act, to create an Office of Adolescent Health (OAH). The functions of the OAH are delegated to the MCHB. Fulfilling the need for a focal point for adolescent health, the OAH is responsible for assisting private and other public organizations to develop a collaborative approach to planning, implementing, monitoring and evaluating national programs to promote, improve and maintain the health status of pre-adolescents and adolescents.

Priorities: For purposes of this competition, only membership organizations representing the following disciplines will be considered for funding:

—Law.

—Social Work.

—Psychology.

—Medicine.

Future competitions will be focused on other professional disciplines.

Project Period: Up to 5 years.

Contact: For programmatic or technical information contact Juanita C. Evans, LCSW, telephone: 301 443–4026.

6. Public Comment

The categories, priorities, special considerations and preferences described above are not being proposed for public comment this year. In July 1993, following publication of the Department's Notice of Proposed Rulemaking to revise the MCH special project grant regulations at 42 CFR part 51a, the public was invited for a 60-day period to submit comments regarding all aspects of the SPRANS application and review process. In responding to those comments, the Department noted the practical limits on Secretarial discretion in establishing SPRANS categories and priorities owing to the extensive prescription in both the statute and annual Congressional directives.

Comments on this SPRANS notice which members of the public wish to make are welcome at any time and may be submitted to: Director, MCHB, at the address listed in the **ADDRESS** section. Suggestions will be considered when priorities are developed for the next solicitation.

7. Eligible Applicants

Any public or private entity, including an Indian tribe or tribal organization (as defined at 25 U.S.C. 450b), is eligible to apply for grants or cooperative agreements for project categories covered in this announcement.

8. Public Health System Reporting Requirements

This program is subject to the Public Health System Reporting Requirements (approved under OMB No. 0937–0195). Under these requirements, the community-based nongovernmental applicant must prepare and submit a Public Health System Impact Statement (PHSIS). The PHSIS is intended to provide information to State and local health officials to keep them apprised of proposed health services grant applications submitted by community-based nongovernmental organizations within their jurisdictions.

Community-based nongovernmental applicants are required to submit the following information to the head of the appropriate State and local health agencies in the area(s) to be impacted no later than the Federal application receipt due date:

(a) A copy of the face page of the application (SF 424).

(b) A summary of the project (PHSIS), not to exceed one page, which provides:

(1) A description of the population to be served.

(2) A summary of the services to be provided.

(3) A description of the coordination planned with the appropriate State and local health agencies.

The project abstract may be used in lieu of the one-page PHSIS, if the applicant is required to submit a PHSIS.

9. Executive Order 12372

The MCH Federal set-aside program has been determined to be a program which is not subject to the provisions of Executive Order 12372 concerning intergovernmental review of Federal programs.

The OMB Catalog of Federal Domestic Assistance number is 93.110.

Dated: March 19, 1996.

Ciro V. Sumaya,

Administrator.

BILLING CODE 4160–15–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Species Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of application.

The following applicant has applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

PRT–812539

Applicant: Dr. Rolf O. Peterson, Michigan Technological University, Houghton, Michigan.

The applicant requests a permit to take (capture, handle and release) gray wolves (*Canis lupus lycaon*) in Isle Royale National Park, Michigan, for the purpose of enhancement of survival of the species through scientific research.

Written data or comments should be submitted to the Regional Director, U.S. Fish and Wildlife Service, Division of Endangered Species, 1 Federal Drive, Fort Snelling, Minnesota 55111–4056, and must be received within 30 days of the date of this publication.

Documents and other information submitted with this application are available for review by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, division of Endangered Species, 1 Federal Drive, Fort Snelling, Minnesota 55111–4056. Telephone: (612/725–3536 x250); FAX: (612/725–3526).

Dated: March 19, 1996.

Mamie A. Parker,

Acting Assistant Regional Director, Ecological Services, Region 3, Fish and Wildlife Service, Fort Snelling, Minnesota.

BILLING CODE 4310–65–M

Endangered and Threatened Species Permit Application

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of receipt of application.

The following applicants have applied for amendments to their permits to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531, *et seq.*).

PRT–809630

Applicant: Dr. Allen Kurta, Eastern Michigan University, Ypsilanti, Michigan.

The applicant requests an amendment to his scientific take permit for Indiana Bats (*Myotis sodalis*) to add Indiana, Ohio, and Illinois to the scope of permitted activities. Take activities are currently authorized in Michigan and include capture, handling, radio-tagging, and release of specimens.

PRT–809227

Applicant: 3D/Environmental, Cincinnati, Ohio, Dr. Virgil Brack, President.

Applicant requests an amendment to their scientific take permit for Indiana Bats (*Myotis sodalis*) and Gray Bats (*Myotis grisescens*) to include the following states within the scope of permitted activities: Alabama, Arkansas, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, and Tennessee.

Written data or comments on either of these amendment requests should be submitted to the Regional Director, U.S. Fish and Wildlife Service, Division of Endangered Species, 1 Federal Drive, Fort Snelling, Minnesota 55111–4056, and must be received within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, Division of Endangered Species, 1 Federal Drive, Fort Snelling, Minnesota 55111–4056. Telephone: (612/725–3536 x250); FAX: (612/725–3526).

Dated: March 19, 1996.

Mamie A. Parker,

Acting Assistant Regional Director, Ecological Services, Region 3, Fish and Wildlife Service, Fort Snelling, Minnesota.

BILLING CODE 4310–55–M

Receipt of Applications for Permit

AGENCY: Fish and Wildlife Service, Interior

ACTION: Notice of Receipt of Applicatior for Permit.

The following applicants have applied for a permit to conduct certain activities with endangered species. This notice is provided pursuant to section 10(c) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*):

PRT–812350

Applicant: Mr. Phillip Sacco, CH2M HILL, Atlanta, Georgia.

The applicant requests a permit to take (capture for presence/absence survey) the endangered Indiana bat, *Myotis sodalis*, and gray bat, *Myotis grisescens*, at a proposed landfill expansion site, Sullivan County, Tennessee for the purpose of enhancement of survival of the species.

PRT–812346

Applicant: Ms. Kimberly M. Elliott, Antioch, Tennessee.

The applicant requests a permit to take (capture, mark, and release) the endangered Nashville crayfish, *Orconectes shoupi*, in Davidson County, Tennessee, for the purpose of enhancement of survival of the species.

PRT-812344

Applicant: Mr. Wendell Pennington, Pennington and Associates, Inc., Cookeville, Tennessee.

The applicant requests a permit to take (capture, relocate from a construction site, and release) the endangered Nashville crayfish, *Orconectes shoupi*, in Davidson County, Tennessee, for the purpose of enhancement of survival of the species.

PRT-812339

Applicant: Mr. Billy J. Grantham, Troy State University, Troy, Alabama.

The applicant requests a permit to take (salvage remains) federally listed threatened and endangered species from throughout the southeast for the purpose of enhancement of survival of the species.

PRT-812348

Applicant: Dr. Ronald L. Mumme, Aiken, South Carolina.

The applicant requests a permit to take (capture and translocate) the threatened Florida scrub jay, *Aphelocoma coerulescens coerulescens*, in Highlands and Collier Counties, Florida for the purpose of enhancement of survival of the species.

PRT-812342

Applicant: Dr. R. Wayne Tyndall, Maryland Natural Heritage Program, Annapolis, Maryland.

The applicant requests a permit to take (collect leaves for isozyme analyses) the threatened seabeach amaranth, *Amaranthus pumilus*, throughout the species range in the southeast for the purpose of enhancement of survival of the species.

Written data or comments on these applications should be submitted to: Regional Permit Coordinator, U.S. Fish and Wildlife Service, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345. All data and comments must be received within 30 days of the date of this publication.

Documents and other information submitted with these applications are available for review, subject to the requirements of the Privacy Act and Freedom of Information Act, by any party who submits a written request for a copy of such documents to the following office within 30 days of the date of publication of this notice: U.S. Fish and Wildlife Service, 1875 Century Boulevard, Suite 200, Atlanta, Georgia 30345 (Attn: David Dell, Permit Biologist). Telephone: 404/679-7313; Fax: 404/679-7081.

Dated: March 18, 1996.

Noreen K. Clough,

Regional Director.

BILLING CODE 4310-55-P

Availability of Draft Recovery Plan

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of document availability and public comment period.

SUMMARY: The U.S. Fish and Wildlife Service announces the availability for public review of a revised draft recovery plan for the wood stork. Wood storks occur in Florida, Georgia and coastal South Carolina. The Service solicits review and comments from the public on this draft plan.

DATES: Comments on the draft recovery plan must be received on or before May 24, 1996 to ensure consideration by the Service.

ADDRESSES: Copies can be obtained by contacting the Acting Field Supervisor, U.S. Fish and Wildlife Service, 6620 Southpoint Drive, South, Suite 310, Jacksonville, Florida 32216 or calling (904) 232-2580. Comments and materials received are available on request for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Linda D. Finger at above address.

SUPPLEMENTARY INFORMATION:

Background

Restoring an endangered or threatened animal or plant to the point where it is again a secure, self-sustaining member of its ecosystem is a primary goal of the U.S. Fish and Wildlife Service's endangered species program. To help guide the recovery effort, the Service prepares recovery plans for most of the listed species native to the United States. Recovery plans describe actions considered necessary for conservation of the species, establish criteria for the recovery levels for reclassifying them from endangered to threatened status or removing them for the list, and estimate the time and cost for implementing the needed recovery measures.

The Endangered Species Act of 1973 (Act), as amended (16 U.S.C. *et seq.*) requires the development of recovery plans for listed species unless such a plan would not promote the conservation of a particular species. Section 4(f) of the Act, as amended in 1988, requires that public notice and an opportunity for public review and comment be provided during recovery plan development. The Service will consider all information presented during a public comment period prior to approval of each new or revised Recovery Plan. The Service and other Federal agencies will take these comments into account in the course of implementing approved recovery plans.

Wood storks are large, white, long-legged wading birds that use a variety of freshwater and estuarine wetlands for nesting feeding and roosting. They are found throughout Florida, Georgia and coastal South Carolina. The Service listed the wood stork as an endangered species on February 28, 1984. Wood storks were listed as endangered because of loss of feeding habitat, human disturbance and man-made changes in water levels that affected the natural drainage patterns of Florida. Since the 1960's, the wood stork population has shown substantial declines in southern Florida, and substantial increases in northern Florida, Georgia and South Carolina. Over the last 12 years, the U.S. population has ranged between 5,500 and 6,500 pairs.

The Service completed the recovery pan for this species in 1986 to identify actions necessary to recover the population. Since that time, many tasks identified in the original plan have been accomplished and more information is now available on the biology and distribution of storks throughout the southeast. This revised recovery plan updates the original information as well as addresses new threats and needs.

Public Comments Solicited

The Service solicits written comments on the Recovery plan described. All comments received by the date specified above will be considered prior to approval of the plan.

Authority

The authority for this action is section 4(f) of the Endangered Species Act, 16 U.S.C. 1533(f).

Dated: March 11, 1996.

Michael M. Bentzien,

Acting Field Supervisor.

Bureau of Land Management

[AK-962-1410-00-P; F-40315]

Alaska Native Claims Selection

In accordance with Departmental regulation 43 CFR 2650.7(d), notice is hereby given that a decision to issue conveyance under the provisions of Sec. 14(h)(8) of the Alaska Native Claims Settlement Act of December 18, 1971, 43 U.S.C. 1601, 1613(h)(8), will be issued to Bering Straits Native Corporation for approximately 40 acres. The lands involved are in the vicinity of Marys Igloo, Alaska, within T. 2 S., R. 30 W., Kateel River Meridian, Alaska.

A notice of the decision will be published once a week, for four (4) consecutive weeks, in the Anchorage Daily News. Copies of the decision may be obtained by contacting the Alaska State Office of the Bureau of Land Management, 222 West Seventh Avenue, #13, Anchorage, Alaska 99513-7599 ((907) 271-5960).

Any party claiming a property interest which is adversely affected by the decision, an agency of the Federal Government or regional corporation, shall have until April 24, 1996 to file an appeal. However, parties receiving service by certified mail shall have 30 days from the date of receipt to file an appeal. Appeals must be filed in the Bureau of Land Management at the address identified above, where the requirements for filing an appeal may be obtained. Parties who do not file an appeal in accordance with the requirements of 43 CFR Part 4, Subpart E, shall be deemed to have waived their rights.

Heather A. Coats,

Land Law Examiner, ANCSA Team, Branch of (962) Adjudication.

BILLING CODE 4310-JA-P

[CA-930-06-1020-00, 4000/1790]

Notice of Intent To Prepare an Environmental Impact Statement for the Development of Standards for Rangeland Health and Guidelines for Grazing Management on Public Lands in California and Northwestern Nevada, and To Amend Land Use Plans Pursuant to the Planning Regulations

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent.

SUMMARY: The Bureau of Land Management (BLM) in California intends to develop a statewide Environmental Impact Statement (EIS) to address Standards for Rangeland Health and Guidelines for Grazing Management as provided in the BLM's new grazing regulations (43 CFR Part 4100) and to amend, as necessary, existing Land Use Plans (LUP) in the State. The EIS is being prepared in compliance with section 102(2)(C) of the National Environmental Policy Act (NEPA). This notice invites public input on the development of the Standards and Guidelines, issues to be addressed, planning criteria, and the alternatives to be considered in the EIS.

DATES: Comments concerning the scope of the EIS and Plan Amendment must be received by April 24, 1996. No public scoping meetings are anticipated. However, other opportunities for public involvement will be provided during the NEPA/Plan Amendment process.

ADDRESSES: Any scoping comments or requests to be placed on the mailing list should be sent to Rangeland Health Coordinator, Bureau of Land Management, 2800 Cottage Way, Sacramento, CA 95825.

FOR FURTHER INFORMATION CONTACT: Jim Morrison at (916) 979-2830.

SUPPLEMENTARY INFORMATION: The BLM's new grazing administration regulations (43 CFR Part 4100), which became effective August 21, 1995, provide for the development of state Standards for Rangeland Health and Guidelines for Grazing Management. A national programmatic EIS was completed by BLM in 1993 in support of the new regulations. This EIS for California and northwestern Nevada will be tiered to the national EIS, and will incorporate applicable information from previously prepared BLM grazing EISs.

These Standards and Guidelines are to be developed through BLM's planning process (43 CFR part 1600), with input from Resource Advisory Councils as well as the public. The analysis will be conducted using an interdisciplinary team of specialists. All existing LUPs for public lands in the California and northwestern Nevada will be examined for conformance with the proposed standards and guidelines. Approval of the standards and guidelines by the Secretary of Interior will also constitute approval of an amendment to the existing LUP's.

Description of Possible Alternatives

At this time two preliminary reasonable alternatives have been identified: (1) the application of fallback Standards and Guidelines contained in the regulations at 43 CFR 4180(f) (1) and (2) the adoption of Standards and Guidelines developed locally and in consultation with California's Resource Advisory Councils and the public. Additional alternatives may be added as a result of scoping or subsequent public or agency input.

Anticipated Issues

Issues anticipated during the NEPA analysis include, but may not be limited to, the following: the effect that adoption of Standards will have on resource conditions, uses, and users of public land, and the effect that adoption of Guidelines will have on livestock operations.

Dated: March 11, 1996.

Ed Hastey,

State Director.

BILLING CODE 4310-84-M

[WY-921-41-5700; WYW131557]

Notice of Proposed Reinstatement of Terminated Oil and Gas Lease

Pursuant to the provisions of 30 U.S.C. 188 (d) and (e), and 43 CFR 3108.2-3 (a) and (b)(1), a petition for reinstatement of oil and gas lease WYW131557 for lands in Carbon County, Wyoming, was timely filed and was accompanied by all the required rentals accruing from the date of termination. The lessee has agreed to the amended lease terms for rentals and royalties at rates of $10.00 per acre, or fraction thereof, per year and 16⅔ percent, respectively.

The lessee has paid the required $500 administrative fee and $125 to reimburse the Department for the cost of this **Federal Register** notice. The lessee has met all the requirements for reinstatement of the lease as set out in Section 31 (d) and (e) of the Mineral Lands Leasing Act of 1920 (30 U.S.C. 188), and the Bureau of Land Management is proposing to reinstate lease WYW131557 effective May 1, 1994, subject to the original terms and conditions of the lease and the increased rental and royalty rates cited above.

Pamela J. Lewis,

Chief, Leasable Minerals Section.

BILLING CODE 4310-22-M

[ID-943-1430-01; IDI-07135]

Public Land Order Revocation of Public Land Order No. 6010; Idaho

AGENCY: Bureau of Land Management, Interior.

ACTION: Public Land Order.

SUMMARY: This order revokes in its entirety a public land order which withdrew 3.50 acres of public land for the Bureau of Land Management—s Idaho Falls Administrative Site. The

land is no longer needed for this purpose, and the revocation is needed to permit disposal of the land to the State of Idaho through exchange. This action will open the land to surface entry and mining. The land has been and will remain open to mineral leasing.

EFFECTIVE DATE: April 24, 1996.

FOR FURTHER INFORMATION CONTACT: Larry R. Lievsay, BLM Idaho State Office, 3380 Americana Terrace, Boise, Idaho 83706–2500, 208–384–3166.

By virtue of the authority vested in the Secretary of the Interior by Section 204 of the Federal Land Policy and Management Act of 1976, 43 U.S.C. 1714 (1988), it is ordered as follows:

1. Public Land Order No. 6010, which withdrew the following described public land for the Bureau of Land Management's Idaho Falls Administrative Site, is hereby revoked in its entirety:

Boise Meridian

T. 2 N., R. 38 E.,
Sec. 8, that part of the S½SE¼ described as follows:
Beginning at a point from which the South Quarter Corner of said Section 8 bears South, 41.5 ft. and West, 897 ft.;
Thence E. 224 ft. along the Utah-Idaho Sugar Company right-of-way;
N. 28° 17′ E., 617 ft. along the Idaho Irrigation District West right-of-way canal;
S. 69° 08′ W., 566.7 ft.;
S. 2° 12′ E., 341.7 ft. to the point of beginning.

The area described contains 3.50 acres in Bonneville County.

2. At 9 a.m. on April 24, 1996, the land described above will be opened to the operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. All valid applications received at or prior to 9 a.m. on April 24, 1996, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in order of filing.

3. At 9 a.m. on April 24, 1996, the land will be opened to location and entry under the United States mining laws, subject to valid existing rights, the provisions of existing withdrawals, other segregations of record, and the requirements of applicable law. Appropriation of any of the land described in this order under the general mining laws prior to the date and time of restoration is unauthorized. Any such attempted appropriation, including attempted adverse possession under 30 U.S.C. 38 (1988), shall vest no rights against the United States. Acts required to establish a location and initiate a right of possession are governed by State law where not in conflict with Federal law. The Bureau of Land Management will not intervene in disputes between rival locators over possessory rights since Congress has provided for such determinations in local courts.

Dated: March 13, 1996.

Bob Armstrong,

Assistant Secretary of the Interior.

Lease of Public Land; Tonsina Lake, AK

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: This notice of realty action involves a proposal for a 20 year renewable commercial lease to Jeff Chadd, Majestic Mountain Alaskan Adventures. The lease is intended to authorize the construction, maintenance, and operation of commercial recreational facilities related to guiding and outfitting activities on public.

DATES: Comments and an application must be received on or before May 9, 1996.

ADDRESSES: Comments and an application must be submitted to the Glennallen District Management Team, P.O. Box 147, Glennallen, Alaska 99588–0147.

FOR FURTHER INFORMATION CONTACT: David Mushovic, (907) 822–3217.

SUPPLEMENTARY INFORMATION: The site examined and found suitable for leasing under the provisions of Sec. 302 of the Federal Land Policy and Management Act of 1976, and 43 CFR 2920, is described as within:

Sec. 23, T. 4S., R. 2 W., Copper River Meridian.

An application will only be accepted from Jeff Chadd, who owns Majestic Mountain Alaskan Adventures. The comments and application must include a reference to this notice. Fair market rental as determined by appraisal will be collected for the use of these lands, and reasonable administrative and monitoring costs for processing the lease. A final determination will be made after completion of an environmental assessment.

Dated: March 18, 1996.

David Mushovic,

Realty Specialist.

BILLING CODE 4310–JA–M

Minerals Management Service

Outer Continental Shelf, Central Gulf of Mexico; Notice of Leasing Systems, Sale 157

Section 8(a)(8) (43 U.S.C. 13378(a)(8)) of the Outer Continental Shelf Lands Act (OCSLA) requires that, at least 30 days before any lease sale, a Notice be submitted to the Congress and published in the **Federal Register**:

1. identifying the bidding systems to be used and the reasons for such use; and

2. designating the tracts to be offered under each bidding system and the reasons for such designation.

This Notice is published pursuant to these requirements.

1. *Bidding systems to be used.* In the Outer Continental Shelf (OCS) Sale 157, blocks will be offered under the following four bidding systems as authorized by section 8(a)(1) (43 U.S.C. 1337(a)(1)), as amended: (a) Bonus bidding with a fixed 16⅔-percent royalty on all unleased blocks in less than 200 meters of water; (b) bonus bidding with a fixed 16⅔-percent royalty on all unleased blocks in 200 and 400 meters of water with a royalty suspension volume of up to 17.5 million barrels of oil equivalent; (c) bonus bidding with a fixed 12½-percent royalty on all unleased blocks in 400 to 800 meters of water with a royalty suspension volume of up to 52.5 million barrels of oil equivalent; and (d) bonus bidding with a fixed 12½-percent royalty on all unleashed blocks in water depths of 800 meters or more with a royalty suspension volume of up to 87.5 million barrels of oil equivalent.

For bidding systems (b), (c), and (d), the royalty suspension volumes apply on a one per field basis. The royalty suspension allocation rules are described in the Interim Rule (30 CFR Part 260) addressing royalty relief for new leases that will be published in the **Federal Register** in late March 1996.

a. *Bonus Bidding with a 16⅔-percent Royalty.* This system is authorized by section (8)(a)(1)(A) of the OCSLA. This system has been used extensively since the passage of the OCSLA in 1953 and imposes greater risks on the lessee than systems with higher contingency payments but may yield more rewards if a commercial field is discovered. The relatively high front-end bonus payments may encourage rapid exploration.

b. *Bonus Bidding with a 16⅔-Percent Royalty and a Royalty Suspension Volume (17.5 million barrels of oil equivalent).* This system is authorized by section (8)(a)(1)(H) of the OCSLA, as amended. This system complies with Sec. 304 of the Outer Continental Shelf Deep Water Royalty Relief Act (DWRRA). An incentive for development and production in water depths of 200 to 400 meters is provided through allocating royalty suspension volumes of 17.5 million barrels of oil equivalent to eligible fields.

c. *Bonus Bidding with a 12½-Percent Royalty and a Royalty Suspension Volume (52.5 million barrels of oil equivalent).* This system is authorized by section (8)(a)(1)(H) of the OCSLA, as amended. It has been chosen for blocks in water depths of 400 to 800 meters proposed for the Central Gulf of Mexico (Sale 157) to comply with Sec. 304 of the DWRRA. The 12½-percent royalty rate is used in deeper water because these blocks are expected to require substantially higher exploration, development, and production costs, as well as longer times before initial production, in comparison to shallow-water blocks. The use of a royalty suspension volume of 52.5 million barrels of oil equivalent for eligible fields provides an incentive for development and production appropriate for this water depth category.

d. *Bonus Bidding with a 12½-percent Royalty and a Royalty Suspension Volume (87.5 million barrels of oil equivalent).* This system is authorized by section (8)(a)(1)(H) of the OCSLA, as amended. It has been chosen for blocks in water depths of 800 meters or more proposed for the Central Gulf of Mexico (Sale 157) to comply with Sec. 304 of the DWRRA. The use of a royalty suspension volume of 87.5 million barrels of oil equivalent for eligible fields provides an incentive for development and production appropriate for these deep water depths.

2. *Designation of Blocks.* The selection of blocks to be offered under the four systems was based on the following factors:

a. Royalty rates on adjacent, previously leased tracts were considered to enhance orderly development of each field.

b. Blocks in deep water were selected for the 12½-percent royalty system based on the favorable performance of this system in these high-cost areas in past sales.

c. The royalty suspension volumes were based on the water depth specific volumes mandated by the DWRRA.

The specific blocks to be offered under each system are shown on the "Stipulations, Lease Terms, and Bidding Systems" and "Royalty Suspension Areas for the Central Gulf of Mexico" maps for Central Gulf of Mexico Lease Sale 157. These maps are available from the Public Information Unit, Minerals Managements Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394.

Dated: March 18, 1996.

Cynthia Quarterman,

Director, Minerals Management Service.

Approved:

Bob Amstrong,

Assistant Secretary, Land and Minerals Management.

BILLING CODE 4310–MR–M

Outer Continental Shelf, Central Gulf of Mexico, Oil and Gas Lease Sale 157—Final

1. Authority

This Notice is published pursuant to the Outer Continental Shelf (OSC) Lands Act (43 U.S.C. 1331–1356, (1988)), and the regulations issued thereunder (30 CFR Part 256).

2. Filing of Bids

(a) Sealed bids will be received by the Regional Director (RD), Gulf of Mexico Region, Minerals Management Service (MMS), 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394. Bids may be delivered in person to that address during normal business hours (8 a.m. to 4 p.m., Central Standard Time (c.s.t.)) until the Bid Submission Deadline at 10 a.m. Tuesday, April 23, 1996. Hereinafter, all times cited in this Notice refer to c.s.t. unless otherwise stated. Bids received by the RD later than the submission deadlines specified above will be returned unopened to the bidders. Bids may not be modified or withdrawn unless written modification or written withdrawal request is received by the RD prior to the Bid Submission Deadline specified above. Bid Opening Time will be 9 a.m., Wednesday, April 24, 1996, at the Hyatt Regency Hotel, 500 Poydras Plaza, New Orleans, Louisiana. All bids must be submitted and will be considered in accordance with applicable regulations, including 30 CFR Part 256. The list of restricted joint bidders which applies to this sale appeared in the **Federal Register** on October 16, 1995, at 60 FR 53642.

(b) In the event a natural disaster (such as widespread flooding) or other occurrence causes the MMS Gulf of Mexico Regional Office to be closed on Tuesday, April 23, 1996, bids will be accepted until 9 a.m. Wednesday, April 24, 1996, at the site of bid opening specified above. Under these conditions, bids may be modified or withdrawn upon written notification up until 9 a.m. Wednesday, April 24, 1996. Closure of the office may be determined by calling (504) 736–0557 and hearing a recorded message to that effect.

3. Method of Bidding

(a) *Submission of Bids.* A separate signed bid in a sealed envelope labeled "Sealed Bid for Oil and Gas Lease Sale 157, not to be opened until 9 a.m., c.s.t., Wednesday, April 24, 1996" must be submitted for each tract bid upon. The sealed envelope and the bid should contain the following information: the company name, Gulf of Mexico Company Name (GOM Company Number), area number and/or name (abbreviations acceptable), and the block number of the tract bid upon. In addition, the total amount bid to be considered by MMS must be in whole dollar amount. Any cent amount above the whole dollar will be ignored by MMS.

Bidders must submit with each bid ⅕th of the cash bonus, in cash or by cashier's check, bank draft, or certified check, payable to the order of the U.S. Department of the Interior—Minerals Management Service. For identification purposes, the following information must appear on the check or draft: company name, GOM Company Number, and the area and block bid on (abbreviation acceptable). No bid for less than all of the unleased portion(s) of a block will be considered.

All documents must be executed in conformance with signatory authorizations on file in the Gulf of Mexico regional office. Partnerships also need to submit or have on file a list of signatories authorized to bind the partnership. Bidders submitting joint bids must state on the bid form the proportionate interest of each participating bidder, in percent to a maximum of five decimal places, e.g., 33.33333 percent. Other documents may be required of bidders under 30 CFR 256.46. Bidders are warned against violation of 18 U.S.C. 1860 prohibiting unlawful combination or intimidation of bidders.

(b) *Submission of Statement(s) Regarding Certain Geophysical Data.* Each company submitting a bid, or participating as a joint bidder in such a bid, shall submit, prior to the Bid

Submission Deadline specified in paragraph 2 of this Notice, a statement or statements identifying any processed or reprocessed pre and post stack depth migrated geophysical data in their possession or control pertaining to each and every block on which they are participating as a bidder. The existence, extent, type of such data, and identification of specific lines or 3D surveys must be clearly stated. In addition, the statement shall certify that no such data are in their possession for any other blocks on which they participate as a bidder. The statement shall be submitted in an envelope separate from those containing bids and shall be clearly marked; an example of a preferred format for the statement and the envelope is included in the document titled "Trial Procedures for Access to Certain Geophysical Data in the Gulf of Mexico." Only one statement per bidder is required for each sale, but more than one may be submitted if desired, provided that all tracts bid on by that company are covered in the one or more statements.

Paragraph 14(1), *Information to Lessees*, contains additional information pertaining to this requirement.

4. Bidding, Yearly Rental, and Royalty Systems

The following bidding, yearly rental, and royalty systems apply to this sale:

(a) *Bidding Systems.* All bids submitted at this sale must provide for a cash bonus in the amount of $25.00 or more per acre or fraction thereof.

(b) *Yearly Rental.* All leases awarded on tracts in water depths of 200 meters and greater as depicted on the map "Royalty Suspension Areas For The Central Gulf Of Mexico" provided with this Notice (i.e., tracts in any of the three royalty suspension areas) will provide for a yearly rental payment of $7.50 per acre or fraction thereof until initial production is obtained.

All leases awarded on other tracts (i.e., those in water depths of less than 200 meters) will provide for a yearly rental payment of $5 per acre or fraction thereof until initial production is obtained.

(c) *Royalty Systems.* After initial production is obtained, leases will provide for a minimum royalty of the amount per acre or fraction thereof as specified as the yearly rental in paragraph 4(b) above, except during periods of royalty suspension as discussed in paragraph 4(c)(3) of this Notice. The following royalty systems will be used in this sale:

(1) *Leases with a 12½-Percent Royalty.* This royalty rate applies to tracts in water depths of 400 meters or greater; this area is shown on the Stipulations, Lease Terms, and Bidding Systems Map applicable to this Notice (see paragraph 13). Leases issued on the tracts offered in this area will have a fixed royalty rate of 12½ percent, except during periods of royalty suspension (see paragraph 4(c)(3) of this Notice).

(2) *Leases with a 16⅔-Percent Royalty.* This royalty rate applies to tracts in water depths of less than 400 meters (see aforementioned map). Leases issued on the tracts offered in this area will have a fixed royalty rate of 16⅔ percent, except during periods of royalty suspension for leases in water depths 200 meters or greater (see paragraph 4(c)(3) of this Notice).

(3) *Royalty Suspension.* In accordance with Public Law 104–58, signed by the President on November 28, 1995, MMS has developed procedures providing for the suspension of royalty payments on production from eligible leases issued as a result of this sale. MMS will allow only one royalty suspension volume per field regardless of the number of eligible leases producing the field. For purposes of this paragraph, an eligible lease is one that: is located in the Gulf of Mexico in water depths 200 meters or deeper; lies wholly west of 87 degrees, 30 minutes West longitude; and is offered subject to a royalty suspension volume authorized by statute.

An eligible lease from this sale may receive a royalty suspension volume only if it is in a field where no currently active lease produced oil or gas (other than test production) before November 28, 1995. The following applies only to eligible leases in fields meeting this condition.

(i) The royalty suspension volumes are:

—17.5 million barrels of oil equivalent (mmboe) in 200 to 400 meters of water;

—52.5 mmboe in 400 to 800 meters of water; and

—87.5 mmboe in 800 meters of water and greater.

A map titled "Royalty Suspension Areas For The Central Gulf Of Mexico" (March 1996) depicting blocks in which such suspensions may apply is currently available from the MMS GOM Regional Office (see paragraph 14(a) of this Notice).

(ii) When production first occurs from any of the eligible leases in a field (not including test production), MMS will determine the royalty suspension volume applicable to eligible lease(s) in that field. The determination is based on the royalty suspension volumes and the map specified in paragraph 4(c)(3)(i) above.

(iii) If a new field consists of eligible leases in different water depth categories, the royalty suspension volume associated with the deepest eligible lease applies.

(iv) If an eligible lease is the only eligible lease in a field, royalty is not owed on the production from the lease up to the amount of the applicable royalty suspension volume.

(v) If a field consists of more than one eligible lease, payment of royalties on the eligible leases' initial production is suspended until their cumulative production equals the field's established royalty suspension volume. The royalty suspension volume for each eligible lease is equal to each lease's actual production (or production allocated under an approved unit agreement) until the field's established royalty suspension volume is reached.

(vi) If an eligible lease is added to a field that has an established royalty suspension volume, the field's royalty suspension volume will not change even if the added lease is in deeper water. The additional lease may receive a royalty suspension volume only to the extent of its production before the cumulative production from all eligible leases in the field equals the field's previously established royalty suspension volume.

(vii) If MMS reassigns a well on an eligible lease to another field, the past production from that well will count toward the royalty suspension volume, if any, specified for the new field to which it is assigned. The past production will not be counted toward the suspension volume, if any, from the first field.

(viii) An eligible lease may receive a royalty suspension volume only if the entire lease is west of 87 degrees, 30 minutes West longitude. A field that lies on both sides of this meridian will receive a royalty suspension volume only for those eligible leases lying entirely west of the meridian.

(ix) An eligible lease may obtain more than one royalty suspension volume. If a new field is discovered on an eligible lease that already benefits from the royalty suspension volume for another field, production from that new field receives a separate royalty suspension.

(x) A lessee must measure natural gas production subject to the royalty suspension volume as follows: 5.62 thousand cubic feet of natural gas equals one barrel of oil equivalent, as measured fully saturated at 15.025 psi, 60 degrees F.

(xi) In any year during which the arithmetic average of the closing prices on the New York Mercantile Exchange for light sweet crude oil exceeds $28.00 per barrel, royalties on the production of oil must be paid at the lease stipulated royalty rate (see paragraphs 4(c)(1) and (2) above), and production during such years counts toward the royalty suspension volume.

In any year during which the arithmetic average of the closing prices on the New York Mercantile Exchange for natural gas exceeds $3.50 per million British thermal units, royalties on the production of natural gas must be paid at the lease stipulated royalty rate (see paragraphs 4(c)(1) and (2) above), and production during such years counts toward the royalty suspension volume.

These prices for oil and natural gas are as of the end of 1994 and must be adjusted for subsequent years by the percentage by which the implicit price deflator for the gross domestic product changed during the preceding calendar year.

(xii) A royalty suspension will continue until the end of the month in which the cumulative production from eligible leases in the field reaches the royalty suspension volume for the field.

Paragraph 14(n), *Information to Lessees*, contains additional information pertaining to royalty suspension matters.

5. Equal Opportunity

The certification required by 41 CFR 60–1.7(b) and Executive Order No. 11246 of September 24, 1965, as amended by Executive Order No. 11375 of October 13, 1967, on the Compliance Report Certification Form, Form MMS–2033 (June 1985), and the Affirmative Action Representation Form, Form MMS–2032 (June 1985) must be on file in the Gulf of Mexico regional office prior to lease award (see paragraph 14(e)).

6. Bid Opening

Bid opening will begin at the bid opening time stated in paragraph 2. The opening of the bids is for the sole purpose of publicly announcing bids received, and no bids will be accepted or rejected at that time.

7. Deposit of Payment

Any cash, cashier's checks, certified checks, or bank drafts submitted with a bid may be deposited by the Government in an interest-bearing account in the U.S. Treasury during the period the bids are being considered. Such a deposit does not constitute and shall not be construed as acceptance of any bid on behalf of the United States.

8. Withdrawal of Tracts

The United States reserves the right to withdraw any tract from this sale prior to issuance of a written acceptance of a bid for the tract.

9. Acceptance, Rejection, or Return of Bids

The United States reserves the right to reject any and all bids. In any case, no bid will be accepted, and no lease for any tract will be awarded to any bidder, unless:

(a) The bidder has complied with all requirements of this Notice and applicable regulations;

(b) The bid is the highest legal bid; and

(c) The amount of the bid has been determined to be adequate by the authorized officer.

No bonus bid will be considered for acceptance unless it provides for a cash bonus in the amount of $25.00 or more per acre or fraction thereof. Any bid submitted which does not conform to the requirements of this Notice, the OCS Lands Act, as amended, and other applicable regulations may be returned to the person submitting that bid by the RD and not considered for acceptance.

To ensure that the Government receives a fair return for the conveyance of lease rights for this sale, the MMS has modified its two-phased process for bid adequacy determination. The MMS will not automatically accept legal high bids on confirmed and wildcat tracts which receive three or more bids. Such tracts will be evaluated in accordance with the remaining elements of the MMS bid adequacy procedures. A copy of the revised bid adequacy procedures ("Summary of Procedures for Determining Bid Adequacy at Offshore Oil and Gas Lease Sales: Effective April 1996, with Sale 157") is available from the MMS GOM Regional Office (see paragraph 14(a) of this Notice).

10. Successful Bidders

The following requirements apply to successful bidders in this sale:

(a) *Lease Issuance.* Each person who has submitted a bid accepted by the authorized officer will be required to execute copies of the lease (Form MMS–2005 (March 1986) as amended), pay the balance of the cash bonus bid along with the first year's annual rental for each lease issued, by electronic funds transfer in accordance with the requirements of 30 CFR 218.155, and satisfy the bonding requirements of 30 CFR 256, Subpart I, as amended.

Paragraphs 14 (o) and (p), *Information to Lessees*, contain additional information pertaining to this matter.

(b) *Certification Regarding Nonprocurement Debarment, Suspension, and Other Responsibility Matters—Primary Covered Transactions.* Each person involved as a bidder in a successful high bid must submit, prior to lease award, a certification that the person is not excluded from participation in primary covered transactions under Federal nonprocurement programs and activities. Persons submitting such certifications should review the requirements of 43 CFR, Part 12, Subpart D, as amended in the **Federal Register** of June 26, 1995, at 60 CFR 33035.

Copies of the certification form are available from the MMS GOM Regional Office Public Information Unit. See Paragraph 14(a) of this Notice for directions on how to obtain the forms.

11. Leasing Maps and Official Protection Diagrams.

Tracts offered for lease may be located on the following Leasing Maps or Official Protraction Diagrams which may be purchased from the MMS GOM Regional Office Public Information Unit (see paragraph 14(a)):

(a) Outer Continental Shelf (OCS) Leasing Maps—Louisiana Nos. 1 through 12. This is a set of 30 maps which sells for $32.

(b) Outer Continental Shelf Official Protraction Diagrams. These diagrams sell for $2.00 each.

NH 15–12 Ewing Bank (rev. 12/02/76).
NH 16–4 Mobile (rev. 02/23/93).
NH 16–7 Viosca Knoll (rev. 12/02/76).
NH 16–10 Mississippi Canyon (rev. 12/02/76).
NG 15–3 Green Canyon (rev. 12/02/76).
NG 15–6 Walker Ridge (rev. 12/02/76).
NG 15–9 (No Name) (rev. 04/27/89).
NG 16–1 Atwater Valley (rev. 11/10/83).
NG 16–4 Lund (rev. 08/22/86).
NG 16–7 (No Name) (rev. 04/27/89).

(c) A complete set of all the above OCS Leasing Maps and Official Protraction Diagrams is available on microfiche for $5.00 per set.

12. Description of the Areas Offered for Bids

(a) Acreage of blocks is shown on Leasing Maps and Official Protraction Diagrams. Some of these blocks, however, may be partially leased, or transected by administrative lines such as the Federal/State jurisdictional line. Information on the unleased portions of such blocks, including the exact acreage, is included in the following document as a part of this Notice and is currently available from the MMS GOM Regional Office:

Central Gulf of Mexico Lease Sale 157—Final—Unleased Split Blocks and Unleased Acreage of Blocks with Aliquots and Irregular Portions Under Lease.

(b) **Tracts not available for leasing:** The areas offered for leasing include all those blocks shown on the OCS Leasing Maps and Official Protraction Diagrams listed in paragraph 11(a) and (b), except for those blocks or partial blocks already under lease and those blocks or partial blocks under appeal as listed in the following paragraph. A list of Central Gulf of Mexico tracts currently under active lease is included at the end of this Notice.

Although currently unleased, the following tracts are currently appeal and therefore unavailable for leasing: Main Pass, South and East Addition, Blocks 253 and 254.

Note: Tracts or portions or tracts beyond the United States Exclusive Economic Zone are offered based upon provisions of the 1982 Law of the Sea Convention, and could be subject to a continental shelf delimitation agreement between the United States and Mexico.

13. Lease Terms and Stipulations

(a) Leases resulting from this sale will have initial terms as shown on the Stipulations, Lease Terms, and Bidding Systems Map applicable to this Notice. Copies of the map and lease form are available from the MMS GOM Regional Office (see paragraph 14(a)).

(b) The applicability of the stipulations which follow is as shown on the map described in paragraph 13(a and as supplemented by references in this Notice.

Stipulation No. 1—Topographic Features

(This stipulation will be included in leases located in the areas so indicated in the Biological Stipulation Map Package associated with this Notice which is available from the Gulf of Mexico Regional Office (see paragraph 14(a)).

The banks that cause this stipulation to be applied to blocks of the Central Gulf are:

Bank name	No activity zone defined by isobath (meters)
McGrail Bank	85
Bouma Bank	85
Rezak Bank	85
Sidner Bank	85
Rankin Bank	85
Sackett Bank[2]	85
Ewing Bank	85
Diaphus Bank[2]	85
Parker Bank	85
Jakkula Bank	85
Sweet Bank[1]	85
Bright Bank	85
Geyer Bank[3]	85
MacNeil Bank[3]	82
Alderdice Bank	80
Fishnet Bank[2]	76
29 Fathom Bank	64
Sonnier Bank	55

[1] Only paragraph (a) of the stipulation applies.

[2] Only paragraphs (a) and (b) apply.

[3] Western Gulf of Mexico bank with a portion of its "3-Mile Zone" in the Central Gulf of Mexico.

(a) No activity including structures, drilling rigs, pipelines, or anchoring will be allowed within the listed isobath ("No Activity Zone" as shown in the aforementioned Biological Stipulation Map Package) of the banks as listed above.

(b) Operations within the area shown as "1,000-Meter Zone" in the aforementioned Biological Stipulation Map Package shall be restricted by shunting all drill cuttings and drilling fluids to the bottom through a downpipe that terminates an appropriate distance, but no more than 10 meters, from the bottom.

(c) Operations within the area shown as "1-Mile Zone" in the aforementioned Biological Stipulation Map Package shall be restricted by shunting all drill cuttings and drilling fluids to the bottom through a downpipe that terminates an appropriate distance, but no more than 10 meters, from the bottom. (Where there is a "1-Mile Zone" designated, the "1,000-Meter Zone" in paragraph (b) is not designated.)

(d) Operations within the area shown as "3-Mile Zone" in the aforementioned Biological Stipulation Map Package shall be restricted by shunting all drill cuttings and drilling fluids from development operations to the bottom through a downpipe that terminates an appropriate distance, but no more than 10 meters, from the bottom.

Stipulation No. 2—Live Bottoms

(To be included only on leases in the following blocks: Main Pass Area, South and East Addition, Blocks 190, 194, 198, 219–226, 244–266, 276–290; Viosca Knoll, Blocks 473–476, 521, 522, 564, 565, 566, 609, 610, 654, 692–698, 734, 778.)

For the purpose of this stipulation, "live bottom areas" are defined as seagrass communities; or those areas which contain biological assemblages consisting of such sessile invertebrates as sea fans, sea whips, hydroids, anemones, ascidians, sponges, bryozoans, or corals living upon and attached to naturally occurring hard or rocky formations with rough, broken, or smooth topography; or areas whose lithotope favors the accumulation of turtles, fishes, and other fauna.

Prior to any drilling activities or the construction or placement of any structure for exploration or development on this lease, including, but not limited to, anchoring, well drilling, and pipeline and platform placement, the lessee will submit to the Regional Director (RD) a live bottom survey report containing a bathymetry map prepared utilizing remote sensing techniques. The bathymetry map shall be prepared for the purpose of determining the presence or absence of live bottoms which could be impacted by the proposed activity. This map shall encompass such an area of the seafloor where surface disturbing activities, including anchoring, may occur.

It if is determined that the live bottoms might be adversely impacted by the proposed activity, the RD will require the lessee to undertake any measure deemed economically, environmentally, and technically feasible to protect the pinnacle area. These measures may include, but are not limited to, the following:

(a) the relocation of operations; and

(b) the monitoring to assess the impact of the activity on the live bottoms.

Stipulation No. 3—Military Areas

(This stipulation will be included in leases located within the Warning Areas and Eglin Water Test Areas 1 and 3, as shown on the map described in paragraph 13(a)).

(a) *Hold and Save Harmless.* Whether compensation for such damage or injury might be due under a theory of strict or absolute liability or otherwise, the lessee assumes all risks of damage or injury to persons or property, which occur in, on, or above the Outer Continental Shelf (OCS), to any persons or to any property of any person or persons who are agents, employees, or invitees of the lessee, its agents, independent contractors, or subcontractors doing business with the lessee in connection with any activities being performed by the lessee in, on, or above the OCS, if such injury or damage to such person or property occurs by reason of the activities of any agency of the United States Government, its contractors or subcontractors, or any of its officers, agents or employees, being conducted as a part of, or in connection with, the programs and activities of the command headquarters listed in the following table.

Notwithstanding any limitation of the lessee's liability in Section 14 of the lease, the lessee assumes this risk whether such injury or damage is caused in whole or in part by any act or omission, regardless of negligence or fault, of the United States, its contractors or subcontractors, or any of its officers, agents, or employees. The lessee further agrees to indemnify and save harmless the United States against all claims for loss, damage, or injury sustained by the agents, employees, or invitees of the lessee, its agents, or any independent contractors or subcontractors doing business with the lessee in connection with the programs and activities of the aforementioned military installation, whether the same be caused in whole or in party by the negligence or fault of the United States, its contractors, or subcontractors, or any of its officers, agents, or employees and whether such claims might be sustained under a theory of strict or absolute liability or otherwise.

(b) *Eelctromagnetic Emissions.* The lessee agrees to control its own electromagnetic emissions and those of its agents, employees, invitees, independent contractors or subcontractors emanating from individual designated defense warning areas in accordance with requirements specified by the commander of the command headquarters listed in the following table to the degree necessary to prevent damage to, or unacceptable interference with, Department of Defense flight, testing, or operational activities, conducted within individual designated warning areas. Necessary monitoring control, and coordination with the lessee, its agents, employees, invitees, independent contractors or subcontractors, will be effected by the commander of the appropriate onshore military installation conducting operations in the particular warning area; provided, however, that control of such electromagnetic emissions shall in no instance prohibit all manner of electromagnetic communication during any period of time between a lessee, its agents, employees, invitees, independent contractors or subcontractors and onshore facilities.

(c) *Operational.* The lessee, when operating or causing to be operated on its behalf, boat, ship, or aircraft traffic into the individual designated warning areas shall enter into an agreement with the commander of the individual command headquarters listed in the following list, upon utilizing an individual designated warning area prior to commencing such traffic. Such an agreement will provide for positive control of boats, ships, and aircraft operating into the warning areas at all times.

W–155A and B (For Agreement)—Chief, Naval Air Training, Naval Air Station, Office No. 206, Corpus Christi, Texas 78419–5100, Telephone: (512) 939–3862/2621

W–155A and B (For Operational Control)—Fleet Area Control & Surveillance Facility (FACSFAC), Operations, Naval Air Station, Pensacola, Florida 32508, Telephone: (904) 452–2735/4671

W–92—Naval Air Station, Air Operations Department, Air Traffic Division/Code 52, New Orleans, Louisiana 70146–5000, Telephone: (504) 393–3100/3101

W–453—Air National Guard—CRTC, Gulfport/ACMI, Scheduling Office, Gulfport, Mississippi 39507, Telephone: (601) 867–2433

Eglin Water Test Areas 1 and 3—Air Force Development Test Center, Strategic Plans Division AFDTC/DRP, 101 West "D" Avenue, Suite 125, Eglin AFB, Florida 32542–5495, Telephone: (904) 882–3899/4188

14. Information to Lessees

(a) *Supplemental Documents.* For copies of the various documents identified as available from the MMS Gulf of Mexico Regional Office, prospective bidders should contact the Public Information Unit, Minerals Management Service, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394, either in writing or by telephone at (504) 736–2519 or (800) 200–GULF. For additional information, contact the Regional Supervisor for Leasing and Environment at that address or by telephone at (504) 736–2759.

(b) *Navigation Safety.* Operations on some of the blocks offered by lease may be restricted by designation of fairways, precautionary zones, anchorages, safety zones, or traffic separation schemes established by the U.S. Coast Guard pursuant to the Ports and Waterways Safety Act (33 U.S.C. 1221 et seq.), as amended, and the Deepwater Port Act (33 U.S.C. 1501–1524). Bidders are advised to review U.S. Coast Guard regulations (particularly 33 CFR Part 150, Appendix A; see also 59 FR 17480 published on April 13, 1994) regarding the safety zone around the Louisiana Offshore Oil Port (LOOP).

U.S. Army Corps of Engineers (COE) permits are required for construction of any artificial islands, installations, and other devices permanently or temporarily attached to the seabed located on the OCS in accordance with section 4(e) of the OCS Lands Act, as amended.

For additional information, prospective bidders should contact Lt. Commander Ken Parris, Assistant Marine Port Safety Officer, 8th Coast Guard District, Hale Boggs Federal Building, New Orleans, Louisiana 70130, (504) 589–6901. For COE information, prospective bidders should contact Mr. Ron Ventola CELMN–OD–S, Post Office Box 60267, New Orleans, Louisiana 70160–0267, (504) 862–2255.

(c) *Offshore Pipelines.* Bidders are advised that the Department of the Interior and the Department of Transportation have entered into a Memorandum of Understanding, dated May 6, 1976, concerning the design, installation, operation, and maintenance of offshore pipelines. Bidders should consult both Departments for regulations applicable to offshore pipelines.

(d) *8-Year Leases.* Bidders are advised that any lease issued for a term of 8 years will be cancelled shortly after the end of the fifth year, following notice pursuant to the OCS Lands Act, as amended, if within the initial 5-year period of the lease, the drilling of an exploratory well has not been initiated; or if initiated, the well has not been drilled in conformance with the approved exploration plan criteria; or if there is not a suspension of operations in effect. Furthermore, a rental payment for the sixth year will be due despite the cancellation. Bidders are referred to 30 CFR 256.37 and the MMS GOM Region's Letter to Lessees and Operators of February 13, 1995.

(e) *Affirmative Action.* Revision of Department of Labor regulations on affirmative action requirements for Government contractors (including lessees) has been deferred, pending review of those regulations (see **Federal Register** of August 25, 1981, at 46 FR 42865 and 42968). Should changes become effective at any time before the issuance of leases resulting from this sale, section 18 of the lease form (Form MMS–2005, March 1986), would be deleted from leases resulting from this sale. In addition, existing stocks of the affirmative action forms described in paragraph 5 of this Notice contain language that would be superseded by the revised regulations at 41 CFR 60–1.5(a)(1) and 60–1.7(a)(1). Submission of Form MMS–2032 (June 1985) and Form MMS–2033 (June 1985) will not

invalidate an otherwise acceptable bid, and the revised regulations' requirements will be deemed to be part of the existing affirmative action forms.

(f) *Ordnance Disposal Areas.* Bidders are cautioned as to the existence of two inactive ordnance disposal areas in the Mississippi Canyon area, shown on the map described in paragraph 13(a). These areas were used to dispose of ordnance of unknown quantity and composition. Water depths range from approximately 750 to 1,525 meters. Bottom sediments in both areas are soft, consisting of silty clays. Exploration and development activities in these areas require precautions commensurate with the potential hazards.

The U.S. Air Force has released an indeterminable amount of unexploded ordnance throughout Eglin Water Test Areas 1 and 3. The exact location of the unexploded ordnance is unknown, and lessees are advised that all lease blocks included in this sale within these water test areas should be considered potentially hazardous to drilling and platform and pipeline placement.

(g) *Communications Towers.* The Department of Defense, U.S. Air Force, has installed seven military communications towers in the Chandeleur/Mobile/Viosca Knoll area which support Air Combat Maneuvering Instrumentation (ACMI). This project may impose certain restrictions on oil and gas activities in that area since no activity can take place within 500 feet of a tower site, and unobstructed lines of sight must be maintained between towers. The seven towers are located within Mobile, Blocks 769, 819, and 990; Viosca Knoll, Block 116; Chandeleur Area, Blocks 33 and 61; and Chandeleur Area, East Addition, Block 39. Information and maps of the specific locations and line of sight crossings for ACMI towers may be obtained from Mr. Wallace Williams, Minerals Management Service, (504) 736–2772.

(h) *Archaeological Resources.* Bidders are advised that a Final Rule regarding archaeological resources was published in the **Federal Register** on October 21, 1994 (59 FR 53091), granting specific authority to each MMS Regional Director to require archaeological surveys and reports (under 30 CFR 250, 256, 260, and 281) and the submission of these reports to the Regional Director prior to exploration, development and production, or installation of lease-term or right-of-way pipelines. MMS Notice to Lessees (NTL) 91–02 (Outer Continental Shelf Archaeological Resources Requirements for the Gulf of Mexico OCS Region) published in the **Federal Register** on December 20, 1991 (56 FR 66078) effective February 17, 1992, specifies survey methodology, linespacing, and archaeological report writing requirements for lessees and operators in the Gulf of Mexico Region.

Two additional documents are available from the MMS Gulf of Mexico Region Public Information Unit (see paragraph 14(a)):

"List of Lease Blocks Within The High-Probability Area For Historic Period Shipwrecks On The OCS" dated January 30, 1995. This list supersedes the list promulgated by the MMS Letter to Lessees (LTL) of November 30, 1990.

"List of Lease Blocks Within The High-Probability Area For Pre-Historic Archaeological Resources On The OCS" dated January 30, 1995.

Implementation of this Final Rule and NTL 91–02 obviates the need for the Protection of Archaeological Resources Stipulation required in previous leases.

(i) *Proposed Rigs to Reefs.* Bidders are advised that there are OCS artificial reef sites and planning sites for the Gulf of Mexico. These are generally located in water depths of less than 200 meters. While all existing and proposed sites require a permit from the U.S. Army Corps of Engineers, this "Rigs to Reefs" program is implemented through State sponsorship through the following State Coordinators:

Alabama Mr. Walter M. Tatum, (205) 968–7577
Louisiana Mr. Rick Kasprzac, (504) 765–2375
Mississippi Mr. Mike Buchanan, (601) 385–5850
Texas Ms. Jan Coulbertson, (713) 474–2811

For more information on artificial reef sites, prospective bidders should contact the above listed State Artificial Reef Coordinators for their areas of interest.

(j) *Right of Use and Easement for Chandeleur Blocks 27 and 30.* Bidders are advised that a right of use and easement has been granted for portions of Chandeleur Area Blocks 27 and 30 for gas storage purposes. The area is generally on the southernmost quarter of the federal portion of Chandeleur Area, Block 27 and the W½ NW¼; NW¼ SW¼ portion of Chandeleur Area, Block 30. For additional information, contact the MMS Gulf of Mexico Regional Supervisor for Production and Development at (504) 736–2675.

(k) *Proposed Lightering Zones.* Bidders are advised that the U.S. Coast Guard has proposed designating certain areas of the Gulf of Mexico (60 FR 1958 of January 5, 1995), as lightering zones for the purpose of permitting single hull vessels to off-load oil within the U.S. Exclusive Economic Zone. Such designation may have implications for oil and gas operatons in the areas. Additional information may be obtained from Lieutenant Commander Stephen Kantz, Project Manager, Oil Pollution Act (OPA 90) Staff, at (202) 267–6740.

(l) *Statement Regarding Certain Geophysical Data.* Pursuant to Sections 18 and 26 of the OCS Lands Act, as amended, and the regulations issued thereunder, MMS has a right of access to certain geophysical data and information obtained or developed as a result of operations on the OCS. MMS is sensitive to the concerns expressed by industry regarding the confidentiality of individual company work products and client lists and the potential burden of responding to a myriad of requests from MMS pertaining to the existence and availability of these types of reprocessed geophysical data. To resolve the concerns of both industry and MMS with respect to such cases, MMS has worked with industry to develop the requirements contained within paragraph 3(b) *Method of Bidding* above. MMS is modifying the previous procedure to require that bidders who are in possession of the requested data, now identify the specific data by line name or 3D phase. This will help MMS in identifying time data that may already be in our data base and at the same time not impose undue burden on industry by rerequesting it. These requirements are being imposed on a trial basis to determine their effectiveness and are subject to modification in future sales.

The details of this requirement are specified in the document "Trial Procedures for Access to Certain Geophysical Data in the Gulf of Mexico," which is provided in this Sale Notice package and which is available upon request from the MMS Gulf of Mexico Region Public Information Unit (see paragraph 14(a)). In brief, these requirements include:

(1) In the period for ninety (90) days after the sale, bidders will allow MMS to inspect such data within seven (7) days of a written request from MMS, and upon further written request will transmit to MMS, within ten (10) working days, such data. After this ninety day period, a response time of thirty (30) days following an MMS written request will be considered adequate.

(2) Successful bidders must retain such data for three (3) years after the sale, and unsuccessful bidders must retain such data for six (6) months after the sale, for possible acquisition by MMS.

For the six (6) month period after the sale, based on a review of the allowable cost of data reproduction to MMS for three-dimensional and two-dimensional data sets, the company providing the reprocessed data will be reimbursed at a rate of $480 per block or part thereof for three-dimensional data and $2 per line mile for two-dimensional data. Afterwards, reimbursement will be subject to the terms and conditions of 30 CFR 251.13(a).

All geophysical data and information obtained and reviewed by MMS pursuant to these procedures shall be held in the strictest confidence and treated as proprietary in accordance with the applicable terms of 30 CFR 251.14.

For additional information, contact the MMS Gulf of Mexico Regional Office of Resource Evaluation at (504) 736–2720.

(m) *Information about Indicated Hydrocarbons.* Bidders are advised that MMS makes available, about 3 months prior to a lease sale, a list of unleased tracts having well bores with indicated hydrocarbons. Basic information relating to production, well bores, and pay range for each tract is included in the list. The list is available from the MMS Gulf of Mexico Region Public Information Unit (see paragraph 14(a)).

(n) *Royalty Relief.* The Outer Continental Shelf (OCS) Deep Water Royalty Relief Act authorizes the Secretary of the Interior to offer certain deepwater OCS tracts in the Central and Western Gulf of Mexico for lease with suspension of royalties for a volume, value, or period of production the Secretary determines. On or near the date of this Final Notice of Sale 157, an interim rule has been published in the **Federal Register** that specifies the royalty suspension terms under which the Secretary will make tracts available for this sale. Bidders are advised to review that document for additional details on this matter. For further information, bidders may contact Walter Cruickshank of the MMS Offshore Minerals Analysis Division at (202) 208–3822.

A map titled "Royalty Suspension Areas For The Central Gulf of Mexico" depicting blocks in which such suspensions may apply is currently available from the MMS GOM Regional Office (see paragraph 14(a) of this Notice).

The publication "OCS Operations Field Names Master List" depicts currently established fields in the Gulf of Mexico. This document is updated monthly and reprinted quarterly. Copies may be obtained from the MMS GOM Regional Office (see paragraph 14(a) of this Notice).

(o) *Lease Instrument.* Bidders are advised that the lease instrument will include royalty relief provisions (paragraph 4(c)(3) of this Notice) and 8-year lease cancellation provisions (paragraph 14(d) of this Notice) where applicable. Leases will continue to be issued on Form MMS–2005 (March 1986) as amended.

(p) *Electronic Funds Transfer.* Bidders are advised that the 4/5ths and first year rental EFT instructions for lease payoff have been revised and updated by MMS Royalty Management. Companies may now use either the Fedwire Deposit System or the Automated Clearing House (overnight payments). See paragraph 10(a) of this Notice.

Approved: March 18, 1996.

Cynthia Quarterman,
Director, Minerals Management Service.

Bob Armstrong,
Assistant Secretary, Land and Minerals Management.

Central Gulf of Mexico Leased Lands

March 11, 1996

Descriptions of blocks listed represent all Federal acreage leased unless otherwise noted.

National Park Service

Notice of Availability of the Revised Draft Development Concept Plan/ Environmental Impact Statement for South Side Denali, Alaska

AGENCIES: National Park Service, Interior.

ACTION: Notice of Availability of the Revised Draft Development Concept Plan/Environmental Impact Statement for South Side Denali, Alaska.

SUMMARY: The National Park Service announces the availability of a Revised Draft Development Concept Plan/ Environmental Impact Statement (DCP/ EIS) for South Side Denali, Alaska. The document describes and analyzes the environmental impacts of a proposed action and two action alternatives for visitor facilities and services on the south side. A no action alternative also is evaluated. This notice announces the dates and locations of public hearings to solicit comments on the revised draft DCP/EIS.

DATES: Comments on the revised draft DCP/EIS must be received no later than May 21, 1996. Hearing dates, times, and locations are listed under Supplementary Information, below.

ADDRESSES: Comments on the revised draft DCP/EIS should be submitted to the Superintendent, Denali National Park and Preserve, Post Office Box 9, Denali Park, Alaska 99755. Copies of the Revised Draft South Side Denali DCP/ EIS are available by request from the aforementioned address.

FOR FURTHER INFORMATION CONTACT: Nancy Swanton, Park Planner, Denali National Park and Preserve. Telephone: (907) 257–2651 Fax: (907) 257–2485.

SUPPLEMENTARY INFORMATION: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (P.L. 91–190, as amended), the National Park Service, as lead federal agency, in cooperation with the State of Alaska, Matanuska-Susistna Borough, and Denali Borough, has prepared a DCP/EIS for proposed visitor facilities and services on the south side of Denali National Park and Preserve in Alaska. Information meetings and public hearings are scheduled in Alaska on the dates and at the times and locations indicated below.

- April 16—Fairbanks, John A. Carlson Center, Pioneer Room, 2010 Second Avenue. Information meeting (5:30–6:30 p.m.); Hearing (6:30–8:30 p.m.)
- April 17—Healy, Tri-Valley Community Center, Windjammer Room, First Floor. Information meeting (6:30–7:30 p.m.); Hearing (7:30–9:30 p.m.)
- April 18—Cantwell, Community Hall. Information meeting (6:30–7:30 p.m.); Hearing (7:30–9:30 p.m.)
- April 23—Trapper Creek, Trapper Creek Elementary School, Mile 2.5 Petersville Road. Information meeting (6:30–7:30 p.m.); Hearing (7:30–9:30 p.m.)
- April 24—Talkeetna, Talkeetna Elementary School, Mile 14 Talkeetna Spur Road. Information meeting (6:30–7:30 p.m.); Hearing (7:30–9:30 p.m.)
- April 25—Anchorage, William A. Egan Civic and Convention Center, Board Room, Second Floor, 555 West Fifth Avenue. Information meeting (5:30–6:30 p.m.); Hearing (6:30–8:30 p.m.)

The first hour of each meeting will be a discussion session. Representatives of the South Side Denali Cooperative Planning Team will be available to answer questions and hear your comments in a more informal setting. The rest of the meeting will be a public hearing; a brief introduction by the planning team will be followed by public testimony on the plan.

The revised draft DCP/EIS represents a cooperative planning effort that builds

on previous planning for the region, including a draft DCP/EIS issued in 1993. The south side refers to an area that includes Denali National Park and Preserve land, Denali State Park land, and other lands to the south of the national park and preserve boundaries. This revised draft DCP/EIS describes and analyzes the environmental impacts of a proposed action, two other action alternatives, and a no action alternative. The proposed action is based on south side recommendations made by the Denali Task Force, a group formed in 1994 at the request of Secretary of the Interior Bruce Babbitt, to provide recommendations through the National Park System Advisory Board regarding visitor facilities and services in and near Denali National Park and Preserve, including the south side. Other sections of the document, including alternatives to the proposed action, are based on the 1993 draft DCP/EIS, with modifications made in response to public comments and environmental and economic considerations.

The proposed action includes a new visitor center (up to 13,000 square feet), picnic area, campground, public use cabins, and short interpretive/hiking trails in the Tokositna area at the western end of Denali State Park. Some of the hiking trails would lead into Denali National Park and Preserve. The Petersville Road would be upgraded and extended to provide improved access to this area. In cooperation and, where desirable, partnership between the National Park Service, local government, Alaska Native Claims Settlement Act Native Corporations, and the State of Alaska would develop visitor facilities and services at Talkeetna, Broad Pass, and the central development zone of Denali State Park when the need and opportunity to do so are established. For the central development zone of Denali State Park, this would entail constructing up to a 3,000 square foot visitor center. The Byers Lake campground would be expanded by up to 25 sites or a new campground of up to 50 sites would be built elsewhere in the central development zone of the state park. Up to five primitive fly-in only campsites would be constructed at Chelatna Lake, along with two public use cabins and a short hiking/interpretive trail and trailhead interpretive sign. The Dunkle Hills road could provide new access opportunities in the Dunkle Hills/Broad Pass area, including access into Denali National Park and Preserve, pending resolution of land status/access issues. These actions would be phased in practical and achievable steps over the 15 to 20-year life of the plan, under the guidance of an intergovernmental implementation team.

The focus of the two other action alternatives is to provide visitor facilities and services within easy access from the George Parks Highway. No facilities would be constructed in the Tokositna area, in the Dunkle Hills, or near Chelatna Lake. No public use cabins would be constructed. In one alternative, a new visitor center (up to 13,000 square feet) would be located at either the northern, central, or southern development zone of Denali State park, with short hiking/interpretive trails established near the visitor center. The Byers Lake campground would be expanded by up to 25 sites or a new campground of up to 50 sites would be built elsewhere in the central development zone of the state park. In the other action alternative, a new visitor center (up to 1,500 square feet) would be located at either the northern, central, or southern development zone of the state park, with short hiking/interpretive trails established near the visitor center.

With the no action alternative, management activity and the current level of backcountry visitation would continue. A 320 square foot visitor contact station would be built near the Vietnam Veteran's Memorial in Denali State Park, and a short trail to the Chulitna River would be developed in the central development zone of the state park. The Matanuska-Susitna Borough likely would construct snowmachine and all-terrain vehicle (ATV) trails and facilities near the Forks Roadhouse along the Petersville Road. An existing privately built (trespass) cabin near Chelatna Lake would be converted to public use. No campgrounds or other visitor facilities would be developed by the state, the National Park Service, or boroughs on the south side. Certain policies and actions would be implemented under each action alternative (some actions also would apply under the no-action alternative). The policies would call for locating commercial facilities (e.g., lodging) primarily on private lands; protecting the wild character of the south side; minimizing impacts on existing uses; adhering to the Alaska National Interest Lands Conservation Act, sections 1306 and 1307, and phasing development. The following actions would be taken (those applying to the no action alternative are noted with an asterisk):

- Developing up to five additional roadside exhibits along the George Parks Highway
- identifying and establishing watchable wildlife areas
- developing self-guiding interpretive brochures
- implementing state highway right-of-way restrictions and conducting selective brushing and vista clearing along the George Parks Highway
- reviewing and revising the Matanuska-Susitna Borough's Special Land Use District in Denali State Park to improve implementation and enforcement*
- completing corridor management plans for the George Parks Highway and implementing management guidelines*
- working cooperatively to manage uses on the south side
- seeking designation of the George Parks Highway within Denali State Park as a state scenic byway *
- conducting research on the natural and cultural resources and human uses in the area in advance of development on the south side *
- formally establishing a Denali South Side Plan Implementation Partnership to continue the cooperative partnership approach in implementing the DCP.

The DCP/EIS is the result of a collaborative process that takes a regional rather than a jurisdictional approach to planning. The cooperative planning team is comprised of representatives from the National Park Service, State of Alaska, Matanuska-Susitna Borough, Denali Borough, and two Native Regional Corporations (Ahtna, Incorporated and Cook Inlet Region Incorporated). All six partners in this cooperative effort have land management authorities on the south side. In compliance with the National Environmental Policy Act of 1969, as amended, the National Park Service is the lead federal agency responsible for the environmental impact statement; the state and the two boroughs are cooperating agencies. The two Native Corporations are not cooperating agencies but are considered planning partners in accordance with National Park Service guidelines and the Federal Advisory Committee Act.

Dated: March 15, 1996.

Robert D. Barbee,

Field Director, Alaska Field Office.

BILLING CODE 4310–70–P

Notice of Intent to Repatriate Cultural Items in the Possession of the Science Museum of Minnesota, St. Paul, MN

AGENCY: National Park Service

ACTION: Notice

Notice is hereby given under the Native American Graves Protection and Repatriation Act, 25 U.S.C. 3005 (a)(2), of the intent to repatriate cultural items in the possession of the Science Museum of Minnesota, St. Paul, MN which meet the definition of "sacred object" and "object of cultural patrimony" as defined in Section 2 of the Act.

Between 1963 and 1977, the Science Museum of Minnesota accessioned eight carved wooden masks and one cornhusk mask into its collections.

In 1963, the Science Museum purchased two masks from W.G. Spittal. One mask is a woven cornhusk mask. The second mask is black-painted basswood in an elongated oval shape, with a carved face, horsetail hair, and copper eye plates. The cornhusk mask was made by an Onondaga Nation member, and the basswood mask was made by a Cayuga Nation member. Both of these masks were made at the Six Nations Reserve, Ontario, Canada.

In 1977, the Science Museum purchased seven masks from W. Bailey. The first mask is dark brown- stained wood in an elongated oval shape, horsetail hair, carved face, and copper eye plates. Information with this mask indicates it was made by the Seneca. The second mask is red-painted wood in an elongated oval shape, carved face, horsetail hair, and white eye plates. The third mask is black-painted wood in an elongated oval shape, carved face, horsetail hair, and tin eye plates. The fourth mask is black-painted wood in a narrowed oval shape, carved face, horsetail hair, and copper eye plates. The fifth mask is red-painted wood in an elongated oval shape, carved face, horsetail hair, and white eye plates. The sixth mask is red painted wood in a narrowed oval shape, horsetail hair, and white eye plates. The seventh mask is black-painted wood in an oval shape, carved face, horsetail hair, and white eye plates.

Consultation was conducted with representatives of the Haudenosaunee Standing Committee on Burial Rules and Regulations representing the Cayuga Nation, the Mohawk Nation, the Onondaga Nation, the Seneca Nation of Indians, the Tonawanda Band of Seneca, and the Tuscarora Nation. Consultation was also conducted with representatives of the Oneida Nation of New York, the Oneida Tribe of Wisconsin, and the Seneca-Cayuga Tribe of Oklahoma.

Consultation evidence indicates these items are medicine or false face masks. Such masks represent the power of particular medicine beings. Representatives of the Haudenosaunee Standing Committee on Burial Rules and Regulations affirm that these false face masks are needed by the traditional religious leaders of all the nations of the Iroquois Confederacy for the practice of traditional ceremonies by present-day adherents. Representatives of the Haudenosaunee Standing Committee on Burial Rules and Regulations have indicated that false face masks are owned collectively by the members of the False Face Society common to all nations of the Iroquois Confederacy and no individual had the right to sell or otherwise alienate the masks.

Consultation, anthropological literature, and ethnographic evidence all indicate these masks are used by a traditional religious society (the False Face Society) common to all nations of the Iroquois Confederacy. With the exception of the one mask known to be Cayuga, the one mask known to be Onondaga, and the mask noted as Seneca, these masks are common to all extant False Face Societies.

Based on the above-mentioned information, officials of the Science Museum of Minnesota have determined that, pursuant to 25 U.S.C. 3001(3)(C), the nine masks are specific ceremonial objects which are needed by traditional Native American religious leaders for the practice of traditional Native American religions by their present day adherents. Officials of the Science Museum of Minnesota have also determined that, pursuant to 25 U.S.C. 3001(3)(D), the nine masks have ongoing historical, traditional, and cultural importance central to the Native American group or culture itself, rather than property owned by an individual Native American, and which, therefore, could not be alienated, appropriated, or conveyed by any individual. Finally, officials of the Science Museum of Minnesota have determined that, pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity with can be reasonably traced between these items and the Cayuga Nation, the Mohawk Nation, the Onondaga Nation, the Seneca Nation of Indians, the Tonawanda Band of Seneca, and the Tuscarora Nation, the Oneida Nation of New York, the Oneida Tribe of Wisconsin, the Seneca-Cayuga Tribe of Oklahoma.

This notice has been sent to representatives of the Haudenosaunee Standing Committee on Burial Rules and Regulations, the Cayuga Nation, the Mohawk Nation, the Onondaga Nation, the Seneca Nation of Indians, the Tonawanda Band of Seneca, and the Tuscarora Nation, the Oneida Nation of New York, the Oneida Tribe of Wisconsin, the Seneca-Cayuga Tribe of Oklahoma. Representatives of any other Indian tribe which believes itself to be culturally affiliated with these objects should contact Ms. Faith G. Bad Bear, NAGPRA Project Manager, Science Museum of Minnesota, 30 East 10th Street, St. Paul, MN 55101, telephone (612) 221–9432 before April 24, 1996. Repatriation of these objects to the Haudenosaunee Standing Committee on Burial Rules and Regulations, representing the interests of the Cayuga Nation, the Mohawk Nation, the Onondaga Nation, the Seneca Nation of Indians, the Tonawanda Band of Seneca, and the Tuscarora Nation may begin after that date if no additional claimants come forward.

DEPARTMENT OF JUSTICE

Immigration Related Employment Discrimination Public Education Grants

AGENCY: Office of Special Counsel for Immigration Related Unfair Employment Practices, Civil Rights Division, U.S. Department of Justice.

ACTION: Notice of availability of funds and solicitation for grant applications.

SUMMARY: The Office of Special Counsel for Immigration Related Unfair Employment Practices (OSC) announces the availability of up to $1.3 million for grants to conduct public education programs about the rights afforded potential victims of employment discrimination and the responsibilities of employers under the antidiscrimination provisions of the Immigration and Nationality Act (INA), 8 U.S.C. § 1324b.

It is anticipated that a number of grants will be competitively awarded to applicants who can demonstrate a capacity to design and successfully implement public education campaigns to combat immigration-related employment discrimination. Grants will range in size from $50,000 to $150,000.

OSC will accept proposals from applicants who have access to potential victims of discrimination or whose experiences qualifies them to educate employers about the antidiscrimination provisions of INA. OSC welcomes proposals from diverse nonprofit organizations such as local, regional or national ethnic and immigrants' rights advocacy organizations, trade

associations, industry groups, professional organizations, or other nonprofit entities providing information services to potential victims of discrimination and/or employers. Applications will not be accepted from individuals or public entities, including state and local government agencies, and public educational institutions.

APPLICATION DUE DATE: May 9, 1996.

FOR FURTHER INFORMATION CONTACT: Patita McEvoy, Public Affairs Specialist, Office of Special Counsel for Immigration Related Unfair Employment Practices, 1425 New York Avenue NW., Suite 9000, P.O. Box 27728, Washington, DC 20038–7728. Tel. (202) 616–5594, or (202) 616–5525. (TDD for the hearing impaired).

SUPPLEMENTARY INFORMATION: The Office of Special Counsel for Immigration Related Unfair Employment Practices of the Civil Rights Division of the Department of Justice announces the availability of funds to conduct public education programs concerning the antidiscrimination provisions of INA. Funds will be awarded to selected applicants who propose cost-effective ways of educating employers and/or members of the protected class, or to those who can fill a particular need not currently being met.

Background

On November 6, 1986, President Reagan signed into law the Immigration Reform and Control Act of 1986 (IRCA), Pub. L. No. 99–603, which amended the INA. Additional provisions were signed into law by President Bush in the Immigration Act (IMMACT 90) on November 29, 1990. IRCA and subsequently, IMPACT 90, makes hiring aliens without work authorization unlawful, and requires employers to verify the identify and work authorization of all new employees. Employers who violate this law are subject to sanctions, including fines and possible criminal prosecution.

During the debate on IRCA, Congress foresaw the possibility that employers, fearful of sanctions, would refuse employment to individuals simply because they looked or sounded foreign. Consequently, Congress enacted Section 102 of IRCA, an antidiscrimination provision. Section 102 prohibits employers of four or more employees from discriminating on the basis of citizenship status or national origin in hiring, firing, recruitment or referral for a fee, and prohibits employers from engaging in document abuse in the employment eligibility verification process.

Citizens and certain classes of work authorized individuals are protected from *citizenship status discrimination*. Protected non-citizens include permanent residents, temporary residents under this amnesty, the Special Agricultural Workers (SAWs) or the Replenishment Agricultural Workers (RAWs) programs, refugees and asylees who apply for naturalization within six months of being eligible to do so. Citizens and *all* work authorized individuals are protected from *discrimination on the basis of national origin*. However, this prohibition applies to employers with four to fourteen employees. National origin discrimination complaints against employers with fifteen or more employees remain under the jurisdiction of the Equal Employment Opportunity Commission under Title VII of the Civil Rights Act of 1964.

In addition, under the *document abuse provision* of the law, employers must accept all forms of work authorization and proof of identity allowed by the Immigration and Naturalization Service (INS) for completion of the Employment Eligibility Verification (I–9) Form. Employers may not prefer or require one form of documentation over another for hiring purposes. Requiring more or specific documents to prove identity and work authorization constitutes document abuse.

Congress created the OSC to enforce Section 102. OSC is responsible for receiving and investigating discrimination charges and, when appropriate, filing complaints with a specially designated administrative tribunal. OSC also initiates independent investigations of possible Section 102 violations.

While OSC has established a record of vigorous enforcement, studies by the U.S. General Accounting Office and other sources have shown that there is an extensive lack of knowledge on the part of protected individuals and employers about the antidiscrimination provisions. Enforcement cannot be effective if potential victims of discrimination are not aware of their rights. Moreover, discrimination can never be eradicated so long as employers are not aware of their responsibilities.

Purpose

OSC seeks to educate both potential victims of discrimination about their rights and employers about their responsibilities under the antidiscrimination provisions of INA. Because previous grantees have developed a wealth of materials (*e.g.*, brochures, posters, booklets, information packets, and videos) to educate these groups, OSC has determined that the focus of the program should be on the *actual delivery* of said education. More specifically, in keeping with the purpose of the grant program, OCS seeks proposals that will use *existing materials* effectively to educate large numbers of workers or employers about exercising their rights or fulfilling their obligations under the antidiscrimination provisions.

Program Description

The program is designed to develop and implement cost effective approaches to educate potential victims of employment discrimination about their rights and to educate employers about their responsibilities under INA's antidiscrimination provisions. Applications may propose to educate potential victims only, employers only, or both in a single campaign. *Program budgets must include the travel, lodging and other expenses necessary for at least one, but not more than two, program staff members to attend the mandatory OSC grantee training (2 days) held in Washington, DC, at the beginning of the grant period (late Autumn).* Proposals should outline the following key elements of the program:

Part I: Targeted Population

The educational efforts under the grant should be directed to (1) work authorized non-citizens who are protected individuals, since this group is especially vulnerable to employment discrimination; (2) those citizens who are most likely to become victims of employment discrimination; and/or to (3) employers. The proposals should define the characteristics of the work authorized population or the employer group(s) targeted for the educational campaign, and the applicant's qualifications to credibly and effectively reach large segments of the campaign targets.

The proposals should also detail the reasons for targeting each group of protected individuals or employers by describing particular needs or other factors to support the selection. In defining the campaign targets and supporting the reasons for the selection, applicants may use studies, surveys, or any other sources of information of generally accepted reliability.

Part II: Campaign Strategy

We encourage applicants to devise effective and creative means of public education and information dissemination that are specifically designed to reach the widest possible targeted audience. Those applicants proposing educational campaigns addressing potential victims of discrimination should keep in mind that some of the traditional methods of public communication may be less than optimal for education members of national or linguistic groups that have limited community-based support and communication networks.

Some grantees who are implementing citizenship campaigns, have, in the past, combined those efforts and resources with the INA antidiscrimination education campaigns in order to maximize the scope and breadth of the project and to reach a larger number of individuals in the targeted population. If an applicant proposes to combine these efforts, please discuss how the programs will interact and how the budgets will be administered.

Proposals should discuss the components of the campaign strategy, detail the reasons supporting the choice of each component, and explain how each component will effectively contribute to the overall objective of cost-effective dissemination of useful and accurate information to a wide audience of protected individuals or employers. Discussions of the campaign strategies and supporting rationale should be clear, concise, and based on sound evidence and reasoning.

Since there presently exists a wealth of materials for use in educating the public, proposals should include in their budgets the costs for printing from camera-ready materials received from OSC or from current/past OSC grantees. To the extent that applicants believe the development of original materials particularly suited to their campaign is necessary, their proposal should articulate in detail the circumstances requiring the development of such materials. All such materials *must* be approved by OSC to ensure legal accuracy and proper emphasis prior to production. It should be noted that proposed revisions/translations of OSC approved materials must also be submitted for clearance. All information distributed should also include mention of the OSC as a source of assistance, information and action, and the correct address and telephone numbers of the OSC (including the toll-free and TDD toll-free numbers for the hearing impaired).

Part III: Evaluation of the Strategy

One of the central goals of this program is determining what public education strategies are most effective and thus, should be included in future public education efforts. Therefore, it is crucial that the methods of evaluating the campaign strategy and public education materials and their results be carefully detailed. A full evaluation of a project's effectiveness is due within 60 days of the conclusion of a campaign.

Selection Criteria

The final selection of grantees for award will be made by the Special Counsel for Immigration Related Unfair Employment Practices.

Proposals will be submitted to a peer review panel. OSC anticipates seeking assistance from sources with specialized knowledge in the areas of employment and immigration law, as well as in evaluating proposals, including the agencies that are members of the Antidiscrimination Outreach Task Force: the Department of Labor, the Equal Employment Opportunity Commission, the Small Business Administration, and the Immigration and Naturalization Service. Each panelist will evaluate proposals for effectiveness and efficiency with emphasis on the various factors enumerated below. The panel's results are advisory in nature and not binding on the Special Counsel. Letters of support, endorsement, or recommendation will not be accepted or considered.

In determining which applications to fund, OSC will consider the following (based on a one-hundred point scale):

1. Program Design (50 points)

Sound program design and cost effective strategies for educating the targeted population are imperative. Consequently, areas that will be closely examined include the following:

a. Evidence of in-depth knowledge of the goals and objectives of the project. (15 points)

b. Selection and definition of the target group(s) for the campaign, and the factors that support the selection, including special needs, and the applicant's qualifications to effectively reach the target. (10 points)

c. A cost effective campaign strategy for educating targeted employers and/or members of the protected class, with a justification for the choice of strategy. (15 points)

d. The evaluation methods proposed by the applicant to measure the effectiveness of the campaign and their precision in indicating to what degree the campaign is successful. (10 points)

2. Administrative Capability (20 points)

Proposals will be rated in terms of the capability of the applicant to implement the targeting, public education and evaluation components of the campaign:

a. Evidence of proven ability to provide high quality results. (10 points)

b. Evidence that the applicant can implement the campaign, and complete the evaluation component within the time lines provided. Note: OSC's experience during previous grant cycles has shown that a number of applicants choose to apply as a consortium of individual entities; or, if applying individually, propose the use of subcontractors to undertake certain limited functions. It is essential that these applicants demonstrate the proven management capability and experience to ensure that, as lead agency, they will be directly accountable for the successful implementation, completion, and evaluation of the project. (10 points)

3. Staff Capability (10 points)

Applications will be evaluated in terms of the degree to which:

a. The duties outlined for grant-funded positions appear appropriate to the work that will be conducted under the award. (5 points)

b. The qualifications of the grant-funded positions appear to match the requirements of these positions. (5 points)

Note: If the grant project manager or other member of the professional staff is to be hired later as part of the grant, or should there be any change in professional staff during the grant period, hiring is subject to review and approval by OSC at that time.

4. Previous Experience (20 points)

The proposals will be evaluated on the degree to which the applicant demonstrates that it has successfully carried out programs or work of a similar nature in the past.

Eligible Applicants

This grant competition is open to nonprofit organizations that serve potential victims of discrimination and/or employers. Applications will not be accepted from individuals or public entities, including state and local government agencies, and public educational institutions.

Grant Period and Award Amount

It is anticipated that several grants will be awarded and will range in size from $50,000 to $150,000.

During evaluation, the panel will closely examine those proposals that guarantee maximum exposure and penetration in the employer or potential victims target populations. Thus, a campaign designed to reach a very large proportion of employers (or potential victims) in the state of Texas would take precedence over a campaign designed to reach a more limited number of

employers (or potential victims) nationwide.

Publication of this announcement does not require OSC to award any specific number of grants, to obligate the entire amount of funds available, or to obligate any part thereof. The period of performance will be twelve months from the date of the grant award. Those grantees who successfully achieve their goals may be considered for supplementary funding for a second year based on the availability of funds.

Application Deadline

All applications must be received by 6:00 p.m. EDT, May 9, 1996 at the Office of Special Counsel for Immigration Related Unfair Employment Practices, 1425 New York Ave., N.W., Suite 9000, P.O. Box 27728, Washington, DC 20038–7728. Applications submitted via facsimile machine will not be accepted or considered.

Application Requirements

Applicants should submit an original and two (2) copies of their completed proposal by the deadline established above. All submissions must contain the following items in the order listed below:

1. A completed and signed Application for Federal Assistance (Standard Form 424) and Budget Information (Standard Form 424A).

2. OJP Form 4061/6 (Certification Regarding Lobbying; Department, Suspension and Other Responsibility Matters; and Drug-Free Workplace Requirements).

3. An abstract of the full proposal, not to exceed one page.

4. A program narrative of not more than fifteen (15) double-spaced typed pages which include the following:

a. A clear statement describing the approach and strategy to be utilized to complete the tasks identified in the program description;

b. A clear statement of the proposed goals and objectives, including a listing of the major events, activities, products and timetables for completion;

c. The proposed staffing plan (NOTE: If the grant project manager or other professional staff member is to be hired later as part of the grant, or should there be a change in professional staff during the grant period, hiring is subject to review and approval by OSC at that time); and

d. Description of how the project will be evaluated.

5. A proposed budget outlining all direct and indirect costs for personnel, fringe benefits, travel, equipment, supplies, subcontracts, and a short narrative justification of each budgeted line item cost. If an indirect cost rate is used in the budget, then a copy of a current fully executed agreement between the applicant and the Federal cognizant agency must accompany the budget.

Note: Program budgets must include the travel, lodging and other expenses necessary for at least one, but not more than two, program staff members to attend the mandatory OSC grantee training (2 days) held in Washington, D.C. at the beginning of the grant period (late Autumn).

6. Copies of resumes for the professional staff proposed in the budget.

7. Detailed technical materials that support or supplement the description of the proposed effort should be included in the appendix.

In order to facilitate handling, please do not use covers, binders or tabs.

Application forms may be obtained by writing or telephoning: Office of Special Counsel for Immigration Related Unfair Employment Practices, 1425 New York Ave., N.W., Suite 9000, P.O. Box 27728, Washington, DC 20038–7728. Tel. (202) 616–5594, or (202) 616–5525 (TDD for the hearing impaired).

Approved: Dated: March 20, 1996.

James S. Angus,

Acting Special Counsel, Office of Special Counsel for Immigration Related Unfair Employment Practices.

BILLING CODE 4410–01–M

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and NAFTA Transitional Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended, the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA–W) issued during the period of March, 1996.

In order for an affirmative determination to be made and a certification of eligibility to apply for worker adjustment assistance to be issued, each of the group eligibility requirements of Section 222 of the Act must be met.

(1) That a significant number of proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated,

(2) that sales or production, or both, of the firm or subdivision have decreased absolutely, and

(3) that increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have contributed importantly to the separations, or threat thereof, and to the absolute decline in sales or production.

Negative Determinations for Worker Adjustment Assistance

In each of the following cases the investigation revealed that criterion (3) has not been met. A survey of customers indicated that increased imports did not contribute importantly to worker separations at the firm.

TA–W31,901; Anchor Glass Container, Cliffwood, NJ
TA–W31,826; Lantz Lenses, Inc., St. Cloud, MN
TA–W31,957; Textron, Inc., Textron Lycoming Div., Williamsport, PA
TA–W32,021; Spartan Printing Co., Sparta, IL

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

TA–W31,898; Tandy Electronics Design (TED), Ft Worth, TX
TA–W31,894; Inland Container Corp., Macon, GA

Increased imports did not contribute importantly to worker separations at the firm.

TA–W31,760; Windsor Textile Processing, Inc., Newburgh, NY
TA–W31,925; Grow Group., Inc., New York, NY

The workers firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA–W31,765; EIS Brake Parts, Div. of Standard Motor Products, Inc., Rural Retreat, VA

The investigations revealed that criterion (2) and (3) have not been met. Sales or production did not decline during the relevant period as required for certification. Increases of imports of articles like or directly competitive with articles produced by the firm or appropriate subdivision have not contributed importantly to the separations or threat thereof, and the absolute decline in sales or production.

TA–W31,833; Young Stuff Apparel Group, Inc., New York, NY

The investigation revealed that criterion (1) & criterion (2) have not been met. A significant number or proportion of the workers did not become totally or partially separated as required for certification. Sales or production did not decline during the relevant period as required for certification.

Affirmative Determination for Worker Adjustment Assistance

The following certifications have been issued; the date following the company name & location for each determination references the impact date for all workers for such determination.

TA–W31,923; Sanfatex, Inc., Red Springs, NC: January 26, 1995.
TA–W31,946; J & J Lingerie Co., Glen Falls, NY: February 6, 1995.
TA–W31,882; American Contract Sewing Corp., Eufaula, OK: January 2, 1995.
TA–W31,885; Warnaco, Warner's Div., Sylvania, GA: January 3, 1995.
TA–W31,974; Krone, Inc., Englewood CO: February 16, 1995.
TA–W31,832; Spring Town Knitwear, Inc., AKA Spring City Knitting, Carterville, GA
TA–W31,862; TA–W–31.887; Healthtex, Inc., Warrenton, GA and Luverne, AL: January 18, 1995
TA–W31,977; Omak Wood Products, Inc., Omak, WA February 8, 1995.
TA–W31,989; Oneita Industries, Inc., Andrews Sewing Plant, Andrews, SC: February 26, 1995.
TA–W31,861; W.E. Stephens Manufacturing Co., Inc., Pulaski, TN: January 19, 1995.
TA–W31,859; Standard Textile Contractor, Inc., Knoxville, TN: January 19, 1995.
TA–W31,788; Martin Blouse Co., Inc., Shenandoah, PA: December 20, 1994.
TA–W31,944; Eaton Corp., Forge Div., Marion, OH: January 31, 1995
TA–W31,786; Lauderdale Mills, Lauderdale, MS: December 12, 1994.
TA–W31,771; Buster Brown Apparel, Inc., Lafayette, GA: December 29, 1994.
TA–W31,777; Communications & Power Industries (CPI)—Eimac Div. (Formerly Varian), Salt Lake City, UT: December 12, 1994.
TA–W–31,920; Doranco, Inc., Attleboro Falls, MA: January 31, 1995.
TA–W–31,840; Tektronix, Inc., CRT Operation, Beaverton, OR: January 9, 1995.
TA–W–31,866; Hughes/JVC Technoligy Corp., Carlsbad, CA: December 15, 1994.
TA–W–31,930; Quality Stitching, Inc., Seluda Plant, Saluda, SC: February 1, 1995.
TA–W–31,852; Anne Rashel Sportswear, Inc., Albany, KY: January 26, 1995.
TA–W–31,693; Pent-House Sales, Franklin, MA: January 24, 1995.
TA–W–31,854; Tri-Lakes, Ltd, Houston, MS: January 15, 1995.
TA–W–31,772, TA–W–31, 773; Buster Brown Apparel, Inc., Ider, AL and Marion, VA: December 18, 1994.
TA–W–31,970; Henry I. Siegel Co., Inc., Hohenwald, TN: February 5, 1995.
TA–W–31,972; US JVC Corp., Manufacturing Co., Elmwood Park, NJ: February 13, 1995.
TA–W–31,961; American Meters Co., Erie, PA: February 16, 1995.
TA–W–31,978; Philips Consumer Electronics Co., Arden, NC: February 6, 1995.

Also, pursuant to Title V of the North American Free Trade Agreement Implementation Act (P.L. 103–182) concerning transitional adjustment assistance hereinafter called (NAFTA–TAA) and in accordance with Section 250(a) Subchapter D, Chapter 2, Title II, of the Trade Act as amended, the Department of Labor presents summaries of determinations regarding eligibility to apply for NAFTA–TAA issued during the month of March, 1996.

In order for an affirmative determination to be made and a certification of eligibility to apply for NAFTA–TAA the following group eligibility requirements of Section 250 of the Trade Act must be met:

(1) that a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, (including workers in any agricultural firm or appropriate subdivision thereof) have become totally or partially separated from employment and either—

(2) that sales or production, or both, of such firm or subdivision have decreased absolutely,

(3) that imports from Mexico or Canada of articles like or directly competitive with articles produced by such firm or subdivision have increased, and that the increases in imports contributed importantly to such workers' separations or threat of separation and to the decline in sales or production of such firm or subdivision; or

(4) that there has been a shift in production by such workers' firm or subdivision to Mexico or Canada of articles like or directly competitive with articles which are produced by the firm or subdivision.

Negative Determinations NAFTA–TAA

In each of the following cases the investigation revealed that criteria (3) and (4) were not met. Imports from Canada or Mexico did not contribute importantly to workers' separations. There was no shift in production from the subject firm to Canada or Mexico during the relevant period.

NAFTA–TAA–00826; Textron, Inc., Textron Lycoming Div., Williamsport, PA
NAFTA–TAA–00791; Spartan Printing Co., Sparta, IL
NAFTA–TAA–00807; Inland Container Corp., Macon, GA
NAFTA–TAA–00788; Imperial Metal and Chemical Co., Philadelphia, PA
NAFTA–TAA–00796; Pent-House Sales Corp., Franklin, MA
NAFTA–TAA–00808; Quality Stitching, Inc., Saluda Plant, Saluda, SC
NAFTA–TAA–00814; Howard Manufacturing Co., Kent, WA
NAFTA–TAA–00737; Anchor Glass Container, Cliffwood, NJ
NAFTA–TAA–00824; Wotco, Inc., Mils, WY
NAFTA–TAA–00795; Christian Brothers Logging, Inc., Cascade, ID
NAFTA–TAA–00840; Hill Co., Inc., Fort Smith AR

In the following cases, the investigation revealed that the criteria for eligibility have not been met for the reasons specified.

NAFTA–TAA–00815; Smith's Home Furnishings, Bellingham, WA
NAFTA–TAA–00785; Burlington Industries, Inc., Burlington Menswear Div., New York, NY
NAFTA–TAA–00822; Watson Agency, Inc., Coeur D'Alene, ID

The investigation revealed that the workers of the subject firm did not produce an article with in the meaning of Section 250(a) of the Trade Act, as amended.

Affirmative Determinations NAFTA–TAA

The following certifications have been issued; the date following the company name & location for each determination references the impact date for all workers for such determination.

NAFTA–TAA–00806; Blue Mesa Forest Products, Inc., Montrose, CO: January 31, 1995.
NAFTA–TAA–00752 & A; Lasevilla Fashions, Inc., Mangham Plant, Mangham, LA & Laundry Div., Columbia, LA: January 12, 1995.
NAFTA–TAA–00793 & A, B; W.E. Stephens Manufacturing Co., Inc., Pulaski, TN, Nashville, TN & Cadiz, KY: January 19, 1995.
NAFTA–TAA–00819; Thomas & Betts Corp., Electrical Dept., Montgomeryville, PA: February 8, 1995.
NAFTA–TAA–00797; Phillips Consumer Electronics Co., Arden, NC: January 30, 1995.

NAFTA–TAA–00790; WTD Industries, Inc., Morton Forest Products, Morton, WA: January 26, 1995.
NAFTA–TAA–00833; Mission Packaging, Inc., Tigard, OR: February 12, 1995.
NAFTA–TAA–00842; Krone, Inc., Englewood, CO: February 20, 1995.
NAFTA–TAA–00856; Oneita Industries, Inc., Andrews Sewing Plant, Andrews, SC: Feburary 19, 1995.
NAFTA–TAA–00784; Standard Textile Contractors, Inc., Knoxville, TN
NAFTA–TAA–00805; PMI Food Equipment Group, Plants 11 & 12, Troy, OH: January 30, 1995.
NAFTA–TAA–00817; Alphabet, Div of Stoneridge, Inc., Nappanee, IN: February 5, 1995.
NAFTA–TAA–00803; Union Special Corp., Huntley, IL: January 4, 1995.
NAFTA–TAA–00799; Warnaco, Warner's Div., Sylvania, GA: January 29, 1995.
NAFTA–TAA–00778; M.B.C.A. Manufacturing, Inc., El Paso, TX: January 17, 1995.

I hereby certify that the aforementioned determinations were issued during the month of March 1996. Copies of these determinations are available for inspection in Room C–4318, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC. 20210 during normal business hours or will be mailed to persons who write to the above address.

Dated: March 14, 1996.

Russell Kile,

Acting Program Manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have bee filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Program Manager of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Program Manager, Office of Trade Adjustment Assistance, at the address show below, not later than April 4, 1996.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Program Manager, Office of Trade Adjustment Assistance, at the address shown below, not later than April 4, 1996.

The petitions filed in this case are available for inspection at the Office of the Program Manager, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 11th day of March, 1996.

Russell Kile,

Acting Program Manager, Policy & Reemployment Services, Office of Trade Adjustment Assistance.

APPENDIX

[Petitions instituted on 03/11/96]

Alcoa Fujikura Ltd., Alcoa Fujikura Ltd. West, a/k/a Electro-Wire Products, a/k/a Circuit Assembly Services, Inc. (C.A.S.I.), El Paso, Texas; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on February 27, 1996, applicable to all workers of Aloca Fujikura Ltd., Alcoa Fujikura Ltd. West located in El Paso, Texas. The notice will soon be published in the **Federal Register**.

At the request of the company, the Department reviewed the certification for workers of the subject. The workers produce wire harnesses. The company reports that some of the workers separated from employment had their unemployment insurance (UI) taxes paid to the former company names Electro-Wire Products or Circuit Assembly Services, Inc. (C.A.S.I.). The Department is amending the certification to include these workers. The intent of the Department's certification is to include all workers of the subject firm adversely affected by increased imports.

The amended notice applicable to TA–W–31,711 is hereby issued as follows:

All workers of Alcoa Fujikura Ltd., Alcoa Fujikura Ltd. West, a/k/a Electro-Wire Products, a/k/a Circuit Assembly Services, Inc. (C.A.S.I.), El Paso, Texas, engaged in employment related to the production of wire harnesses who became totally or partially separated from employment on or after November 20, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974.

Signed at Washington, DC this 14th day of March 1996.

Russell T. Kile,

Acting Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[TA–W–31,500 South Boston, Virginia and TA–W–31,500A Pisgah, Alabama]

Andover Togs, Incorporated; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on October 18, 1995, applicable to all workers of Andover Togs, Incorporated located in South Boston, Virginia. The notice was published in the **Federal Register** on November 9, 1995 (60 FR 56619).

At the request of petitioners, the Department reviewed the certification for workers of the subject firm. New information provided by the company shows that the subject firms' Pisgah, Alabama production facility closed February 12, 1996. All workers have been separated. The workers were engaged in the production of children's apparel.

The intent of the Department's certification is to include all workers of the subject firm who were adversely affected by increased imports of apparel. Accordingly, the Department is amending the certification to cover the workers of Andover Togs, Incorporated, Pisgah, Alabama.

The amended notice applicable to TA–W–31,500 is hereby issued as follows:

"All workers of Andover Togs, Incorporated, South Boston, Virginia (TA–W–31,500), and Pisgah, Alabama (TA–W–31–500A) engaged in employment related to the production of children's apparel who became totally or partially separated from employment on or after September 15, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, DC this 7th day of March 1996.

Russell T. Kile,

Acting Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

Andover Togs, Incorporated, Pisgah, Alabama; Notice of Termination of Investigation

Pursuant to Section 221 of the Trade Act of 1974, an investigation was initiated on February 26, 1996 in response to a worker petition which was filed January 26, 1996 on behalf of workers at Andover Togs, Incorporated, Pisgah, Alabama (TA–W–31,941).

The petitioning group of workers are covered under an existing Trade Adjustment Assistance certification (TA–W–31,500A). Consequently, further investigation in this case would service no purpose, and the investigation has been terminated.

Signed at Washington, DC, this 4th day of March 1996.

Russell T. Kile,

BILLING CODE 4510–30–M

Investigations Regarding Certifications of Eligibility To Apply for Worker Adjustment Assistance

Petitions have been filed with the Secretary of labor under Section 221(a) of the Trade Act of 1974 ("the Act") and are identified in the Appendix to this notice. Upon receipt of these petitions, the Program Manager of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the Program Manager, Office of Trade Adjustment Assistance, at the address shown below, not later than April 4, 1996.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Program Manager, Office of Trade Adjustment Assistance, at the address shown below, not later than April 4, 1996.

The petitions filed in this case are available for inspection at the Office of the Program Manager, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210.

Signed at Washington, DC this 4th day of March, 1996.

Russell Kile,

Acting Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[TA–W–31,359 Milwaukie, Oregon and TA–W–31,359A Portland, Oregon]

Pendleton Woolen Mills, Inc.; Amended Certification Regarding Eligibility to Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974 (19 USC 2273) the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on September 13, 1995, applicable to workers at Pendleton Woolen Mills, Inc., Milwaukie, Oregon, engaged in employment related to the production of women's blouses. The certification was amended on October 25, 1995 to expand coverage to all workers of the subject firm. The amended notice was published in the **Federal Register** on November 7, 1995 (60 FR 56174).

At the request of the union, the Department reviewed the certification for workers of the subject firm. New findings show that worker separations have occurred at the subject firm's production facility in Portland, Oregon. The workers produce a variety of men's and women's apparel, including ladies' blazers and men's jackets. The articles manufactured by the subject firm have been impacted importantly by the high import penetration ratio of these articles in the domestic market place.

The ratio of U.S. imports to domestic shipments of women's, girl's, men's and boys' coats and jackets was over 200 percent in 1993, 1994 and 1995.

The intent of the Department's certification is to include all workers of Pendleton Woolen Mills adversely affected by imports of apparel. Accordingly, the Department is amending the certification to cover the workers of the subject firm in Portland, Oregon.

The amended notice applicable to TA–W–31,359 is hereby issued as follows:

"All workers of Pendleton Woolen Mills, Inc., Milwaukie, Oregon (TA–W–31,359) and Portland, Oregon (TA–W–31,359A) who became totally or partially separated from employment on or after August 9, 1994 are eligible to apply for adjustment assistance under Section 223 of the Trade Act of 1974."

Signed at Washington, D.C. this 13th day of March 1996.

Russel T. Kile,

Acting Program manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

BILLING CODE 4510–30–M

[TA–W–31,537]

The SERO Company, Inc. Cordele, Georgia; Notice of Negative Determination Regarding Application for Reconsideration

By an application dated February 9, 1996, former workers of the subject firm requested administrative reconsideration of the Department's negative determination regarding worker eligibility to apply for trade adjustment assistance. The denial notice was signed on January 24, 1996 and published in the **Federal Register** on February 6, 1996 (61 FR 4486).

Pursuant to 29 CFR 90.18(c) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous;

(2) if it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) if in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The former workers of The Sero Company Inc. requesting reconsideration claim that the major customer of the subject firm has given its contract to an overseas manufacturing company. Also, petitioners claim Sero expanded its company in the Dominican Republic because it was more economical for them to produce there. Additionally, the petitioners claim that workers were also producing men's sport shirts.

Findings of the investigation show that workers of the subject firm performed contract sewing work on men's dress shirts. Sero now cuts a reduced level of its own dress shirts in Cordele but sewing work is contracted out to another domestic firm.

Company officials report an insignificant amount of production of men's sports shirts in 1995 at Cordele. All production of that product has been transferred to an affiliated plant in the Dominican Republic. Since the predominant portion of the sewing operations encompassed men's dress shirts, the shift in production of men's sports shirts to a foreign facility would not form the basis for worker certification.

Finding show that the contract sewing work at the Cordele plant, was for a single customer. The Department surveyed the customer regarding its contract work and imports of men's dress shirts. The customer reported that foreign contract work declined in 1995 compared with 1994 and finished shirts were not imported. The customer reports that contract sewing work previously performed by Sero was awarded to another domestic facility.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of

Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, D.C. this 12th day of March 1996.

Russell T. Kile,

Acting Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

[FR Doc. 96–7120 Filed 3–22–96; 8:45 am]

BILLING CODE 4510–30–M

[TA–W–31,522]

Transco Energy Corporation Including Transcontinental Gas Pipe Line Corporation and Transco Gas Marketing Company Houston, Texas; Notice of Negative Determination Regarding Application for Reconsideration

By applications dated February 6 and February 8, 1996, former workers of the subject firm requested administrative reconsideration of the Department's negative determination regarding worker eligibility to apply for trade adjustment assistance. The denial notice was signed on December 6, 1995 and published in the **Federal Register** on January 26, 1996 (61 FR 2573).

Pursuant to 29 CFR 90.18(C) reconsideration may be granted under the following circumstances:

(1) If it appears on the basis of facts not previously considered that the determination complained of was erroneous:

(2) if it appears that the determination complained of was based on a mistake in the determination of facts not previously considered; or

(3) if in the opinion of the Certifying Officer, a misinterpretation of facts or of the law justified reconsideration of the decision.

The requests for reconsideration by the former workers of Transcontinental Gas Pipe Line Corporation (TGPL) and Transco Gas Marketing Company (TGMC) claim that Transco has produced products that constitute articles within the meaning of the Trade Act. Workers also claim that the Department's decision focussed too narrowly on products that it currently produces.

Findings of the investigation show that workers of the subject firm are engaged in employment related to natural gas services, which include purchasing, transport and marketing of natural gas.

In an earlier TAA determination for workers at Transco Energy Company (TA–W–27,462), the company was engaged in the production of exploration of crude oil and natural gas. Workers were issued a certification of eligibility to apply for TAA because all criteria of the Trade Act were met. At the time the service employees were included in the certification because they were engaged in employment related to the exploration and production of crude oil and natural gas. In the same investigation, workers at TGPL were denied eligibility for TAA because criterion (2) of the Trade Act was not met. Revenues increased during the time period relevant to the investigation.

The findings of this investigation show that the reduction in employment at Transcontinental Gas Pipe Line was due to a reorganization as a result of Transco's acquisition by another company. Other findings show that Transco Gas Marketing Company was transferred to another domestic location. Neither action would form the basis for a certification.

In order to be certified eligible for TAA, workers of TGPL and TGMC would have to be engaged in the exploration or drilling for natural gas. Worker groups performing a service, including the transmission of natural gas, can be certified only if their separation was caused importantly by a reduced demand for services from a parent firm, a firm otherwise related to the subject firm by ownership, or a firm related by control.

The worker adjustment assistance program was not intended to provide TAA to workers who are in some way related to import competition but only for those workers who produce an articles and are adversely affected by increased imports of like or directly competitive articles which contributed importantly to sales or production and employment declines at the workers' firm.

Conclusion

After review of the application and investigative findings, I conclude that there has been no error or misinterpretation of the law or of the facts which would justify reconsideration of the Department of Labor's prior decision. Accordingly, the application is denied.

Signed at Washington, DC this 5th day of March 1996.

Russell T. Kile,

Acting Program Manager, Policy and Reemployment Services, Office of Trade Adjustment Assistance.

Alcoa Fujikura Ltd., Alcoa Fujikura Ltd. West a/k/a Electro-Wire Products, a/k/a Circuit Assembly Services, Inc. (C.A.S.I.) El Paso, Texas; Amendment Certification Regarding Eligibility to Apply for NAFTA Transitional Adjustment Assistance

In accordance with Section 250(a), Subchapter D, Chapter 2, Title II, of the Trade Act of 1974, as amended (19 USC 2273), the Department of Labor issued a Certification for NAFTA Transitional Adjustment Assistance on February 27, 1996, applicable to all workers of Alcoa Fujikura Ltd, Alcoa Fujikura Ltd. West location in El Paso, Texas. The notice will soon be published in the **Federal Register**.

At the request of the company, the Department reviewed the certification for workers of the subject firm. The workers produce wire harnesses for the automotive industry. The company reports that some of the workers separated from employment had their unemployment insurance (UI) taxes paid to the former company names Electro-Wire Products or Circuit Assembly Services, Inc. (C.A.S.I.). Accordingly, the Department is amending the certification to reflect this matter. The intent of the Department's certification is to include all workers of the subject firm adversely affected by increased imports.

The amended notice applicable to NAFTA–00712 is hereby issued as follows:

"All workers of Alcoa Fujikura Ltd., Alcoa Fujikura Ltd. West, a/k/a Electro-Wire Products, a/k/a Circuit Assembly Services, Inc. (C.A.S.I.), El Paso, Texas, engaged in employment related to the production wire harnesses who became totally or partially separated from employment on or after November 20, 1994 are eligible to apply for NAFTA–TAA under Section 250 of the Trade Act of 1974."

Signed at Washington, D.C. this 14th day of March 1996.

Russell T. Kile,
